Things the fish might possibly come ashore to rid it-part of Madras gossips and scandal-mongers;

> A friend has sent the Editor of Public Opinion an extract from a letter written by a high official in North Nigeria, thinking it might interest his readers, especially those who are not aware that cannibalism still exists on British soil, to wit, in the Protectorate of Northern Nigeria, in Western

"The following tale may interest you. It has the peculiarity of being perfectly true. Before our Government took over Nigeria, some attempt to govern and administer justice, on an English basis, was made by the Royal Niger Company. The condition of the country twelve or fifteen years ago may well be imagined, when even now in many parts of the Protectorate there are swarms of cannibals, who have never seen a white man. To continue, information of the death of one of the chiefs in the delta reached the district commissioner of that neighbourhood. of the death of one of the Chiefs in the delta reached the district commissioner of that neighbourhood, who immediately sent a subordinate to inquire into the matter and summon a jury—in fact, to act as coroner, according to the terms of the local Proclamation. The newly appointed coroner, fired with zeal, and anxious to act in strict accordance with the laughter. Marquis Ito:—How about yourself?] I, why of course I also take the credit.
But everything moves with the times. The
elder Saigo's proposal to attack Korea was
in itself a small matter. It would have cost
little and it gave him little concern. The
bogey perpetually present with him, night
and day, was Russia. And now that big,
formidable Russia is standing in the lists with
us and is getting beaten wherever we find

They said, "No, we want our dinner now." I explained that they were to make up their minds before I let them go. They said they could not and did not want to, but wanted their dinner. I then locked them up, and said I would not let them out until they had decided how the deceased chief met his death. I then went to lunch. On any return, I found that they jury had eaten the deceased. Kindly send instructions for my next step, as the Proclamation does not seem to provide for this incident,"

The preliminaries for a second domestic loan of 100 million yen have been virtually arranged. A meeting of bankers, held subsequently to a conference at the resident of the Prime Minister, decided that the rate of issue should be 92 (the former loan was issued at 96), the interest 5 per cent., and the period 6 years.

American newspapers published the following press message on April 20th:—

Paris, April 19.
The Tokyo correspondent of the Matin says that "the active participation of the United States Minister (Lloyd C. Griscom) in the fetes given by the Japanese Association, being a flagrant contradiction of President Roosevelt's declarations, causes a belief that the ulterior intervention of the United States is probable."

The level-headed Public Ledger of Philadelphia replied to this wild scare in a short editorial article on April 22. It said :-

delphia replied to this wild scare in a short editorial article on April 22. It said:—

There has been some Russian criticism of our Minister to Japan, it being alleged that he has exhibited too great a personal interest in the success of the Perry Memorial Relief Fund, which grew out of the recent celebration at Tokyo of the fifteth anniversary of the signing of the Perry Treaty by the United States and Japan, and which originally opened that country to the trade and intercourse of the world. The Fund being the sequence of such a notable triumph of American diplomacy, and intended to render aid to the destitute families of Japaneses soldiers and sailors, it would be surprising, indeed, if so good an American as Minister Griscom should not show personal interest regarding it. It appeals to the sympathy of every patriotic, benevolent American, and it is distinctly honourable to him that in its appeals to his sympathy it has received his material support and encouragement. Minister Griscom has been long enough in the diphomatic service of his country to render it quite improbable that he would commit any act of discourtesy to any country with which we are at peace and on friendly terms. In all the several diplomatic positions he has held in the service of his country Minister Griscom has displayed sound judgment, good discretion and tactful observance of the international courtesies becoming his place. No doubt he would have exhibited not less interest in a similarly benevolent fund if it had been intended to assist destitute and suffering Russians as well as Japanese. The Russian criticism of his humanitarian zeal does not seem justified by the circumstances.

One of the finest excursions in Japan is undoubtedly that to Shoji by way of Tokyo, Hachoji and Otsuki, with the passage down troublesome near there, in spite of the presence the Fujikawa, for the routes abound in of General Ma and fifteen battalions of Chinese scenery of the finest and most varied character and at the Shoji Hotel visitors can depend upon first-class accommodation and the most intelligent and painstaking attention. With pleasant weather such as is reported from this truly favoured spot even a few days' sojourn should stimulate and brighten the most jaded faculties. The trip begins with the departure from Tokyo by first train which carries one as far as Otsuki, thence train is taken to Yoshida via Tamura (where the Suzukiya offers accommodation much above the average of Japanese inns). A three mile walk or jinrikisha ride from Yoshida takes one to Funatsu, whence Lake Kawaguchi is crossed by boat to Nagahama; the walk to Nishi-no-umi is one third of a

NEWS FROM THE FRONT.

(FROM A CORRESPONDENT.)

Shan-hai-kwan, 6th May, 1904. quiet at Newchwang. The excite-Affairs seem quiet at Newchwang. ment over the Russian proclamation of martial law at Yinkow railway station has subsided.

The Russian officer placed at the station to inspect passengers and their baggage does not make himself obnoxious, taking very little notice and before the Japanese get in; as there are said of people apparently. A passenger is generally just asked his name.

But in reality Russian influence is being quietly multer of lowedown francers there. Some of

But in reality Russian influence is being quietly and surely extended. Three pontoon bridges, made with junks, have been thrown across the Liao River near Tienchuantai; and 2,000 or 3,000

The men sent over are chiefly Cossacks and Circassians, and their patrols go down as far as Chen-chow. But the majority of the troops are kept more north, a camp of 300 or 400 men having been formed quite close to Kaopantze Junction, and the lines from there to Yinkow and to Shin-min-tun are being closely watched. sections of the railway; she is doing it quietly but none the less surely, and before long she will probably extend martial law to Kaopantze.

M. Pavloff passed through here on his way to

Peking two nights ago, and it is supposed that he has gone to try and make some arrangement with the Peking Government for Russian control of the railway down to Kaopantze. In fact a report appeared yesterday in one of the Tientsin papers that Russia had asked to be allowed to station troops temporarily at Shan-hai-kwan and to establish a depot for stores there:

Native papers previously had reports that the Russians were about to despatch troops, via Tientsin through neutral territory, to somewhere near Shan-hai-kwan, in order to be able to attack the Japanese in the rear when they land on this coast

on their way to Newchwang.

No smoke without fire, so there is probably some movement on foot. I imagine Russia quite means to have the railway under her control, first as far as Kaopantze, and later right down to Chenchow, or even outside the Great Wall at Shan-hai kwan. If she cannot secure what she wants diplomatically, she will just notify the Consuls, as she did before when proclaiming martial law west of the Liao at Yinkow station, that, finding it necessary, she has now extended martial law to Kaopantze. It would not astonish me to hear this had happened any day.

An excuse for the move can always be found in

the presence of the Hung-hu-tze, who are no doubt about in good numbers, and well armed. Reports from Chaoyang state that they are

regulars.

From all one can gather the Chinese are getting restive at the state of affairs, and it is doubtful if they will remain quiet much longer if Russia continues to excite them. A hostile movement might be made any day. It is reported from Peking that 70,000 troops have been ordered to be got ready with all speed, prepared for any eventuality. The garrisons towards the Great Wall are being strengthened, and an additional 4,000 troops have been ordered to the Shan-haikwan district.

General Ma has wired Peking that the Ruse have again ordered him to withdraw his soldiers from Chaoyang, at which place the inhabitants are said to be in rather a disturbed condition.

Without taking too serious a view of things, it is evident that the situation is strained; while

the walk to Nishi-no-umi is one third of a mile and there boat is again taken to Nemba which is only 3½ miles from Shoji—the whole journey from the capital being easily accomplished in one day.

He walk to Nishi-no-umi is one third of a most people here think there is no immediate fear of a general rising of the Chinese against foreigners, it is felt that the Chinese troops might any day make a demonstration against Russia,—which is what Russia is said to want. The Chinese are negatively for delign the want when the control of the chinese against foreigners, it is felt that the Chinese against forei Mr. C. Fujikawa, proprietor of the Himeji see are proverbial for doing the wrong thing at the wrong moment, and the efforts of the Japan-of having obtained money by menace and fraud.

The Russians evidently expect the Japanese to land somewhere on the coast, so as to approach Newchwang from the west as well as from the east, but latest advices from Newchwang show that the Russians evidently feel that they will be unable to hold the place, and are prepared to

number of low-down foreigners there. Some of these latter may be seen going up in the train

every day, and are there for no good purpose.

It is hoped, however, that the Chinese troops troops have crossed over and are patrolling the are ready to take train up to Yinkow at once, country carefully. There are Chinese reports of and to preserve order there and at Newchwang till all sorts of outrages committed by these troops, but these are not reliable, though the soldiers are no doubt foraging with a high hand.

The longer, inwever, that the Chinese troops are ready to take train up to Yinkow at once, and to preserve order there and at Newchwang till the Japanese arrive. It is possible that some but these are not reliable, though the soldiers are arrangement of this sort has been made between no doubt foraging with a high hand.

The longer, inwever, that the Chinese troops, and to preserve order there and at Newchwang till the Japanese arrive. It is possible that some but these are not reliable, though the soldiers are hardened to the preserve order there and at Newchwang till the Japanese arrive. It is possible that some but these are not reliable, though the soldiers are hardened to preserve order there and at Newchwang till all sorts of outrages committed by these troops, and to preserve order there and at Newchwang till all sorts of outrages.

THE JAPAN SOCIETY.

The annual dinner of members of the Japan The annual clinner of members of the Japan Society at present resident in this country, was held on Thursday evening in the Imperial Hotel, Tokyo, Sir Claude MacDonald, G.C.M.G., K.C.B., H.B.M.'s Minister, presiding. The company was the largest that has ever marked such an event, there being no fewer than 102 present. Superping the Chairman there were on the such an event, there being no lewer than 102 present. Supporting the Chairman there were, on the right, Baron Komura, Sir Archibald Edmonstone, Mr. K. Tsuzuki, Lieut. Col. Macpherson, Viscount Okabe, Viscount Nagaoka, Lieut.-Col. Haldane; and on the left, Marquis Nabeshima, Col. J. C. Hoad, Admiral J. Miyabara, Major Crawford, Mr. A Sato, Admiral Mukoyama and Capt. Robertson. A. Sato, Admiral Mukoyama and Capt. Robertson. Facing the Chairman were: Viscount Aoki, Baron D. Kikuchi, Lieut.-General Sir W. Nicholson, Mr. T. Kato and Mr. S. Chinda. The two vicechairs were occupied respectively by Mr. M. Zumoto, and Mr. D. Goh.

An interesting toast list was entered upon after dinner, and the proceedings were greatly enlivened by the music of the Imperial Household

Band.

The CHAIRMAN said: Your Excellencies and Gentlemen—I have the honour to propose the first toast to-night. It is one that will, I am sure, be received with the most unbounded enthusiasm by all present, not only by the loyal and devoted subjects of His Majesty, but I can personally answer for it with equal enthusiasm by all Britishers with hearing without the property of the who, having witnessed the patriotic devotion which has characterized the present war, are more than ever proud to call themselves the allies of Japan.

(Enthusiastic "Banzais.")
The Band: "Kimi-ga-Yo."

Viscount Aou: Your Excellencies and Gentlemen,—I have the honour to propose the health of His Majesty the King of the United Kingdom of Great Britain, Emperor of India, and the illustrious Allu, of our agents Soversion. the illustrious Ally of our august Sovereign.
(Hurrahs and "Banzais.")
The Band: "God Save the King."

Sir CLAUDE MACDONALD said he had been deputed to inform the company that a telegram had been despatched to and one had been received from the London Japan Society each conveying the greeting "Banzai." He had another pleasant duty to perform before sitting down and that was to read to them a letter from Baron d'Anethan, who was, as they knew, the Doyen of the Diplomatic Corps and was also an enthusiastic member of the Japan Society. The letter was as

My dear Sir Claude,—I am very sorry I am unable to attend the Japan Society's dinner and I much regret not to have this opportunity of meeting my fellow members, amongst whom I have so many friends in Japan and England.

I would be much obliged if you would kindly express my best wishes for the continued success and prosperity of the Society, which has done so much to promote and maintain sentiments of friendship and symbathy between Japan and other countries.

sympathy between Japan and other countries. Believe me, dear colleague, yours very sincerely, d'Anéthan. Legation de Bélgique, Tokyo, May 12th, 1904. The reading of the letter evoked applause. Lieut.-General Sir W. Nicholson said: Sir

Claude, Your Excellencies and Gentlemen I esteem it a great honour to be called upon to propose the toast of the Imperial Armies and Navy of Japan. To one who, like myself is unversed in public speaking it is a great relief to feel that the task allotted is such a short and simple one, for deeds are much more convincing than words and the splendid deeds of the Imperial naval and military forces of his Majesty, with which you and I and the whole world are well acquainted, speak more eloquently of themselves than the tongue of a Demosthenes or a Cicero. For me to attempt to use fitting terms would be as superfluous and as preposterous as to endeavour to paint the lily or gild refined gold. (Applause) Gentlemen, of late years the Japanese have been called an imitative nation, but they have followed the Christian precept to "try all things and hold fast that which is good." (Laughter and hold fast that which is good." (Laughter and applause). They have instructed their representatives in all countries to observe the progress of science and to study the development of modern strategy and tactics. They have assimilated all that is best and most desirable in the naval and military systems of the European Powers. But such imitation and such assimilation would be of but little value had the Japanese nation failed to retain the heroic spirit and the self-sacrifice which animated their ancestors, and had the influence of western civilization weakened the loyalty, patriotism and devotion to duty which have been so strongly exemplified during the present war. (Applause). We of the Anglo-Saxon race may perhaps reflect that in former years the Japanese nation learned something from us, but at present, if we act wisely, we shall, I think, return the compliment by learning a good deal from the Japanese people. (Hear, hear, and applause). The strength of a nation depends not only on its wealth and its material resources, on the number of its ships and troops and guns, but on the foresight of its statesmen, the unity of purpose of its people, the careful preparation and compilation of all the means available to attain the desired object and upon the organization, training and devotion to duty of all ranks among its sailors and soldiers. (Applause). In those respects I do loyalty, patriotism and devotion to duty which soldiers. soldiers. (Applause). In those respects I do not think the Japanese have much to learn; in fact they may justly claim to be the instructors rather than the instructed, to be the original rather than the eopy. (Applause). And in making these remarks I may say that I am speaking from what I hear and from what I read and not from what I have personally had the opportunity of seeing. But, speaking for myself and for the officers who are with me, and for our friends the

Admiral MIYABARA said: Your Excellencies and Gentlemen,—I was at the last moment called upon to make the response to this important toast, upon to make the response to this important toast, the Army and Navy of Japan. I am sorry to say that I am not a fit person to do so—and, besides, speech-making is altogether out of my line. There are many others who could perform the duty; an able Admiral and General were expected to be present and to do so, but, much to my regret, they are prevented by official occupation from attending, so that I have to stand up as a poor substitute. After the flattering speech that has been made, nothing remains for me to say except that so far both the Army and Navy have acted smartly and quite in a business-

part of civilization from Europe and the United States, and in general, I think, she has more or less succeeded. At any rate as to one part of it, namely, civilized engines of war, we have pretty well grasped it and its efficacy is now actually being proved. I must say that for the success of our navy great credit is due to Great Britain and to British experts. As to the wholesale importation of mechanical civilization many of us Japanese doubted (at least I did) as to the influence which it might have on what we call Yamato Damashii, which is a spirit inherent in the Japanese, and the theory of which is known to many members of the Society. If I recollect right-ly our friend Mr. Diosy, Vice-Chairman of the London Society, some years ago read a paper in London on *Yamato Damashii*. I am glad to learn from the present conflict that the combination of those and similar engines of war with the spirit of Yamato Damashii has been practically proved, and we may hope that by the proper application of them we may not have long to wait for the attainment of our ultimate aim, peace. Gentle-men, on behalf of the Army and Navy of Japan I wish to express our deepest thanks to this society I am quite young. It is therefore beyond company for the toast which has just been given by our gallant friend, General Nicholson, and it. I can say this, however, that it is a cosmowhich has been received so very enthusiastically

History, and Folk-lore; of Japanese Art, Science and Industries; of the Social Life and Economic and indistricts, of the Social Lie and Personnic Condition of the Japanese people, past and present, and of all Japanese matters;" that is to say, to make Japan and the Japanese really known and thoroughly understood in England,—I beg Sir Claude's pardon, in the British Empire—(Laughter and applause). This is an excellent object, for mutual knowledge begets mutual confidence between nations as between individuals, and ignorance of each other's traditions, history, customs feelings and ideals often causes misunderstand ings, which can be prevented by a fuller knowledge. Hence to obtain a thorough knowledge of each other is very desirable between nations, and especially is this important for a country like Japan, so long isolated, so little known hitherto to the rest of the world, and differing from it,

like manner, and have been fortunate enough to what we have been trying to do for the last forty gain success on each occasion. I may add one years or more with regard to Occidental civilisathing more—that for the last 30 years Japan has, tion, and I trust, we do know now something of tried to introduce what I may call the mechanical. Europe. That on the other hand, the British people have come to know and trust Japan well enough to conclude an alliance with us, and that we are daily coming closer still is, I believe, due in a very great degree to the work of this society in the advancement of that object (Applause). May it long continue to do this work. If there had been such a society in every capital in Europe perhaps to-day we should not hear so much about that absord cry of the "Yellow Peril" (Hear, hear). If there had been a society like this in St. Petersburg—(a voice: "No War!"). Exactly (Laughter and applause). I am very glad that the Society has been doing such good work, and I beg to propose its success and prosperity (Loud applause).

The toast was enthusiastically honoured.

Mr. K. SONODA said: Mr. Chairman, my lords and gentlemen, I rise on behalf of the members of the Japan Society as well as on my own behalf to offer you our most cordial thanks for the very flattering manner in which this toast has been proposed by Baron Kikuchi and re-ceived by you all. As you will observe I wear a good deal of gray hair but as a member of the politan association, and that it has worked hard and succeeded to a certain degree in making which has been received so very enthusiastically politan association, and that it has worked hard and with such warmth. (Applause).

Baron Kirucht was the next speaker. He said: Your Excellencies and Gentlemen,—It is my pleasant task to propose the toast of "The Japan Society." The object of the Society, as stated in its booklet, is "the Encouragement of the Study of the Japanese Language, Literature, moment. (Laughter). I am not at all sure History and Echlegae of Language, Literature, whether or not the society is in any way ware response. whether or not the society is in any way responsible for this deplorable state of affairs. On looking at the members' list to-day I failed to discover any Russian name on it. If the society had been fortunate enough to have a few Russian members I think things might have been different from what they are. (Hear, hear). However the milk is spilt and it is no use to grumble now. I do not know whether the world is getting wicked or enlightened. Anyhow in the present state of human society even the best of friends are apt to quarrel and it is a curious fact that after a fight they often become better friends than ever.
(Laughter and applause). I most sincerely hope that it will be the case with us and that peace omcers who are with me, and for our friends the press correspondents who are still languishing in Tokyo, I think I can say that with the kind permission of General Fukushima nothing would give us greater pleasure than to watch on the spot what we now admire from a distance. (Laughter and applause). In conclusion I will venture to express the hope that although we may deplore the necessity for war on account of the unavoidable suffering and loss of life which it entails, the events of the present conflict may tend to strengthen the bond of that mutual esteem and friendship which at present happily unite the Japanese and British Empires—(Applause)—of which one of the embodiments is the Japan Society of London, an embodiment which we, the guests this evening, have every reason to appreciate most highly. I ask you to join me in drinking to the imperial Admiral Miyabara said: Your Excellencies and Capital and may be very soon restored for our mutual adto use mathematical language, community of two nations occupying exactly antipodal positions interests is a necessary but not a sufficient condiand having two distinctly different colours of tion for an alliance of that nature. The people or skin, should have joined hand in hand, but it shows at least the influential section of the people of the that the inhabitants of the world are getting closer two nations must see not only that their interests and more intimate and that colours or skins have

the guests of the evening, and as I rise to do so I am reminded by Baron Kikuchi's remarks that this Society has considerably changed its character since we last sat down to eat our annual dinner. It was then an association of men who sought to bring Japan into the field of the world's observation by turning on her the light of their own erudite researches and sometimes, ngnt of their own endote researches and sometimes, perhaps, of their distinguished personality. It is now an association which may be well content itself to shine by the reflected light of Japan's visible brilliancy. It was then an association which sought to awaken the general interest in Japan by investigating her picturesque past. It is now an association which has simply statistically the best research and the best perhaps the simply services the best permanent and the simply services and the simply services are the simple services and the simply services are the services and the simply services are services and the simply services are services and the services are services are services are services and the services are ser to point to her great present and to the pro-spects of a still greater future opening before her. Many of those present this evening must find it a source of profound satisfaction that during the past quarter of a century they have never wavered in their faith in Japan's potentialities nor ever hesitated to give expression to that confidence although the proceeding was not always popular or fashionable. It must be now a source of profound satisfaction to them to observe the record she is making, and to observe that the autonomy she recovered some years ago in the sequel of long and patient efforts has never been abused by her to the disadvantage of the stranger within her gates, and that even now in the hour of her signal self-assertion she has never shown herself more friendly or more hospitable to her foreign visitors .- (Applause). May I not in view of these facts truly say that she has completely justified her supporters and confounded her detractors? And may I not also say with the endorsement of all who have lived long in this country, that in no part of the world, not even in the very heart of Anglo-Saxondom, can there be found a people less disfigured by racial prejudice or religious bigotry than the Japanese? It is true that, as Baron Kikuchi says, there are some persons who see their account in making this country an object of obloquy, and who point the finger at her as the head and front of the Yellow Peril, whereas she is in reality the brave champion of ideals which Anglo-Saxons, the world over, regard with all veneration. If to struggle against the spread of a military despotism throughout East Asia; against the establishment of a monopoly excluding all countries but one from the field of Far Eastern commerce and industry against the aggressive disruption of neighbouring empires and against the national strangulation of Japan herself—if to struggle against these things is to be a Yellow Peril, then Japan is certainly the head and front of this Yellow Peril. I hope I have not spoken too strongly. It has been my have not spoken too strongly. It has been my desire to convey to our guests the sentiments which I believe to be those of my fellow-members. The Society deems itself greatly honoured by the presence of so many distinguished statesmen, officers, and gentlemen, and in asking you to cordially drink their health, I desire to couple with the toast the name of a statesman whom history will be sentimentally asked to the control of the control o tory will recognise as having contributed material-

making a speech, which always requires a serious effort on my part—and especially so on this occasion in view of the very eloquent speeches of the gentlemen who have preceded me. However, I feel it my duty to say a few words in appreciation of the honour conferred on me and in expression of my thanks for the very courteous remarks made by Capt. Brinkley in regard to Japan and to myself personally. Knowing as I do the great work of this society, and appreciating the value of its work in promoting the mutual knowledge of Japan and Great Britain and of their people and in securing mutual friendship between the two countries, it is instrument, a very willing one I admit, for carry fing out Great Britain's policy towards Japan,—rny earnest wish to see the value of its work more and more increase. When I conmaking a speech, which always requires a serious my expression of thanks, I am afraid I should very

will be a complete success. I always bear in mind the English maxim or proverb "Brevity is the soul of wit" and therefore I will not continue. But I cannot sit down without making one remark about a very important point. At the most critical moment of her history Japan appreciates the sympathy of the British people, appreciates the sympathy of the British people, because Japan knows the sympathy of that people is always on the side of the nation that exerts its strength in the cause of justice—(Applause)—and in the interests of all nations. (Renewed applause). I thank you most sincerely for the very cordial manner in which you have drunk the toast and I again express my best wishes for the continued prosperity and success of the society.—(Applause).

Mr. T. Kato said: The Committee has

assigned to me the pleasant task of giving the last but not the least important toast. Our dis-tinguished Chairman, Sir Claude MacDonald, resided amongst us now for several years and although opportunities of foreign represen-tatives coming into contact with the general public are unfortunately rather rare in this country, the condition of things being different in our Chairman's own land, still those who have had the good fortune to make his acquaintance all unite in testifying to his excellent qualities as a man and a diplomatist— (applause)—and it goes without saying that both (applaise)—and it goes without saying that both they and the public at large are of one mind, that in him Japan has a sincere friend. He came here towards the end of the year 1900, having just gone through the siege of Peking and having successfully commanded the defence of the Legation with a small force composed of different nationalities. The assistance witch he rendered to the Japanese contingent during the siege was very great, so great that the Emperor's commendation of his good and kind services would have assumed different shape if the rules of the service to which he belongs would have permitted. The siege must have been very trying to him and his charming lady, but to compensate for his sufferings and hardships he has had the great consolation of reading his obituary in that great paper, The Times. Of course this must be revised for he is still a young man as age goes in his country, and ing about the happy Albance which is so much appreciated by the Governments and the peoples of the two countries. Gentlemen, I am sure I express the sentiments of you all when I say that we hope Sir Claude may continue to live among us for many years to come and may always work as in the past for the promotion of the common good of the two allied Empires. Your Excellencies and gentlemen, I give you the toast of the Chairman.—(Loud applause).

tory will recognise as having contributed material. Your Excellencies and gentlemen, I give you the lay to the brilliant successes his country is now achieving, the name of His Excellency Baron Komura—(Loud Applause).

Baron Komura—it hank you for the honour of being present on this occasion. The pleasure I the all too fattering words of my friend Mr. being present on this occasion. The pleasure I Kato. If the depth of the gratitude which I feel feel, and feel very highly, would have been no doubt enhanced if I were spared the task of this toast were to be measured by the length of my expression of thanks. I am afraid I should very

cellencies and Gentlemen,—The pleasant duty sider the ability of the members both in Tokyo policy, me policy which early recognized that in the devolves on me of proposing the health of and in London I have no doubt that the society Far East a sum was not rising, but had risen, whose rays reflected forth all that was brave, and honourable and true.—(Applause.) No one can say who has studied the negotiations which preceded this war, or who has observed the manner in which it has been conducted by our nature in which it has been conducted by our allies, their reckless bravery, their gentle treatment of the enemy's wounded, and the honours paid to the dead,—no one can say that the words bravery, truth and honour are one whit too strong.—(Renewed applause.) Great Britain's policy, I repeat, not only recognized, but was the first to recognize, at any rate in a practical man-ner, the noble aspirations of the people of the Risen Sun, and this by taking the lead in the revision of their treaties and in an equally practical manner by concluding with them a solemn Alliance.—(Applause). The Anglo-Japanese Alliance was entered into in the earnest hope that it would make for peace. This hope, gentlemen, has not been fulfilled, but if by its means two friendly nations have been drawn into closer bonds of friendship, and if the horrors of war can be prevented spreading to other countries, the Anglo-Japanese Alliance will not have been made in vain.—(Loud and continued applause.)

The proceedings then terminated.

MEMORIAL DAY.

A meeting of American ladies was held on Saturday afternoon at the U.S. Naval Hospital to discuss arrangements for the observance of Memorial Day on May 30th. Mrs. E. C. Bellows Memorial Day on May 30th. Mrs. E. C. Bellows presided and among those present were Mesdames A. I. Bagnall, J. Strauss, E. H. R. Manley, and C. F. McWilliams, and Misses Loomis and Bagnall. Dr. Herndon, of the U.S. Naval Hospital, attended by invitation. It was stated by Dr. Herndon, in reply to the President, that in the Cemetery there were 125 graves of men that belonged to the American services and since the observance last year 25 headstones of granite or marble had been erected. Eighteen of the graves had previously been marked by wooden headboards only. viously been marked by wooden headboards only.
A Committee under the presidency of Mrs. E. V.
Thorn, and consisting also of the following ladies: Mesdames Bellows, Manley, Bagnall, McChesney, and Horne, and Miss Loomis, was for him. Since his arrival in Tokyo he has incessantly worked towards cementing the good relations between Japan and his country, and success has attended his efforts. I speak under correction of my friend, Baron Komura, whom we are glad to see here, when I say that I have heard, and possibly it is true, that Sir I have heard, and the heard have heard heard heard she thought it would be hardly necessary to appeal for funds this year as one item of last year's expense would probably be avoided. Instead of purchasing pot plants for the graves they would ask sympathisers who usually gave flowers to give either flowers or pot plants, and the placing of these on the graves would be attended to by men supplied by Dr. Herndon. The accounts, it was stated, showed a balance of yen 30.89. Dr. Herndon informed the meeting that he would send men to place flows on the American soldiers' and men to place flags on the American soldiers' and sailors' graves scattered throughout the Cemetery, some of which dated back to Commodore Perry's expedition. This was all the business.

THE PERRY MEMORIAL RELIEF FUND.

The following letter has been received by the Committee of the Perry Memorial Relief Fund:— To The Perry Memorial Relief Fund,

Tokyo.

Dear Sirs:—As a member of the Asiatic Society
I am requested by cable this day, to subscribe yen
one thousand (1.000) to your fund, by the NilesBement-Pond Company of New York City, Manufacturers of Machine Tools.

turers of Machine Tools.

I take pleasure in enclosing my cheque for the above sum, which shall be charged to the account of the firm mentioned herein.

Kindly acknowledge receipt of same in the name of the Niles-Bennent-Pond Company, whom I have the pleasure of representing in the Far East.

I am, Dear Sirs, respectfully yours,

F. W. HORNE,

Yokohama, May 14th, 1904.

THE RELIGIOUS BODIES IN JAPAN.

A conference of the religious bodies Japan was held in the Yayoi-kan, Shiba Park, on the afternoon of the 16th instant. About a thousand Japanese and foreigners were present, including a large number of missionaries. There were many speakers, but each was limited to a space of 20 minutes. Mr. Koraki insisted that Puri Mr. Kozaki insisted that Russia represents the ideals of the 16th century; Japan those of the 20th. Russia is for despotic government, for tradal protection, for the closed door and for restraints on conscience. Japan is for precisely the opposite. The present war has nothing whatever to do with differences of race or religion. It is simply to secure the peace of the East. Dr. Murakami insisted that however different religion and patriotism might be in their theoretical scope they are not separable in practice. He also held that war, though in itself indefensible, might be condoned as an instrument for ensuring subsequent peace. Mr. Ouchi, the representative of Buddhism, declared that the Japanese do not constitute the Yellow Peril The Mongols constitute it, and above all the Russians, who are Mongols. Napoleon had well said that a Russian has Napoleon nau wen said that a reason a white skin over a yellow heart. Japan has a vellow skin over a white heart. The has a yellow skin over a white heart. whole practice of Russia, her boundless aggressions, her despotism and her intolerance mark her as the true yellow peril of the era. As for religion, it is entirely unconnected with the war. Mr. Shibata, representing Shinto, said that the pity of Buddhism, charity of Christianity, and the ware about 65 Shinto are all one and the pure heart of Shinto are all one and the same thing under different names.

Dr. William Imbrie said :-It is thought advisable that I read a translation of the resolution already presented. I need not say that I do so with pleasure:

say that I do so with pleasure:

"The war now existing between Japan and Russia has for its object, on the part of Japan, the security of the empire and the permanent peace of the East. It is carried on in the interests of justice, humanity and the civilization of the world. With differences between races or religions it has nothing whatever to do. We, therefore, meeting together without distinction of race or religion, agree that we will endeavor publish to the world, each in a manner accordant with the methods observed in the religious body to which he belongs, the real purpose of the present war as now described. We also express a most earnest desire for the speedy accomplishment of an honourable peace."

One of the statements in the resolution which is presented to us for adoption is this: With differences of race or religion the war has nothing whatever to do. That this is true I am sure we all believe. But how may we prove it? What shall I say to the man who questions its truth?

In the years to come the student will read the story of the Era of Meiji; and he will find it to be a story bright with great achievements. But as he turns its pages he will find none brighter than the one that tells him how the Emperor gave to the nation his gift of the Constitution. In that Constitution there is embodied the priceless principle of civil and religious freedom. When therefore the questioner asks me whether or not this war is a war for the supremacy of race over race and religion over religion, I will point to the Consti-tution; which is the gift of the Emperor, which is the crown lewel of the nation, and which is sacred. And I will tell him too that a war for the security of the empire can not be one to trample on the Constitution.

That is a proof written on the sky; but there is also one written on the earth. Our meeting together here to-day, without distinction of race or religion, is in itself a proof. Some of us are Japanese and some are foreigners; different races. Some of us are Buddhists, some Shintoits, some Christians; different religions. If this war were war goes on the analogy seems to be completing it would rather signalize to England the right to war for the supremacy of race and religion, we itself with a strange exactness. Already Japan do, financially, the same for Japan. It would

pression of Buddhism, no Buddhist could be here ; if they were there for the suppression of Christi- It may be that there is still in store for her anity, no Christian. But what is true here in Thermopylae. And who can doubt that if Tokyo is also true of every city in the empire: needs be she will, without a word, have her there is no city in Japan where such a meeting as this might not be held; and if all Japan, east and this might not be held; and it all Japan, east and west, north and south, should meet in some great amphitheatre among the mountains, the same would still be true. No, the war is not one for the supremacy of race and religion. If it were, it would drive us all asunder? But it does not drive us asunder. It draws us all together. It binds us all together as men, as we have never been bound together before. bound together before.

What, then, is the object of the war? There are two objects.

First, the security of the empire. And is a war necessary for that? No one can look at the map and, remembering the course of Russia in recent years, answer No. It is just as certain that the course of Russia is a peril to Japan, as it is certain that when the dark shadow of the great world steals across the face of the moon, the silver moon will be eclipsed. The war is necessary for the security of the empire; and the security of the empire is the first and foremost object of the war.

The second object is the permanent peace of the East. And is that endangered also? To that question I have only to repeat what I have just said concerning the course of Russia. But there are some in other lands who tell us that when Japan says "For the permanent peace of the East," what she really means is this: That when the present war is ended, she will take to herself the place of leadership in China; stir up the anti-foreign spirit lurking there; and then set all the East in hostile array against the West. Is that true?

Standing in the present, I can not point to facts standing in the present, I can not point to facts that lie hidden in the future. That is impossible. But standing in the present I can recall the past; and the past of a nation, just as truly as that of a man, is an index of its purpose for the future. What then of the past? Only a few years ago all the world was troubled over China. For reasons that are now more evident than their world was troubled over than the property was the property of than they were then, no nation had so hard a place to fill as Japan. And how did she fill it? Can any one say that in all that trying time she was ever derelict in the performance of her duty?
Must not every one say that she was never
derelict? And who then has a right to insinuate that in the future Japan will be less enlightened, less broad minded, less honourable, less humane, less a friend of the civilization of the world, than she was in the day when her army marched to the relief of foreigners beleagured in Peking? No, when Japan says, "The permanent peace of the East," she does not mean the East in arms against the civilization of the world.

I have been speaking somewhat confidently; and with good reason, so I think. But I can say something more that makes my confidence still more confident. Recently I had the honour of an interview with Count Katsura. The subject of the conversation was precisely what is declared in the resolution which I have just read. He told me that the object of the war is the security of the empire and the permanent peace of the East; and that with differences of race or religion the war has nothing to do. Then he said," "What I say, I say not as an individual only; I say it as Prime Minister also." Then he added, "And in what I say I am speaking the mind of the Emperor." Therefore it is that I am

May I say one thing more? Something perhaps not directly connected with the purpose of this meeting; but something which I have had in mind ever since the war began. Ever since the war began I have been repeating to myself possible, but we have no right to presume such a the old familiar splendid story of little Greece of little Greece contending with, of little Greece victorious over, the vast empire of Persia. And against its Russian friends. A French loan to all for what? For the security of Greece and Russia does not necessarily after the friendly

could not meet thus together. If the armies of has had her Salamis. In the loyalty, the courage, Japan now in Manchuria were there for the sup- the discipline of her armies, there is abundant promise that she is to win her crown of Plataea. It may be that there is still in store for her needs be she will, without a word, have her Thermopylae. For she has myriads more of soldiers in her ranks like those who perished beneath the waters in the Sea of Japan, rather than surrender. And if Japan does have her Thermopylae, then the analogy will be com-plete. For then there will be written, on some mountain pass in Manchuria, the immortal words written on the rock at Thermopylae:—"Stranger, go tell Sparta that we lie here, obedient to Sparta's laws." And all for what? For the security of the empire and the permanent peace of the East.

> The Mayor of Tokyo, Mr. Ozaki, declared his entire accord with Mr. Kozaki's statements. The only part of the world where Japan adopted the policy of the closed door was at Port Arthur. He congratulated the meeting on the resolution passed. Baron Senge also delivered a congratulatory address, as did a representative of the Roman Catholic Faith. The Greek Church alone was not represented. The resolution was carried unanimously.

THIS AND THAT ABOUT RUSSIA.

(Translated for the Japan Mail from the Neues Wiener Tagblatt.)

The last Russian war against the Porte cost fourteen hundred million roubles. It is probable that the war against Japan will cost a much larger sum. In the Turkish war the Russian fleet took no active part. In the present war, though not playing the part which Russia's proud ambition expected, nevertheless it burdens her Treasury, partly because it remains inactive though con-suming money, and partly because the Japanese have eliminated it as a fighting factor, reducing it into a mere machine for the consumption of Russian money. The war on land will no doubt be much more expensive than the one against the Porte. The enormous distance, the necessity of a greater number of troops, the very expensive commissariat and clothing of the armies; the greater consumption of ammunition, &c., will make the bill come very high. It may be that this war will cost Russia several milliards. Where will this money come from? At first, no doubt, the cash in hand will suffice, but its consumption will mean a shock to Rushave to be found in the French money market.

Only the French? It is rather delicate to speak about these things. If one should venture to say that under certain circumstances. German money could be obtained for Russia, he would be in danger of playing with possibilities, of which it can be said with certainty that there is m yet not a shadow of reality in sight. The opening of the German money-market to Russia would be an event of such significance that it is best not to speak of it until facts are produced which will permit us to discuss it otherwise than as a theory. Up to this hour no such facts are at hand. True, during the first days after war at hand. True, during the first days after war broke out one could hear of different illusionaries who, quite uncalled for, felt the necessity of consulting Count Bülow, and then constructed a house of cards. It appeared in this shape:—Russia will agree to a favourable commercial treaty with Germany, and in return Germany will not alone observe friendly neutrality during the war, but will go one better and allow German capital in the form of a lean to flow into the capital, in the form of a loan, to flow into the Russian war-treasury. Of course, this might be

constitute itself an act of mutual international justice and in a sense would act as a neutralizer

justice and in a sense would act as a neutralizer.

The Russian press does not say very much about financial difficulties, neither those pending nor the greater ones that are sure to turn up. For the Russian press is now busy with an unusual occurrence, namely, that the Tsar received its representatives, accepted an address from them, and then addressed them very kindly. Yet, to be explicit not all the presses creak of this theory. explicit, not all the papers speak of this thorny subject, even the Novoye Vrenya is silent. But the Viedomosti, in St. Petersburg, refers to the subject. In reproducing its conclusions we follow the translation of Professor Schleimann as it appeared in the Kreuz Zeitung.

The Editor, Mr. Stolypin, refers to the words of the Tsar, that the press should tell the truth, and nothing but the truth. That is, he says, a command. But to tell the truth one must have the right and the means to do so publicly. In this respect we have so far been in a very trying position. Numerous restrictions burden the press and it is far from being free in the sense that it may speak the truth freely and fearlessly. Many a time have expressions been forbidden, not because they were not truth but because they were not in accord with the opinion of people who had the power to silence the press. For a long time the brightest minds have contended for the freedom of public expression. And if we must admit that they have accomplished much in this respect, yet it is by no means sufficient. To this hour the sad fact remains, which, without going too far, we must state,—we are not permitted to tell the truth. But now one great step forward has been made. All trueservants of the press have now an almighty ally, the clear and powerful word of the Tsar—a Tsar's command!

We cannot contradict Professor Schliemann in his scepticism concerning the meaning which Mr. Stolypin draws from the words of the Tsar, and in his concern as to the result in case Mr. Stolypin his concern as to the result in case Mr. Stolypin and his colleagues should endeavour to make a trial. Even quite recently the following papers have been punished for telling the truth: The Uraleta, suspended for three months; the Ingosopadny Krai, for six months; the Nedelya, for eight months, and the Yenissei for three months. This certainty does not look as though the higher press-bureau, the Ministry of the Interior, and the Holy Synod had withdrawn their loving care as to what the press may publish as "truth" and what it may not publish.

In connexion with the fire which occurred on In connexion with the fire which occurred on the morning of May 11th at Imaichi-machi, Utsu-nomiya, destroying twenty-nine buildings, S. Kasuyama (48) merchant whose dwelling was the origin of the accident, was arrested on the following day on suspicion of incendiarism. It is reported that on the 4th he insured his property for five hundred yen and since then has removed many articles to the bouse of one of his relatives.

The Emperor was pleased on May 12th to distribute twenty-five hundred yen among the people in Otaru who are suffering through the recent

THE LAW COURTS.

On Thursday, in the Kobe Ku Saibansho, Mr. H. Julien, ship's provisioner, Division Street, Kohe, was prosecuted at the instance of the Customs authorities for boarding a vessel outside the harbour limits and thereby violating the Customs Regulations. It may be remembered that at at a previous hearing, the defendant was fined year
7 in absence but protested, and the case was now
reheard. On behalf of Mr. Julien it was pointed out
that the regulations were enforced at Kobe with unnecessary strictness, and it was stated that at Nagasaki the claims of ships arriving from long voyages to have supplies of fresh provisions were recognized and though stevedores were constantly going outside the harbour limits with such sup-plies they were never prosecuted. The previous udgment was confirmed, defendant being ordered to pay the fine of yen 7.

MARRIAGE OF MDLLE, JOUBERT,

Despite the pouring rain and the general cheer less aspect of things out-of-doors, a large congregation assembled on Saturday forenoon to witness the nuptials of Mdlle. Jeanne Joubert, younger daughter of the late M. Louis Joubert of Mau-Sourah, Egypt, and ward of M. Steenackers, French Consul at Yokohama, and M. Charles Coraze, son of the late M. C. Coraze, of Marseilles. The civil ceremony took place at the French Consulate at 11.30, before M. Steenackers, when the witnesses for the bride were H. E. M. Harmand, the nesses for the Dride were 11, E. M. Thatmand, the French Minister, and M. A. de Panafieu, First Secretary of the French Legation; and for the bridegroom, M. Mottet and M. Gilbert. The bridal party then left for the Church of Jesu and Mary, Main Street, where the religious rites were duly celebrated. A tri-coloured canopy extended from the procedure of the proce duly celebrated. A tri-coloured canopy extended from the porch to the entrance gates, and the interior of this was richly adorned with flowers, as was also the church itself, white azaleas, lilies, and ferns being used profusely, the whole being the work of Mde. Gielen, Mrs. T. S. Baker, Mrs. Manley, etc. The bride entered the sacred fane on the arm of her guardian, M. Steenackers. She was attired in a very handsome dress of heavy crabe de Chier, tripmed with dress of heavy crêpe de Chine, trimmed with sprays of orange blossom and flounces of old peint d'Angleterre. Her train was carried by Miss Margot Forster and Master Frankie Forster, her pieze and nather the forster, her pieze and nather children of Mr. Ralph C. her niece and nephew, children of Mr. Ralph G E. Forster, British Consul at Hakodate. The bridesmaids were Miss Eva Baker and Miss Muriel Thomas, who were dressed in pale blue crèpe de Chine, with deep yokes and cuffs of white lace studded with turquoise, and they wore charming French hats of white trimmed with tiny banksia roses. We should mention that little Miss Margot Forster's costume was of silk and lace and her large bonnet was also trimmed with bansia roses. The bridegroom's supporters were M. Laroche, French Vice-Consul, and M. Henri Cambon, son of the French Anibassador to London, who is Second Secretary to the French Legation in Tokyo. Father Pettier officiated. During the service, the choir (augmented by many friends of the bride) sang Men-delssohn's "In te Domine speravi," more deissonn's "in the Domine speravi," more commonly known as "I waited for the Lord," the soloists being Miss F. Mendelson and Mde. La Croix, the choir consisting of Mrs. J. P. Mollison, Mrs. E. P. W. Skrimshire, Miss Mecre, Miss Parker, Mrs. T. S. Baker, Mr. A. E. Cooper, Mr. Murray Mollison, and Dr. Walker; Father Paning presiding at the oyean and Mr. W. Keall. E. Vincent conducting. At the close of the service, and while the register was being signed, Mrs. J. P. Mollison sang Cooper's "Ave Maria," the 'cello obligato being played by Mr. Rudolphe Schmid.

The bridal party left the church to the strains of the Wedding March, and proceeded to the residence of the French Consul, No. 186 Bluff, where dejeuner was served to nearly 300 guests, among whom were His Ex. M. Harmand, the French Minister; His Ex. Count Arco-Valley, the German Minister; His Ex. M. d'Ambro, the Austrian Minister; Baroness Corvisart, M. and Mde. Andre; M. and Mde. Thiel; Governor Sufu, the members of the Consular Conps in Yokohama, and representatives of Yokohama and Tokyo society. The guests were received by Madame Frique, aunt of the bride, and Mrs. R. G. E. Forster (sister). Mde, Frique was attired in a handsome dress of black trimmed with chiffon, Mrs. Forster being in turquoise blue. The toast Mrs. Forster being in turquoise blue. The toast of the bride and bridegroom was given by Mr. Harmand and was enthusiastically received. The extremely numerous and valuable presents desplayed in an adjoining room bore testimony to the high regard and affection which the happy bride has won during her residence in Japan. The bridal pair leave for France on the next *Empress* steamer.

The hair of three officers and sixty-five men belonging to the 24th Regiment, who were killed in the fighting on the Yalu was brought on May 16th by Major Fujioka to the Fukuoka barracks. The funeral service was to take place on the following day.

YACHTING.

Seven yachts of the 21-rating class started on Saturday, in a rather fresh wind and pelting rain.

Pina was too soon over the line before gunfire, and had to be recalled. Winsome crossed six seconds after the signal, with Sunbeam four seconds later, Pima, Pek, Valkyrien and Beatrice, whipped in by Cho Cho, the latter being 70 seconds behind time. In the beat to the harbour entrance Winsome increased her lead, and Valkyrien gained second place. It was and randyten gained second place. It was a run withspinnakers out to port as far as the mark Boat off Mandarin Bluff, round which they luffed and fetched the Lightship on port tack. Winsome continued to get away from Vallyrien, some continued to get away from Vallyrien, standing up to the wind, with full mainsail, much better than in her races last season. They all had to make a short board to clear the harbour entrance, and once inside had the wind on starentrance, and once inside had the wind on star-board quarter to the finishing line, which was crossed by Winsome at 3.13.57, well ahead of Valkyrien, Pele had some difficulty in keeping clear of a blanketting by Sunbeam coming down the harbour, and finished 7 secs ahead of the latter boat. Pima followed, and Beatrice was last, as Cho Cho had given up and returned by the Grand Hotel entrance. Winsome's time for the five and a half miles, 58 mins, 51 secs. elapsed, is very good. elapsed, is very good.

Five "Larks" started to race over their No. Five "Larks" started to race over their No. 9 course, the strong breeze and nasty sea combining to bother them considerably. In consequence three boats dropped out at the end of the first round, leaving Nos. 11 and 12 to make the second trip along the outside of the breakwater. No. 12 got into difficulties when about half-way round but finally made the harbour entrance and finished at 4.4 for each thing second wize No. finished at 4. 59. 00, taking second prize, No. 11 which got home at 4. 40. 05, also in a crippled state, winning the first prize.

THE LOSS OF A SUBMARINE.

In reference to the recent loss of Submarine In reference to the recent loss of Submarine AI, a British naval officer at home, well-known in Shanghai, writes in \blacksquare private letter (says the N-C. Daily News): "I am sure you will all think that submarines are the most dangerous things on earth, this is quite a mistake. The accident which happened to AI might have happened to anything which is foolish enough to accident which happened to Mr might have map-pened to anything which is foolish enough to travel on the sea. Of course the liner could not see her, but put two ships in the same area, and let them steam about without looking at one another, and it would be ages before they touched. As must have been at the depth of at least 15 feet at the time she was struck, right in the top of the conning tower, and only a small hole; but the blow coming at a distance of about ten but the blow coming at a distance of about ten feet from her centre of gravity must have turned the boat almost right over, and probably stunned nearly all the crew, besides up-setting the acid out of her cells. The Admiralty have behaved very liberally in the pension line, and the Southern Daily Mail fund is already about £800. It may be another fortnight before they get her up.

It is so sad having all the relations waiting; they can't see anything when she is up. It's awful. Mansergh was one of the watch-keeping lieutenants in the Severn (at Shamhai). keeping lieutenants in the Severn (at Shanghai), a very good fellow, and very popular. The manœuvres were a great success, and I think have induced the Admiralty to adopt this mode of warfare; there are about twenty more boats building now."

At the unveiling of the Nelson memorial at Bath on April 16th the Earl of Selborne, First Lord of the Admiralty, announced that there had been recovered from the wrecked submarine boat A I, the remains of the optical tube and part of the coming tower. "The officer in anxiety to observe her he forgot too long to scan the horizon. The officer subsequently saw looming in his field of vision the bows of a great ship. He rapidly turned his tube, saw the ship was right on top of him and immediately made his submarine boat dive, and to show the tragedy of the event it appears that there were only three seconds between the crew and safety. Three seconds more would have taken the submarine boat under the ship."

A London telegram reports:-At the inquest on those lost in the submarine-boat, Capt. Bacon said the bodies were found at their posts. The Otherwise crew were stunned by the collision. they would have been able to stop the leak and come to the surface.

SPRING MEETING OF THE NIPPON RACE CLUB.

FIRST DAY.—MONDAY, 16TH MAY.

PATRONS:—H.I.H. Fushimi-no-Miya, H.I.H. Arisugawa-no-Miya, and H.I.H. Kanin-no-Miya.

PERMANENT COMMITTEE:—Sir Claude Maxwell MacDonald, K.C.B., G.C.M.G., President; Dr. E. Wheeler, Vice-President; Baron A. D'Anethan, Count Von Arco-Valley, A. Bianchi, Esq., V. Blad, Esq., A. J. Easton, Esq., B. C. Howard, Esq., S. Isaacs, Esq., L. Mottet, Esq., K. Mori, Esq., M. Pors, Esq., R. D. Robison, Esq., B. Runge, Esq., Governor Sufu, T. Thomas, Esq., T. Taniguchi, Esq., and A. G. M. Weale, Esq. Thomas, Es Weale, Esq.

/eale, Esq. Executive Committee:—V. Blad, Esq., Chair-an; A. J. Easton, Esq., C. de C. Hughes, Esq., J.

EXECUTIVE COMMITTEE:—V. Blad, Esq., Chairman; A. J. Easton, Esq., C. de C. Hughes, Esq., J. de Cuers de Cogolin, Esq., D. Marshall, Esq., K. Mori, Esq., and F. M. Tegner, Esq. CLERK OF THE COURSE:—A. J. Easton, Esq. HONORARY TREASURRE:—C. de C. Hughes, Esq. JUDGE:—V. A. Caesar Hawkins, Esq., CLERK OF THE SCALES:—Dr. E. Wheeler. STARTER: -A. J. McChire, Esq. Time-Keeper: -F. J. Hall, Est Secretary: -Mr. Geo. Hood.

The Spring Meeting of the Nippon Race Club was favoured with splendid weather on Monday and some very good racing was witnessed, though the spectators were not as numerous as usual when the earlier events were run off. After luncheon the attendance increased, several ladies adding brightness to the scene with their spring costumes. originates to the scene with their spring costumes. The Course was in good condition, though, perhaps, a trifle heavy. Good racing was the order of the day, the finishes being close in most of the races. The starting was exceptionally good throughout. In the seventh race, the Melbourne Cup, the mile record was broken by Hitachi, this being a splendid race between the winner and Kachideki. The programments made the ac Kachidoki. The new arrangements made the ac-commodation for spectators much better than on former occasions, there being ample room for everyone, while the innovation of purchasing tickets for refreshments apparently worked without a hitch. Given fine weather there will doubtless be a very large attendance to-morrow, Ladies Day, the race for the Ladies' Purse affording additional interest.

Following are the events:-

1.—The CHAMPAGNE CUP, (Presented by Messrs, G. H. Mumm & Co.); for Australian Subscription Horses of 1901 and thereafter, that have not run at more than two Meetings; to be won three times in all by Horses the bona fide property of same Owner or Owners, with yen 300 added by the Club until the Cup is finally won, when the Second Horse will receive the added money; weight 145lb. Entrance yen 5. One Mile.

One Mile.

Mr. Tatsuta's Suma 145lb..................(Takahashi) 1
Mr. R. Loonen's La Friponne, 145lb....(Kurosaka) 2

There were only two starters for the Champagne
Cup. La Friponne and Suma, the latter being a strong
favourite. La Friponne had a little the best of the
start, but in the Dip Suma caught up and at the
half-mile post was half a length ahead. This lead
was increased, and at the Trees Suma was me good
length ahead. Coming into the straight the winning
horse was at least two clear lengths ahead and
won easily by about five lengths. Time, 1.523
Winner paid yen 5.50.

-The PEKIN CUP, for China Subscription Ponies of Autum 1903; weight as per scale; winners at date of entry 5lb. extra. Entrance yen 5. One Mile. Winner yen 350; Second Prize yen 50.

(Count Metternich) o

Mr. R. Field's Trader (late Settler) 155lb.
(A. Takahashi) o

There were five starters in this race, Count Metter-nich carrying 11lb. extra, not being able to weigh in at 147lb. Le Lutteur did not come out. A very at 147lb. Le Lutteur did not come out. A very good start and the ponies kept together round the Dip. Adolar then obtained a slight lead, though followed closely by Tanuki and Trader. Then just before getting to the Trees Yakumo came up and the four ponies were racing aimost neck and neck. Coming into the Straight Adolar drew ahead, though closely challenged by Tanuki. In the last few strides, just at the finishing post, Tanuki, well ridden, made a fine spurt, and it was doubtful to spectators which had won until the numbers were hoisted. Yakumo was a good third and Fra Diavolo was "not in it." Time, 3.13 to. Winner paid yen 14.50.

3.-The COLONIAL STAKES, for Australian Subscription Horses of Autumn 1903; weight for age; winners of 4 races or less at date of entry 3lb. penalty per win, of more than 4 races 15lb. penalty in all. Entrance yen 5. Three quarters of a mile. Winner yen 500; Second Prize yen 100.

Mr. Friend's Mistletoe, 137lb.

A very good start. Mistletoe drew ahead at once though closely followed by Jupiter. The former, however, had the race in hand easy and gradually increased her lead, being about five clear lengths ahead at the Trees. Coming into the Straight Mistletoe lad the same lead and Jupiter was closely followed by La Friponne. The horses finished in this order, Mistletoe winning by about six lengths. Time, 1.21, 3. Winner paid yen 7.

4.-The GRAND PRIX, for Australian Subscription Horses of 1904; weight for age; a forced entry of yen 30, non-starters half forfeit. One Mile. Winner yen 1,000; Second Prize yen 200; Third Prize yen 100.

Mr. G. Barclay's Carnation, 137lb.....(Horikoshi) I
Mr. R. Loonen's Parisienne, 137lb.....(Kurosaka) 2
Mr. Alexander's Juno, 137lb......(Hayashi) 3
Mr. Sphynx's Chouchou, 137lb......(Higaki) 0
Mr. Astral's Moonshee, 137lb......(Sasaki) 0

Out of twenty-eight entries there were but five Out of twenty-eight entiries there were but hive starters, Carnation being a strong favourite. There was trouble in starting this race, and after one or two efforts, what appeared to the ordinary onlooker as a good "line up" was not up to the starter's ideas and Carnation and Moonshee bolted away, the latter going right round the course. Another false start, and then the horses got away fairly well together. Carnation at once assumed the lead and at the half Carnation at once assumed the lead and at the half mile post was about ten lengths ahead of Parisienne, Juno following about one clear length behind in third place. At the Trees Parisienne gained upon Carnation and made a very good effort in the Straight, but the jockey of Carnation never had to push his mount and came in an easy winner; Parisienne second and Juno third. Time, 1.52 %. Winner paid yen 7.

5 .- The Newcomers' Plate, for Australian Subscription Horses of 1904; weight for age; winner of Grand Prix excluded. Entrance yen 5. Three quarters of a mile. Winner yen 500; Second Prize

Thirteen starters, Primrose carrying 6lb. over and Elsa 2lb. Alexandra was a hot favourite. After one or two efforts a fair start was made, though Daisy threw her jockey at the starting post. Sucrai assumed the lead, closely followed by Alexandra and Elsa. At the Trees Alexandra drew up and coming into the Straight caught up and finished a finely ridden race by about four lengths from Tarantella, Elsa being a good third. Time, 1 25\(\frac{2}{3}\). Winner paid yen \(\frac{8}{3}\).

entry of yen 30; non-starters half forfeit. One Mile Winner paid yen 7.00; Second Prize yen 150.

Pit-a-Pat was a strong favourite though C.O.D.

Mr. Tatsuta's Lion, 153lb.(Takahashi) o Pit-a-Pat was a strong favourite though C.O.D., Fheechting and Gaulois II had a number of backers. After a good start Mayor had a slight lead entering the Dip, but at the three-quarter mile post Adonis secured the lead, and was a length ahead of Pit-a-Pat at the half mile post, C.O.D. being also well up and the rest in a bunch. Coming into the Straight C.O.D. made a good effort, well ridden by Mr. Cox, and a very close finish ended in favour of Adonis, Protz being third. Time, 2.12\frac{3}{2}. Winner paid yen 48.50.

Mr. Graal's Attila (late Arrieregarde), 147lb. (Mr. Mottu) 1

Mr. May's May-moth (late Moth),

Mr. May's May-moth (late Moth), 140lb.

Mr. Four-in-hand's The Doctor, 154lb. (Mr. von Hessenthal)

Attila was a strong favourite. A fairly good start, and Mark got the lead. At the three-quarter mile post Mark was leading by at least seven or eight lengths, followed by Gladiateur and Attila, close together. Then the latter drew up until at the Trees Mark and Attila were going neck and neck. A very fine race ensued in the Straight. Attila, ridden hard, won from Mark by half a length, the Leader a bad third. Time, 2.10½. Winner paid yen 7.50.

SECOND DAY .- TUESDAY, 17TH MAY.

The second day's racing was exceptionally good, and spectators turned up in large numbers. This being Ladies Day, and the weather being as lovely as could be desired, the show of beautiful Spring costumes was particularly fine, but to the great regret of everybody, the President of the Club, Sir Claude Macdonald and Lady Macdonald, were unable to attend the meeting, owing to the recent death of Lady Mackenzie, sister of Lady Macdonald. Tokyo Society both diplo-matic and official was very largely represented. Towards the end of the afternoon the skies clouded over, threatening rain, and foreboding a break in the weather for the last day. There were a good number of starters in each race and in most instances the finishes were close. The Ladies'
Purse was won by Mr. Mottu, to whom Mrs. E.
C. Davis presented the prize with a few graceful
remarks. Mr. Tatsuta (Mr. K. Mori) secured the 6.—The China Grand Prix, for Subscription Emperor's Cup—a handsome silver bowl—and China Ponies of 1904; weight as per Scale; a forced after Count Toda had made the presentation the

Clerk of the Course, Mr. A J. Easton, called for three cheers for the Emperor, which were heartily given. The arrangements for spectators heartily given. worked admirably, the new stand over the Pari Mutuel being crowded, as well as the Grand Stand. In the third race Alexandra and Parisienne. ran a dead heat and the owners arranged to run it off after the ninth event, with the result that Alexandra, a strong favourite, won with something to spare.

Following are the events:-

1.—The COSMOPOLITAN PLATE, for all Australian Subscription Horses; weight for age with 5lb. deducted; winners of 4 races or less at date of entry 3lb. penalty per win, of more than 4 races 15lb. penalty in all; winners at the meeting 5lb. extra; winner of race 7 First Day excluded. Entrance yen 5. Three-quarters of a Mile. Winner yen 600; Second Prize ven 100.

yen 100. Mr. Yezoye's Izumo, 144lb.....(Sugiura)

2.—The MANCHURIAN STAKES, for Subscription China Ponies of 1904; weight as per scale; winner of China Grand Prix excluded. Entrance yen 5. Three-quariers of a Mile. Winner yen 350; Second

c.O.D. Challenged her and the three points were racing almost neck and neck. Coming into the Straight C.O.D., well ridden by Mr. Cox, came along with Fluechtling and a fine race finished in favour of C.O.D. by about one length; Mayor third. Time, 1.3876. Winner paid yen 10.

3.—The Addlace Cup, for Australian Subscription Horses of 1904; weight for age; winner of race 5 First Day 5lb. extra; winner of Grand Prix excluded. Entrance yen 5. One mile and a Furlong. Winner yen 500; Second Prize yen 100; Third Prize yen 50. Mr. Satsuma's Alexandra, 141lb.(Horikoshi) 1
Mr. R. Loonen's Parisienne, 137lb.(Kurosaka) 1
Mr. Alexander's Juno 136lb.(Sugiyarna) 3
Mr. Sphynx's Chochou, 137lb.(Higaki) 0
Mr. B. Runge's Tarantella, 137lb.(Kano) 0

In this race Alexandra was a strong favourite though Parisienne was heavily backed. Passing the Stand Parisienne was leading, closely followed by Juno and Alexandra. At the three quarter mile post Parisienne still had a little the best of it, but at the half mile the three horses named were racing almost nock and neck. Then Juno fell behind and the race was heterage Parisienne and Alexandra. Coming nair mile the three norses named were racing almost neck and neck. Then Juno fell behind and the race was between Parisienne and Alexandra. Coming down the Straight Alexandra made a fine effort but was unable to get ahead of her competitor and a splendid race resulted in a dead heat; Juno, several lengths behind, third. Time, 2.121. Winners paid: Parisienne yen 7, Alexandra yen 4.50. The owners of the winning horses arranged to run off the race after the last advertised event.

4.—The LADIES' PURSE, (Presented), with Second and Third Prizes added by the Club; for all China Ponies; Handicap; weights to be published at close of first day; to be ridden by full members of the Club, or Visitors, whose names must be sent in to the Committee before the meeting and approved by them. Entrance yen 5. One Mile. Second Prize yen 200; Third Prize yen 100.

Mr. Graal's Atila, 160lb......(Mr. Mottu) 1 Mr. G. Werckmeister's Adonis, 145lb.

The five ponies caused the starter considerable trouble and were finally got away to a rather bad start. Adonis had the lead, The Leader following within half a length. The ponies were all close together in the Dip and at the three quarter mile post Gladiateur put on a spurt and drew ahead. This lead was but short lived, and at the half mile post Attila was half a length ahead of Adonis, The Leader being about the same distance behind the second pony. This order was maintained past the trees and coming into the Straight Attila increased her lead, and though the riders of Adonis and The Leader made every effort won easily by about four lengths from Adonis without being ridden hard. Time, 2.11. Winner paid yen 10.50

being ridden flard. Time, 2.11. Winner paid yen 10.50
Immediately after the race the successful jockey, Mr. Mottu, was presented with the Ladies' Purse by Mrs. E. C. Davis, who had been instrumental in collecting the same from the ladies of Tokyo and Yokohama. The donor said she was pleased to present the purse to Mr. Mottu, who had won the Ladies' Purse on former occasions, and she hoped he would win it again in the future. It had been a good race and no doubt the best pony won. Mr. Mottu made an appropriate acknowledgment, saying that he had won the Ladies' Purse on three occasions.

5.—The QUEENSLAND STAKES, for Australian Subscription Horses of 1904; Handlicap; weights to be published at close of first day; winners after publication of weights, 7lb. extra. Entrance yen 5. Three quarters of a mile. Winner yen 500; Second Prize yen 100.

the Emperor.

7.—The NANKIN STAKES, for China Subscription Ponies of 1904; Handicap; weights to be published at close of First Day; winners after publication of weights 7th, extra. Entrance yen 5. One Mile and a Quarter. Winner yen 350; Second Prize yen 50.

Mr. May's May-mie, 138lb.(Ichi)
Mr. May's May-sie, 122lb.(Mr. Dietrich)
Mr. R. Field's Thrift, 121lb.(Mr. Catto) o

Hibachi had the best of the start and at the three-quarter mile post was leading by about four lengths from Kachidoki, Rose de France being about two lengths behind the second horse. Kachidoki, which was the favourite, caught up a little, being about three lengths behind at the half mile post and only one length to the bad at the Trees. She could not catch the winning horse however and Hischi was one length to the bad at the Trees. She could not catch the winning horse, however, and Hitachi won by about three lengths, Rose de France a bad third. The winner beat her own record of the previous day, the time being 1.481. Winner paid yen 14.50.

9.—The Monoclian Plate, for Subscription China Ponies of Autumn 1903; Handicap; weights to be published at close of First Day. Entrance yen 5. One Mile and a Furlong. Winner yen 350; Second Prize yen 50.

Captain Jardine's Tanuki, 161lb.(Mr. Cox) 1 Mr. G. Werckmeister's Adolar, 150lb. (Mr. Dietrich) 2 Mr. R. Field's Trader, 150lb.(A. Takahashi) 3

Mr. R. Field's Trader, 150lb.(A. Takahashi) 3 Mr. Yodo's Yakumo, 144lb.(Rikizo) 0 Tanuki was a hot favourite for this race. After a good start the Ponies passed the Grand Stand Tanuki leading by about two lengths from Adolar and Trader, who were racing neck and neck. From the three quarter mile post Trader came up and the three ponies—Tanuki, Adolar and Trader—raced neck and neck, until reaching the Trees Tanuki had a lead of a length from Adolar, the same distance separating Trader from the second pony. Coming round the bend Yakumo, who had been several lengths behind made a good spurt, but the race—a good, well ridden race—ended in favour of Tanuki by three quarters of a length, Adolar second and Trader third. Time, 2.39\frac{5}{2}. Winner paid yen 8.50. paid yen 8.50.

THE DEAD HEAT.

Mr. Satsuma's Alexandra, 141lb.(Horikoshi) 1 Mr. R. Loonen's Parisienne, 137lb.....(Kurosaka) 2

Mr. R. Loonen's Parisienne, 137lb.....(Kurosaka) 2
Alexandra was a very hot favourite for this race frunning off the dead heat of the third race). The two horses passed the Grand Stand close together and kept so throughout, though at the start Parisienne had a slight dead. From the three quarter mile post to the Trees the two competitors ran neck and neck, it being almost impossible to judge which was in front. Then entering the Straight it seemed doubtful which would win, but making a good effort Alexandra won in fine style by making a good effort Alexandra won in fine style by about three lengths. Time, 2.15. Winner paid

THIRD DAY.-WEDNESDAY, 18TH MAY.

The third day's racing opened in threatening weather, and before luncheon the rain began to fall. It did not come down very heavily, however, and the closing events were run off in bright supshine. The attendance was fairly good and the racing in most instances evoked keen interest. Sir Claude MacDonald's Stella, which started a hot favourite in the seventh race, came in third, being beaten by Jupiter and La Friponne. The best dividend of the meeting was paid to the backers of the winning horse in this race—yen 66.

An Off Day's racing is to take place on Satur-day afternoon, particulars of which will be duly advertised.

Following are the events:-

t.—The Yokotiama Derbis, for Australian Subscription Horses, except those of 1904; Handicap; weights to be published at close of Second Day. Entrance yen 5. One mile and a Half. Winner yen 700; Second Prize yen 200; Third Prize yen

three horses were all together. Rounding the bend Annemarie secured the lead and won a splendidly ridden race by three lengths from Rose de France, Irumo third, Time, 2.50 j. Winner paid yen 5.

2.—The YOUNGSTERS' HANDICAP, for Australian

Subscription Horses of 1904; Handicap; weights to published at close of Second Day. Entrance yen 5. One Mile. Winner yen 500; Second Prize yen 100; Third Prize yen 50.

Third Prize yen 50.

Mr. Satsuma's Alexandra, 155lb.......(Horikoshi) 1

Mr. B. Runge's Tarantella, 140lb......(Kanno) 2

Mr. Alexander's Juno, 145lb.......(Sugiyama) 3

Mr. Sphynn's Chouchou, 136lb......(Higaki) 0

Mr. N. Kawakita's Kyoto, 132lb.....(Sugiura) 0

Mr. R. Field's Treasure, 120lb......(Mr. Catto) 0

Alexandra was a hot favourite for this event, though

Alexandra was a not tayourne for this event, though Juno had a good number of backers. A very fair slart, Alexandra having a little the best of it. Entering the Dip Alexandra was leading slightly from Kyoto, Juno being in third place. Kyoto had a slight lead at the three quarter mile post, but racing to the half mile Alexandra had a length the best of it, Tarantella taking second position with Juno a couple of lengths behind. This order was maintained to the finish, Alexandra winning by about three lengths without being "ridden." Tarantella and Juno finished close together. Time, 1.55%. Winner paid yen 8.

3.—The CHINA CHAMPIONS, for all China Ponies; weight as per scale; a forced entry for winners at the meeting, of one race yen 10, of two or more yen 20. Optional to beaten Ponies at an Entrance of yen 25. One Mile and a Quarter. Winner yen 600. Mr. Graal's Attila, 147lb.....(Mr. Mottu) 1 Mr. G. Werckmeister's Adonis, 144lb.

(Mr. Dietrich) 2 No. 127 Mess' C.O.D., 147lb.(Mr. Cox) 3

No. 127 Mess' C.O.D., 147/b.(Mr. Cox) 3
Attila was a hot favourite, though C.O.D. was strongly backed. After a good start Attila was leading by a length passing the Grand Stand, the other two ponies running together. In the Dip this order was maintained, and at the three quarter mile post Adonis was in second position by a neck from C.O.D. Running to the half mile Attila had a lead of about four lengths from Adonis, C.O.D. being about a length behind the second pony. This order was maintained to the finish, Attila winning easily without being pushed by her jockey, Adonis second and C.O.D. a good third. Time, 2.48. Winner paid yen 6.50. ner paid yen 6.50.

4.-The JUNIOR CHAMPIONS, for Australian Sub 4.—The JOHDR CHAMPIONS, for Australian Sun-scription Horses of Autumn 1903 and Spring 1904; weight for age; a forced entry for winners at the meeting, of one race yen 10, of two or more yen 20. Optional to beaten Horses at an Entrance of yen 25. One Mile and a Quarter. Winner yen 600.

Suma was a strong favourite. Carnation had a little the best of the start and passing the Grand Stand was leading from Suma by about a length, the third horse being two or three lengths behind Suma. In the Dip the latter began to overtake Carnation and at the half mile post the two horses were running close together. At the Trees Suma obtained the lead and rounding the bend came down the straight with the race well in hand, winning from Carnation by about seven lengths, Annemarie a bad third. Time, 2.23. Winner pard yen 7.50.

5.—The Senior Champtons, for all Australian Subscription Horses, except those of Autumn 1903 and Spring 1904; weight for age; a forced entry for winners at the meeting of one race yen 10, of two or more yen 20. Optional to beaten 1 orses at an Entrance of yen 25. One Mile and maguarter. Winners ven 26. ner yen 750.

Mr. N. Kawakita's Hitachi, 137lb.......(Sugiura) 1 Mr. K. Ikeda's Kachidoki, 137lb......(Takahashi) 2 Mr. R. Loonen's Rose de France, 137lb...(Higaki) 3

Hitachi was a hot favourite for this event. Kachidoki got away at the start but was immediately collared by Hitachi, the latter having a lead of about three lengths passing the Grand Stand, the other two running close together. Coming to the three quarter mile Hitachi had a long lead and at the half mile post the favourite was at least ten lengths ahead of Kachidoki, Rose de France being about three lengths behind the second horse. This order was maintained and Hitachi came in an easy winner, Rose de France being about five lengths behind Kachidoki. Time, 2.19. Winner paid yen 6. Hitachi was a hot favourite for this event. Kachi-

ponies having but few backers. The favourite got away from the start and at the half mile post had a lead of about ten lengths from May-moth, Yakumo being about eight lengths behind the second pony. The race was won easily by Mark, the jockey not having to push his mount at all; Yakumo second and May-moth a close third. Tune, 2.15,1%. Winner paid yen 6.50.

7.—The New Sourth Wales Cup, for Australian Subscription Horses of Autumn 1903; weight for age; winners of 4 races or less at date of entry 3lb. penalty per win; of more than 4 races 15lb. penalty in all; Winners at the meeting excluded. Entrance yeo 5. One mile and a Furlong. Winner yen 400; Second Prize yen 100.

Mr. Alexander's Jupiter, 136lb.(Sugiyama)
Mr. R. Loonen's La Friponne, 137lb.....(Sugiyama)
Sir Claude MacDonald's Stella, 139lb. (Horikoshi)

8.—The CHINA CONSOLATION, for China Subscrip tion Ponies of 1904; weight as per scale; winners at the meeting excluded. Entrance yen 5. One Mile. Winner yen 300.

Winner paid yen 8.50.

o.—The Australian Consolation, for Australian Subscription Horses of 1904; weight for age; winners at the meeting excluded. Entrance yen 5. One Mile. Winner yen 400.

Mr. R. Loonen's Parisienne 137lb.(Kurosaka) Mr. Alexander's Juno, 137lb.(Sugiyama)
Mr. Gran's Elsa, 137lb.(Mr. Motto)
Mr. N. Kawakita's Hyogo, 137lb.(Sugiura)

Parisienne was a strong favourite, Juno being second in the number of backers. Some trouble second in the number of backers. Some trouble was experienced in getting the eight horses away, and they were finally started to a rather bad start, Tarantelia being left at the post. Suerai had the lead, followed by Elsa and Hyogo. At the three quarter mile post Suerai still had the lead, closely followed by Elsa, Hyogo, Parisienne and Juno. Getting to the Trees Parisienne came to the front and won a fine race by half a length from Juno, Elsa a bad third. Time 1.56\frac{1}{2}. Winner paid yen 8.00.

LITERARY GOSSIP.

Mr. and Mrs. Humphry Ward's second daughter, Miss Janet Penrose Ward, was married at Oxford recently to George Macaulay Trevelyan, third son of Sir George Otto Trevelyan. The bridegroom is a fellow of Trinity College, Cambridge, and is one of the editors of the new Independent Review. The ceremony was performed in the chapel of Manchester College, and Mr. and Mrs. Ward gave a reception afterward in the Manchester College library. Mrs. Ward is now in Italy at work on her novel, "The Marriage of William Ashe."

In connexion with the celebration of the jubilee of the London Association of Correctors of the

was not sense. He said that he did not know the quotation, and that he did not expect sense from Mr. Browning. The quotation being nonsense as it stood, no doubt the editor took that for proof that, as it was from Browning, it was correctly printed; but the right sort of proof-reader," Mr. Lang thinks, "would have corrected the misprint."

We acknowledge receipt of the Travellers' Hand Book and Telegram Code published by the well-known bankers and agents Messrs. H. S. King & Co. of which the present is the twenty-third annual issue. This little work contains a great deal of information of value to travellers, and the telegram code consists of sentences that seem admirably adapted to their probable wants. It is chiefly designed for the use of homeward bound passengers.

It is not generally known that among the rare It is not generally known that among the rare volumes in the library of the Law Society's Hall, London, is a manuscript devotional book of the thirteenth century, the "First Polyglot Bible" (1514), the "First Prayer Book of Edward VI.," and the "Whole Byble," by Miles Coverdale (1550). The collection was made by the Rev. Joseph Mendham in the early part of the 19th century, and was presented to the Law Society by his representatives in 1821, or condition that by his representatives in 1871, on condition that it formed a permanent part of the Library in Chancery-lane. Why these ecclesiastical works were given to the Law Society is unknown. Perwere given to the Law Society is unknown. Perhaps it was thought that they would create a moral atmosphere. Anyhow, the Law Society is justly proud of its Library. In 1832, when the Hall was first opened, the Committee reported, in terms of congratulation, that over 1,000 volumes had been collected. To-day every member of the Society is free to consult some 40,000 books.

Someone has been inquiring as to what it is boys and girls read nowadays, and the Warden of St. Andrew's College, Bradford, answering for his own scholars, says the younger boys read Ballantyne and Henty, those of the middle form Weyman and Kipling, while the oldest boys concern themselves with Emerson and Carlyle, As to Board schools, two boys only at St. Austell have read Scott and Dickens during the past year, while Burton-on-Trent has neglected both year, white both these authors; but at Gloucester, where Scott is "very low down in popular favour," Dickens is first favourite. The girls of Plumstead find Scott and Dickens alike "too long and too dry."

Writing to the Secretary of the British and Foreign Bible Society in September last in response to the question "What I owe to the Bible," Sir Edwin Arnold replied: "If, as I suppose, I am addressed as a man of letters, I will simply say that I owe my education as a writer more to the Bible than to any other hundred books that the Bible than to any other hundred books that could be named. . . . In another way," Sir Edwin continued, "I owe a good deal to your Society as a teacher of languages. Out of ten or a dozen which I could read before becoming blind, I picked up two or three at least by using your translation into Hindustani, Persian, Sangorit Languages and Specials as the least that the sanger of the sanger Sanscrit, Japanese, and Spanish as a book to begin with. It was so convenient to know by heart the grand old text while picking up the new tongue.

According to the People's Friend, Sir Conan Doyle, when a small boy, belonged to m book society. He was such m great reader that the society had to pass a rule for his benefit that no member be allowed to change his book more than three times a day. His first story was written at the age of six, and was about a tiger that swallowed a man. When the budding writer had got the man inside the tiger he had to finish the story; but, as he sagely observed, it was easier to get a man into a scrape than to get him out of it—which, by the way, may or may not throw some light on the position of the better-known tiger who was associated (in company with a big note of interrogation) with a lady. It is evident statement, such as "Raising the knife in mid-air," say, were all others connected with the cas or "And then the wicked Marquis saw——" and The presiding judge at this mock trial is a declining to continue without a further supply of the senior judge of the King's Bench Division. pastry—a case, to reverse the familiar saying, of "no supper, no song."

Writing from the editorial office of the Girl's Realm, Mt. S. H. Leeder gives the result of the voting of between 3,000 and 4,000 girls of the educated classes for their favourite girl-character in fiction. The voters were aged between thirteen and eighteen. In the following list Jo March was first by an overwhelming majority:

The death of Sir Edwin Arnold recalls to recollection the sonnet which he wrote upon the death of Mathew Arnold, a sonnet remarkable for the personal tone that pervades it :-

Now, that thou better knowest friends and foes Good Friend dear Rival! bear no gradge to those Who had not time, in Life's hard fight, to show How well they liked thee for thy "slashing blow"; How "sweet" thy "reasonableness" seemed; how

Thou, that didst bear my Name, and deck it so That—coming thus behind—lardly I know If I shall hold it worthily, and be Meet to be mentioned in one Age with thee—hefore the Star. before the Star

Is kindled for thee, let my funeral torch Light thee, great Namesake! to th' Elysian Porch! Dead Poet! let a poet of thy House Lay, unreproved, these bay-leaves on thy brows!

One incident in the career of the late Mr. John Forbes, K.C., whose death has just occurred, is to be found recorded in Mr. Birrell's life of Sir Frank Lockwood. "The circuit, being in high good humour," wrote Sir Frank Lockwood to his wife in 1882, "proceeded to try Forbes for having indecently opened the Commission in a small Bar wig, not in the full-bottomed wig of a Q.C. Forbes was also charged with having faisely and fraudulently procured himself to be styled his lordship in several newspapers. I, as Attorney-General, prosecuted, and Potter, Q.C., defended. Wills, as leader, presided, and a jury defended. Wills, as leader, presided, and a jury was sworn. The defence of insanity was set up on Forbes's behalf, but miserably failed, as it was proved beyond a doubt he was always alive to his own interests. Of course, he was found guilty, and consequently fined, and so I regret to

d-air," say, were all others connected with the case."
"and The presiding judge at this mock trial is now

The amount left under the will of three eminent men—representatives of literature, law, and di-plomacy—were made known a few days ago, and plomacyif the totals could be taken as any indication of the relative remunerativeness of the three professions literature would have to be regarded as better than the law, and the law as more profitble than diplomacy.

ble than diplomacy.

Probate of the will of Sir Leslie Stephen, who died on February 22. is granted to Messrs, George H. Duckworth and Gerald de l'Etang Duckworth. The estate is sworn at £15,715 6s. 6d., of which £8,906 14s. 6d. is net personalty.

Probate of the will of the Right Hon. Baron Shand, who died on March 6, has been granted to his widow, Emily M., Lady Shand. The estate is valued at £2,745 19s. 3d.

The estate of Lord Augustus W. F. S. Loftus, G.C.B. (son of the second Marquis of Ely), formerly Ambassador at St. Petersburg, who died on March 7 intestate, is swoin at £298 11s. 5d., by his son, Mr. Augustus P. B. Loftus.

Three cases of dysentery are reported from Kochi.

The general meeting of the Hokkaido Railway Company was held on May 15th at the office of the Geological Society, Tokyo. The accounts for the past year were submitted to the shareholders, among those present being Mr. Sakamoto, the representative of the Imperial Treasury. The Government subsidy was yen 452,320.40, to The Government subsidy was yen 453,320.40, to which a balance of yen 55,725.48 from the previous account was added. Of the total yen 64 was set apart to wipe off a debit balance on the year's working, yen 3,349.32 was placed to reserve and yen 122,969 was allocated to the payment of a dividend at the rate of 6 per cent per annum, the remainder being carried forward to the

May Yohe has reappeared at the Hippodrome Music Hall in Brighton, and is singing her old songs, "Ma Honey, Ma Honey," and "Lazily, Drowsily," from "Little Christopher Columbus," which were the rage in London ten years ago. She retains some of the deep notes of her voice and a good deal of her charm, but instead of being a slight, graceful girl is now

stately woman. She is to appear soon in the syndicate halls of the West End of London at a salary of \$500 a week. Until they went to Brighton sie and her husband, Major Putnam Bradlee Strong of New York, could be seen in the dining-room every night at the Carlton, London. One even-ing Lord Francis Hope arrived on the scene with his new bride. The two parties saluted each other and smiled, but did not speak.

Tonkin papers announce the decease of H. M. Norodom, King of Cambodia. His Majesty, who was born in 1834 and crowned in 1860, died in his palace at Phnompenh, the capital, on April 24th. The heir apparent is Prince Yukanthor, who is forty-two years of age. It is doubtful, however (the *Hongkong Telegraph* considers) if this Prince will succeed his father, for, owing to an outspoken attack in the Figure, on the French Colonial Government, during his visit to the Paris Exhibion in 1900, he was obliged to cross the frontier and take refuge in Belgium. He is now an exile and lives in reduced circumstances at Singapore. It is rumoured that this Prince possesses many partisans in Cambodia, and the nomination of another successor to the vacant throne by the French Authorities may possibly lead to future complications.

The 13th Spring Athletic Sports of the Motomachi School were held on Monday at the Cricket Ground, about twelve hundred pupils being present. The weather was glorious for such an event, warm and windless. The programme consisted of forty-two items and a small hand supplied music of a kind, playing the National Anthem (Kimiga-yo) at the close of the affair. Anthem (Armga-yo) at the close of the affair. During the day there was an exhibition of field hospital work. The Hanawa-no-Asobi, or flower dance and some of the comic races were very good, while the dancing of "The Lancers" by the girls, and the military drill of the lads were excellent, evoking the admiration of the foreigners present. The prizes were distributed by Mr. K. Ikeda, principal of the school, and Mr. Hayashi, Chief of the Prefectural Education Office, the gifts, very appropriately, consisting principally

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE,

In an article entitled Japanese National Charmanner in which Admiral Makaroff met with his Germany, but did not come off owing to England's manner in which Adomiral Makaroll met with his Germany, but did not come off owing to England's death was only natural, but it is a surprise to some people to find that the bulk of the Japanese people were as much shocked by what occurred as were Europeans and Americans.

Extreme England and Americans of the Transvaal war, throughout which Germany's respect for brave foes has for many centuries sympathies were all with the Boers. England has been felt by Japanese warriors. The proverb most forgiven this action on Germany's part; the Bushi wa ui-mi tagai, "Warriors regard each relations of the two countries are affected by it

other with sympathy," well expresses our feelings about the reverses of a brave soldier. It has not been the custom of our warriors to despise their foes at any time or to think that defeat in battle detracts from their value as men. The spirit of chivalry has ever led us to sympathize with those who often through a concatenation of adverse circumstances fail to come off victors in the hour of battle and to turn the reverses which foes have suffered into notes of warning against laxity or carelessness on the part of the victors. Many noted instances of the display of this respect for defeated foes might be quoted from history. When Ishida Mitsunari was defeated at Sekigahara, Kuroda Nagamasa, who had been an old friend of Ishida's, received him with the greatest respect and treated him like a distinguished guest. Tokugawa leyasu on one occasion acted in the same way to a vanquished foe, alighting from his palanquin and going to meet him on foot in a most respectful manner. That this spirit has not died out was shown by an incident which occurred in the China-Japan war connected with the taking of Weihaiwei. The most sincere and profound sympathy was shown by Admiral Itō and all the Japanese naval and military officers present on the occasion of the suicide of Admiral Ting. The Chinese warship Kwang-Isi, which had been captured by our fleet, was disarmed and given to the Chinese to enable them to convey the remains of their brave fellow-countryman to Chefoo, and when the vessel left the harbour the whole of the Japanese fleet went into mourning for the loss of so noble a foe. It is our belief, says the fiji, that no one regrets more the manner in which the brave Rossian Admiral lost his life than Admiral Tögö. He did not of course know at first that the Admiral was on the Petropavlovsk when she went down. The de-ceased Admiral was full of pluck and ambition and it was said to have been his desire to meet the Japanese fleet in battle on equal terms. Admiral Togo would most certainly have preferred that events should have thus culminated.... The narrow escape which Prince Cyril had and his great misfortune touched the cord of respect for royalty in the Japanese nation and caused deep sorrow everywhere.

There is one characteristic of the Jiji Shimpo

which certainly no other newspaper in Japan possesses in the same degree and that is a certain dignified calmiess of tone which is maintained from month to month in the midst of the most stirring events. In certain countries were timplicated and expectation and expectations and expectations and expectations and expectations and expectations and expectations and expectations and expectations and expectations are all the expectations and expectations are all the expect tries sensationalism and emotionalism are all the rage to-day, and there are Japanese organs which are as hysterical as a woman with disorder-ed nerves. On May and the *Jiji* had an article entitled *Kyokutan ni Hashiru nakare* (Don't run to Extremes); which throughout says to the nation, "Happen what will, keep calm." The *fiji* does not under estimate the seriousness of the situation. It says that there is no parallel to the present war in modern history. America's war with Spain and England's war with the Boers were cases in which the issues were simple ones and victory on the side of America and England was a foregone conclusion. In the Far Eastern World at the present moment there is great complication and from week to week there is no say ing what unexpected turn events may take. Final success depends not only on fighting power, but on this and tactful manipulation of the political situation. The Japanese nation must endeavour to avoid arousing hostile feeling in neutral countries. In time of war nations, whether combatants or onlookers, are certainly more sensitive than at ordinary times. Germany by her attitude during America's war with Spain and England's war with the Transvaal did herself great political harm in both these countries. After the war with Spain was over the United States became aware that attempts acteristics the fiji Shimpo says:—That all West- had been made to form an anti-American alliance ern nations should express deep regret for the in Europe and that it had been supported by

to-day. Thus it is seen that at the present time the Japanese nation cannot be too circumspect in its actions and its words. The war will create a good deal of hostile feeling in some quarters anyhow. deal of hostile teehing in some quarters anyhow. We must do all we can, says the Jiji, \(\boldsymbol{m}\) mitigate it by suppressing our feelings when to display them overmuch would only give offence. The Jiji then discusses the probability of interference on the part of the Powers and comes to the conclusion that if Japan plays her cards well, with England as her ally this will be part to with England as her ally, this will be next to impossible.

In the Kyöikukai (Educational World) we find very sensible editorial entitled Jikyoku to Kyōiku, in which the writer condemns very strong-ly the way in which a great many of the schools of the country are kept in a perpetual state of agitation and excitement by warlike demonstrations of all kinds. The prohibition of a certain lantern procession by the Minister of Education, though it was condemned by public opinion at the time as somewhat savouring of pettiness was, in our opinion, says the Kyöikukai, a step in the right direction. In an Imperial Rescript issued at right direction. In an Imperial Rescript issued at the time of the China-Japan war these words occur:—Kuni ni jūsei (常朝) ari; tami ni jūsei (常朝) ari; tami ni jūsei (常義) ari; hijō chōhatsu no baiai wo nosoku no hoka, shimmin ono ono sono jūgyō wo tsutomuru koto wo okotarazu. Uchi ni wa masumasu seishoku wo susume, motte fukyō no moto two tsuchikai-yashinau wo Chin ga nozmu tokoro nari. The ordinary calling of school-teachers is the advaction of the young. With dialogastic the education of the young. With diplomatic and military affairs they are not concerned. It is not for the good of the nation that ordinary people should lose their heads and neglect their duties to the State. On such an occasion as the present teachers should preach sobriety and calmness of mind instead of encouraging, as in some quarters they are doing, every form of unhealthy and utterly useless excitement. It lies with adventionists to premare the vision consecution. with educationists to prepare the rising generation for the functions to be discharged twenty years hence when the excitement of the war will be over. Far harder than any military problems will be the industrial, commercial and race problems of the future. Pre-eminence in war is no preparation for pre-eminence in time of peace. Japan has proved herself to have been well equipped for war. Is she equally well equip-ped for holding her own against her well educated and highly developed rivals?

While writing thus the Kyōikukai is careful to add that keen interest in the success of Japanese arms is natural and may be encouraged, but the nation must not get crazy over the war and neglect everything else. The Kyöikukai states that according to its prediction some months ago the Mombusho has failed to supply the Primary Schools with the text-books needed for the new school year that began in April. The Department says that there has been delay in the trans-port of the books, but the Kyōikuhai in reply to this observes that the Middle Schools have all managed to get their books delivered in time despite railway irregularities.

In the April number of the Kyoikukai that much discussed question, the teaching of morality in schools, is treated in an article entitled Shūshiu Kyōiku no Gokai (Misunderstandings respecting the Teaching of Morality). The writer says that all educationists and all scholars are agreed in thinking it an entire mistake to try and teach morality principally by means of text-books. Instructors in morality should themselves be models of virtue, and they should be allowed to teach the subject in any way they think best. Instead of this, every primary school is saddled with certain text-books and the teachers engaged to give instruction in practical morality

are expected to expound these books; and there their duty ends. According to this system the books are regarded as possessing sufficient authority and influence to make it a matter of little moment by whom they happen to be expounded. But this is quite a ridiculous assumption. Real morality can never be taught in this fashion. Nor is this the way that it was taught in this country in former times. It used to be the custom for lecturers on morals to cull from our history passages which describe noble and virtuous actions, that is to say, to appeal to living examples. When this is done and when the teacher himself is a man that is highly respected by the pupils, school instruction on morality begins to be effective. tive. It seems to be the opinion of the Mombu-sho that teaching morality by books is the foreign way and therefore that it should succeed here. How far it answers in the West unbacked by other methods of impressing the minds of the young we are not able to say, observes the Kyō-ikukai, but in Japan it fails entirely and the sooner the Department of Education realizes this

The Kyöikukai, commenting on Russian re-The Kyokekai, commenting on Russian reverses, says that one cause of want of efficiency on the battle-field is the great ignorance of the Russian soldiers.* Few people have any conception, says this magazine, of the extent to which education is neglected in Russia. According to recent statistics, in the whole country the number of boys attending school does not exceed about 3,136,000 and the number of girls is only about 1,507,000.
This shows the stage of civilisation which Russia has reached. Even for men who spend their lives in military service a certain amount of education is necessary to make them efficient warriors.

In the death of Mr. Kudō Kōkan, says the Taiyō, the country has lost an industrious, honest and loyal servant. As a member of the House of and loyal servant. As a member of the House of Representatives, for fifteen long years he discharg-ed the many duties that devolved on him with the most conscientious care. He was always at his post. To him the Diet was everything. In it he lived, moved and had his being. Outside of politics he had no interests. Without brilliant about him that impressed everybody who came into contact with him. And when on March 21st it was announced that he had died suddenly of heart complaint, his fellow-members felt that they had lost a valuable fellow-worker and a true friend. He died at the age of 63; so that he was one of the oldest members of the House. I hough up to the close of life he retained ail the I hough up to the close of life he retained all the vivacity of youth, there never was anything flippant about him. He was one of the most serious of men, who realized that the duties he was called upon to discharge demanded his whole attention. His habits were simple and he disliked showiness of every kind. He was a warm friend of young men and entered into their feelings in a way that is comparatively rare in a man of his ripe years. He was no rare in a man of his ripe years. He was no money-grubber. He was what we may call an upright public man, who served the State from a sense of duty combined with a liking for his calling. He desired no other reputation than that to be won by the efficient discharge of the functions of a member of the Diet.

A few months ago the Spectator wrote "The They intend neither to conquer nor to annex the great peninsula, but to govern it as the British govern Egypt." This may be the ultimate intention of the Japanese Government, but as yet there are no plain evidences of the inauguration of

* In an interesting article published in the Fortnightly Review a few months ago entitled "The Stav and his Future" Emil Reich says:—"If the upper class of Slav countries suffers from superabundant intellectuality, the lower class compensates for this by an equally exaggerated extent of ignorance. Among the peasant class there is no intellectual activity whatever The country of the Slav is no country in which to seek the mean, either emotional, intellectual or social. His is the land of extremes. There is no bourgeoiste proper in Slav countries.—(Writer of Summary).

such a policy. It is generally considered that nothing but the appointment of Japanese as heads of the Departments of State can cure Korea of the political maladies from which she is suffering. In the May Taiyō Mr. Katō Masanosuke discusses this subject in an article entitled Tai Kan Saku (Our Policy towards Korea) A gloomy picture, indeed, does Mr. Katō paint. From palace to cottage corruption everywhere. The sale of offices begins at the Court and goes on down to quite menial posts. Equitable taxation under this system becomes impossible, and it is only a question of how much squeezing the peasantry will bear, and according to Mr. Katō they put up with quite a remarkable amount. Mr. Katō attaches no importance whatever to all the promises made to Marquis Itō by the Emperor and by his Ministers. If Japan after the war is over does not take the country in hand the war is over does not take the country in hand and insist on radical changes of administration Korea will go back to her old ways. Having obtained certain promises from Korea, the Japanese nation should at once assert their rights in that country, observes Mr. Katö. What should these rights include? (1) The right of land ownership. (2) The right to take part in the fishing industry on water of the cert. (2) The right to industry on every part of the coast. (3) The right to fell timber and start lines of business connected with forestry. (4) Mining rights. (5) The right to construct railways in any part of the peninsula; and industrial and commercial rights of every kind. But even the granting of such rights to our people would not insure the reform of the Government. To effect this our Government will have to insist on the appointment of Japanese advisers, some to reside in the capital to counsel the central Government; others to reside in the provinces to watch local administration and to superintend reforms. For the total regeneration and reorganization of the civil service system money will be needed. This Japan must be preintoney will be needed. This Japan must be prepared to loan to the country at a low rate of interest. To allow things to go back to the old ruts after the war is over would in view of the present political situation in the Far East be madness on Japan's part, concludes Mr. Katō.

Mr. Goto Shimpei is quoted in the Taivo as urging his fellow-countrymen to spend no more time in talking about Imperialism, colonization, and what is called the world-policy, but to take immediate steps for flocking to foreign countries. Now is the time, says Mr. Gotō, when our arms are successful and we as a nation are on the rising tide. Rapid expansion within the next few years must be resolved on by the nation at large. Go abroad if you want to make the home country really great, says Mr. Goto. Writing to the Taiyo from New York, Mr.

prose, have been practically failures. Though because Mr Noguchi is a Japanese and because many of his ideas are beautiful and his verses smack of novelty and unconventionality, his writsmack of novelty and unconventionality, his writ-ings have been praised by many American and some English journalists, his verses set at defi-ance some of the most elementary rules of English composition. Mr. Segawa tells us that Mr. Nocomposition. Mr. Segawa teris us that Mr. No-guchi has wearied of writing blank verse and has taken to prose writing in New York, where he now resides. On Japanese writers of Eng-lish in general, with the very best productions of which Mr. Segawa is evidently well acquainted, he says:—When I say that there are no Japanese who can write either poetry or prose as it should be written in English I may any agent to be a be written in English I may appear to be a pessimist in this matter, but such is my opinion. Unless a Japanese were born in America and brought up there he could not possibly put Oriental thoughts into English in the way Sir Edwin Arnold did. In transposing English ideas into Japanese we have shown great proficiency; but in our use of foreign languages we ficiency; but in our use of foreign languages we have not as yet displayed any special talent. Mr.

Segawa at the close of his interesting and candid article predicts that it is not in literature, was criticised in these columns some time ago.—
but in science that the Japanese of the future (WRITER OF SUMMARY.)

will make their mark in the world. Alread they have begun to do this. He concludes thus —Kongo Nihonjin ga Beikoku ni oile oi ni chi-teki hõmen ni oite seikõ sen to omowaba, sore wa tashikana kwagaku-teki hõmen de aru to omou. Nihonjin wa sude ni sono tensai wo shomei 😝 shita. Tare ka shorai ni oite zokuzoku to shile Beijin wo odorokasubeki shūsai (秀才) rvo idashi-yenu ka to iu mono so.

Mr. Segawa ridicules the idea that Mr. Yaguchi is a pioneer in English literature and that other Japanese will surpass him in writing English poetry. He is of opinion that Mr. Yaguchi has rushed in where angels fear to tread. Mr. Yaguchi's admirers in this country will no doubt have much to say on the other side. The title of Mr. Segawa's article Nihon wo kasa (堂) ni ki (滨) taru Shijin (诗人), Gakusha, Bunjin,* indicates pretty clearly what in Mr. Segawa's opinion are the actual attainments of Japanese writers of Frankhi harmeins. writers of English in America. It seems to us to be largely a question of standard, Mr. Segawa says that tested by Western standards Japanese writers of English have shown no remarkable German writers of English have snown no remarkable talent. Compared with some French and many German writers of English their productions appear very poor. Mr. Segawa gives a short account of three other Japanese who are engaged in journalistic work in America, all of whom seem to be men of promise. (1) The first of these is Mr. Adachi Kinnosuke, who was educated these is Mr. Adachi Kinnosuke, who was educated at the Vanderbilt University. For a short time he was the editor of a small newspaper. He subsequently married an American lady, and moved to San Francisco where he started an English magazine, which, however, was very much of a failure. What he has published in English has been mostly translation. Mr. Adachi writes idiomatic English, says Mr. Segawa, but he lacks originality. Comparing him with Mr. Vaguchi we may say that whereas Mr. Adachi is well versed in the forms in which thought vaguent we may say that whereas Mr. Adacht is well versed in the forms in which thought should be expressed in English, he is without ideas of his own; Mr. Yaguchi, on the other hand, has original ideas, but not the power of stating them in idiomatic English. Beyond these two there are really no Japanese literary men in America worth mentioning, says Mr. Segawa (Zenki (前 配) ni nin vuo navoite wa toritatete kakubeki hodo no hito wa nai). But in New York during the past few years two young Japanese have occasionally given signs of a certain amount of literary ability. I refer says Mr. Segawa to Mr. Yabe Yaekichi and Mr. Kaneko Kiichi. The former has been editing the newly started journal Japan and America;† the latter has figured as a strong socialist. Mr. Yabe has spent Segawa Seidan, B.A., after giving a short sketch a great many yeats in America, having entered of the life and reviewing the poetry of Mr. Noguchi Yone, and after noticing the careers of several other talented Japanese who have settled in America, goes on to observe that judged by anything like a fair standard the Japanese attempts to write English poems or even first-class English deal of journalistic work. Mr. Kaneko was proceed that the standard the filters. The whole process the standard transfer of the standard Since the war broke out he has obtained a good deal of journalistic work. Mr. Kaneko was originally a graduate of a Tōkyō Divinity School and when he first arrived in America he wrote much about Christianity, and was then highly praised by the Literary Digest; but recently he has quite given up writing on religious subjects and to the discussion of social topics. As a writer he aims at simplicity and lucidity. His style is that of the daily newspaper, and it is said that for years he has perseveringly studied leading articles with a view to mastering the art of stating fetters as clearly new consistent as persevering the art of stating

acts as clearly and concisely as possible.

Next to the article we have just dealt with stands a contribution from the pen of this very Mr. Kaneko written in New York for the Taiyo entitled Beikoku Shugaku ni tsuite no

* "Poets, scholars, and literary men who have adopted Japanese Costume (lit. "used Japanese as a hal)."
The reference is not only to Japanese writers in English, but to foreign writers like Sir Edwin Arnold and others who have made literary capital out of Japan; who have sought to attract readers by inter-

zakkan (Things that have struck me connected with study in America). In this article, which we have no space to deal with here, Mr. Kaneko supplies a large amount of valuable advice to Japanese young men who wish to complete their studies in the United States, pointing out the best schools to attend and the dangers and inconveniences which students must be prepared to en-

明治廿五年三月廿日第三種郵便物館可

As is well known to many of our readers, the Sanseidō makes specialty of dictionaries and school-text-books. This publishing house certainly does succeed in pouring out a number of dic-tionaries which are a marvel of cheapness. But the paper used is most inferior and the type is usually that known as No. 7, which when printed on bad paper is very difficult to read at night without a magnifying glass. As to the actual compilers of these many dictionaries nobody seems to know of these many dictionaries nobody seems to know who they are; for as a rule the persons whose names are given on the title page do very little indeed towards the compilation. The Japanese language is rich in terms wherewith to describe functions that may involve much labour or none at all. A couple of years ago the Sanseidō gave us a very handy little dictionary called the Shinyaku Eiros Jilen, noticed in these columns at the time. The title-page was adorned with at the time. The title-page was adorned with the names of six very well known scholars, who were said to be joint-compilers (共編) of the work, whatever that term might mean. We have work, whatever that term might mean. We have before us now a new Japanese-Chinese Dictionary called Kanma Daijiten, which was published by the Sanseidō last year. For fullness and cheapness combined it is said to have no rival in the market. The size of the page is 8½ inches by 5½. Including valuable appendices this lexicon covers about 2,000 pages. The work has been covers about 2,000 pages. The work has been compiled under the supervision (Kanshū), we are told, of three very famous Chinese scholars, Doctors Shigeno, Mijima and Hattori, and a preface penned by Prince Konoe ornaments the opening pages. Notwithstanding the smallness of opening pages. Activities and the statement of the type, we have no hesitation in recommending this lexicon to foreign students of Japanese on account of the enormous number of jukuji or linked ideographs in common use that it contains. ideographs in common use that it contains. The work may be described as a boiling down of the Köki-jiten, the great progenitor of all Japanese ideograph lexicons. The jukuji are arranged under the principal of the two ideographs. Thus 六天, 九天, 半天, will all be found under 天 ten; Sonshitsu under 失, shitsu, and so on. The explanations given through your phase to the son the contained the son through the son throug explanations given, though very short, are to the point. Thus 凡夫 bompu, is given as tsune, nami no otoko. The single characters are all arranged under the roots to which they belong, arranged under the roots to which they belong, following in the order of number of strokes. The jukuji are given in no special order.

One has to run over them till the eye lights on those sought for. The dictionary has one great defect. It does not give the pronunciation of both ideographs where there are two together. This necessitates in many cases the looking up of the second character under its radical to find out how it should be pronounced, and even that is not a sure guide, as ideographs and even that is not a sure guide, as ideographs when combined are often pronounced in a special manner. This is the case with numbers of Buddhist terms like A AB, Byōtō, for example. But all things considered, the Sanseidō has given us in a single volume a vast amount of highly technical information on one of the most complicated of Oriental languages. The printing is so small that on some pages will be found explanations of from 50 to 100 jukuji. Taking the average number of characters explained to be 40 per page, not a high estimate, the lexicon would page, not a high estimate, the lexicon would contain explanations of some 80,000 ideographs; Fusan. Going back to Hasama's early days, we and all this is supplied to the public for 4 year. find that he came from Kishi, as did Ioi Chotaro The lexicon is bound in whole leather. The himself the present head of the Ioi firm. Mr. scholars who have lent their names to the work Hasama is an entirely self-made man, having are of course in no sense responsible for its con-

phers of note. It is this utilization of the labours of others that enables the Sanseido to supply the public with so many cheap dictionaries. Did the work include the chief modern jukuji, it could not have been put together without much original investigation, which would have greatly enhanced the cost of compilation. Comparatively few modern technical terms are to be found in it—a proof that it is principally a reprint of matter contained in old lexicons.

The Jitsugyō no Nihon in an article entitled "Korea is Japan's Stage" gives an account of the progress of Japanese business in the Peninsula. Before doing so it points out that no foreign country offers so many advantages to Japanese settlers as Korea. The climate suits the Japanese. settlers as Korea. The climate suits the Japanese. There is no overpowering competition there such as is encountered in the West and even to a certain extent in China. At present there are some 50,000 Japanese in Korea, but this number should be multiplied many times over before very long, says the Jitsugyō no Nihon. The chief long, says the *fitsugyo no Nihon*. The chief centre of Japanese commercial and industrial enterprise is Fusan. The number of Japanese in Chemulpo does not exceed about 5,000, and the Japanese settlement there grows very slowly, but at Fusan during the past few years the Japanese population has been increasing at such a wonderful pace that a Japanese residing there to-day hardly knows that he is in a foreign country. Japanese point of view. (1) Its propinguity to Japane. So close is it that illiterate people in Kyūshū often address their letters, "Fusan, Nagasaki-ken." (2) The excellence of the Fusan har-bour compared with such harbours as Chemulpo. In the latter harbour there is a great difference In the latter harbour there is a great universe, between the high and low water-marks, but the difference in Fusan is almost imperceptible, and the water is deep enough for very big white to anchor quite close to shore. (3) The ships to anchor quite close to shore. (3) The Jupanese traders in Fusan are real men of business; not mere speculators and adventurers like so many of the Japanese in Chemulpo. (3) The port is so situated that the chief imports and exports of the pointsula find their way there. (5) The new Seoul-Fissan railway has considerably added to its importance. The port is to Korea what Shanghai is to China. For the above reasons the number of Japanese who have been success. the number of Japanese who have been successful in business in Fusan is much larger than that of those who have done well in Chemulpo. But there is one man in this town who is universally admitted by both Japanese and Koreans to have scored a greater success than anybody else, and that is Mr. Hasama Fusatarō, who is known in Korea by the name of Bakukan-kon. Bakukan is the Korean pronunciation of the ideographs 追聞, pronunced Hasama by the Japanese; and the Kon is the Korean pronunciation of 🔉 , a title of respect affixed to the merchant's name by the Koreans. The history of this great merchant is of considerable interest. We have only space to give part of it in this Summary. In Fusan he represents that old, well known Osaka mercantile house Ioi (五百井). The loi house has a very large trade with Korea, having established no less than six branches in the peninsula. Mr. Hasama manages the whole of these branches. He is in reality, though only a managing clerk, a bigger man than his employer. The house of Ioi Chohei is run on employer. The house of for Choner is run on a capital of about 300,000 ren, but Mr. Hasama owns property worth 500,000 yen. The rapid manner in which he became wealthy was owing principally to his investments in land in Fusan and to his connection with a great deal of the Japanese trade and industry of the place. There is hardly a company of any kind but his name is connected with it. He is the Shibusawa of Fusan. Going back to Hasama's early days, we find that he can be a few Vishing edid to 15 Ch55x5

house pulled itself together and was the first big mercantile firm to open up trade with Korea at the beginning of the *Meiji* era. For thirty long years has Mr. Hasama superintended that business and it is owing to him that it has in every part of Korea been so successful. Not only the house of Ioi but the Japanese nation owes much to this remarkable man, for it is largely through his energy, talent and indomitable perseverance that Japanese business has made such wonderful strides in Fusan during the last four or five years.

AMERICAN TOPICS.

Dakota divorces are growing in disfavour in the Eastern states. The Supreme Court of Iowa the Eastern states. has followed the example of that of Massachusetts by refusing to recognize them as valid.

Vice-Governor Ide of the Philippines says it is proposed to replace gradually the customs duties with domestic taxes, with a view to ultimate free trade. There will be heavy taxes on tobacco, liquor, corporations and banks, and a poll tax.

In his cross-examination at the trial before Supreme Court Justice Davis in New York of the suit brought by Moritz and Carl Ernst, as stockholders, for an accounting from the officers of the American Spirits Manufacturing Company, Theodore H. Wentworth, the Secretary of the concern, testified that the actual cost of manufacturing various brands of whiskey varied from actual cost of the concern, testified that the actual cost of manufacturing various brands of whiskey varied from actual cost of the concern testified that the actual cost of manufacturing various brands of whiskey varied from actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the actual cost of the concern testified that the concern te turing various brands of whiskey varied from 12 to 13 cents a gallon.

The gross postal receipts at the fifty largest post offices in the United States for March, 1904, as compared with March, 1903, aggregated \$6,458, 301, a net increase of 13 per cent. The largest percentage of increase was more than 38, at Los Angeles, and the only decrease was 3 per cent., at Jersey City. New York's receipts were \$1,384, 175, or 15 per cent. increase, and Chicago's \$1, 067,468, or almost 14 per cent. increase.

Mr. C. M. Schwab, formerly president of the United States Steel Cotporation, is quoted as saying that while the steel situation is much improved as compared with the beginning of the year, it is nothing like the trade of the past two years. Mr. Schwab is a firm believer in the revival of business after the presidential election. He says that the railroads and all other consumers of steel and iron have held back orders, and there is much work to be done all over the country by

Captain James Hall, for many years commodore of the Pacific Mail Steamship Company's fleet, died at his hone in Braintree, Mass., on April 22, aged 90. He followed the sea for fifty-five years, from the age of 13, when he shipped before the mast, until his retirement in 1881. Hall became captain of an East India merchantman, and to the Amur river. After the Pacific Mail Conpany was organized by Commodore Vanderbilt, Captain Hall was given command of one of the steamers. He was retired in 1881.

Four young society men of Reading, Pa., were snart enough to beguile the souvenir fanatics of New York into giving them nearly \$2,000 for a carload of worthless slag. That was almost two years ago, but the secret never leaked out until this week. Having spent the \$2,000, the quartet made plans last month to renew their operations on visitors to the St. Louis Fair. They intended to unload on the visitors to the fair a lot of slag as lava from some famous Japanese volcano, but they have been betrayed. These four young men are the sons of wealthy fathers and did not need the money, but they wanted to earn some money and feel independent. Just after the Mont Pelee eruption these youths bought a carload of slag and took it to New York and retailed it as Pelee lava, at store they rented on Broadway. A are of course in no sense responsible for its contents. The compilation has undoubtedly been done by a number of copyists, who have culled house. He grew up alongside of Chōtarō, done by a number of copyists, who have culled his confidence and together the two slag from standard dictionaries the definitions that are given. Our opinion is that most of these definitions are thoroughly trustworthy, having originally been written by Chinese or Japanese lexicograthe young men on the St. Louis Fair visitors,

Mme. Calve on April 22 bore the brunt of a hose attack intended for a band of college students and with wet garments went to her dressing room. She appeared later as *Carmen*, and, in spite of her ducking, sang with accustomed fervour. Her coming had been advertised far in advance, and coming had been advertised far in advance, and at least 300 Yale students went this evening to the stage door of the Hyperion Theatre, New Haven, insisting that they be hired as supernumeraries. The manager selected twenty-five, and hinted that the others might depart. They declined to go and insisted that they must appear on the same stage with Calve. To prove their fitness they sang the Toreador song and various chouses of Rizet with a desfening effect. When choruses of Bizet with a deafening effect. When Calve's carriage arrived the students made way for it. At this point an idea occurred to the stage carpenter, and he got out the stage fire hose and turned on a stream of water. Calve left her carriage just in time to get the full force of the water intended for the students. She was drenched, and said things in French. students removed their hats and gave her three cheers and sang for her. The stage carpenter apologized and the incident was closed.

Street railways and traction lines-classified as city, suburban and inter-urban—in the United States at last accounts represented a total of 24,561 miles of track, an increase in nine years of 11,384 miles, or 86 per cent. This is a wonderful growth, says the Railway Age, although it is to be remembered that the mileage of track words be remembered that the mileage of track, much of it being double track on city streets, is far greater than the length of line—the basis on which steam railway mileage is figured. But still more significant are the figures showing the change in the character of street railway propulsion during the period from 1894 to 1903. Thus duminy roads have dropped from 409 to 142 miles, a decrease of 267 miles; horse railways from 1,950 to 281, a decrease of 1,668 miles, and cable miles from 578 to 267—decrease, 310 miles; while electric railway mileage has jumped from 10,238 to 23,869, an increase of 13,631 miles, or 133 per cent. It is gratifying to find that horse and mule power has decreased from 45,353 to 7,923, showing that 37,430 of those noble and ignoble animals have been put out of commission since 1894. Dummies and locomotives have been displaced to the number of 2, 132, only 475 remaining in street railway service. Motor cars have increased from 12,563 to 52,119, while other passenger cars have decreased from 30,857 to show a total of 65,420, an increase of 22,000 in number in nine years, while the increase in capacity has been still more significant.

The Frankfurter Zeitung in an editorial, states that the Panama canal treaty has been ratified at Washington, that thereby the legal basis for the construction of the canal from the Atlantic to the Pacific has been created, and that the great work can be completed in a comparatively short time. "It is perhaps pertinent," the paper adds, "to recall what Goethe said concerning these matters. During a conversation with Eckermann in 1827, with reference to Humboldt's travels, he said:
"This much is certain: If by a crosscut of
this kind it could be accomplished that
vessels with all sorts of cargoes and of every
size could go through such a canal from the Gulf with reference to Humboldt's travels, he said: This much is certain: If by a crosscut of this kind it could be accomplished that vessels with all sorts of cargoes and of every size could go through such a canal from the Gulf of Mexico to the Pacific ocean, quite incalculable results would follow for the entire civilized and uncivilized human race. I, however, would be surprised if the United States would miss the chance to get such a work into her hands. It is to be foreseen that this young State, with its decided tendency toward the west, will in thirty to forty years have also taken possession, and will have populated, the large areas of land on the other side of the Rocky mountains. It is furthermore to be foreseen that in this entire coast of the Pacific ocean, where nature has already created the most roomy and safest harbours, in course of time very important taken idea. The Chinese are slow, but that is a mistaken idea. The Chinese are not at all slow. As commercial towns will carry on a large traffic between China and the East Indies with the United States. In such a case it would not only

ment are much less in proportion to the popula-tion than those of many other of the leading nations of the world. This fact is shown by a statement just published by the Department of Commerce and Labour, through its Bureau of Statistics. It shows that while the expenditure of the United States, with 80,000,000 of people, is \$640,000,000, that of the United Kingdom, with \$2,000,000 of people, is \$898,000,000; that of France, with 39,000,000 people is \$695,000,000; that of Germany, with 58,000,000 people, is \$553,000,000; while in practically every country aside from China and India, with their enormous population, the per capita of government expen-ditures is greater than in the United States. Even in the case of Russia, with its population of 141,000,000, the per capita of government expenditure is about the same as that of the United States. The table puts the propulation of all States. The table puts the population of the United States at 80,372,000, the government expenditure in 1903 at \$640,313,000, and the per capita expenditure \$7.97. For the latest avail-able year the United States shows an excess of revenues over expenditures amounting to \$50,000,000.

In a lecture deliverd in New Orleans, Dr. Isadore Dyer, the physcian of the lepers' home of Louisiana and one of the most distinguished experts on this disease in America, after saying there were 3,000,000 lepers in existence, or one to every 500 living persons, announced that in the last two years the problem of curing this dread disease had been solved. In ten years, Dr. Dyer said, ne and his assistants had succeeded in removing every trace of the disease in twelve lepers. In the past two years, since the latter part of 1902, In the past two years, since the latter part of 1902, every case at the Louisiana leper home, except those in the very last stages of the disease, have been improved materially, and in three cases the lepers are almost well, and it will be possible to discharge them within a comparatively short time. Before the recent Berlin conference on leprosy, which Dr. Dyer attended, there had been, he said, a few cases of the disease cured. That there were not more cures was due to the That there were not more cures was due to the fact that the disease was not treated. Treatment means perseverance for years, not for weeks or months. Dr. Dyer expressed confidence that if the treatment of leprosy was begun early enough and maintained long enough, the disease could be cured as easily as any other. In another decade, he said, it will be universally recognized that leprosy is as curable as typhoid or yellow

THE PERIL OF JAPANESE SUCCESS.

FROM THE VIEW-POINT OF COUNT CASSINI.

The following extracts are taken from an interview with the Russian Ambassador to the United States, as published in the N. Y. World under date

of March 20, 1004 :

be desirable, but almost necessary, that merchants as well as war "vessels should be able to have quicker connexion with the western and eastern coasts of America. I therefore repeat that it is entirely indispensable for the United States to make a passage from the Gulf of Mexico to the Pacific occam, and I am certain that she will accomplish it."

The expenditures of the United States Government are much less in proportion to the popula

cesses how will be your obsess later on. Every step she takes shows clearly the danger to civilization and the world's commerce involved in the part which she aspires to play in Asia. A union of Japan and China, with the resitess fighting spirit of the Japanese impressed upon the now placid Chinese, would create a peril such as civilization has not seen for centuries.

"The idea of Japanese success as an end of this war is preposterous. America is getting most of her news from Tokyo, and that accounts for the misleading statements which have converted a few cunning strokes by a treacherous nation into decisive victories. Russia is well able to defend her rights and her authority, and when she strikes it will be in a manner worthy of her strength and dignity.** *

"I have always been told that American sympathy will be found with the nation that stands for peace. You are a commercial nation. Commerce and war do not go together. When the fighting began in Asia Russia was unprepared for war. Iapan had been preparing to attack for many months. Can any fair-minded person have a doubt as to which nation desired war? Russia did everything possible to avert bloodshed. Our Emperor—who has furnished the world abundant evidence of his peaceful and generous ideas—was in full sympathy with the national aversion to a conflict. On the other hand the whole Japanese nation was eager to begin the fight. The truth is that Japan was determined to have a war, made all her preparations and began the struggle deliberately in the hope of gaining a strategic advantage by early action.

"If American sympathy goes with the nation which favours peace, Russia is entitled to the good-will of all Americans.

Russia's "PRIVILECED POSITION IN MANCHURIA."
"Russia's privileged position in Manchuria is the just result of her enterprise and progress. After all,

Russia's "Privileged Position in Manchuria; "Russia's privileged position in Manchuria is the just result of her enterprise and progress. After all, the highest law is the law of human progress. In building her vast railway system across Siberia Russia opened up to civilization thousands of miles of fertile country and furnished a new food supply to the world. That great service to mankind has been recognized fully everywhere.

"It was necessary to find a seaport terminus for the railway and its commerce somewhere in southern waters, free from ice all the year around. A branch of the railway running down through Manchuria to Port Arthur was the natural and obvious development. Russia secured the right to build her railway to Port

waters, free from ice all the year around. A branch of the railway running down through Manchuria to Port Arthur was the natural and obvious development. Russia secured the right to build her railway to Port Arthur through the free and voluntary consent of the Chinese Government. I had the honour to negotiate at Peking for that right and can therefore speak with a complete knowledge of the facts.

"At the end of the China-Japanese war China found herself compelled to cede the Liaotung peninsula and the island of Formosa to Japan and to pay \$100,000,000 in money as a war indemnity. "Russia loaned China \$100,000,000. Russia, also, supported by France and Germany, saved the Liaotung peninsula to China by successfully protesting against the proposed annexation by Japan. The fact that Germany and France could agree upon such a serious matter of international policy ought to be sufficient to prove that the position taken by Russia at that time was just and in the interest of peace and civilization. The presence of an aggressive, ambitious fighting nation like Japan on the Chinese mainland was inconsistent with peace and was obviously opposed to European interest.
RUSSIA SPENT OVER \$300,000,000 IN MANCHURIA. "The Russian railway to Port Arthur was begun in 1805 and the work was pushed through vigorously. The benefits which have resulted to the people of that country may be partly estimated from the fact that up to a year ago Russia had spent more than \$300,000,000 in Manchuria. I know the figures because they were given to me by M. de Witte, the Russian minister of Finance, himself. That immense sum was spent on the railway, or road building, on canals and on the cities. The city of Harbin itself is a monument to Russian enterprise and civilization.

"Ten years ago Manchuria was in many respects

numbering perhaps 15,000 or 20,000. Russia furnished from her army thousands of guards for the railway. This was done with the hearty consent of railway. This was done with the hearty consent or China. The moment these soldiers crossed the frontier into Manchuria they ceased to be a part of the Russian army and became simply railway guards. This was in itself a full recognition of the sovereignty of China, which was respected in every way by

Not only was the railway built, commerce and industry stimulated, roads and cannals and cities built, industry stimulated, roads and cannals and con-but the power of the brigands was completely broken. Russia restored peace and order and gave the means of a prosperous development to Manchuria. That is the record of my country in Southern Asia.

JAPAN AND FORMOSA.

JAPAN AND FORMOSA.

"Now take Japan. Ten years ago she received the island of Formosa from China. It is a rich island. Its tea, camphor, rice and other products yield a wast revenue. What has Japan done for that island? Nothing. During the ten years in which Russia has spent more than \$500,000,000 in improving and developing Manchuria Japan has left Formosa as savage as she found it.

"Not that Japan was financially make to instance."

"Not that Japan was financially unable to improve her new territory. She got \$100,000,000 as the result of her war with China. But she spent most of that

her new territory. She got \$100,000,000 as the result of her war with China. But she spent most of that money on new battleships, cannon and other war materials. She used her funds not to improve Formosa but to prepare for another war.

"I mention these facts merely to call the attention of the American people to Japan's record in Asia as a civilizing power in contrast to the record of Russia. "In the year of the Boxer uprising the Chinese crossed the Amur River, on the northern frontier of Manchuria, and attacked the Russian city of Blagovestchensk. The Russian army punished the aggressors, and, in consequence of that attack and of the disorders which threatened the railway and Russian interests generally, Russia occupied Manchuria, Regular Chinese troops, with their officers, took part in the attack upon Blagovestchensk. That was an act of war. Had Russia desired to extinguish Chinese sovereignty and annex Manchuria to the Russian Empire she could have seized upon that incident as a reason for war with China. The participation of Chinese troops made a clear case. But Russia treated the matter as an incident of disorder and used her forces simply to secure tranquilli y.

"Since her occupation of Manchuria Russia has

case. But Russia treated the matter as an incident of disorder and used her forces simply to secure tranquillity.

"Since her occupation of Manchuria Russia has respected the rights and interests of all nations. She gave to the United States, as to other Powers, what they asked for. The United States declared that its interest in Manchuria was a purely commercial interest. Secretary Hay was vigorous and vigilant. He did everything in his power to safeguard the interests of his country. Russia gave formal assurances that she would respect the rights acquired by the United States and the other nations by treaties with China. She needed no compulsion, for it was her policy to do so. All she claimed was that she occupied a privileged position in Manchuria. That position was recognized by the whole world.

"Russia intended to withdraw from Manchuria, but when the time for the evacuation came China had failed to furnish guarantees of Russia's privileged position is hould be not a word but a fact. Our troops remained in Manchuria.

"When Japan attempted to interfere she was informed that Russia recognized Japanese rights as she recognized the rights of other nations. Japan had no rights or interests superior to the rest of the world. Russia declared that the Manchurian question was a question between herself and China, an independent nation.

was a question between herself and China, an independent nation.

independent nation.

"Japan insisted that Russia should recognize her strategic rights' in Southern Korea. Russia agreed 'strategic rights in Southern Kolea. Russia agreed to recognize the superior position of Japan in Southern Korea with respect to commerce and kindred matter. But Japan insisted upon 'strategic rights.' Her object was to convert Masampilo, ir the south of Korea, into a Japanese Gibraltar com-manding the Strait of Korea. That Russia would not agree to.

JAPAN'S ULTIMATE ABMITION.

JAPAN'S ULTIMATE ABMITION.

"To give Japan command of the trade of the Far East would be unthinkable. It is a question that afferts both Europe and America. Russia has trouble with Japan this year, but next year the United States may have trouble with her. Your commerce in Asia Is growing and must greatly increase in the future. In spite of the many treaties guaranteeing the independence and integrity of Korea, Japan is to-day revealing her true purpose in that peninsula. Her ultimate ambition is an Asiatic league against Europe and America, with a Gibralter at Masampho"

Twelve sho of new cocoons have been put on Kochi market, the quality proving to be ly satisfactory. The nominal price is sen 70 highly satisfactory. per sho-about 133 lbs.

AR ANSWER TO COUNT CASSINI.

By BARON KANEKO

"In relation to the charges that Russia was un "In relation to the charges that Russia was unprepared for war and that Japan took advantage of
Russia's unpreparedness, the facts make this appear
utterly untrue," said Baron Kaneko, in a recent
newspaper interview. "Since last April Russia has
increased her naval strength in Eastern waters by
three battle-ships, with a tonnage of 38,000; one
armored cruiser, with a tonnage of 7,700; five cruisers
with a tonnage of 26,000; one gunboat and two vessels for
laying submarine torpedoes, making in all nineteen
ships, with a total tonnage of 82,000.

SHIPS FROM EVERYWHERE

"Besides the Russian Government ordered of he own fleets, from different quarters of the globe, ships own neces, from different quarters of the globe, ships in total tonnage of 37,740, to be concentrated to the East, though these were afterward called back and did not reach the East.

"At the time of the said."

"At the time of the outbreak of hostilities Russia "At the time of the outbreak of hostilities Russia had a tonnage of 203,785 war vessels in Asiatic waters. In regard to her land forces, Russia had, in addition to her military forces already stationed in Manchuria, an army of 200,000 ready to mobilize in the East. In Manchuria she had between 170,000 and 200,000 men scattered from Vladivostock to Port Arthur, Harbin and other Far Eastern cities. Does not this look like decided preparation for actual war?

"If Russia expected to conciliate and settle the dip lomatic question with Japan, why should she mobilize such enormous land forces and such an enormous fleet of war vessels? Yet they say they were unprepared for war!

pared for war!

"No reasonable man would say that a nation doing

these things was not preparing for war.

"Furthermore, I might give another fact. On Jan "Furthermore, I might give another fact. On Jan. 28 formal orders to prepare for war were actually given by Viceroy Alexieff to the forces on the Yalu River. Then, on Feb. 1, the military commander of Viadivostok notified the Japanese diplomatic agent there that a state of siege might be proclaimed at any moment, and requested him to be prepared to withdraw at any moment.

- PRACEFUL "PREPARATIONS.

"Peaceful." Preparations.

"Are these preparations for war? Such things are not considered necessary when peaceful negotiations are going on. So Russia, outwardly, under cover of the soft words of diplomacy, was making preparations for war on land and sea. Yet they say they were unprepared for war!

"After the Chinese-Japanese war of 1894-5 and the Japanese accessions in the Liaotung peninsula, the Russians said the act of withdrawal from the conquered territory on the part of Japan was necessary and just in the interests of peace and civilization. The occupation of the Liaotung peninsula, according to Russia's custom of war, that to the victors belong the spoils, was just, but three powers protested that for the peace of Asia Japan should return to China the Liaotung peninsula. We followed the advice of the three powers simply and solely to maintain the peace of Asia.

"At that time the whole nation of Japan was appared and state the contract of the three powers simply and solely to maintain the peace of Asia.

peace of Asia.

"At that time the whole nation of Japan was enraged and attacked the Government's policy, but the Government, in spite of opposition by the people, returned to China the occupied territory.

"Here is a very good example the Russian people and the Russian Government will keenly feel. After the Turko-Russian was the treaty of San Stefano was shattered at the Congress of Berlin, when Lord Beaconsfield, representing England, forced Russia to return the territory occupied by her army in Turkey.

"After we returned Liaotung to China, Russia occupied that peninsula. I should like to know if this occupation was in the interests of peace and civilization.

civilization.

THE MENACE TO JAPAN.

"Ever since the occupation of that peninsula by Russia, Korea and Japan have been menaced in regard to the integrity of Korea and the established right and interest of Japan in Manchutia and Korea. Ever since last summer we have tried to settle the contentions peacefully. We tried repeatedly. We proposed settlements, and Russia refused to make concessions. We sent counter-proposals, and they were not accepted; yet we tried and tried again to come to peaceful terms.

"We even went so for as to to propose conditions.

come to peaceful terms.

"We even went so for as to to propose conditions, which, at that time, were considered by European and American nations the most reasonable of terms. Much surprise was expressed that Japan should demand so little from Russia. Our final proposition demanded only one thing:—The recognition by Russia of China's sovereignty over Manchuria. We did not even mention Port Arthur. The proposal was not answered, Russia standing on her previous for the Japanese.

As a matter of fact there was only an ordinary engagement of vanguards from our part, which, as to her position in Manchuria and that all territory in Rorea, north of the 39th degree of latitude be considered from the purpose of discovering the enemy's strength and the direction of their move-

"That is a very strategic zone, and encompasses Gensan, looking toward Japan, and Ping-yang on the western slope, two most important positions, literally cutting Corea in two.

FIGHT FOR EXISTENCE ONLY.

"In regard to the remark that the Japanese

FIGHT FOR EXISTENCE ONLY.

"In regard to the remark that the Japanese are an aggressive people and always eager for war, I will say we have never been inspired to war or fought for the mere thirst of blood. We fought when our national existence was menaced or our national honour was at stake. This was well shown in our history at the time of the invasion of Japan by the Emperor Kubiai Khan, and in the Chinese-Japanese struggle in 1894-5. We were placed in an exactly similar position by the Viceroy Alexteff. We were forced into war, and nothing more.

"Answering the statement that during the last ten years Japan has done nothing for the improvement of Formosa and left that island as savage as she found it, I may say that our Government has spent enormous sums for the improvement of the conditions of the people of that island. We have rebuilt and lengthened the railway, established schools, built harbours and lighthouses, improved agricultural and industrial conditions, inaugurated judicial and administrative systems such as are found in Japan, and no one can say truthfully that Formosa is savage as we found it. I think the American Governor-General of the Philippines and a Congressional committee on Philippine administration that investigated the government of Formosa can testify to what we have done.

"In Europe and America a belief has been expressed that we might take China as an ally and make a Chinese-Japanese league that would realize the much-advertised 'yellow peril.' But we have often announced and informed both Europe and America that we never had nor have now such an idea. We want to fight this war single handed, with no help from China or Korea.

The "Yellow Peril."

no help from China or Korea.

THE "YELLOW PERIL,"

"Why, if we were to take China into this war the cry of 'yellow peril!' would be raised against us. We are not fighting that we may be regarded as a 'peril' to Western civilization, but to maintain the progress and humanity of Asiatic peoples.

"It is said that it is Japan's ambition to make Masampho a Japanese Cibraltar and to menace Europe and America. Let us see who wants Masampho. Every diplomat and strategist in Europe and Arnerica who understands Asiatic politics knows. The Russian Government has taken Port Arthur and

Masampho. Every diplomatant strategist in Europe and America who understands Asiatic politics knows. The Russian Government has taken Port Arthur and Vladivostock. Masampho, at the extreme south of Korea, would be the apex of the strategic wedge that would not only encompass Corea but be a perfect triangle of fortified ports—a danger pointed at the heart of Japan.

"That was Russia's ultimate ambition many times attempted through influence, for Russia has often sought the lease of Masampho from Korea.

"The present war is not the outcome of Japan's ambition to predominate in Asia or to menace the interests or rights of Western powers, because no nation with only 6 00,000 troops on a war-footing would declare war against an enemy that has 4,000,000. No nation would ever think of fighting a nation eight times as powerful. So the fact is apparent that our fight is not for conquest but for national existence and national honour. national existence and national honour

AMERICAN ADVICE FOLLOWED.

"During the last fifty years, since the advent of Commodore Perry, we have followed the advice of the American people and the American Government and introduced every method of Anglo-American civilization, political and social. We have at last attained the present conditions. We are fighting to maintain the progress for which we have striven for

fifty years.

"In the midst of reaping the harvest of Anglo-American civilization we are forced into war, If we are defeated Western progress will end. There will be no further hope of nourishing a Christian civilization on the continent of Asa.—International Eco-

FLOUG'S STORY OF THE YALU FIGHT.

Colonel Ogorodnikoff of the Russian General. Staff, Russian Military Agent in North-China, has placed at the disposal of the N. C. Daily News the following:-

It is necessary to contradict altogether the unfounded report which appeared in Reuter's telegram of May 2nd from London via Bombay about the news reaching Washington, that a great battle had been fought on the Yalu, resulting in a complete victory

ments. After this had been successfully carried out our vanguard, having sustained very insignificant losses, drew away to another position, not engaging in any serious action.

On this very occasion the Japanese have done everything in their power to assist our vanguard to discover what was wanted.

discover what was wanted.

On April 30th the Japanese deployed all their artillery (field guns as well as siege cannons) and were firing aimlessly from 10 a.m. till 5 p.m. On the same day they crossed the Yalu river with a much stronger number than was necessary to attack our small detachment. The next morning the Japanese reopened the bombardment, preparing an attack. In the meantime our detachment ceased firing, as the enemy's strength was discovered in a much more appreciable way and degree than we possibly could have hoped for. Any further action was of course quite useless for us. It is therefore quite ryident that the Japanese had

It is therefore quite evident that the Japanese had an absolutely wrong idea about the strength of our detachment and did not at all understand the object and sense of the action.

And after all that the Japanese had nothing better to do but to assure that the deploy of their artillery was not simless at all and that they gained a com-

As a matter of fact the false and fantastic reports and inventions of some of the newspapers are not worth any attention.

For instance:—How could the fapanese capture 28 guns while we had only 8 in action?

It is rather astonishing how the Japanese Govern-ment allows to publish such stories under the title of "Official News"!

Full particulars about the actions on April 30th and 1st of May have been published already according to our official reports.—Signed by Major-General Floug.

It is difficult to understand, remarks our contemporary, with what object this preposterous dispatch, dated the 3rd instant, was published as a cable message on the 10th.

COUNT CASSINI ON THE WAR.

New York. April 20.
Count Cassini, the Russian Ambassador to the United States, contributes to the forthcoming number of the North American Review an article in which, under the caption of "Russia and the Far East," he makes a statement of his Government's position. After briefly outlining the negotiations which preceded the outbreak of hostilities, the Ambassador says:

After briefly outlining the negotiations which preceded the outbreak of hostilities, the Ambassador says:

"Russia has never ceased to wonder why the idea that she was willing and anxious to make war with Japan became so generally prevalent. The prejudiced minds of those having nothing beyond a superficial knowledge of my Government's position, preceding the unexpected and dishonourable attack upon our fleet at Port Arthur, may dispute the statement that Russia hoped for and tried to maintain peace, but I have no hesitation in making it. If proof of the assertion be demanded, it lies in the simple but uncontradicted answer—Russia was not prepared. For the personal representative of the Russian Emperor to make an admission seemingly so humiliating to the national pride may appear strange and remarkable, but it is made with full appreciation of its importance and significance. I repeat that Russia was not prepared for war because she had no reason to expect war. In her faith that the negotiations with Japan were being conducted by both parties with the object of reaching an amicable and an honourable adjustment of their differences, she was not conscious that the result was to be anything but peaceful." thing but peaceful."

Count Cassini denies that Russia was actuated by designs to possess Manchuria or Kores, by force of arms, and says:

"Had Russia desired war, or even had she ex-pected it, no consideration would have induced her to evacuate Chinese territory, and thus lose the opportunity of ending the war quickly."

opportunity of ending the war quickly."

Concerning the negotiations between Russia and Japan, Count Cassini avers that his Government, in the effort to bring the negotiations to a peaceful conclusion, did all that dignity would permit, and offered to give assurances again, that the sovereignty of the Emperor of China in Manchuria would be recognized. Having made this marked concession, solely in the expectation that the Japanese would accept it the Government prepared an answer, diplomatic in character, that would furnish the basis for the furtherance of the negotiations to a satisfactory conclusion. Before the Russian Minister at Tokyo could deliver this reply, the Japanese answer came, not through the regular channels, but as a torpedo attack at midnight. Thus, now that war has come, Russia does not doubt the issue."

* TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

COTTON DECLARED CONTRA-BAND BY RUSSIA.

London, May 11.

Russia has declared cotton contrabandof-war, because it is used in the manufacture of explosives.

THE JAPANESE LOAN.

London, May 12.

Five million pounds sterling of the Japanese loan were issued in London on the 11th inst. at 931/4.

Viscount Hayashi, Japanese Minister in London, appeared on the floor of the Stock Exchange just as the prospectuses were being distributed, and received a great ova-

The premium has risen to 33% per cent. THE RUSSIAN LOAN.

Foreign tenders for the Russian loan are arriving in Paris, but the form of issue is still undecided. There will probably be a first issue of 24 million pounds sterling and then eight millions

THE JAPANESE LOAN.

London, May 13. The Japanese loan, which is now at a premium of 25%, has been covered twenty-fold and has been closed. The New York section is also over-subscribed and was closed to-day.

DESTROYING DOCK AND PIERS AT DALNY.

Viceroy Alexieff reports that the dock and piers at Dalny have been blown up to prevent the enemy utilising them.

CHINESE LABOUR FOR THE TRANSVAAL.

The convention with China regulating the importation of Chinese into the Transvaal will be signed to-day.

RUSSIA AND THE ANGLO-FRENCH AGREEMENT.

London, May 14.

Russia is the first of the Powers to approve of the Khedivial decree appended to the Anglo-French Agreement. The French Government has requested M. Delcasse, the Foreign Minister, to warmly thank Russia for this fresh and valuable proof of friendship thus given to her ally.

BRITISH REINFORCEMENTS FOR TIBET.

Mr. St. John Brodrick, Secretary for India, speaking in the House of Commons said that the reinforcements for Tibet would consist of four companies of British infantry, four companies of native infantry, and four

THE RUSSIAN LOAN.

A Russian Imperial Ukase has authorized the raising of a 5 per cent. foreign loan of thirty-two million pounds sterling.

RUSSIA'S INTERNAL TROUBLES.

London, May 15.

The Standard's St. Petersburg correspondent says that there are persistent rumours of serious disturbances in Warsaw, and that a high official has been killed.

He adds that the feeling is not decreasing that a successful battle is very necessary

if complete order is to be restored in the interior of Russia.

ANOTHER H-A-L. STEAMER SOLD TO RUSSIA.

Later.

The Hamburg-American line have sold another steamer to Russia.

THE JAPANESE LOAN IN AMERICA.

The Japanese loan has been covered five times in New York.

THE INVESTMENT OF PORT ARTHUR.

Russian despatches show that the investment of Port Arthur has fairly begun.

A HOLY WAR.

London, May 16.

Reuter's representative at Gyangtze tele-graphed on the 13th May that the Lamas are preaching a holy war against the British. AUSTRO-HUNGARIAN BUDGET.

The Budget for 1905 submitted to the Austro-Hungarian delegation includes some exceptional military expenditures, including an extraordinary credit for 3½ millions sterling, which includes two millions for field-guns. The total required for the Navy is five millions, but this is extended over

THE RUSSIAN WOUNDED.

several years.

The Russian Red Cross Society has received a telegram from its principal representative in the Far East testifying to the Japanese care of the Russians wounded at the battle of the Yalu.

THE FRANCO-RUSSIAN ALLIANCE.

London, May 17 M. Doumer, President of the Budget Committee, in a speech made at a banquet strongly condemned the questionable attitude of some Frenchmen toward the Russian Alliance. He said that it was impossible for any Frenchman to side with a Yellow race in a struggle between western and eastern civilizations.

AN AUSTRIAN OPINION.

M. Gulowchowski, addressing a deputation at Buda Pest, said that the situation in the Far East was gloomy and that it is impossible to guage the duration of the struggle. In view of the wide interpretation of the question as to what constituted contraband-of-war, he suggested that some international resolution regulating the question be adopted by mutual agreement.

THE POWERS AND TURKEY.

The Powers have warned Turkey of the serious danger she exposes herself to if she fails in her reform programme.

CHINA'S NEUTRALITY

It is officially announced that China has instructed her representatives to assure the Powers that come what may she intends to strictly adhere to neutrality

RUSSIA'S SUSPICIONS.

London, May 18.

Three Lascars belonging to the crew of the British steamer Camrose, and also some members of a German steamer, have been arrested at Kronstadt on suspicion of being

FLOUG ON THE JAPANESE ADVANCE.

General Floug telegraphs that the Japanese advance on Liaoyang is characterized by indecision. He supposes that the objective principal of the Japanese force is a point beyond Haicheng.

FUNERAL OF STANLEY.

The funeral service at the burial of the late Sir Henry Stanley, the explorer, in Westminster Abbey was a great ceremony. The King and Queen, the King of the Belgians, and others were represented.

THE P. & O. CONTRACT.

The British Government has arranged to

extend the subsidy for the P. & O. mail services until 1908, but with the proviso of an acceleration of 24 hours throughout. The Company is to receive £330,000. Meanwhile the Government will ascertain whether any further improvements are not obtainable through the means of open tenders.

GREAT BRITAIN AND TIBET.

Lord Harwicke, speaking in the House of Lords in reply to Earl Spencer, said that the hostility shown to the British Mission to Tibet had proved the justification of the Government's policy, and that we had Government's policy, and that we had been confronted by a danger still more serious. It is anticipated that a declaration of policy will be made on the 11th of June, but this was in no wise a bar to an advance on Lassa. It is admitted that we are now at war and that we were driven to our present position by force of arms; but the Mission had shown that Great Britain was not to be trifled with.

A DISGRACED GENERAL

London, May 19.

General Sassoulivitch, who was in com mand of the Russian forces at the Yalu, has been relieved of the command of the 2nd Siberian Division, and General Keller replaces him.

DEATH OF MR. KESWICK.

Mr. Keswick, of Messrs. Jardine, Matheson & Co., has died at Calcutta.

Saigon, May 15

The strike at Marseilles is over, the strikers having accepted the terms proposed. PLAGUE AT ADEN.

Aden is officially declared infected with plague.

ATTACK ON DALNY.

· Saigon, May 15.

Chefoo-The Japanese are investing and bombarding Dalny.

NEWS FROM PARIS.

Saigon, May 18.

The Chamber, returning from the Easter holidays, has resumed its sitting with calm. At St. Petersburg it is believed that the siege of Port Arthur is imminent. Japanese will probably make an attack soon.

(OFFICIAL REPORT RECEIVED AT THE JAPANESE HEAD QUARTERS.)

ABUSING THE RED CROSS FLAG.

When a Japanese detachment approached Pulantien on May 6th, a train without special marks, as required by Red Cross Regulations, was sighted running northward from the direction of Port Arthur. The Russian soldiers in the train immediates the control of the result ately fired upon the Japanese detachment, to which the latter responded. Then the train halted suddenly and a Red Cross flag was hoisted. Whereupon the Japanese detachment ceased firing and were about to make an investigation when the train started at full speed and escaped.

(RECEIVED AT THE FOREIGN OFFICE) NEWCHWANG.

According to the statements of the crew of a foreign vessel which reached Chefoo from Newchwang on the 12th instant, the Russians have withdrawn from Newchwang; leaving only about a thousand men and a few field-guns. Russian officials are still carrying on the administration but are expected to hand it over soon to the Chinese.

Wechnesoay night.

It is officially reported at the War Department in Tokyo that on the 16th inst. at the Hatsuse's crew. The fog has not yet cleared.

No. 5. Received at 12.48 p.m., May 18.

Yesterday the fog cleared and all the Yesterday the fog cleared and all the Kiulichwang, which is about 2½ miles N.

(RECEIVED IN TOKYO) FATAL RAILWAY ACCIDENT.

It is reported from Shan-hai-kwan that on the 6th inst. a train travelling from Liaoyang to Harbin ran off the rails at full speed. Twenty soldiers were killed and 200 wounded.

ALEXIEFF CALLS ON THE CONVICTS

On the 15th April Viceroy Alexieff issued a proclamation in Saghalien inviting the convicts to volunteer and promising any who responded that they should have their sentences reduced and granted freedom of residence.

THE INVESTMENT OF PORT ARTHUR.

An official despatch from General Floug at Mukden to General Dessino at Shanghai shows that on the 11th inst. a large force of Russians moving out from Port Arthur drove the Japanese from the railway line at Pulantien, and temporarily restored communications, but the Japanese subsequently recovered the position.

(FROM THE "ASAHI SHIMBUN.") REPORTS FROM GENERAL FLOUG.

General Floug telegraphs from Moukden on the morning of the 16th May, saying that on the 12th inst. a battalion of Japanese Infantry and two squadrons of Cavalry took possession of the town of Pulantien, and hat night' captured the station. The train from Dalny had to put back. On the night of the 13th the Japanese searchlight v turned upon the neighbourhood, and the Japanese appeared at Whasantien and wrecked the railway. It became necessary to close the stations at Whasankau and Wangchailien.

There is no change in the position on the East (that is the First Army). Only cavalry outposts are seen here and

The bandits at Sinwanchao and at Lienshan are very active and are engaged in breaking the field communication.

The Chinese 27 miles south-west of Kwantien have begun to show lawlessness against Russian converts.

Telegraphing from Moukden on the 16th at 5 p.m., General Floug says:—On the 12th and 13th reports from Fenghwang show that the enemy is advancing very slowly, more as a demonstration than as a real movement, in the direction of Liaotung. His main body seems to be advancing on Kaiping and on Haicheng. Moreover he is Kaiping and on Haicheng. massing a strong force to the northwest of Takushan.

With reference to the movements of the bandits between Sinwanchao and Lienshan, measures have been taken to suppress them but after several encounters the Cossacks

had three killed, 11 wounded, and 4 missing. On the 14th inst. 300 bandits attacked the Russian mines at Yengtai and after killing 30 people withdrew.

At about 12 miles to the west of Liaoyang, a large body of bandits attacked the railway. The Guards sent out along the Sungari to the western districts have been compelled by attacks of bandits to retire to

THE JAPANESE ON LIAOYANG.

Wednesday night. It is officially reported at the War De-

E. of Kinchow. Our troops then occupied the heights from that place to Chinkiaping, which is about 31/2 miles east of Kinchow. The enemy after retiring from this position opened fire on us with his artillery, which was posted on Shang-kinshan. Shang-kin-shan is in the neighbourhood of Tahoshang.

The enemy's forces were three batallions of Infantry with 8 guns. Our losses in the engagement were 146 killed and wounded. No officers were killed but 9 were wounded, 3 severely.

Note—These names will possibly puzzle our readers, but the gist of the matter is that the Japanese have turned the position on the Kinchow isthmus and are now near the centre of Talien Bay.

LOSS OF A JAPANESE BATTLE-SHIP AND A CRUISER.

A HEAVY DEATH-ROLL

The following reports have been received from Admiral Togo:—

No. 1. Received at 10.05 a.m., May 1 I regret greatly to have to report a third calamity. On the 15th inst., at 5 a.m., Admiral Dewa reported by wireless telegraphy, that at 1.40 a.m. to-day the Third Squadron, which was on its way back from the blocking operations, had reached the north of Shantung promontory, when, during a heavy fog, the Kasuga struck the Yoshino on the left side near the stern. The Yoshino filled quickly and sank. The Kasuga saved 90 of her crew. The fog has not yet cleared. I can only add an expression of my profound

regret at this calamity. Received at 6 p.m., May 19 To-day the most unfortunate accident that

has yet happened to the Fleet has to be re-ported. At 5 a.m. the Hatsuse, the Shiki-shima, the Yashima, the Kasagi and the Tatsuta were watching the enemy's squadron when the Hatsuse struck a mine. helm was smashed and she signalled asking that a steamer should be sent to tow her. When the steamer was about to be despatched the Shikishima signalled that the Hatsuse had sunk. I beg to express my profound regret at making this report. All proper measures were taken to lessen the calamity. The thick fog has not yet lifted.

o. 3. Received at 10.30 p.m., May 15. The Shikishima has just returned to report the fact of the Hatsuse's loss. The whole of the destroyers and two torpedo-boats left this at 7.30 p.m., for Port Arthur to meet the enemy's destroyers and assist the crew of the Hatsuse.

No. 4. Received at 4.37 p.m., May 16.
The place where the *Hatsuse* struck a mine was about 10 miles S.E. of Liaotishan There was no fog at the time Promontory. and none of the enemy's destroyers were in sight. It would therefore appear that either the enemy placed a mine in this district, or else employed a submarine. The Hatsuse was struck a second time, 30 minutes after, and sank immediately, but the Shikishima, the Yashima, the Kasagi, the Takachiho and other ships saved Admiral Dewa, Capt. Nakao, and 300 others. At the time the Hatsuse sank, 16 of the enemy's destroyers came out and attacked our ships, but were driven off by the Akashi, the Chiyoda, the Akitsushima the Oshima, the Akagi, the Uji and the Takasago, and it was

that the disaster to the Hatsuse was caused by her coming in contact with the enemy's

Note—The Hatsuse was a 1st class line-of-battle-ship of 15,000 tons displacement. Her full comple-ment was 741 men, therefore some 400 have been lost. The Voshino was a 2nd class cruiser of 4,180 tons and her full complement consisted of 360 men, therefore some 250 have probably been lost.]

(From the "Jip Srimpo,") RUSSIAN STRATEGY

It is reported from St. Petersburg that General Kuropatkin intends to withdraw his forces to Harbin where he will await the arrival of re-inforcements. He expects that the Japanese will take six weeks to reach Harbin. The Russians believe that the latter will first attack Port Arthur.

(FROM TOP 16 American)

(FROM THE "ASAHI SHIMBUN,")

OPINION IN RUSSIA

According to latest intelligence, all the newspapers in Russia pretend to feel satisfaction with regard to the progress of the war during the three months past, Public opinion in St. Fetersburg, however, takes a pessimistic view of the position of General Kuropalkin. GERMAN EXPERTS ON RUSSIA'S STRATEGY.

German experts agree in critizing unfavourably the imperfect preparations and the defects in strategy displayed by the Russians.

RUSSIAN OFFICERS IN MANCHURIA.

The Russian Government is believed to be making changes among the high officers in Manchuria. THE SUBMARINES.

The Russian naval authorities are stated to intend sending a number of submarines to Vladivostock.

(FROM THE "N.-C. DAILY NEWS.") BRITAIN'S GREAT ACHIEVEMENT.

Mr. Balfour referred to the enormous value of the Anglo-French Agreement, which he believed would

What might seem at first sight, he said, to be a say diplomatic construction, would become a solihasty diplomatic construction, would become a soli-dified bulwark against an invading tide of war, resisting all the changes and chances besetting international arrangements.

NEWSPAPER PANEGYRICS.

The Daily Telegraph remarks that the campaign has been conducted with a brilliance almost unparalleled in the history of war. Japan's success is; due to a consummate combination of naval and military action which even England has never rivalled. The successess achieved in the last three months are more marvellous than those of Germany in 1870. London, May 9.

The Standard declares that there have been few finer feats of war than the blocking of Port Arthur.

THE MORALIST.

The Daily News says that the fight on the Yalu Seems to have decided the possession of Southern Manchuria. Russia is rapidly reaping the effects of her Imperialisms.

THE MASTERLY STRATEGY OF THE JAPANESE.

There is a universal chorus of eulogy of the master-strategy of the Japanese, combined with swift unflinching execution

miration.

APPREHENSION IN RUSSIA.

The Japanese successes have caused a feeling of apprehension in Russia.

The General Staff declare that the latest developments assure a long and bitter war.

DISEASE IN THE RUSSIAN ARMIES.

There are reports from various sources that dysentery, smallpox, and typhus are raging among the Russians in Manchuria.

THE RUSSIAN HEADQUARTERS MOVED TO MUKDEN.

The Russian General Staff has left Linoyang for

petroleum were found ignited in a building in which high explosives were sto

THE PROTECTION OF NEUTRALS AT NEWCHWANG.

America and Great Britain are considering whether ey shall dispatch gunboats to Newchwang to they shall dispatch gunboats t protect the people against bandits.

RUSSIAN RESERVISTS CALLED OUT.

London, May 11.

An imperial ukase has been issued calling out large bodies of reservists in western Russia.

CAUTIOUS CRITICS.

Military critics in England deprecate over-hasty conclusions based on the Japanese successful operations so far. They emphasise that battles mainly decide campaigns and approve of General Kuropatkin's policy of withdrawal.

JAPAN'S PROGRAMME.

In an interview with a representative of Reuter, Baron Suyematsu, the Japanese statesman, declared that Japan's first and chief aim was to push Russia

that Japan's first and thier aim was to push Kussia back as far as possible. Russia will never be allowed the least political or territorial hold over Korea, whose future status will

be that of a Japanese Egypt.

Some form of buffer state under Chinese sovereignty will possibly be created in Manchuria.

Japan will regard any breach of the neutrality of China as a calamity. The chief danger of this comes from Russia, who is doing things to irritate the

Baron Suyematsu concluded by saying that no matter what successes Japan achieved, her policy is to ensure absolute freedom to all Powers in the Far East, and no Occidental Power need feel the slightest anxiety that Japan is likely to suffer from awelled hand.

THE MISSION TO TIBET.

London, May 12. The Times in a leading article says that we must go to Lhassa and make our treaty there, and trusts that the Government will recognise this.

THE PERFIDY OF THE CHINESE COMMISSIONER.

The correspondent of the *Times* at Gyangtze wires that the Chinese Commissioner, Ma, deliberately concealed the existence of the Tibetan plot to attack the

mission on the 5th instant.

NARROW ESCAPE OF CAPTAIN PARR.

Captain Parr, of the Chinese Customs Service, who was Joint Commissioner with Ma, has narrow escaped death. His servants were all butchered.

THE PROGRESS OF THE LICENSING BILL. The Licensing Bill has passed its second reading in the House of Commons by 353 votes to 196.

MORE WARSHIPS SOLD.

The Chilean armoured cruiser Esmeraldo, 7,020 tons, built at Elswick in 1897, and the Chacabaco, 4,500 tons, built at Elswick in 1903, have been sold to a New York firm.

THE YELLOW PERIL

The Times, discussing what it describes as the mischievons and dishonest cry of the Yellow Peril raised by the Continental Press, says that only if Japan were confronted by an international boycott, is she likely to make the yellow peril a reality.

No policy could be more fatuous and injust than to exclude her from the sisterhood of civilised peoples, and neither Great Britain nor the United States would lend an ear to such advice.

THE MISSION TO TIBET.

The Tibetans have rebuilt the ruined fort at Gyangte and mounted six guns on it, with which they nost reserved, cannot withhold its tribute of ad-

The Imperial Government have informed the Indian Government that they do not propose to depart in any wise from the policy, as to Tibet, enunciated in the dispatch of the 6th of November last.

ciated in the dispatch of the 6th of November last.

Mr. Brodrick, Secretary of Slate for India, stated in the House of Commons, that unless the Chinese Amban and a competent Tihetan negotiator appear at Gyangtse within a fixed period, we shall take steps to negotiate at Lhassa.

All the necessary steps will be taken to secure our line of communications.

PRINCE ADALBERT AT PEKING.

Peking, May 9 H.I.H. Prince Adalbert of Prussia arrived here by The Russian General Staff has left Linoyang for Mukden.

RUSSIA'S ENEMIES AT HOME.

London, May II.

An attempt has been discovered to destroy Cronstadt Arsenal, Shavings besprinkled with Ministers to-day.

H.H. Prince Adaibert of Prussia arrived here by special train yesterday direct from Taku. He will stay here for ten days and will take trips to the Great Wall, the Ming Tombs, and other places. He will also be received in audience by the Emperor and the Empress Dowager, who received the Foreign Ministers to-day.

EMPRESS DOWAGER TO ENTERTAIN FOREIGN LADIES.

LATEST COMMERCIAL.

IMPORTS.

In Yarns there is nothing doing; prices are nominal, with but little enquiry. Considerable sales of Grey Shirtings have been made from stock at prices below replacing cost. Stocks of Whites are depleted and a few contracts have been made "to arrive" at covering prices. In Fancy Cottons and Woollens nothing has been done and clearances are unsatisfactory.

A fair business has been passing, mostly in Iron and Mild Steel Bars.

The market is weak, with a small business.

Prices are steady with little or no change. The market is inactive, but an advance is expected in anticipation of summer demand.

HUMOURS CHING

SPEEDY CURE TREATMENT FOR EVERY HUMOUR.

Bathe the affected parts with hot water and CUTICURA SOAP, to cleanse the skin and scalp of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply CUTICURA OINTMENT freely to allay itching, irritation, and inflammation, and soothe and heal, and lastly take CUTI-CURA RESOLVENT PILLS, to cool and cleanse the blood. This pure, sweet, and wholesome treatment affords instant relief, permits rest and sleep, and points to a speedy, permanent, and economical cure in the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, eczemas, rashes, and irritations, from intancy to age, with loss of hair, when all else fails.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleaning the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, and for all the purposes of the toilet, bath, and nursery. Millions of Women use CUTICURA SOAP in the form of baths for annoying irritations, inflammations, and excorlations, for too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers.

CUTICURA RESOLVENT PILLS, CHOCOLATE COATED,

Are s new, tastoless, odourloss, economical substitute for the celebrated liquid Cuticular

RESOLVENT, as well as for all other blood purifors and humour cures. Put up in screwcap pocket vials containing 80 doses. Cuticura Fills are alterative, antiseptio, tonle,
and digestive, and beyond question the pures, sweetest, most successful and commenced
blood and skin purifers, humour cures, and tonle-digestives, yet compounded.

CUTICURA REMEMBERS SEE 601, LINGON. Prench Depot 27-66, Charterbouse 80-1, London. French Depot 27-66, Charterbouse 80-1, London. French Depot 27-68 list. Fortus Depot AND Caupe.

EXPORTS.

RAW SILK.

There has been less doing this week and prices are irregular. Filatures for Lyons are the turn cheaper, while those for New York are the turn dearer. Attention is now fixed upon the new crop. Leaf is abundant in all provinces. A few new cocoons have appeared in Idzu and opening prices for cocoons in the worket are about a price of the cocoons in the worket are a price of the cocoons in the worket are a price of the cocoons in the worket are a price of the cocoons in the worket are a price of the cocoons in the worket are a price of the cocoons in the worket are a price of the cocoons in the worket are a price of the cocoons in the worket are a price of the cocoons in the worket are a price of the cocoons in the worket are a price of the cocoons in the cocoons in the for cocoons in the market are about 20 per cent, below those of last season. The present outlook is for plenty of good silk and reasonable prices in the new campaign.

DEATHS

At Bedford, England, ARTHUR THOMAS WATSON, late of Yokohama. (By telegram received May 21st).

At Hongkong, on the morning of 25th May, Alfred B. Glover, of Nagasaki.

On the 26th inst., at No. 127-D Bluff, FLORENCE MANSON, beloved wife of Leroy E. McChesney.

SUMMARY OF NEWS.

Mr. ALEXANDER MCLEAN, Canadian Commercial agent, is expected to arrive at Yokohama in June.

A TELEGRAM from Matsuyama reports that a serious shock of earthquake was felt on May 20th at 5.30 pm.

THE Asahi believes that the Crown Prince will shortly be promoted Major-General and Rear-Admiral.

THE Czar received Mr. Henry Norman, M.P., in private audieuce at the Winter Palace, St. Petersburg, on the 7th ult.

Mr. T. OKAZAKI, manager of the Hankaku Railway Co, Osaka, died of apoplexy on the night of May 22nd.

Six hundred coolies, to be employed on the construction of the Seoul-Fusan railway, left Misumi on May 23rd for Korea.

prisoners arrived on May 25th at Shimonoseki sonous drug.

on their way to Matsuyama where they areto be

THE Bangkok Times hears that the Maha Uparat of Cambodia, brother of the late King Norodom, has been proclaimed his successor.

THE Chemulpo branch of the Mitsui Bussan Kaisha on May 17th exported 487,000 kin of ginseng, valued at about a million yen, to China.

MR. KONDO, of Kobe, purchased the British steamer Westminster, 4,000 tons. She will arrive at Kobe on May 27th when he will take

A TELEGRAM from Saseho reports that a train on the Kyushu Railway was derailed and overturned on May 24th, with the result that several persons were injured.

Armstrong, Whitworth & Co. shipbuilders, of Elswick, Newcastle-on-Tyne, are, it is announced, contracting largely to replace the Russian fleet after the war.

A GAS explosion on May 21st at the Okinoyama coal mine, Yamaguchi prefecture, resulted in two coolies being severely injured. One man is reported missing.

THE Chinese Government has informed the Japanese authorities that the former will not con-sent to the Russian declaration that cotton is contraband of war.

Prince Michi and Atsu (sons of the Crown Prince) who have been at the villa of Count Kawamura, Numadzu, during the winter returned to Tokyo on May 29th.

THE net income of the Domestic Transport Company for the last half year was yen 60,180, and an interim dividend has been declared at the rate of 41/2 per cent.

ADVANCE from the Bank of Japan to the Gov-ernment increased by nine million yen over the amount calculated at the end of last week, making a total of sixty-nine million yen.

THE stock of kerosine oil in Yokohama on May 23rd was 471,110 cases "chester" brand and 139,829 cases "anchor" brand. Sales are reported to be very quiet at present.

SEVEN soldiers belonging to the Fourth Division (Osaka) quarrelled on May 19th with a coolie at Hiroshima and stabbed him to death. They were arrested by the gendarmes.

To economize expenditures during the war, the Yokohama City Office have released thirtytwo employees-14 clerks, 2 civil engineers, 3 interpreters, 10 coolies and 3 boys.

THE British Admiralty have cancelled the orders for the Wivern to be sold, and have directed her to be fitted as a workshop for repairing torpedoboat destroyers on the China Station.

From an Indo-China exchange, it is noted that of the two new French submarines now on their way out, the *Protet* is to be stationed at Cape St. James, and the *Lynx* in the Baie d'Along.

THE Daily Mail, in commenting upon the decline of the birth rate in Australia, tells its readers that if the Australian population does not increase. British power in Australia in doomed.

THE dead body of a coolie was found on May 19th in a grove at Gotenyama, Shinagawa, which belongs to Count Sano. The man is believed to THE fift says that over two hundred Russian have committed suicide by drinking some poi-

THE Rugby Union County Championship was won by Kent, who defeated Durham, the previous year's champions, by a goal and a try (8 points) to two tries (6 points). Kent had not won since 1897, but were in the final last year.

F. FUKUI and his wife, who were undergoing trial in the Tokyo District Court on a charge of having mal-treated their son, 12 years old, were sentenced on May 19th to 8 months' imprison-ment with hard labour and a fine of yen 10 each.

Y. NOBE (34) residing in the village of Tokiwa near Utsupomiya, murdered his elder brother on the morning of May 23rd by attacking him with a hatchet. He afterwards committed suicide with a revolver. A dispute as to succession to pro-perty was the cause.

THE German steamer Quarta, chartered by the Osaka Shosen Kaisha, went ashore on the morning of May 24th off the district of Shimo-etchi, near Matsuyama. The Asahi reports that she grounded at Kurushima strait on her way to Formosa and that the damage seems to be slight.

A SEOUL telegram says that the Governor of Amchong, Pyon-an-do, has been arrested by the Japanese. It appears that this Korean official was employed by the Russian Government as a spy for obtaining knowledge of military move-

In the typhoon which devastated Cap St. Jacques on the 2nd inst. a French soldier and a number of natives were drowned; considerable damage was done to the town. The residence of the Governor-General suffered considerably, and nearly all the European houses were inundated.

F. FUJINO, President of the Hyogo Hospital, Kobe, has been punished with a fine of forty yen for infringement of the medicine regulations. It appears that he prepared a remedy for consumption and sold it by advertising in several papers. The fif says that the medicine was made from dried blood obtained at slaughter-houses with which was mixed guajacol and carbonate of soda,

ACCORDING to European papers Japan has placed large orders both in England and on the Continent for material for the construction of torpedo-boats. The material is to be delivered with the utmost possible-despatch. One British firm alone is said to have received an order for material for the building of ten destroyers.

A TELEGRAM from Takamatsu to the Nichi Nichi says that the Army authorities intend to estab-lish a building in one of the Shioaku islands off Kagawa prefecture, to accommodate the Russian prisoners. For the purpose Mr. M. Akiyama, councillor of the Army, has paid a visit to the islet accompanied by officials of Kagawa

S. Yamagishi, formerly a police officer belonging to the Kanagawa prefectural office, was sentenced on May 19th in the Yokohama District Court to four months' imprisonment with hard labour, a fine of six yen, and six months' police surveillance. He had been arrested by the lsezaki-cho police on a charge of fraud

THE foreign silk traders of Yokohama have long had to complain of the fraudulent practises prevalent among native producers of waste silk, and on the 14th May they formally protested through their honorary secretary, Mr. F. M. Tegner. This warning and protest was received by the Yokohama Cocoon and Silk Traders United and has been duly circulated among the Guild, and has been duly circulated among the silk districts concerned.

OPERATIONS ON THE ROAD TO PORT ARTHUR.

Saturday, May 21.
The official report from the front says that in the fight on the 16th instant at Shihsanlitai, the enemy had 8 quick-firing guns. His force of men is uncertain but there were detachments from the 5th, 14th and 16th regiments of Rifles. The enemy left on the field 30 dead, inclusive of officers. According to the statements of prisoners, the Russian losses exceeded 300. Our field hospital corps is treating 5 wounded, including one officer. The prisoners say that the force defending the Kinchow Peninsula consists of the whole of the Seventh Division and the greater part of the Fourth Division. General Stoessel is directing the defense. Viceroy Viceroy Alexieff left for Mukden at the beginning of the month. In Port Arthur there are 31 Japanese naval men, prisoners, including one officer.

Two of the Tokyo papers report that on the 16th inst. Japanese troops landed at Takushan. We presume that this is the hill called Takushan which stands on Hooer's point, the promontory to the north of Talien Bay.

1. The Naval authorities announce receipt of 1. The Naval authorities announce receipt of a telegram at 9.20 p.m. on the 19th containing a report from Rear-Admiral Togo (not Vice Admiral Togo) with regard to the Kaiping fight:—
"I started at daylight on the 15th instant with the Akashi, the Akitsushima, the Chiyoda, the Suma the Oshima, the Akagi, the Uji and the 14th Torpedo Squadron and reached the Port Arthur offing at noon. We learned then that the Hatsuse had struck two of the enemy's mines and had sunk. Therefore despatching the Oshima, the U_l^{α} and the Torpedo Squadron on the duty originally fixed, I proceeded with the other ships to drive back the enemy's destroyers which had come out to attack, and to assist in saving the crew of the Hatsuse.

In the evening my squadron left Port Arthur and steamed into the Gulf of Pechili. At noon on the 16th we approached Takshan, and examined the whole of Kaichow promontory. We amined the whole of Kalchow promontory. We observed a small force of the enemy on shore and opened fire on them. They fled. On the afternoon of the 17th, we proceed to clear the shore and then entered Kinchow Bay. The gunboats were despatched to the shore of the Bay, when they opened fire upon a railway bridge, upon a military-transport train just about to pass, and on the enemy's buildings. More or less damage was

done in every case.
(The War Department's report relating to the

above has not yet been published).

2. The War Department publishes a telegram received on the 20th instant. It says; "A company of the Liaotung Army under Captain Yama-da approached the east of Shaukinshan to re-connoitre. On the north of the position our troops came into collision with two companies of the enemy and a fight of some 30 minutes ensued, with the result that the enemy war driven back. Our losses were Lieutenant Onodera and 4 rank and file killed; and Captain Yamada and 8 rank and file wounded. The enemy's casualties were one officer and between 40 and 60 men."

one officer and between 40 and 60 men.

3. The 'aval Department publishes a telegram received from Rear-Admiral Hosoya on the 20th instant:—The Fuso, Heiyen, Tsukushi, Saiyen, &c., under my command, proceeded to the new landing place at 6 a.m. on the 19th instant. The Fusabi was told off to search the shore. She Takemitsu landed, encountering no opposition.

has crossed the Tang-ho and the Taitsz-ho prisoner. rivers and has reached a point (Panshifu?) 25 miles from Liaoyang on the east-north-east. We can not identify Panshi-fu, but the river Taitsz is a tributary of the but the river Taitsz is a tributary of the land torpedo craft. They passed through a Liao and flows into the latter westward of Liaoyang. From Kwantien to Liaoyang duty assigned to them, withdrew at day-the approach is over comparatively level light. The gunboats were hit by a few country, leaving the formidable passes of shells but their casualties are not yet Lienshan and Motien-ling on the southwest. In fact, there are three ways of reported.

Tuesday. May 24. reaching Liaoyang from Fenghwang-ching. One is the regular road over the hills. This traverses the Lienshan and Motien passes, and presents enormous difficulties as a military route. The two others are on either side of the mountain road. One goes vià Sunguen to Haiching and then up the line of railway to Liaoyang. The other threads the series of valleys from Kwantien vid Samazi (or Samachu) and finally crosses the Toltes. If the account of the country of the coun Taitsz. If the account sent from London be correct, General Kuroki has divided his army into two sections. One of these-the main body—is advancing by the southern route to Haiching and will attack Liaoyang from the south-west. The other has taken the northern route and will attack Liaoyang from the north-east. If the movements of these two bodies can be synchronized, the strategical plan looks large and fine. But it will be apparent to any one examining the map that the two sections of the Japanese army are moving at a great distance apart. Of course Kwantien column may be intended chiefly to threaten the Liaoyang-Mukden line of communications, and for aught we know to the contrary it may be receiving large accessions of strength all the time, in the form of drafts from Japan. It is useless to indulge in conjectures with regard to such matters. All that we can say is that a very comprehensive strategical plan is unfolding before us.

Another London telegram says that on the 16th instant a Japanese army of 20,000 men landed at a point 25 miles south of men landed at a point 25 miles south of lating in St. Petersburg. Of course St. Kaiping, and is now advancing north against Petersburg is not now in communication Haiching. Everything goes to show that there has been a landing in the north-eastern corner of the Gulf of Pechili, but we doubt the alleged number of the troops that have landed. The ultimate junction of this force with General Kuroki's main body now somewhere in the neighbourhood of Haiching—would mean the withdrawal of every Russian soldier from the Liaotung Peninsula, except the garrisons southward of the Kinchow Isthmus. The London telegram further represents Kunching for the soldier from the Liaotung the last positions on the Kinchow Isthmus, namely Tahoshan and Shaukinshan, on the 21st instant, and even supposing that the telegram further represents Kuroki's force as having already moved from Sungyuen to the neighbourhood of Haiching. In that position it will be appreciated that the column moving north from Kaiping is intended to free Kuroki's left wing from any menace at the hands of the Russian forces at Tashikiao and Newchwang.

the Kaiping column, or to retreat to Haiching.

Monday, May 23.

Takemisu landed, encountering no opposition. At 8 a.m. the Japanese flag was run up and the landing of the troops-commenced at once. The weather was exceptionally fine and the work proceeded quickly. The Squadron did everything possible to assist the troops."

(The name of the landing place is not mentioned).

London telegraphs that the section of the

Japanese army which moved from Kwantien dead. One Russian captain was made The Japanese had no casualties.

Admiral Togo reports that on the 20th at I a.m. he sent into Port Arthur a squadron of gunboats and a number of destroyers and torpedo craft. They passed through a

Tuesday, May 24. The last operation at Port Arthur presented one noteworthy feature; namely, that the squadron which went in in-cluded several gunboats. These last are strange craft to send within easy range of heavy fort-guns. Nothing of the kind had previously been done by the Japanese Admiral, and if he incurred such a great risk on this occasion, there must have been a special reason. It is true, indeed, that the fort-artillery at Port Arthur had shown itself extraordinarily inefficient, so far as night firing was concerned. A few hits have been made in the case of the third batch of blocking steamers, but the two first flotillas suffered very little from the fire of the forts. On this last occasion the gunboats are said to have been struck by some of the enemy's projectiles. They did not suffer materially however. It was the destroyer Akatsuki that had a terrible ex-Twenty-five of her crew are said perience. to have been killed by a shell bursting on board. She probably did not carry a complement of much over 50, and if one half of them were killed, how many of the other half were wounded, and how did the survivors manage to take the vessel back? This is a dramatic incident and the public will be very anxious to learn fuller details.

According to Reuter, General Stoessel has made a sortie from Port Arthur and driven back the Japanese, inflicting on them a loss of a thousand in killed and wounded. At all events such a report is said to be circuwith Port Arthur either by sea or by land and must therefore rely on Japanese intelli-gence or on mere rumour. This story of a sortie would not be altogether discredited by that fact, but the difficulty is that the term "sortie" can not be correct inasmuch as the captured them on that day, they could not possibly have reached Port Arthur in time for the alleged sortie to come off. The latest news of which we are in possession at this moment (Monday morning) is that Stoessel was massing his forces at Nankwanrin hill, which lies immediately south of the Isthmus, under these circumstances it will be plain ing. It is possible, of course, that a Japanese that nothing remains for the Newchwang force except to retire upon Tashikiao and there to oppose the northward advance of conjecture at present. A landing at Dalny the Vicing column or to retreat to Hai would turn the whole of the Russian de-fences at this point, but Dalny Bay appears to be strewn with mines so thickly as to defy any such enterprise.

steamers by strange processes, and as to many other notable circumstances. The subsequently reported that the Russian say a word about what they had seen or Nichi Nichi's Chefoo correspondent telegraphed to his journal a detailed account of wonder, among the skirmishes which have been reported as Russian victories? he has at all events attracted some attention. The public are now warned to be on their

Wednesday, May 25. By wireless telegraphy Chefoo is informed from Weihaiwei that at 1 p.m. on the 22nd instant the sounds of violent cannonading were heard in the neighbourhood of Yuen-tau, which is a little island some 30 miles south-east of Port Arthur, and in the track of vessels bound from Talien to Shanghai. As yet no definite explanation of the incident is forthcoming, but the conjecture is that the Russian destroyers emerged from Port Arthur and were attempting some coup against the Japanese line of communications with Pitsewo.

In this context it may be mentioned that the Russians claim to have sent out a cruiser—the Pallada or the Novik—on the occasion of the sinking of the Hatsuse. statement is treated by the Nichi Nichi Shim-bun with ridicule. If the Russians can send cruisers, why on earth do they not attempt something at this most critical stage of the war, asks our contemporary. But we may hwang. They are said to have gone observe that the distinguishing feature of gladly to welcome the Japanese troops. Russian strategy throughout the whole was has been neglect of opportunities. Not one of her commanders has shown himself ready or competent to utilize the material and the occasions at his disposal. Of course this may change at any moment. There are may change at any moment. indeed symptoms that General Stoessel is an officer of higher calibre. At any rate, we can not regard the inaction of the remaining Russian ships as a conclusive proof that the obstruction has not been sufficiently removed from the entrance of Port Arthur to allow of their exit. The explosions heard on more than one occasion are explicable only on the supposition that dynamite was being used to break up the sunken steamers.

It is now apparent that the sortic rumoured to have been made by General Stoessel with the result of inflicting a loss of a thousand on the Japanese and driving them back was nothing more or less than the already-reported engagement at Shisanlitai on the 16th instant when the Japanese obtained possession of the Chinkiatun highlands and also of the Kiulichwan hill. General Stoessel seems to have been misinformed as to the dimensions of the Japanese force, so that he sent out only four battalions at the utmost. He encountered the van of the Japanese army, and according to the official reports each side suffered about the same losses. As to this attack having suspended the Japanese advance, what is much more probable is that the Japanese are waiting—if indeed they be waiting at all horses seem much exhausted. It appears—for heavy guns to assist them in the attack to us that such a state of affairs is extremely upon the Tahoshan and Shunkinshan positions. These latter taken, the next nut to has not been so rapid as to produce exhaustions. be cracked will be the hill called Nankwan-

Japanese near Tsititien on the 9th Instant, described themselves as deserters from Liaoyang. They said that they could not endure the hard fare and the harsh treatment received there, and they had found an opportunity to escape when their comrades were marched out to entrench the Motienling position.

The Taotal of Fenghwang is said to have stated that before the battle of the Yalu, the number of Russian troops in the town was not greater than 2,000, although the Russians resorted to various devices to make it appear larger. At all events the head-quarters of the Army Corps was at Fenghwang, and constant trips between that place and Antung and Kiulien took place.

The Russian field hospital at Fenghwang fell entirely into the hands of the Japanese, it is said. But General Kuroki's report did not represent this eapture in such large

There were 200 Chinese braves in Fenghwang. They are said to have gone out

The only injury inflicted by the Russians on Fenghwang at the time of their retreat was the burning of a magazine. All the fine buildings were left intact. It is believed that want of time alone prevented wide destruction. Since the Japanese entered the place many Chinese who were in hiding

It is rumoured at Shanhaikwan that the Russians at Liaoyang have prepared 119 in conjectures is useless. locomotives and 1,300 cars wherewith they intend to retreat to Harbin should the necessity arise. That is scarcely a credible story, though it must be admitted that many recent accounts combine to indicate weakening of Russia's resolve to held

Liaoyang.

The latest accounts from Newchwang, dated the 23rd, say that the last of the Russian forces left that place on the 22nd. Thus there has commenced the interregnum so much dreaded by the foreign residents. These are said to have conferred together, and to have come to the conclusion that the best course would be to entrust the administration to the Chinese volunteer association. We presume that the Russians have directed their march to Tashikiao, whence they will proceed to Haiching, now the objective of the main body of General Kuroki's force.

Reference may be made here to the report of General Kuropatkin's scouts that the Japanese foot-soldiers and the Japanese tion of either men or animals. There have rin, immediately south of the Kinchow been no forced marches, and since the battle will probably be merely to dispirit their Isthmus. In fact, the whole of the march of the Yalu there has not been any night to Port Arthur must be an affair of the most work. The troops that crossed the Yalu Kuropatkin has no idea of attempting final

> Thursday, May 26.
> Chefoo reports (*Jiji Shimpo*) that the Japanese forces have captured the position in the neighbourhood of Kinchow and that their van is now within 7 versts of Nan-kwanrin. The Nichi Nichi's correspondent, also telegraphing from Chefoo, represents Kinchow as having actually fallen into the hands of the Japanese, and puts the van 8 versts from Nankwanrin. Nothing is said by either account about the important posi-tions of Tahoshan and Shaukinshan. With regard to the Russian forces, there are said regard to the Russian forces, there are said to be 500 in Dalny, 2,000 at Liushutun (the promontory in Dalny Bay having Hand Bay on the north and Junk Bay on the south); and over ten thousand in Port Arthur. These are apparently in addition to the troops at Nankwanrin, where recent advices indicated that General Stoessel was collecting his purposes. collecting his main force.

> The Asahi's information from Shanghai shows that Stoessel is strongly holding Sanlichwang, Nankwanriu and Tsihlichwang, and that a battery of 8 guns has been mounted at the last-named place, so as to command Kinchow Bay.

These details leave much to be desired in point of lucidity, but their general meaning is plain enough, namely, that the Japanese have not yet forced the Kinchow Isthmus and that General Stoessel is determined to have come out and business is carried on stay them there if he can possibly continue without interruption. developments of this situation but to indulge

It is rumoured in Chefoo that Dalny has only a few days' provisions and that Port Arthur is in possession of a two months' supply. Very little reliance can be placed on these stories. The Russians have had ample time to stock their granaries, and it will be strange if the moment of crisis finds them so unprepared.

There is a story that the Russian police at Dalny have still one Japanese man and twenty—some say forty—Japanese women in custody. On what ground, we wonder, are these people detained.

A telegram from Takeshiki published by the Jiji, the Asahi and the Nichi Nichi, represents an officer who recently returned from Manchuria as saying that the Russians will inevitably make their second great stand at Liaoyang where they have massed fully 80,000 men. The fortifications, however, are not completed, and in order to gain time, some resistance, more or less formidable, will probably be organized to the Japanese army's advance at Haiching and Anshantien. The enemy is bringing together at Liaoyang the remnants of all the troops that have been beaten in engagements with the Japanese, but the effect of their presence work. The troops that crossed the Yalu seems probable, Stoessel is determined to fight every inch of ground.

The Yomiuri Shinban has a telegram from its own correspondent with the First Army that on the 23rd instant a skirmish took place on the west of Kwantien between a company of Japanese infantry and about 100 Russian troopers. The latter were Nichi Shimban, which publishes this news, that The Times' despatch boat Haiman has

Chefoo that on the 21st instant it sighted 6 received in audience by the Emperor, a mines at a point on the south-east of the fact which suggests that an additional Divi-Edge (?) Islands. It appeals to men's imagination, and the Petropavlovsk's gold willinevitably take its place among the innumerable treasures supposed to be lying at the bottom of the ocean.

Friday, May 27.

It is stated by the Jiji's correspondent with the First Army that on the 24th instant a body of Russian cavalry numbering about a thousand, made its appearance on the south of Shihtauchin, which is not marked on the maps, but lies between Fenghwang and Aiyangpienmun. A company of Japanese infantry opened fire and drove the Cossacks in a northerly direction, the Japanese suffering no loss.

The same correspondent says that 6 Rus-

lie to the north-east of Fenghwang, and the facts that the Japanese troops are moving in that direction and are encountering Russian forces there, indicates a phase of the campaign for which we were not prepared. Broadly speaking movements by General Kuroki's forces to the north-east of Fenghwang would suggest merely measures for the protection of his right flank against essays on the part of the Russians from the Mukden-Yalu line. On the other hand, we

informed the Commissioner of Customs at Lieutenant-General Baron Nogi has been about 11/4 miles distant from the steamer, Retired List, even this deduction can not be the most remote about 1 ½ miles. on the Fenghwang side of Motienling; There is now a formal contradiction of the much more probable place for a combat is advancing by the road over the mountains.

It is reported from Chefoo that General Stoessel has requisitioned all the money in the vaults of the Russo-Chinese Bank at Port Arthur and Dalny. Interest is of course promised to the Bank, but the rate is kept secret. The funds of depositors have not escaped. All is drawn into the military net, and it is alleged that even the means of travelling away to less unquiet districts are withheld from private individuals. But we imagine that this last item of the tale is an of all non-combatants. These, however, can not avail themselves any longer of the The same correspondent says that 6 Russian troops were found in ambush near Wankiakau. The lieutenant in command of them was killed and one trooper was asked to let the non-combalants pass through their lines. Their wisest plan would be to The places mentioned in the above reports follow the example of the Boers, and decline to sauction any step tending to lessen the enemy's embarrassment.

> The last journals received from Europe-America show that there has been remark-

crippled, the Russian sailors night have been dispirited, but it is impossible to conceive them so dejected, so weakened or so constrained that they would look out idly upon a stream of Japanese transports constantly flowing to and fro within thirty miles of the Russian stronghold. No one has undertaken to show what advantages the littoral of the Gulf of Pechili offers as a landing place to compensate for the cardinal disadvantage of a wantonly exposed line of communications. We have always supposed that if the Japanese went to Newchwang, their route would be from some point eastward of the place, some point having communication with the Yellow-Sea littoral. The only European journal that has shared our view, so far as we know, is a German journal. Japan ought to get control of Newchwang, and also of the mouth of the Amur so as to cut off Russian Far-Eastern positions wholly and absolutely from all maritime routes of supply, but it does not follow that she should land at Newchwang,

We hear nothing more of the alleged landing in the north-west of the Liaotung Peninsula. It appears to have been simply a demonstration. Its immediate effect was the hasty retreat of the Russian troops in that neighbourhood. They retired upon Tashikiao, and it is now stated that during their absence the nimble-fingered Chinaman raided their camp and barracks and helped himself to everything he would lay hands on. Presently the troops marched back, only to find their house swept and garnished. They made complaint to the Chinese officials, demanding compensation, but the Taotai declined to admit the justice of any such representations and there the matter rests. Of course the story has lost nothing in travelling thence hither.

On the 15th instant the First and Second Battalions of one of the Divisions forming the Second Army and a squadron of cavalry, proceeded, in obedience to orders to march towards Liukiakau which is near the road to Kinchow and westward of Tahoshan. The exaggeration. The Russian General would force set out at 5.30 a.m. Intelligence had be only too glad to facilitate the departure been received that a force of the enemy was posted at Shihchingtsz, but on the left wing reaching Liukiakau and reconnoitering, nothing was seen of this force, and the heights there were taken possession of. An observation from one of these hills showed some 6 troopers retiring from an eminence at some distance off. These troopers were riding along the Kinchow road. It was then noon, and as sounds of firing were heard from the direction of the main body's advance, two companies were detached from the left wing to render assistance, but before they effected a junction the enemy, few in numable unanimity among foreign strategists as to the advisability of landing a Japanese little further, the force halted for the night, army at Newchwang. Their view was that such a measure would effectually ease the pressure at the Yalu and would also isolate port Arthur. So it would, no doubt, but company of engineers from the main bedy, and the advances are remarked. Mukden-Yalu line. On the other hand, we do not hear of any marked advance on the side of the left wing which is doubtless now in touch with the troops that recently landed at Takushan. The indications do not suffice to disclose any clearly defined strategical programme, nor are they intended to suggest one.

Meanwhile there is much conjecture as to the nature of the troops that have landed at Takushan. The public is quite uncertain whether these troops form a third army or whether they belong to the Divisions already in the field. We observe, however, that battalion, also in open order, marched along the base of the hills. A company of the enemy opened fire on us from an eminence about 1,500 metres distant, but was quickly driven back. Just at this time a battalion of Russian troops was seen to advance to a position on the east of Shaukinshan. The officer in command of the Japanese now united his two battalions and pushed for-ward rapidly. The troops traversed five ward rapidly. The troops traversed five eminences and the intervening valleys, thus crossing two of the Tahoshan principal hills.

The left wing now found itself engaged hotly. The Fifth Company advanced straight against the enemy's position and had over twenty casualties in a very brief space, the other companies also suffering severely. The Second Company which was on the extreme left, had to march against a stone parapet crowning a hill near the Kinchow road. From behind this parapet 2 companies of the enemy kept up a heavy fire, inflicting 26 casualties on our company, which therefore inclined to the enemy's right wing and directed a heavy fire on the Shishan position, whence the Russians had to retire, thus relieving the Japanese of the fire from which they were suffering most. Two other eminences were now won, and so soon as the second was occupied the enemy withdrew from his position on the east of it. Nothing could now be seen of the Russians except some disunited bands escaping by the Kin-chow road. They were pursued vigorously, but one of their tatteries took up a position on a height some 2,500 metres distant, and opened fire on the Japanese left flank to cover the retreat. A curious incident occurred at this point. A company of the Japanese had left their knapsacks on the top of a hill and had pushed on in light marching order. The Russian artillight marching order. The Russian artil-lery discharged 5 shells at these knapsacks, and had got the range pretty cleverly before they discovered their mistake, the Japanese playing the part of amused spectators. That ended the fight for the day, the Japanese remaining in possession of the hills, and cheering lustily as they planted their colours. They had lost over 140 men.

This narrative is told by a wounded officer who took part in it. He adds that the reason of the heavy losses in proportion to the smallness of the engagement was that the Russians were operating in ground where they had calculated all the ranges and could thus deliver a deadly fire. Seventeen Russians were taken prisoners. said that the troops engaged on their side had been the Fifth and the Thirteenth Regiments and a part of the Fourteenth Regiment of the Siberian Rifles, together Regiment of the Siberian Rines, together with 2 batteries of artillery. These were the best marksmen the Russians had. The prisoners further said that it having been observed that the Japanese officers gave their orders standing, the riflemen had been directed to aim specially at them, which they did so successfully that 9 officers. were wounded. General Stoessel had directed that there should be no retirement until reliefs arrived, but apparently this direction had not been obeyed. The Kinchow position, according to these prisoners, was exceptionally strong, being protected by heavy artillery mines and barbed wire entanglements.

The above is the fight which St. Petersburg believed to have been a sortie by General Stoessel, ending in the repulse of the Japanese with a loss of 1,000 men.

NEWCHWANG AND NEIGHBOURHOOD.

Saturday, May 21.

Tokyo is still perplexed as to the identity of the Takushan where a Japanese force is stated to have landed on the 19th instant. At first there was a disposition to believe that the place was on Hooper Point, the promotory on the north of Talien Bay. But promotory on the north of Talien Bay. one can not see what purpose would be served by a landing there unless troops advancing thence could take the Tahoshan position in rear, which is not apparent. general impression now is that the Takushan in question is on the northern littoral of the Yellow Sea, the place which the Japanese used as an advanced base when General Katsura moved upon Haiching. Strategy is largely determined by the nature of the country in which an army is operating. From Takushan to Sungyuen the distance is 45 miles and from Sungyuen to Haiching the distance is also 45 miles. General Kuroki is said to have occupied Sungyuen and it is more than probable that the hesitation which the Russian Generals have observed in his advance has been the result of waiting for the landing at Takushan which his troops, at Sungyuen cover. To march against at Sunguen cover. To march against the Russians have destroyed the Alaching having the Yalu for base would tween Newchwang and Tashikiao. That is not unlikely to be true if the evacuation of the credible. cations, and since the Japanese have the command of the sea, it is plainly their business to convert into maritime comconvertible part munications every convertible part of their land lines. We had expected that force would have been put ashore at Takushan immediately after the battle of the Yalu and before the landing on Liaotung, but in truth the order of the two operations did not greatly matter. With his base of supplies brought within 45 miles of Sungyuen, General Kuroki can push on vigorously and we anticipate that no further evidences of hesitation will be observable, unless indeed the summer rains render the country im-passable. A district where two days' rain renders the roads girth deep-literally girth deep-in mud may defy the progress of an army.

General Floug reports that the landing of Japanese troops near Kaiping was only me demonstration; that they re-embarked immediately and that the transports put to sea again. That is a very perplexing statement.

Chefoo reports, on the strength of infor-mation furnished by Chinese junks from Dalny, that the Japanese forces on the Liaotung Peninsula captured the Kinchow position on the 17th instant, the Russian troops retreating to Dalny. These Russian troops are spoken of as from 250 to 300 strong, but the Japanese official report put the number defending Tahoshan at some 3 bat-talions with 8 guns. The retreat of two or three hundred is difficult to reconcile with such an estimate. Experience shows that these Chinese accounts must be received with great reserve, as is indeed natural, for the Chinese themselves can not observe the to a distance of $3\frac{1}{3}$ miles (10 Chinese li) from the town. That tends to lend probability to the account, for the town of Kinchow possesses no defensive capacities whatsoever. Its fall would be immediately attendant on the capture of the neighbouring hills, especially Tahoshan.

Several accounts agree in stating that to the fortress. Ah-zen, a Chinaman, was arrested on May 25th from a very early hour on the morning of by the Kagacho police on a charge of having used opium. He was removed to the Court.

is difficult to connect with any previous intelligence. Our latest official news put the Japanese near Kinchow on the 16th instant. From thence to Port Arthur the distance is 32 miles and Dalny would have to be dealt with en route. Had Dalny been taken it is most improbable that the news would have failed to reach us. This cannonade, there-fore, would seem to indicate a naval rather than a military operation.

The Novy Krai of the 10th instant publishes a general order from General Stoessel conjuring all under his command to stand to their posts and resist to the death. The order also alludes in very strong terms to the habit of drinking that prevails among the

Monday, May 23.

It is reported that the Russian troops have again occupied Newchwang, but we give General Kuropatkin credit for greater fixity of purpose than would be indicated by this marching and countermarching. performance reminds us of stage soldiers rather than of real war.

Side by side with the above comes another rumour-a repeated rumour-that Newchwang be credible.

Shanghai says that it has received a telegram from Kinchow in the sense that the Russian officers at that position have reported to Head Quarters that the Japanese artillery is very powerful. Two things perplex us in this report. One is Kinchow's ability to communicate with Shanghai by telegraph, seeing that the Japanese are in possession of the line; the other, the Kinchow officers' ability to communicate with Kuropatkin. However, there will be here an opportunity for Colonel Ogorodinoff and General Floug to demonstrate that the Japanese are fruitlessly deploying their artillery for Russian information-only that and nothing more.

It is believed in Tokyo that the Japanese forces on the Liaotung Peninsula commenced a general attack against the Kinchow position on the 21st instant. We may explain that a part of the position has already fallen. Kinchow itself lies in a plain dominated by three hills, or groups of hills, one on the west, one on the north and one on the east. The town is approached by two roads from the north, the main or westerly road, namely the railway, which leads to Pulantien, and a secondary road which leads to Chinkiatung. The rail-way has been captured by the Japanese asfar as Shisanlitai—pace Ogorodinoff—and so have the hills lying on either side of the railway up to the Chinkiatung road. But on the east of the latter road, that is to say, in the area between it and the sea, lies the Tahoshan group of hills, including Shang-kinshan. These latter are very strong positions. Once captured, access is immediately obtained to Talien Bay and the celebrated operations at first hand. We note, however, Isthmus is won. But the operation of that Kinchow itself is not spoken of as having capture will probably entail a heavy loss been taken, but only the adjacent region up to a distance of 3½ miles (10 Chinese li) was incomparably weaker than this Kinchow Isthmus, and in its case Floug and Ogorodinoff will scarcely venture to tell us that the Russian defenders are merely reconnoitering. The capture of the Isthmus does not entail, of course, the fall of Port Arthur, but the Isthmus is certainly the back door

THE "HATSUSE" DISASTER.

明治计五年三月昔日第三维認知物理可

Monday, May 23. We observe that the Nichi Nichi Shimbun quotes our reference, on the 18th inst., happen to suffer, constitutes no manner to a rumour that some accident, more serious of excuse. A country at war can exto a rumour that some accident, more serious of excuse. A country at war can exthan the loss of the Miyako, had occurred. The Nichi Nichi infers that intelligence of ritorial waters, and within their limits it the Hatsuse catastrophe must then have may lay mines, duly warning the ships of been in the hands of the naval authorities neutral nations to approach at their peril. and must have been concealed by them until The limits of territorial waters having been the 10th. seems natural, but on investigating the source of the rumour that reached us, we can not find that it was anything more than a deduction drawn from a general statement made by the naval authorities in the sense that the Russians were using mines in a most reckless manner, and that even when the limits in the manner done by the Russians had one man wounded and the most reckless manner, and that, even when the limits in the manner done by the Rusthe war was concluded, it would be difficult to free the seas from all danger to commercial navigation. This statement sounded ominous in some ears and suggested that and bye. another accident had occurred. The Naval Authorities seem to have waited until they The Naval were in a position to explain the undoubted cause of the affair, and the telegram conveying that information did not reach them until the 19th instant, when the publication was made. So we gather from our Tokyo contemporaries.

With reference to this catastrophe the Tokyo journals speak in the calmest terms. The Jiji Shimpo justly observes that at the outset of the naval conflict Japan was prepared, and indeed expected, to lose at least half of her fleet before she succeeded in crippling Russia's naval power in the Far East. Thus far she has lost only one important ship whereas the Russians have been effectually crippled. Her wound has been slight; their hurt has been mortal. There is nothing whatever to complain of. The nation has merely to lament the loss of so many brave men

That is virtually the tone of all the papers. They deprecate any loss of heart and merely lament the deaths of brave men. There is some little dissatisfaction with the Naval Authorities for not publishing the news sooner. The only newspaper that seems at all disposed to be unreasonable is the Nippon.

Tuesday, May 24.

At a meeting of the Kaiji Kyokai when several naval officers attended, the question was raised whether to place mines in such a position as that occupied by the mines which sunk the Hatsuse was not a violation of international law. Professor Matsunami spoke to the query. He said that international law is an elastic affair in asmuch as the various nations interpret its provisions so as to suit their individual convenience. It is certain that the fair-way in neutral waters can not properly be obstructed in such a manner, but apparently the question would not be likely to be raised unless a vessel flying a neutral flag were injured by the mines.

That is certainly how the question would be raised and raised in a practical manner. But in the meanwhile it does not appear to admit of the smallest doubt that unless a belligerent State is in a position to completely control certain waters, it has no manner of right to place dangerous obstructions there. If a man be entitled to absolute right of way over a certain road, and if he therefore have power to interdict the use of the road by any persons not specially licensed to pass along it, then he is also entitled to prevent passage by means of any obstacles that seem effectual in his eyes. But it is quite preposterous to claim that a man may carefully place

traps or dig pitfalls in the public high-way merely because his enemy is more likely to pass that way than any one else. That his enemy does happen to pass and does Our contemporary's inference fixed with reference to the range of old-time sians off Liautishan Promontory. will surely attract much attention and become a subject of international arrangement by

THE LATE MR. A. T. WATSON.

The cable conveyed news on Saturday of the death at Bedford, England, of Mr. A. T. Watson, an old resident of Yokohama. Born in Berners-street, Ipswich, some 57 years ago, Mr. Watson, after receiving his education at Queen Elizabeth's Grammar School in that town, was indentured to the firm of Chapman and Pain, pharmaceutical chemists, whose business was established on the Cornhill of the old county town in the days when George the Second was on the Throne of England. After a few years in London, Mr. Watson came to the Far East, arriving in Yokohama on 24th January, 1870, on the P. & O. steamer Bombay. He was thus a witness of the disastrous collision which occurred off Saratoga Spit between this steamer and the U.S. corvette Oneida, which involved the loss of so many lives. Mr. Watson came out to join Mr. John North, and afterwards joined Mr. Brett in the pharmacy which developed into Messrs. Brett & Co., Ltd. He remained with them till nearly the close of his career in Japan. In 1900 he left Yokohama wery sick man and took up his residence in Bedford, England, but the change of climate and surroundings did not bring about the wished-for improvement in health, and the years spent since his depar-ture from these shores have been filled with days of unremitting sickness: in fact, it was a mere waiting for the end. In his prime Mr. Watson was a great athlete, as many photographs of crews and athletic teams at the Boat Club and elsewhere testify. He held the local record for the Mile Walk, which he made at the autumn meeting of the Y.C. & A.C. in 1878; but his prettiest work was done in the 100 yds. and the ¼ mile, his style of sprinting being unsurpassed for neat-ness, and until Abbott wrested it from him he held the 100 yards record. An enthusiastic naturalist, Mr. Watson was among the first to make a collection of the magnificent butter-flies and moths of Japan, and part of his fine selection now finds a home in the Natural History Museum, South Kensington. He also took a great interest in Freemasonry, and after passing through the chairs of the Yokohama Lodge, the Orient Mark Lodge, and the Royal Arch Chapter, entered the cryptic degrees, rising to the 32nd. Mr. Watson is survived by his wife, two sons, and six daughters, to whom we extend our condolences in the hour of their bereavement.

KOREA.

Monday, May 23. The Russians seem to have renewed their activity on the north-east coast of Korea. An official report to the Seoul Government speaks of a band of Cossacks having been seen within 25 miles of Hamheung, which is some 50 miles north of Wonsan (Yuensan). The latest news from this region is of a

somewhat perplexing nature. First we have a message from the telegraph office in Ham-Russians had one man wounded and the Koreans one man killed! This story duplicated officially from Wonsan with the addition that the Korean troops engaged were the Pyongyang force. It is further stated that the Russians have laid a line of telegraph from Kyongheung, on the Tumen, to Kyongsong, on the east coast, and that they have a force of 100 cavalry and 270 infantry in the latter place.

It now appears that the Anju Cossacks,

whose remaining number is variously stated at from 300 to 600, have turned eastward from Nyongwon and have passed through Hamheung, their evident intention being to make their way to the Tumen. This line of retreat was always open to them, and in taking it they had nothing to fear-at least nothing in comparison with the dangers of the Yalu route.

The usual harrowing accounts arrive from Kyongsong—the accounts always coming from regions cursed by the presence of military representatives of that civilization for which M. Doumer would have France fight. We hear of theft, of arson, of rape

and so forth.

The Korean representatives in foreign capitals have formally announced the rupture of diplomatic relations with Russia and the cancellation of all conventions, agreements and concessions previously existing. Our readers being perfectly familiar with the story of Yong Ampho and the notorious lumber concession, will not be surprised to learn that even the timid Korean authorities have now boldly undertaken to repudiate an arrangement which, having been made originally with a private company, was deliberately perverted by the Russian Government into an instrument of State

aggression.
It is stated that Mr. Li, the Korean Representative in St. Petersburg, is still at his post as the telegram from Seoul re-calling him was suspended in transit by the Russian Authorities. There was a good deal of talk at one time in Russian circles about a telegram, or telegrams, supposed to have been purposely delayed in Tokyo with the object of keeping the Russian Government in ignorance of the real state of affairs in the last chapter of the negotiations. It is a common experience of humanity that suspicion is of all sentiments the most subjective. The sins which a man habitually commits himself are invariably the sins that he reads into the conduct of others.

Tuesday, May 24. Wankiatun is a place about 7 miles north-east of Takushan. A Japanese force landed at the latter place on the 19th instant. The following day they managed to "surround" a company of Cossacks and to inflict heavy loss on them. The term "surround" is strange in this context. One does not expect to hear of cavalry being surrounded by above objects of the war, Korea feels bound infantry, especially as the Cossacks must to assist Japan; that, were the previously have been on scouting duty. However, the existing treaties and conventions suffered to fact that they fell in with the Japanese and have binding force at the present juncture, were roughly handled can not be doubted, it is plain that material for future complica-The interesting point is that bodies of Costions of a serious nature might be provided; sacks should still be moving in this district. So long as a Russian force was posted on once for all to determine her own situation. the Yalu, its videttes would naturally This statement is expected to appear in the have been thrown out along the littoral next Official Gazette. of the Yellow Sea, and indeed we heard of them more than once as extending from Hamyong do are acting on a different prin-Antung to Takushan. But since then the situation has considerably changed, and one provide food for a body of 1,000 Cossacks situation has considerably changed, and one marvels how companies of Cossacks can support themselves in positions entirely cut song, 350 of them riding towards Kapsan and off from any basis of supplies. General 650 towards Songchin. Their arrival at the Kuroki's forces hold the line from Antung to latter place is daily expected, and it is Sungyuen, which line any one by looking at the map can perceive to be drawn completely between the Takushan-Antung littoral of the Yellow Sea and the Haiching-Liaoyang thing else. It is becoming an important park of artillery into action and this made preposition. These Cossacks are certainly some strong steps to check these raids.

The seven hundred who moved from Liaoyang across the upper with moved from Liaoyang across the upper thing they wanted to see, quietly withdrew. reaches of the Yalu and through the Korean mountains to Anju, have now apparently ridden eastward and emerged on the coast somewhere north of Wonsan, so that they may be said to have transferred themselves from the Mukden-Liaoyang army to the Possiet-Bay army without experiencing any special commissariat difficulties en route. If it were possible for large bodies of these troopers to operate in such a manner as aerial columns they might prove a formidable factor, but of course it is not possible. No country, above all Korea, has resources sufficient for the support of more than a few hundred troopers sweeping through it in this manner. News comes from Kyongsong that the

Russian troops there, though few in number. have been in some straits for provisions. Apparently, however, the arrival of a victualling corps from the north has replenished their stock. It is stated that a force of 1,600 Cossacks is expected to reach the place predicts that unless some improvement be soon, and that the local officials, in view of the southward movement of this column, have issued instructions in the sense that each house en route shall furnish 50 eggs, a fowl and 3 measures of millet for the use of the Russians. The story comes from more than one source. It is probably correct within limits. The Russians on the Tumen have never ceased their activity since the war began. It is a frivolous kind of activity. With the exception of burning a few houses of unoffending private folks at Songehin, nothing has been accomplished. If the Cos-sacks get as far as Wonsan they might at any rate create a scare, but that their purpose holds to that extent seems doubtful.

Prince Li Chi-yong, Korean Minister of Foreign Affairs at the time of concluding the last Protocol with Japan, who recently came to Japan in the capacity of special envoy, has resigned his official position. It is said that this incident in not due to any loss of the Emperor's confidence, but that it is merely the consequence of some circum-stances which render the Prince's temporary retirement desirable.

Wednesday, May 25.

ceasing relations; that in view of the swimming.

Meanwhile the Korean local officials in who are said to have set out from Kyongalleged that the folks in the town are disposed to welcome them. Evidently the unfortunate Koreans can scarcely do any-

Thursday, May 26.

There is news—how trustworthy we can not tell—that the Russians in north-eastern Korea are moving across towards Nyong-won, which would suggest another attempt against Anju and perhaps some design upon Pyong-yang. If the Russians can afford to employ troops in this manner, they must be better supplied numerically than is generally supposed. But, after all, there are political results to be considered as well as strategical. The raids of the Russians in the north-east, and now in the interior, of Korea must have a very disquieting effect upon the Court in Seoul and its Ministers.

These Ministers appear to be as restless and as intriguing as ever. The unfortunate monarch has issued another edict in which he severely blames the incompetence and corruption of officialdom in general, and effected dark days are in store for the

The Emperor has endeavoured to prevent the resignation of Prince Li Chi-yon, but the Prince is obdurate. It would appear, therefore, that the resignation is not such a mean ingless incident as was originally supposed.

Friday, May 27. The French Representative in Seoul, according to reports received by the leading Tokyo journals, has expressed himself unable to understand Korea's reason for breaking newspapers of Shanghai and Tientsin that off relations with Russia. He considers the they should be invited to give space to measure unwise. But surely diplomatic re-romances of the nature that have been emanalations are difficult to maintain between two ting from Mukden for the past three months. Powers when the soldiers of one of them are raiding the territories of the other, robbing the men, ravishing the women and burning

It is stated that when the Cossacks were retiring from Hamheung after their encounter with the local forces, they broke open the imperial tombs and destroyed the shrines by burning them. A fine performance in truth, and characteristic.

the houses

There has been a fight between some It is stated that the Korean Government Japanese workmen and 7 highwaymen who will immediately publish a statement of its attempted to rob them. The thing happenreasons for definitely breaking off relations ed at Kanghwa, near Chemulpo. It appears reasons for defititely breaking off relations ed at Kanghwa, near Chemupo. It appears with Russia. Those reasons are that Korea that the Japanese, 4 in number, were on their way by boat to a quarry when the 7 to be the securing of her independence and Koreans asked for passage. On the way the restoration of permanent peace in the Koreans attempted to plunder and kill the Koreans attempted to plunder and kill Russian dead, and doubtless the Russians East; that Russia has already withdrawn her Minister from Seoul, thus practically of their assailants. The other 5 escaped by officers. At all events, if we assume that 3 swimming.

RUSSIAN ACCOUNTS.

. Shanghai is honoured by being the place where Major-General Floug's highly pains-taking reports are published. Shanghai has a reputation, earned for it by certain courageous newspaper correspondents, a reputa-tion which adapts it for the Russian General's uses. There has now arrived in Tientsin a Colonel Ogorodinoff who collaborates with General Floug. The first example of their spirited work appeared recently in the N-C. Daily News and was reproduced in these columns on the 21st instant. It shows that there was no battle at all at the Yalu. What happened was simply that a small party of Russians went out to inspect the Japanese army. The Japanese kindly marched out to be inspected. They were even more considerate than the Russians had expected or hoped, for they brought the whole of their cisely the exhibition desired by their enemies. Then the Russians, having seen everything they wanted to see, quietly withdrew. There was no fight worth speaking of merely an insignificant skirmish, and as to the Japanese having captured guns, that is all a newspaper romance. General Floug and Colonel Ogorodinoff are quite astoallow journals to publish such tales as official news. It is thus that Russian officers show a dignified demeanour in the presence of reverses. Truly the spectacle is fine.
We can understand why men like M.
Doumer grow enthusiastic about the civilization that Russia represents.

General Floug reports that at the time of the sinking of the *Hatsuse*, the *Fuji* also received severe injury and steamed away. Hefarther states that on the 11th instant a force sent out by the Russians from Kinchow to Sanshilipao encountered the Japanese and drove them back with heavy loss, thus arresting their advance on the Liaotung Peninsula. Finally he alleges that the Japanese attempt to land in Taiyau Bay has proved a failure.

In many respects this war is teaching the world some interesting lessons. But the Occidental public may fairly expect and hope that never again will the military and naval operations of a great Power be disfigured by the dissemination of falsehoods so wholesale and so clumsy as those emanating from the officers to whom the Russian commanderin-chief has entrusted the duty of instructing newspapers. It is an insult to the English

THE BATTLE OF THE YALU.

Saturday, May 21.

We noted yesterday when reproducing the official statement of Japanese casualties at the Valu that the details did not tally with the total. The correct numbers are:—

Killed.		
Officers	5 }	223
Wounded.		
Officers	33 } 783 }	816
	_	

were wounded for every one killed, the total

of wounded-taking the killed at 1,363would be 4,089. The prisoners number 613, and if we suppose that one half of these are wounded, the total Russian casualties amount to 5,758, against Japanese casual-ties of 1,039. It is unprecedented in the history of war that the side acting on the defensive and occupying a fine position should suffer five times as much as the attacking force. But of course no hard-and-fast conclusion can be formed in that respect until we know what part of their casualties the Russians suffered at Hohmutang, where in turn, they seem to have had the disadvantage of position and to have been almost surrounded by the Japanese.

Wednesday, May 25

In the Harbin journal there are published official or semi-official accounts of the Battle of the Yalu. Whether they have been mutilated in transit we can not tell, but they show discrepancies. General Sassulitch show discrepancies. endeavours to make light of the affair, claims that only 3 regiments of infantry were engaged, and alleges that the Japanese casualties aggregated some 3,000. General Kastaliusky is much more frank. He says that his Division alone lost about 2,000 We can not follow the stories in detail, and indeed it would be useless to make the attempt, for the result might only be misleading, and it is certain that we shall have full accounts before long from Europe. One interesting feature is made clear, however; namely, that the Russians were able to bring up their reserves from Antung and that thus the whole force they had on the Yalu took part in the battle at one time or another. In the two Generals' reports we find incidental reference to 5 regiments of infantry, independently of cavalry and artillery. Thus it would seem that at least fifteen thousand men were engaged. But the return of casualties shows very clearly that from five to six thousand Russians were put hors de combat; that is to say, from 30 to 40 per cent. of their whole force, assuming it to have been only 15,000. Should these figures prove correct, the Yalu will stand as one of the bloodiest battles ever fought, although the Russians were acting on the defensive.

AN OLD STORY IN A NEW GUISE.

Dr. E. J. Dillon, who unfortunately for the cause of historical accuracy is gifted with what reviewers call a facile pen, unaccompanied with any corresponding measure of discrimination or accuracy, contributes to the last number of the Review of Reviews an essay entitled "Has Russia any Strong Man." In the course of this essay he makes the following statements:-

Alexieff's ambition dates from his school-days, and comrades of his assure me that it was never limited by the possibilities of the career he had chosen, but soared to quite imaginary heights. In this respect he widely differed from his brother, a man of modest widely differed from his brother, a man of modest aims and retiring disposition, who is an obscure officer on the retired list. Since E. I. Alexieff has achieved the highest rank which the Tsar can confer upon him, legend has woven its halo around his name and his first and only feat is said to have consisted in his spirited treatment of two British warships in 1881. At that time a feeling of intense bitterness marked the relations of England and Russia. Two British vessels entered the port of Nagasaki, where Alexieff was in command of a cruiser. The British vessels were mancucuring, intentionally or unwittingly, in such a way that the Russian cruiser was in danger of getting rammed. Alexieff, standing on the bridge, sudway that the Russian cruiser was in danger of getting rammed. Alexieff, standing on the bridge, suddenly gave orders that all guns be pointed at the offending vessel, and at the same time signalled to its commander that, unless he desisted then and there, the would order his gunners to open fire. Thereupon the English commander, seeing that the Russian the English ship was handled smartly she fainting fit. "From that time," she adds, meant what he said, promptly took the frank warning meant to ram a friendly Power's vessel in "I was taken with an ardent love for

and abandoned his evolutions. The Tsar Alexander III. afterwards gracefully expressed his thanks to Alexieff, and gave him a signal mark of his approval. So the story runs, and it is more readily believed because it tallies with the known character of the man. He is capable of exercising a wonderful degree of self-restraint any length of time, never once degree of self-restraint any length of time, never once uttering a word or betraying his emotions by a gesture, but at last, and with great deliberation, the pent-up passion bursts all bounds and sweeps away all kinds of restraint. As a matter of sober fact however, the characteristic story is authentically told of Admiral Crown, who was, in truth, the Russian dramatis personnand not Alexieff. Alexieff owes his promotion, which, seeing that he is already forty-three years in the service, can hardly be termed abnormally rapid, to his qualifications as a naval officer. He is clear-witted, cold-blooded, resourceful, a thorough centleman in society, and a popular disciplinarian in is clear-witted, coid-blooded, resourceful, a tnorough gentleman in society, and a popular disciplinarian in the service. He keeps his subordinates well in hand, is noted for his impartial justice, and exerts a beneficent influence over his bluejackets which tends to bring out all their best qualities. Although he hates laxity, the fibre of his character is singularly free from that cast-iron rigour which provokes hatred and paves the way to insubordination.

Dr. Dillon does not intend to be sarcastic or at least does not seem to intend. It is rather bad for Alexieff, however, to have the world told that " his first and only feat' was somebody else's feat after all. But that is not the part to which greatest exception must be taken by well-informed readers of the tale. The fact is that Dr. Dillon's version, wherever he obtained it, is a gross perversion of the truth. The Russian officer, Admiral Crown, did not by any means cut such a fine figure. What happened was that in the time of strained relations between England and Russia-not 1881 but several years later—no Russian ship in Far Eastern waters was suffered to enjoy the privilege of travelling alone. Whenever she went, she was shadowed by a British man-of-war, and it will readily be conceived that such espionage tended to exasperate the Russians terribly. Admiral Crown's flag-ship had managed to elude her vigilant observers enroute from the south, and her officers and crew were feeling very good when they dropped their anchor in Yokohama one morning. But only a very few hours had elapsed when the inevitable Union Jack hove in sight, and a big British cruiser stood into the harbour. She headed direct for her berth, steaming at a good pace, and Admiral Crown, observing her with angry eyes, fell into the strange hallucination that her purpose was to ram him. He piped to quarters and cleared for action. Meanwhile the British captain, having berthed his ship, called for his gig, and boarding the Russian, demand-ed what he meant by clearing for action and training his guns on an English ship in time of peace in a neutral harbour. Of course Admiral Crown could not give any satisfactory explanation, and there ensued correspondence which is now among the most interesting archives of the Far East. There ensued also something else; the arrival of a small Japanese gunboat from Yokosuka which took up her station near the big Russian for the purpose of asserting the neutrality of the port by force of arms, should circumstances demand it. As to the British Captain having been signalled that if he did not desist from his manœuvres then and there the Russian Admiral would order his gunners to open fire, need we say that it is a pure myth? Dr. Dillon is among the few publicists in this wide world who are capable of crediting such undiluted

times of profound peace, and the crime of violating the neutrality of the port by clearing for action. Moreover, it was the Englishman that demanded an explanation and not the Russian that made a menacing announcement, Dr. Dillon puts things upside down all through.

THE " DIVINE" SARAH.

Madame Sarah Bernhardt has consented to contribute a series of memories dealing with her career to the Strand Magazine. Among the earliest recollections which she has committed to paper are some relating to her first appearance as an actress. This occurred while she was at the school of the Grand Champ Convent, Versailles. Mademoiselle, it seems, begged urgently to be allowed to take part in a play written by one of the Sisters. It was one of those pretty little pieces often given in convent schools, and had a Biblical plot, being in short a paraphrase of the journey of Tobias. Sarah tells us that at this time her inclinations were rather religious than anything else, and, actually on the eve of her "first appearance"—impressed by the picture of the nuns receiving at the gate of the convent the Archbishop of Paris and Monseigneur Sibour-a prelate who was assassinated only a few weeks later—she came to the hasty con-clusion that she must become a nun. Of herself at this time she writes:-" Endowed with a lively imagination and with an ex-tremely sensitive nature, the Christian legend appealed both to my heart and mind. The Divine Martyr became my ideal, and the Mother with the Seven Sorrows I simply worshipped." In the play in question Mademoiselle Sarah took the part of the Angel who served as a guide to Tobias:—

who served as a guide to Tobias:

Nothing was spared for this great ceremony, and then, at last, it was our turn. I will not give the details of the piece, as it is well known. I tell this as one of my souvenirs, as it was my dibut. I came very near entering a nunnery. It seemed to me that there was nothing better, nothing which could make me happier. In my childish imagination I could see angels drawing me heavenwards. The only way appeared to be through the convent. In the meantime I was about to appear on the stage. I felt paralysed, and a shudder ran through me from the back of my neck to my feet. I fancy that I missed the right moment for appearing on the scene, as one of the girls pushed me forward, just as my professor, Monsieur M. Provost, had to do some years later when I made my début in "I phigenia" at the Comédie Francais. My entrance was a success, for I had a sudden fit of self-assurance, although I was really half delirious with fright, and I went through my part very well, adding whole phrases to it. I scarcely knew what I was saying, but I continued nevertheless.

When the piece was over the guiding angel was sent for by Monseigneur. I was perfectly triumphant, "What's your name, my child?" asked Monseig-

"Sarah," I replied.

"Sarah," I replied.

"That name must be changed." he said smiling.

"Yes," answered the Superior, "her father wants her to be baptised, and to be called Henriette; the ceremony is to take place in a month."

"Well, Sarah or Henriette," said Monseigneur, here is a medal that you must always wear, and the next time I come here you must recite some poetry, 'Esther's Prayer,' for me."

Monseigneur then kissed me, and this caused some jealousy.

Without delay the little actress set to work to study "Esther's Prayer;" but she had no opportunity of reciting it to the Archbishop, whose assassination was made known in the convent very shortly afterwards. "It was to me," she writes, "as though the murderer, Verger, had robbed me at the same time of my little share of glory." She mysticism, which was encouraged by our religious observances, the mise-en-scene of our services, and perhaps, too, by the fervent and cajoling approval of the women who were educating me." The artistic sense, in short, persuaded her that the career of a nun was the one she should prefer; just as,

LOSS OF THE " BOGATYR."

It is stated in Tokyo on good authority that the Russian cruiser Bogatyr has run on a rock near Vladivostock and become wreck. The Bogatyr is a first class cruiser of 6,500 tons. She emerged from the Stettin Works in 1901. Her speed is 23 knots, and she is a protected cruiser, a sister-ship of the Varyag and Askold.

According to a later telegram from London the Russian Admiral Essen has officially reported the loss of the *Bogatyr*. His despatch has been published in Paris. He is represented as saying that he feared the greater part of the crew had been lost. The Japanese conjecture that this accident occur-red when the Vladivostock Squadron was on its way back after sinking the Kinshu Maru on the 25th of April. The basis of this conjecture is a statement made by United States' journals that the Tsar was much hard to recover any title to historical achieves do nearning about the Kinshu Maru to recover any title to historical achieves and that His Majesty threatened to have Admiral Essen tried by court-martial. Shanghai 12 days after the fight when all This intelligence seemed at the moment very perplexing, but if the loss of the *Bogatyr* was announced to the Tsar simultaneously with the sinking of the Kinshu, the inade-quacy of the exchange may well have raised Ĥis Majesty's ire.

THE LIATISHAN DISASTER.

Of course there are all kinds of exagge-rations. Doubtless St. Petersburg is now rejoicing at the intelligence that three or perhaps four Japanese line-of-battle ships have been sent to the bottom. Such wild stories are already current in Shanghai and Chefoo. But the Japanese have told the whole story and Russia must make the most of it. Her people were thrown into an ecstasy by the sinking of the Kinshiu Marn, and they have now genuine reason to

A notable feature of the affair is that 16 Russian destroyers made their appearance upon the scene. Destroyers, then, can emerge from Port Arthur. That, after all, is nothing extraordinary. Admiral Togo stated from the first that the blocking was not sufficient to defy the passage of torpedo-craft. Some doubts are now entertained, however, as to whether the Russians may not have

The names of the officers who met their death in the sinking of the Yoshino and the Hatsuse have been published. In the case of the Yoshino they number 24, including Captain Saiki and Commander Hirowatari. In the case of the *Hatsuse* the number is 25, ed them by pointing out that the Japanese including Commander Tsukamoto, Com-soldiers would not injure private property, mander Arimori and Commander Viscount Nevertheless all valuables have been placed

M. PAVLOW.

M. Pavlow has had several conversations with a representative of the Jiji Shimpo in Shanghai says that on the 12th and 13th Shanghai, where the ex-Minister has rented instant five or six Japanese vessels approacha house for six months and taken up his re- ed Vladivostock and fired several shots at sidence. He is represented as saying that the forts and the harbour. We have no a little later the artistic sense impelled her to adopt a very different career, which was on the occasion of the last bombardment, source, and had it really occurred Admiral the one for which she was predestined. and that many of these projectiles failed report it to burst, which failures he attributes to The II the great range. The shells, in the latter part of their trajectory, moved with such slow velocity that they turned over, and thus, striking rear foremost, their fuzes did not act. In the matter of provisions, M. Pavlow alleges that Port Arthur has fully a month? fully 3 months' supply, and that the Chinese residents are understood to be in possession of tons of eatables. Many Russian ladies, he adds, are still residing in the town, which item of intelligence is interpolated, we presume, to strengthen the impression that neither the bombardments of the Japanese on the sea side nor their approach on land has any terrors for the garrison.

The Jiji's correspondent premises that he gives these statements for what they may be worth, and we are bound to say, with all due descrence, that their market value is not very high. M. Pavlow will have to work the details had become public property. No one forgets how he then depicted the Asama as put out of action by the Varyag's fire, one Japanese torpedo-boat sunk, the Takachiho so much injured that she went to the ing down.

THE PRISONERS AT FORT ARTHUR.

A Russian who left Port Arthur on the 14th is said to have stated (Jiji Shimpo's Chefoo correspondent) that a Japanese officer and two seamen, who had been taken prisoners on the occasion of the 3rd blocking operation, were summoned to the Flag-ship Scrastopol. There the officer wounded one of his escort and the seamen became violent. The seamen were killed and the officer wounded. We should like to know what kind of treatment drove the unfortunate men to such a course. No sane person can suppose that three Japanese prisoners, treated with even moderate consideration, would behave as this Russian alleges.

According to the same authority, there succeeded in removing the obstructions, are 10 wounded Japanese, including 2 offi-partially at any rate, by means of dynamite. cers, and 14 unwounded, including one There is talk of a German vessel from officer, at Port Arthur. He adds that when Kiaochow having entered the port, and of the Japanese dead were examined, many a Norwegian steamer having carried coal of them were found to have committed suicide, either by strangling themselves or

The crew of the Hanyei Maru are all safe. This Russian further alleges that the Dalny citizens were preparing to destroy their houses when General Stoessel restrainin four large steamers which will be sunk at the supreme moment.

The garrison of Port Arthur places absolute reliance in Admiral Togo's reports.

VLADIVOSTOCK.

A Chinaman who recently arrived at

The United States consul at Vladivostock is said to have reported officially that the Japanese prisoners taken on the occasion of the Kinshu Maru, namely, 26 officers and 184 men, have been most kindly treated by the Russians. On the 28th ult. they were sent from Vladivostock to Irkutsk. The military authorities warned the inhabitants to avoid any demonstration, but the warning seems to have been superfluous as there was no appearance whatever of a dis-position to be offensive. The prisoners were well supplied with food and tobacco by the Russians. It is very satisfactory to be able to record things of this kind for unquestionably there is growing up in Japan a sentiment of burning indignation against the barbarous doings of some of the Rus-sian soldiers. The Cossacks, who appear to be under no kind of restraint and whose normal tendency is to commit excesses of every kind, are doubtless the greatest sinners, but in the immediate context of the shocking mutilation of a Japanese soldier captured by the Russians at the Husan position on the Yalu, news comes—ap-parently authentic—that in several instances the Russians stabbed, shot and hacked the Japanese wounded as they lay groaning on the field at Hohmutang, and this dreadful killed and wounded sent home in a transport the next day. It would be very hard to beat that list of inventions, and it makes a record which M. Paylow will have difficulty in living down. combat with infinite loathing and regret.

DEATH OF MR. ALFRED B. GLOVER.

We learn with profound regret that Mr. Alfred B. Glover died at Hongkong on the 25th instant when en route for Europe. Mr. Glover had been in broken health for some time, and of late his condition inspired so much uneasiness that a trip to his native land was recommended by his medical advisers. But he did not live to see bonnie Scotland again, and it must now be a source of sad reflection to his closest friends that he expired at a distance from their loving ministrations. A very old resident of Japan, most of his career was spent in Nagasaki, where few men have ever won more universal popularity or better deserved to win it, for his was one of those rare natures which seem to have come guileless into the world and to have passed through it exercising everywhere good influences and suffering nothing from contact with life's darker ex-periences. We bid him a sorrowing farewell, and to his family, above all to his brother Mr. T. B. Glover, offer the assurance that his memory will long be cherished in many hearts.

THE " AKATSUKI."

It appears that the loss of life on the Akatsuki on the 20th instant at Port Arthur was 23, and that 5 of these died of their wounds. All the officers, 6 in number, have received a step of posthumous rank, and have been honoured with the Order of the Golden Kite.

NOTES ON CURRENT EVENIS.

of the 'Varsity boats' crews adopting particular profession, and this is how it worked out: Among the Oxford men it is 11 to 8 on the Church, 5 to 2 against the Law, 10 to 1 against the Army, and 20 to 1 against the Medicine; for Cambridge 5 to 4 on the Church, 11 to 8 against the Law, 33 to 1 against Medicine, and 33 to 1 against the Army. Thus it seems almost a member of the order of the or Some time ago a statistician of sporting Army. Thus it seems almost a certainty that each boat this year contained an embryo vicar or maybe a bishop in posse. It will be remembered that every member of the first Oxford crew took Holy Orders, while one became a bishop and two died deans; and of the rival crew Selwyn was to be Bishop of Lichfield and Merivale Dean of Of 151 men who rowed for Oxford in Ely. Of 151 men who rowed for Oxford in the first fifty years of the Boatrace, 108 went into the Church, 31 wooed the Law, 8 joined the Army, and 4 became doctors and of 134 Cantabs during the same period 80 plumped for the Church, 50 for the Law, and only 2 chose the Army or Medicine. Bishop Awdry, of South Tokyo, is an old Blue, having rowed in the Oxford boat.

The report that " A Chinese Honeymoon ' ed at £90,000.

The United States cruiser California was Francisco on April 28. The local newspapers contain long accounts of the ceremony, but we have only space for the flowery introduction with which the San Francisco Call starts off its report:

As willingly as a newly born babe nestles on the bosom of its mother the United States cruiser California glided yesterday into the waters of the bay. Fully 50,000 people watched her wed the rime of countless ages, her bow foaming with California

the sea, voiced by every articulate note of encouragement that a representative American citizenship could devise.

odium in which spies are held should be regarded as one of the unreasoning prejudices bequeathed to the world by tradition. Appian, we believe, was originally responsible for the enunciation of the principle that it is usual to kill spies, and Vattel lent the weight of his great authority to a ruling that capital punishment is essentially just in the case of a spy. Why should it be essentially just? The Brussels Conference of 1874 unintentionally reduced the matter to something very like an absurdity when it decided that military men penetrating within the zone of an enemy's army to collect information should not be considered as spies if it has been possible to recognise their military character. In other words, disguise is the essence of the perfidy. A man can not possibly be a successful spy hasalready yielded £60,000 clear profit draws attention to the gold there is in a really successful play. Some years ago it was said that "Rip Van Winkle," in which Joseph Jefferson played the title-rôle no fewer by the epithet "insects" which a Russian Joseph Jefferson played the title-rôle no fewer by the epithet "insects" which a Russian Capital Some Part of the han 5,000 times, earned the amazing sum General is reported to have recently applied than 5,000 times, earned the amazing sum of £1,000,000, and that for three successive to some Japanese habited as Chinese or seasons at the Boston Theatre it averaged Tartars. Now when an intelligence officer seasons at the Boston Theatre it averaged Tartars. Now when an intelligence officer £4,600 a week in gross returns. "The Old employs all his energy and acumen to Homestead," another American favourite, is discover the naval or military secrets of redited with earning £950,000 in twelve the country where he is serving, and when years; "Our Boys" ran for four years at he transmits these secrets to an intelligence an average profit of £400 a week; and bureau in the home country, how does he Barrie's "Little Minister," it is said, has differ from an ordinary spy? All intelligence are seed the £100,000 more in a rest of the first profiters do not consider it a part long passed the £100,000 mark in net profit, ligence officers do not consider it a part Even the authors' shares of the gold yielded of their duty to push their investigations of their duty to push their investigations by popular plays are on a regal scale, into matters which a State desires to hide, "Sweet Lavender" poured £40,000 into but some do, and truly their resemblance to Mr. Pinero's pockets; Mr. G. R. Sims cleared spies is more theoretical than real. And into matters which a State desires to hide, as much as £15,000 in a single year from when we go down to the bed-rock of the his "Harbour Lights"; while "Pygmalion matter, why should not a man serve his and Galatea" contributed £50,000 to Mr. country as a spy if his country has urgent W. S. Gilbert's ample fortune and his profits need of his services in that capacity? The from half a dozen operas have been estimated quality of patriotism should not be strained.

If a man thinks and believes that he can save hundreds of his countrymen's lives and perhaps save the life of his country herself, launched from the Union Iron Works, San by assuming a disguise to penetrate her enemy's secrets, and if he takes all the risks of doing so, we really fail to see why he should be execrated or called an "insect."

> The terms of the new domestic loan have now been definitely settled, it is said; namely, interest at the rate of 5 per cent., issue price 92, period 7 years, and denominations of bonds 25 yen, 100 yen, 1,000 yen, and 5,000 yen. The date of tender will be from the 10th to the 10th of June,

the security money—2 per cent.—will be considered as the first installment, and from July to March the collection will be at the rate of 10 yen monthly.

In referring to the recent Religious Con-ference held to declare that the present war is entirely independent of religion or of race, we stated that the Greek Church was not represented. It appears that we were mistaken. Mr. K. Semema, Principal of the Theological School of the Greek Church in Tokyo, read a congratulatory paper which is said to have been very cordially received. While it seemed to us very regrettable that the Greek Church should stand aloof from such a demonstration, in view of that Church's connexion with the Russian State, we find it for the same reason not less remarkable and commendable that a representative of that Church in Japan should occupy a place on such a platform side by side with other religionists at a time like the present.

It appears that when the war broke out there were 19 Japanese subjects in Irkutsk. They made their way to Chitah, whence 31 of the former Japanese residents had departed, leaving 29. Thus Chitah had a Japanese community of 48. They asked the Russian Authorities to aid them in getting away, but their application proved fruitless. Finally Berlin. There the Japanese Representative communicated with Mr. Takahira in Washington, and Mr. Takahira passed the matter on to the Foreign Office in Tokyo, Arrangements were finally made for the passage of the fugitives to Berlin, whence they proceeded to London and ultimately to Japan.

The will of the late Miss Frances Power Cobbe, the eminent humanitarian and antivivisectionist, contained an extraordinary clause. The deceased had a horror of being buried alive, and to obviate her premature interment she gave instructions that some time after death the doctor attending her should sever the arteries of the neck and windpipe, almost entirely removing the head. In default of this being done all the bequests were ordered to be revoked. A similar precaution was taken, some years ago, by Edmund Yates, the novelist, and proprietor of the London World, who directed that a fee of twenty guineas should be paid to a surgeon to sever the jugular vein before his remains were interred.

Miss Cobbe, like so many ladies who attained literary fame, was the daughter of an Irish landlord. Miss Edgeworth, it may be remembered was also the daughter of an Irish landlord; Lady Wilde and Mrs. Hungerford were the daughters of Protestant clergymen; while Miss Emily Lawless is the daughter of an Irish peer. Miss Cobbe knew many famous men countless ages, her bow foaming with California tions of bonds 25 yen, 100 yen, 1,000 yen and women in her day, of whom her anecdotes were often entertaining. She used to the paces, She was the prominence that the occasion had forced upon her told the ship in a clear voice, "I christen thee, California." Close to her breast she held a magnificent bunch of American Beauty roses. She was Miss Fiorence Mary Pardee, daughter of the Governor of California, and the fittest and sweetest little girl that ever sent a warship on its mission to destroy or be destroyed.

Never into the saft sea has gone a vessel freighted with the responsibilities of the maintenance of a great republic and the hope of humanity so gladly as did the California. Only a whimper could be heard from the stout timbers that have held her so long from contact with the element she was born to; no steel plate on her vast sides failed to welcome their mission; not a rivet squirmed under the test. Compactly, unswervingly, and without complaint she answered the prayers of her makers and went into and women in her day, of whom her anecdotes were often entertaining. She used to tell, for example, how she met John Bright one day after the *Times* had published a false

to be "dry" struck her more than anything else about Mill. Miss Cobbe's death recalls to mind a bon mot of Darwin, told by the late Professor Huxley now more than twenty years ago. At that time the late Mr. R. H. Hutton, of the Spectator, had taken up the At that time the late Mr. R. H. "Who is this Mr. Hutton?" said Darwin, "he seems to be a kind of female Miss Cobbe." Professor Huxley described this as the most beautiful double-barrelled " score '

The other morning, at the foot of a tree in the Boulevard St. Mande, near Vincennes (says the Paris correspondent of the Globe) a passer-by picked up a little school satchel, containing pair of tiny ear-rings, a small ring, and a letter addressed to "M. le Commissaire de Police de Vincennes." This official, on opening the letter, read as follows:

M. le Commissaire,—I have drowned myself because my mother did nothing else but beat me. And because she does not love me I have thrown myself into the water. I have lived long enough—twelve years and a half. Adieu, Mother. Perhaps my mother will come and identify me at the Morgue.—39, Rue de Paris, Vincennes."

The writing and spelling were evidently those of a child, and the letter bore no signature, but at the address given the commissaire found a woman in despair at the loss of her little girl. The poor woman had not seen her daughter, named Juliette, aged twelve and a half, since the previous day. After a night spent in vain research, she had gone to the school where her girl was last gone to the school where he gil was had raily an Shahuang, the German hands be seen and there she was told that Juliette had in Peking has demanded that permission be probably committed suicide. The Commissive having made certain inquiries among line. It is thought improbable that the comrades of the missing child learned Chinese Government will be able to resist the comrades of the missing child learned the following story. On the previous Mon-day afternoon Juliette gathered half a dozen of her fellow-pupils round her and declared to them that she had had enough of life, and that she intended to put an end to her existence. She, therefore, wanted their assistance in drawing up a letter to the Commissaire de Police of Vincennes, informing him of her tragic resolution. After several attempts, in which Juliette was loyally seconded by her comrades, the letter referred to above was written by Juliette on a page torn from her copy book. When the school was dismissed the girl said good-bye to her little comrades, and handed over her books to one of them. But none of the conspirators said a word to their parents of the plot in which they had assisted. It was only the next morning, when one of the girls handed over the books of Juliette to her teacher, that questions were asked and an inquiry out her sinister resolution and drowned her-self is at present unknown, but the lakes in the Bois de Vincennes and the canals in the neighbourhood are being dragged with the neighbourhood are being dragged with the object of discovering the facts of this strange

had a large circulation, Food and Feeding compressed air is admitted until the guage going through 12 editions, and Diet in Relassians shows that the pressure of the air and water tion to Age and Activity attaining no less that 18 editions. A theological work, The and mines, cables, &c., can be dealt with as Unknown God, had also some vogue. By members of his profession Sir Henry Thompson was recognised as an authority, and as if the boat is being used as a picket, for despenses the present the present of the poor is the compartment provides for telephonic communication with the shore son was recognised as an authority, and as success in that undertaking he was appointed very favourably on the fact that the boat can affair. Considering that these people have

the same office with the present King. Dr. to get out of order in most submarines are Thompson was knighted in 1867, and was the storage battery and the electrical equipcreated a baronet in 1899.

Two remarkable cricket records were established on April 9 in Victoria. W. Armstrong, playing for Melbourne against the University, made 438, of which he continued the continued to the continue tributed 222 on the previous Saturday. The second record was that of 433 put on by Armstrong and Monfries for the fifth wicket. This stands against the world, and is the best partnership yet recorded in Australian cricket. Armstrong hit 46 fours and one fiver, and gave two difficult chances. Throughout he batted freely at the rate of a little over 1 a minute. Monfries played a good innings for 123 runs. At the close of the day's play Melbourne had scored 699 for the loss of eight wickets and the game was drawn.

The three famous medical experts, Dr. Hashimoto, Dr. Sato and Dr. Kikuchi, have been attached to the Head Quarters and will be in charge of the military hospitals in Tokyo, in Hiroshima and in Matsuyama respectively. They will have under their direction a staff of the very best surgeons the country can furnish.

It is reported from Peking that in consequence of recent attempts on the part of lawless individuals to injure the German railway in Shantung, the German Minister this demand. The Chinese Government never does seem able to resist any demand. Ordinary folks can not appreciate why the Peking statesmen should deliberately create for themselves in Shantung another Manchurian-railway question, but the Chinese will probably allow it to be created. They would be lonely, apparently, without some-thing to remind them of their aggrieved condition.

A Board, consisting of officers responsible trials. The Holland boats at present in the American Navy are not suitable for coast defence, but the report of the Board on the Lake boat is so satisfactory that the purchase of five boats of this type has been recomthat questions were asked and an inquiry instituted. Whether the child really carried with the Protector, as the trial boat is called, tains a connexion to the low pressure air system, and is connected by telephone with affair.

The death was announced at the end of April of Sir Henry Thompson, Bart., the eminent surgeon, aged 83 years. To the general public Sir Henry Thompson was best known by his works on diet, all of which appeared outwards. When the door is to be best known by his works on diet, all of which appeared outwards. When the door is to be best known by his works on diet, all of which appeared outwards.

Surgeon Extraordinary to his Majesty, and run under the surface by gasoline propulon that King's death he was appointed to sion. The elements which are most likely the storage battery and the electrical equip-ment which provide the motive power when the vessel is submerged. But in the Lake boat an automatic sighting valve in the top of the conning tower admits air for the gasolines and excludes spray and water, so that the gasoline engines can run even when the boat is to that extent under water. She can therefore move much faster, and in many conditions of light and weather will be able to get within striking distance even if her electrical equipment be totally disabled. The Board considers that vessels of this type will be invaluable wherever swift tides, rough water, or width of channel prevent reliable mine

> The good seed sown by the Japanese in their Manchurian campaign of 1894-5 is bearing fruit now. Wherever the troops of the First and Second Armies make their appearance they are heartily welcomed by the people, who hasten to perform all kinds of services for them, even to the drawing of water for the horses of the cavalry water for the horses of the cavalry and artillery. Japanese officers report that they find everything much easier than it was in Korea, where the inhabitants were too timid or too ill-disposed to offer aid or refrain from molestation. During the China-Japan War we were all familiar with the excellent reputation won by the Japanese in Manchuria, and with the fact that when the time for evacuation was approaching, potitions against that measure were addressed to the military and civil officials of Japan. During the past four years, on the contrary, the country has been over-run by Russian troops, and what that means need not be explained.

Field-Marshal Oyama, Chief of the Head Quarter Staff, has issued an instruction to the troops in the field. He reminds them that they are fighting a powerful enemy in a friendly country and that they have to pay the utmost deference to all the manners, customs and usages of the Chinese, reverencing the aged, treating women and children for the American coast defences, has been gently and courteously and observing all loputing Mr. Simon Lake's submarine torpedo-boat through a series of exhaustive trials. The Holland boats at present in the Russians are Koreans acting as spies, and urges the great importance of making quite clear to the people the reasons of the war. Against nothing does he warn them more stringently than against arbitrary requisitions under any pretense whatever.

> From Haiching comes a statement that the Russians having required the Chihsien of Haiching to collect and furnish a large quantity of provisions for the troops, the Chilisien replied that to comply would be a manifest breach of neutrality. Thereupon the Russians seized him and sent him under arrest to Liaoyang. With much difficulty his release was effected, after the Peking Government had made several applications to M. Lessar. It is interesting to contrast there doings on the part of the Russians with their loudly uttered accusations of some apparent intention or disposition on China's side to depart from the route of strict neutrality. If she has kept her feet steadfast in that route. it is certainly not from want of provocation to leave it.

London telegrams allege that an explosan operating surgeon he was most successful, troying or repairing the cables of mines, and sion was the cause of the Orel's troubles, In 1863 he performed a difficult operation on the crew can escape from the boat in case and of course the idea is that the Nihilists Leopold I., King of the Belgians. For his it comes to grief. The Board also reports or Socialists had something to do with the

openly declared themselves opposed to the war, and considering that many folks in Russia desire her to suffer reverses because they believe that by no other route save that of adversity can she develop the qualities making for real greatness, it certainly seems credible that the new battle-ship met with foul play.

The Official Gasette announces that Mr. Lera, hitherto Minister Resident of Mexico in Tokyo, has been raised to the rank of Envoy Extraordinary and Minister Plenipotentiary, and has presented his credentials to the Emperor in his new capacity. The news will be welcome to Mr. Lera's many friends in Japan.

FROM THE FRONT.

(FROM A CORRESPONDENT.)

Shanhaikwan, Sunday, 8th May, 10.30 p.m. Word reached here to-night of the Japanese hav ing landed at Kaiping, and cut off Port Arthur. Also they have landed 10,000 men at Pitzewo, And some more in Fuchau Bay, who have gone via Fuchau, cut the Railway and seized a Russian train. This force is marching north, and is within 70 miles of Newchwang. There are also within 70 miles of Newchwang. There are also 30 transports between Fuchau and Kaiping. Whether these contain mostly stores or more men to cooperate with those landed, is not known, It is expected men will be landed on this side of the Gulf, probably at Tien-chao-yang, for Kao-chiao, to seize the Railway. The Russians at Newchwang are making all preparations to evacuate the place, removing guns and stores to Liao-yang. The foreigners there are very uneasy as the Chinese are much excited, and it is feared there will be a reign of terror, riot and rapine during the interregnum, after the Russians retire before the Japanese land. Still it is hoped the Japanese will quickly send some gunboats up the river and protect life and property. There are no signs of the Chinese regulars moving up apparent-ly. There are many ladies in Newchwang, several having gone back not long since, against the British Consul's advice, thinking all was quiet. Of course foreigners are armed, but they can't do much against a horde of Chinese and low foreigners.

The river at Newchwang is half a mile wide, the ebb-tide is very strong, and it sometimes takes r hour or more to get down to Yinkow station, so there is not much chance of getting away by rail. The Railway people have a train made up, and an engine under steam always, ready to come off at a moment's notice. But the query is whether

the Russians will not cut the line; there are many bridges, which could easily be tampered with. The Railway Administration have made arrangements with both Russian and Japanese that if either of them takes over the line, they will continue to work it for them; and the Rail-way people hope if the line is to be cut they will be allowed to do it themselves, in some simple way, and not have a bridge blown up. But if the Russians take the line, probably many Chinese employees will run off at once. We also get word, via Newchwang, that the victorious Japanese near the Yalu have gone over in the direction of Kuan-tien, to make a move from there on Liaoyang.

THE SONGS OF BERANGER.

The Alliance Française brought their season to a close on Wednesday afternoon with a reunion littéraire et musicale in the Vestibule of the Public Hall, which, despite the unpropitious weather, was very largely attended.

Mons. J. de Cuers de Cogolin, upon whose

worthy shoulders has descended the presidential mantle so gracefully worn by the first occupant of the post, Mons. C. Pravieux, opened the proceed-ings with a most interestingly phrased lecture on "Les Chansons de Pierre Jean de Beranger,"

10th August, 1780, and remarked that like the English poet Milton it might almost be said that as a baby in the cradle "he lisped in numbers." His first songs were naturally infused with the feeling of the time and breathed of the revolution; and henceforth throughout his life Beranger supported the people as against the nobles, the priesthood, the Bourbons, or any others in authority whom he thought oppressors of the poor. In 1803 appeared the first volume of his collected songs, and it created some sensation, people outside the borders of France gaining through its means some idea of the poet whose writings were on the lips of every Frenchman. In all the changing scenes of French history in those opening years of the nineteenth century, Beranger kept in touch with the moods and frenches of convitor contribution. Beranger kept in touch with the moods and fancies of popular opinion. Now he sang of the glories of Napoleon; anon he tuned his lyre to hymn the joys of peace and love; next he tilted at the priests; then he satirised the noblesse who, returning to France with the Bourbons, showed that like the Stuart Kings of England, exile had taught them nothing: they expected to re-enter their castles and estates with all their mediæval privileges and nowers unimall their mediæval privileges and powers unimpaired, forgetting utterly that the Revolution had made a return to the ancien regime with all its grave abuses and local despotisms quite impossible. For these last satirical writings Beranger was thrown into prison. This happened twice, first on Dec. 8, 1821, and again on Dec. 10, 1828. But incarceration did not stifle his utterance. Indeed, some of his cleverest as well as some of his most touching, songs were piped when he was a "jail-bird." His persecution by the authorities did not cease until 1830, when he refused the honours which the Government now wished to honours which the Government now wished to thrust upon him, likewise he spurned the money recompense offered. Eighteen years later he was elected me Deputy, but declined to sit in the Assembly. He was now growing old, but his pen continued active, though a tinge of sadness begins to steal over his compositions, especially in his love-lyrics. Indeed, in one song—(later in the evening charmingly sung by Madame Lacroix)—the poet says that "growing old, he is afraid that his songs will soon be forgotten," and he conjures "the best friends of his youth to recall those happy days of yore, so that they may not forget him." Death came on the 16th July, 1857.

Mons. de Cuers de Cogolin, who gave copious

Mons de Cuers de Cogolin, who gave copious examples of Beranger's songs and lyrics, was assisted in his Conference by several ladies and gentlemen who sang the songs of the poet in illustration of the lecturer's remarks, thus giving the large audience an opportunity of following the development of Beranger and also of noting how he kept in touch with the spirit of French how he kept in touch with the spirit of French thought and aspiration throughout all the kaleid-scopic changes of Consulate, Empire, Kingdom, Republic and Third Empire which occurred during the span of his productive life.

We append the programme, merely adding that this closing meeting of the Alliance Francaise was among the most charming and successful of any held during this season.

GOTEMBA LEPER HOSPITAL

We beg to acknowledge receipt of the following sums on behalf of the Gotemba Leper Hospital:-

THE NIPFON YUSEN KAISHA.

The following statement of the accounts were presented to the shareholders of the Nippon Yusen Kaisha at the general meeting 27th:-

TO THE SHAREHOLDERS

Gentlemen:—The Directors submit to you the annexed Statement of the Liabilities and Assets of the Company, and Profit and Loss Account for the Half-Year, ended March 31st, 1904.

Depreciation of the Company's fleet	Yen.
and property	741,589,960
Ships' Structural Repair Fund	446,299.010

leaving a balance of yen 2.471,177.591, including yen 1,001,939.675 brought forward from the last Account.

The Directors now propose that yen 73,461,900 be added to the Reserve Fund, raising it to yen 1,987,51,565 and that yen 71,338,110 be allowed as Directors' and Auditors' fees. From the remainder the Directors recommend a Dividend at the rate of Ten per cent, together with Two per cent, as Special Dividend, thus making Twelve per cent, per annum, which will absorb yen 1,320,000.000.

The Balance, yen 1,006,357.581, will be carried forward to the next Account.

Rempei Kondo, Chairman.

Head Office, Tokyo, May 27th, 1904.

TAKESHI ARISHIMA.) Auditors Tokujiro Obata. Tatsumi Iida,

Tokyo, 27th May, 1904.

THE " HATSUSE" AND " YOSHINO!

MISFORTUNES never come singly. The period of extraordinary immunity from accidents enjoyed by the Japanese navy has been broken by four disasters, following in quick succession and involving the loss of a battle-ship, a cruiser, a despatch-boat and a torpedo-boat. None of these was lost in fair fight. The torpedo-boat and the despatch-boat met their fate while engaged in the dangerous operation of clearing away mines laid by the enemy. Such incidents find only a marginal place in the chapter of regular war. cruiser Yoshino, again, met her fate under circumstances which had no direct connexion with fighting. She collided with another cruiser in a dense fog at a place far distant from the scene of belligerent operations. Such a misfortune might occur at any moment, and is always liable to occur in seas so subject to fogs as are the Pechili Gulf and the Yellow Sea from spring to summer. It is a piece of ill luck. That is all we can say. The extremely perplexing circumstances under which it occurred may be surmised from the fact that the tack that the Assuga could not save more than 90 out of a complement of about 350 carried by the Yoshino. But the sinking of the Hatsuse is rightful interests of western nations and in particular to the extension of the Christian religion. from the scene of belligerent operations. an affair of a different nature. It must be cular to the extension of the Christian religion. ranked distinctly as a Russian success; the first substantial success scored on the such fears will prove to have been wholly unenemy's side. To minimize it, or to deny founded; but I am equally sure, especially if to the recognized representatives of all the relithat it stands to the credit of the Russians Japan should continue to be successful, that Rusglous bodies in the country, Buddhists, Shintoists,
would be unmarrly. What can not be sia will leave no stone unturned to alienate the that it stands to the credit of the Russians' Japan should continue to be successful, that Russians' Japan should continu Hatsuse exactly what the Japanese did a this case I can easily see how the recent troubles month previously to the Petropavlovsk in in China can be made to furnish a plausible the Port Arthur offing. loss of life in the case of the Hatsuse was to prejudice the mind of the people of America loss of life in the case of the Hatsuse was to prejudice the mind of the people of Americal not nearly so serious as in the case of the against Japan therefore cause me some concern; Petropavlovsk. That is something to be especially because I am afraid that the awakening of real doubt as to the integrity of Japan may sincerely thankful for. But the Japanese will tend to create the very situation which is apprenow have to recognise that the enemy is learn-hended. But while I do feel concern, my coning from them how to fight and that greater fidence is greater than my concern. I cannot but believe that a fair presentation of the case circumspection must be exercised. There is will satisfy the American people that Japan has one other comment. The Hatsuse struck a manuswer to whatever herenemies may say against mine at a point 10 nautical leagues from her.

The object of the present war, on the part of the Liautishan promontory. *The distance I Japan, in the security of the empire and the perfrom that promontory across the channel manent peace of the East. That such is to the opposite coast is less than 70 necessary is plain. No one can look at the map miles. Was there any manner of security, that that course is an imminent peril to Japan; and is there any manner of security, that the peril must be met without delay. No the steamers of neutral Powers lawfully less clear is it that Russia is, and if allowed to be will continue to be, the great disturber of the peace of the East; and that there can be no permanent peace until she is put in bonds which she cannot break. Regarding this also there can be no delay. Therefore I say that the object of the war is the security of the empire and the permanent peace of the East. To this I may add that simply into this, that the Russians are lay-the situation is not a new one. The position of the peace of the East. To this I may add that the situation is not a new one. The position of the peace of the East. To this I may add that the situation is not a new one. The position of the peace of the East. To this I may add that the situation is not a new one. The position of the peace of the East. To this I may add that the period is that Russia is, and if allowed to be will continue to be, the great disturber of the peace of the East; and that there can be no permanent peace until she is put in bonds which she cannot break. Regarding this also there can be no delay. No ing mines in the fair-ways of the world's Japan is closely analogous to that of ancient Greece in her contest with Persia; a contest for the security of Greece and the permanent peace savage. That this most iniquitous war of Europe. Japan is Greece and Russia is Persia, should have been brought about by the But while I say that the object of the war is the security of the empire and the permanent peace security of the empire and the permanent peace. should have been brought about by the insatiable aggressions and flagrant arbisecurity of the empire and the permanent peace army went to the relief of the foreigners besign of the Power responsible for the organization of the Hague Tribunal, was of race over race or of religion over re- war to have China for an ally. AN INTERVIEW WITH COUNT KATSURA.

I was recently favoured with an interview with Count Katsura. The conversation lasted for nearly two hours; and its subject was the so-called Yellow Peril. Since then I have submitted the following account of the interview to him, and have received his assurance that I understood him correctly. I have also the permission of Count Katsura to make the account public.

WILLIAM IMBRIE.

The friendship of the American people for

Happily the argument in proof of danger in the future. These half concealed endeavours on the part of Russia

With differences of race or religion has nothing to do; and it is carried on in ne interests of justice, humanity, and the com-serce and civilization of the world. In saymerce and civilization of the Russia is at friendly peace—this alone was statements are to be regarded as deplomatic; and that diplomatic statements have the reputation of being inscrutable. That that is true of the statements of some I do not deny; but it is not true of the statements of all. It is not true of those of the Secretary of State of the United States; and there is no evidence that it is true of those of the Prime Minister of Japan.

Of course I cannot argue from facts that lie hidden in the future. That is impossible. But I can point to the past and the present; and the past and the present are an index of the future, just as truly in the case of a nation as of a man. To put the matter as it might be put I should have to go over the history of Japan from the time of the arrival of Commodore Perry; but I cannot do that at present, and must content myself with

I do not think that any government in the world at the outbreak of war ever took such pains, as the Government of Japan has taken, to emphasize to all the duty of conducting the war in strict accordance with the principles of humanity and the usages of international law. Immediately upon the opening of hostilities, communications were sent to all the Governors of Prefectures, reminding them of their responsibilities and especially with regard to any Russians that might be residing within their jurisdiction. Under the authority of the Minister of Education, directions were issued by which all the students in the empire, from the young men in the higher institutions of learning down to the children discountenance any wrong tendencies among the more ignorant of the people. Among the points emphasized by the Government are these: That the war is one between the State of Japan and the State of Russia; that it is not waged against individuals; that individuals of all nationalities, peacefully attending to their business, are to suffer no molestation or annoyance whatever; and the questions of religion do not enter into the war at There have been a few isolated cases in which persons have been treated with rudeness; but no serious harm has been done, and in some instances the aggrieved parties had not been quite so discreet as they might have been. So far as the conduct of the people generally is concerned, in this particular at least it will take rank with that of the people of any country in the world under similar circumstances. I do not wish to boast, but my own belief is that it would take the

The imputation is made that if Iapan is successful in the present conflict, the day will come when to serve her own ends, she will not be above utilizing the anti-foreign spirit that is now lurking among the masses of China. The spirit that held the Legations in Peking in peril of life; that massacred hundreds of helpless foreigners and Chinese Christians; and that brought deep anxiety and sorrow to the whole world. I will not go into the history of the Boxer movement and the steps taken to suppress it; though if I did I could show that, for reasons that are now somewhat more evident than they then were, no other nation occupied so difficult a position as Japan. But no candid man can say that in all that trying time Japan was derelict in the performance of her duties; and no one has a right to institute that in the future she will be less broad-minded, less honourable, less humane, or less the friend of the civilization of the West, than she was when her army went to the relief of the foreigners besiegare rightly informed know that from the very outset of the war and ever since, Japan has steadily endeavored to limit the field of operations and to preserve the neutrality of China. And one great reason for this has been precisely to avoid the danger, with all its terrible possibilities, or fanning into a flame the antiforeign spirit in China. When therefore Japan says, the permannent peace of the East, she does not mean the East in arms against the rightful interests of the West or the civilization of the world.

The argument against Japan is sometimes put in this form: Russia stands for Christianity and Japan stands for Buddhism.

might be done in the United States, and without attracting much if any more attention. There are numerous Christian newspapers and magazines, which obtain their licences precisely as other newspapers and magazines; and as a matter of newspapers and magazines; and as a matter of newspapers and magazines; and as a matter of course. Christian schools, some of them conducted by foreigners and some by Japanese, are found everywhere; and recently an ordinance has been issued by the Department of Education, under which Christian schools of a certain grade are able to obtain all the privileges granted to government schools of the same grade. There are few things which are a better proof of the recognition of rights than the right to hold property. In many cases Associations composed of foreign missionaries permanently residing in Japan have been incorporated by the Department of Home Affairs. These Associations are allowed to "own and manage land, buildings, and other property; for the extension of Christianity, the carrying on of Christian education, and the performance of works of charity and benevolence." It should be added also that they are incorporated under the Article in the Civil Code which provides for the incorporation of Associations founded for "purposes beneficial to the public"; and as "their object is not to make a profit out of the conduct of their business," no taxes are levied on their incomes. Presbyterian, Congregational, Baptist, Episcopal, Methodist, and other American missionaries all have such Associations. In passing it may perhaps be worth while to ask the least true that Japan in her search remain to the conduct of the conduct of their business," no taxes are levied on their incomes. Presbyterian, Congregational, Baptist, Episcopal, Methodist, and other American missionaries all have such Associations. In passing it may perhaps be worth while to ask the least true that Japan in her search to the provide of the conduct of their business, or the provide of the conduct of their business, or the can missionaries all have such Associations. In passing it may perhaps be worth while to ask the question, How far do the facts to be found in Russia correspond with all these facts now stated? Russia correspond with all these facts now stated? The number of those professing Christianity in Japan now holds, and will hold, in common with number, with a much larger number who are Christian in their affiliations. The Japanese One of the essential elements of the civilization of the West. That can missionaries all have such Associations. Japan I do not know; but it must be large number, with a much larger number who are Christian in their affiliations. The Japanese Christian in their affiliations. The Japanese Christian are not confined to any one rank or class. They are to be found among the members of the National Diet, the judges in the courts, the professors in the Universities, the editors of leading secular papers, and the officers of the army and navy. Christian literature has entrance into the military and naval hospitals; and a relatively large number of the trained nurses employed in them are Christian women. Recently arrangements have been made by which six American and British not a village in the empire without its Primary large of the armies in Manchuria, in the capacity of spiritual advisers to the Christian Schools which may be compared with the smaller soldiers. These are facts patent to all; and colleges in the Universities; and besides these shared in Japan has searched and is future, would be to violate the Constitution, and searching the world over to find the best; and

China. When therefore Japan says, the permannent peace of the East, she does not mean the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against the rightful interests of the East in arms against Japan is sometimes put in this form: Russia stands for Christianity and Japan stands for Buddhist, and Christian, or even a Jew, without suffering for it. This is so clear that no right-minded man acquainted with Japan would question it; but as there may be those in America who are not familiar with the facts, it will be well to enumerate some of them. And as in America the matter will naturally be regarded from the point of view of Christianity, I will confine myself to that point of view.

There are Christian churches in every large city, and in almost every town in Japan; and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and they all have complete freedom to teach and the same time value very large. N

hat, the old tree still stands; but the new branches eri-have been grafted into the tree, and now belong. In to the tree just as truly as the old branches which the remain. Nor is it true that Japan in her search

would create deep dissatisfaction throughout all Japan. What then becomes of the argument that Russia stands for Christianity and Japan for Buddhism?

But sometimes the argument against Japan is But sometimes the argument against Japan is stated in this way: There is a general idea that the power of the way: There is a general idea that the power of the way: There is a general idea that the power of the way: There is a genera

constitute, as any thoughtful man will admit, a dominant element in the civilization of the West. In speaking of the civilization of the West, it is headly recovered to the civilization of the West, it is hardly necessary for me to say that I am not it is hardly necessary for me to say that I am not thinking of the type which permits man to be imprisoned or transported for life, with little or no process of law. Since the beginning of the Era of Meiji, Japan has entirely remodeled her laws, both criminal and civil. This was done ofter a most paintaking study of the laws of after a most painstaking study of the laws of Europe and America, with the aid of foreign experts; and Japan has no reason to be ashamed either of her laws or of the administration of them, either of her laws or of the administration of them, even when judged by the standards of the West. Japan also accepts her place among the nations of the West as bound by the principles of international law both in peace and in war; though she regards a judge, sitting in highest Court of Arbitration in the world, as exceeding his duties, when he introduces into his judgment uncalled for when he introduces into his judgment uncalled for criticism of a nation in no way connected with the case under consideration.

But to mention only one thing more. Perhaps there is nothing more peculiarly characteristic of the civilization of the West than government the civilization of the West than government under a Constitution; though there are nations which belong geographically to the West in which a Constitution is not regarded as advisable. Japan has a Constitution which provides for an Upper and a Lower House, through which the will of the people finds expression. In one particular also the Constitution of Japan has in the eyes of Japan a peculiar glory. It was not, as has been the case in many countries, the fruit of a long struggle between the nation and the Throne. It was the gift of the Emperor; freely given, gratefully received; a sacred treasure which both alike will guard with care.

alike will guard with care.

Reference has already been made to the warning that Japan stands eagerly waiting to take the leadership of the East; and that if she does so, it will be in the spirit of the East against the West. Whether or not it is the destiny of Japan to be the leader of the East remains to be unfolded. But if ever that responsibility shall be hers, of one thing the world may be sure. She will not will thing the world may be sure. She will not willingly retrace her own steps; and she will at least endeavour to persuade the East to do what she has done herself, and what she is trying to do more perfectly.

more perfectly.

The object of the war then, on the part of Japan, is the security of the empire and the permanent peace of the East. It is carried on in the interests of justice, humanity, and the commerce and civilization of the world. With differences of race or religion it has nothing whatever 10 do. But the enemies of Japan say that this is not true; that the war is a war for the supremacy of race over race and religion over religion; and they talk of a Yellow Peril. In reply Japan asks for a fair hearing.

fair hearing.

Fire broke out about twenty minutes past eight o'clock on Friday evening in the upper-rooms of a Chinese macaroni shop at 191, Yokohams. The flames were soon through the roof, but the roof in the control of the roof of the control Fire Brigades were not long in getting the outbreak under control.

On May 20th at 11 a.m. fire broke out at Numakunai, Iwate, near Morioka, destroyikg two hundred and fifty buildings including a police station and other public offices. The cause is believed to be sparks from a train which had passed the district. It may be remembered that on May 5th, 1902, fire broke out from a similar cause in the same town destroying over two hundred buildings. In that case the Nippon Railway Co. paid for the damage.

The Emperor and Empress were pleased on

May 24th to distribute yen 350 among the home- by Mr. K. Mort, with yen 50, for the winner, less people in Numa kunai. I wate prefecture, where and yen 50 for Second, added by the Club. For less people in Numa kunai, Iwate prefecture, where a big conflagration occurred on the 20th.

Two fires were reported on May 23rd in Ao-ori prefecture. One occurred at Yahatadate mori prefecture. Tsugaru, destroying twenty-three houses, and another at Tashiro, Nakatsugaru, burning down forty-eight buildings including the village office.

YACHTING.

Saturday's races were sailed in moist and fluky weather and it cannot be said that the proceed ings were enjoyed by those who took active part in them or that they aroused any excitement among those who watched. There was very among those who watched. There was very little wind when the 39 raters got off. Mary was first to cross the line, Maid Marion went over next and Kingfisher passed third. Mary held the lead practically all round the course and finished an easy first, Kingfisher returning after passing the Lightship outward. The official

THE NIPPON RACE CLUB.

The Off Day's racing on Saturday did not evoke much enthusiasm, the weather not being evoke much enthusiasm, the weather not being propitious and the racing mostly uninteresting. The ten starters in the second race got off badly—the worst start of the meeting. The third race brought out two horses only, both from the same stable, and the match between Fra Diavolo and the untrained China pony was, apparently, simply a joke. There was only a small attendance. Following are the events:—

BACE TOTALER 36 MILE.

AUSTRALIAN SUBSCRIPTION HORSES OF AUTUMN 1903 AND SPRING 1904 that have started at the Meeting and not won a race. Handicap.

Mr. Graal's Elsa, 135lb..............(Mr. Dietrich) I Mr. B. Runge's Tarantella, 140lb.........(Kano) 2 Mr. R. Loonen's La Friponne, 150lb...(Kurosaka) 3 Mr. Norfolk's Primrose, 157lb...(Count Wolffskeel) 0

Tarantella had a little the best of the start, but La Friponne drew ahead getting to the half mile post, Tarantella being a length behind, and Elsa in third position a length behind the second horse. Reaching the Trees the three horses were racing close. together, but coming into the Straight Elsa took the lead, and won a good race by three lengths from Tarantella, La Friponne a good third. Time, 1.26. Winner paid yen 23.00

RACE 2.- DISTANCE 3/4 MILE.

THE "SCHERZ SAYONARA" CUP, (pre-THE "SCHERZ SAYUNARA" CUP, presented)—The Cup to go to the rider, with yen 100, for the winner, and yen 50, for Second, added by the Club. For ALL CHINA PONIES that have started at the meeting. Weight as per Scale with 10 lbs. added. To be ridden by full Members of the Club, or Visitors (approved of by the Committee) who have never won a race on the flat in the East.

Mr. K. Ikeda's Mark, 160lb,.....(Mr. Ninmerfall) I
Mr. Graal's Fluechtling, 160lb...(Count Wolfiskeel) 2
Mr. May's May-moth, 157lb.......(Mr. Hughes) 3
No. 127 Mess' C.O.D., 164lb.......(Mr. McClure) 0
Mr. Twoman's The Leader, 154lb.

(Mr. Werckmeister) o

RACE 3.-DISTANCE I MILE.

Two starters from the same stable, and the race had little interest, there being no Pari Mutuel. The two horses ran round the Course close together, Rose de France winning by a couple of lengths. Time, 1.55.

RACE 4.- DISTANCE I MILE.

THE "ADONIS" Cup, presented by Mr. G. WERCKMEISTER. The Cup to go to the rider, WERCKMEISTER. The Cup to go to the rider, with yen 100 for the winner, and yen 50 for Second added by the Club. For Subscription China Ponies of 1904 that have started at the Meeting and not won a race. Weight as per Scale with 10 lbs. added. To be ridden by full Members of the Club or Visitors (approved of by the Committee) who have never wone 1800. the Committee) who have never won a race on the flat in the East.

Mr. Norfolk's Pit-a-Pat, 160lb. (Count Wolffskeel) Mr. Norfolk's File-and Mr. May's Mayor, 160lb.....................(Mr. Filigines) Mr. Mr. R. Loonen's Gaulois II, 154lb. Mr. von Hessenthal) 3

Mayor was most favoured for this event, but Pita-Pat led all the way round. At the half mile post there was but two lengths separating the three ponies. Then Pita-Pat got away and in the Straight was five lengths alread of Mayor, Gaulois II being about seven lengths behind the second pony. Pita-Pat won by about ten lengths from Mayor, Gaulois II a bad third. Time, 2 20 rd. Winner paid yen 15.

RACE 5.-DISTANCE I MILE.

THE "CARNATION" Cup, value yen 200,

Mr. B. Runge's Tarantella, 150lb....(Mr. Dietrich) 3 Mr. J. T. Hamilton's Daisy, 131lb.(Horikoshi) o

Mr. J. T. Hamilton's Daisy, 131lb.(Horikoshi) o Juno was a strong favourite. The four starters got away well together and Juno was in the lead in the dip, where Daisy bolted to the rails. Chouchou then came up and ran neck and neck with Juno to the half mile post, with Tarantella a length behind the second horse. At the Trees Chouchou was leading by a length, and finally won by about five lengths from Juno, Tarantella a bad third. Time, 2.00½. Winner paid yen 51.50.

RACE 6.—Fra Diavolo v. China Subscription No. II. DISTANCE 1/2 MILE.

Fra Diavolo, 155lb.(Mr. von Hessenthal) 1 China Subscription No. II, 155lb. ...(Mr. Hughes) 2 This was something of a farce, Fra Diavolo winning by nearly a furlong.

RACE 7 .- DISTANCE 1/2 MILE.

Coquette, 18olb	(Mr. Loonen) r
Floy, 169lb	(Mr. Lefeber) 2
Peter, 165lb	(Mr. Pors) 3
Peggy, 151lb(Co	
In this race Coquette had to s	
behind the other horses. The	
Connette, held in Floy second, and	d Peter third.

THE P.M. STEAMER " MONGOLIA."

The Pacific Mail steamer Mongolia, 14,500 tons, which arrived in Yokohama on Tuesday evening on her maiden trip to the Far East, is a magnificent vessel in every respect. Built origi-nally for the Atlantic trade she was acquired

e .	Mr. R. Loonen's Gladiateur, 163lb. A very had start and Mark secured the lead, two or three ponies being left right behind. Mark, May-moth and Fluechtling were running close together reaching the Trees, but in the straight the latter came into second position, and finally Mark won by a length from Fluechtling, May-moth m good third. Time, 1.423. Winner paid yen 17.00.	from San Francisco:— Left San Francisco:May 7th 7 p.m.
r T	RACE 3.—DISTANCE I MILE. THE "HITACHI" Cup, value yen 100, presented by Mr. N. KAWAKITA, with yen 50, for the winner, and yen 50, for Second added by the Club. FLORENCE CRITTENTEN RESCUE HOME.

The formal opening and dedication of the Florence Crittenten Rescue Home at 356 Okubo on May 14th, despite the inclemency of the weather, was quite a success. Four hundred guests came, and listened with interest to the excellent programme; Mrs. Honda, wife of the President of Aoyama Gakuin, presided at the morning session; Rev. G. Fukuda, Rev. H. Kozaki, and Dr. Oltmans, of Meiji Gakuin, each had a part in the dedicatory services. Mrs. K. Yajima, of Joshi Gakuin, Bancho, gave the history of our efforts in rescue work for the past nine years; showing encouraging results. Mrs. J. K. McCauley; (the superintendent of the Home) reported the building completed, and the old building put in repair. The amount paid was yen 5,27.10, and a small balance was in the treasury, sufficient to meet came, and listened with interest to the excellent small balance was in the treasury, sufficient to meet presented by Mr. G. BARCLAY, to the winner, a few bills not yet in. At the noon hour, a lunch with yen 50, added by the Club to the Second was on sale, contributed by those interested in the Horse. For Australian Subscription Horses and articles contributed were sold. The sale and of 1904 that have started at the Meeting and not N. Tamura, and Dr. J. Soper, gave instructive and carefully prepared addresses. The music was no small part of the programme, choruses from the Azabu, Aoyama and Bancho Girls Schools, as the Azabu, Aoyama and Bancho Girls Schools, as well as Miss Hayashi, (the sweet singer from Ferris Jo-Gakko) delighted the audience. Mr. Miyashi, the Biwa gospel evangelist, with biwa and violin helped to make the programme very interesting and a famous sword fencer finished the afternoon. The committee wish to thank all who contributed in any way toward the building fund sustentation, and the refreshments.—Communicated.

LITERARY GOSSIP.

The Graphic is worthily maintaining its tradi-The Graphic is worthily maintaining its tradi-tions in the matter of illustrating current events in general and the Japan-Russian war in particular. The number for April 16 contains many photo-graphs and sketchs from both sides, and among the pictures is a photograph of the war-corres-pondents who spent such a long time in Tokyo pointents win specific strength of the front. The two-page supplement = The Graphic Guide to the Seat of War" is excellent and should be mounted on stiff card at once by every one fortunate enough to possess it.

The mother of Mr. Thomas Hardy, the nove-The mother of Mr. Thomas Hardy, the novelist, has just died at the age of ninety-one. She died in the thatched cottage which she occupied all her life on the heath at Bockhampton, near Dorchester, and in which also Thomas Hardy was born. Thence he used to trudge daily to the national school at Dorchester, and later to his marked that captive of the second school as the second s work at an architect's office in the same town.

A Sheffield vicar is appealing in his parish magazine for a "good substantial" pulpit cushion. "If you thump an oak desk very hard it hurts," he says. Pulpit cushions serve on occasion other purposes than to protect the knuckles of the preacher. There was one of crimson velvet padded six inches thick at Beresford Chapel, Walworth, which Ruskin attended in his hophood. It is prohably there still—the in his boyhood. It is probably there still—the chapel is just as it is described in "Præterita," The pulpit cushion had gold tassels at the corners and it was "a great resource to me," wrote Ruskin, "when I was tired of the sermon, be-cause I liked watching the rich colour of the folds and creases that came in it when the clergy-man thumped it."

The new letters of Carlyle which Mr. John Lane has just published are naturally full of good things for the lover of Carlyle as well as for those who decline to take the Sage of Chelsea at the extravagant estimate of his worshippers. They throw no new light on Carlyle, but do show him as exercising an acrimonious wit at the expense of his contemporaries. Take this miniature portrait of Macaulay in 1851 :-

We have had Macaulay for two days; he was a real acquisition while he lasted, and gave rise to much good talk, besides an immense quantity of inmuch good tark, besides an immense quantity of in-different, which he himself executed. A man of truly wonderful historical memory which he has tried in really extensive reading, and has always lying ready, with this or the other fact date or anecdote on demand: in other respects, constantly definable as the subject of commonplace; not one of whose ideas has the least tincture of greatness or originality or rany kind of superior merit except neatness of ex-vession; valde mediocris hours. pression : valde mediocris homo.

Here, again, is a rather ill-natured description of Thackeray as he seemed to Carlyle in 1852 :-

There is a great deal of talent in him, a great dea There is a great dear of tarent in nim, a great dea of sensibility—irritability, sensuality, vanity without limit—and nothing, or little, but sentimentalism and play actorism to guide it all with: not a good or well-found ship in such waters on such a voyage.

Tennyson was distinctly rather wearisome; nothing coming from him that did not smack of utter indolence, what one might almost call torpid sleepiness and stupor; all still enlivened, however, by the tone of boylike naiveté and total want of malice except against his ** Quarterly** and other unfavourable reviewers.

A collection of the perverse things which great writers have said about one another or about the great works of their predecessors or contemporagreat works of their predecessors or contempora-ries would indeed make curious reading. John-son, it will be remembered, threw off many of them; Fielding was a "barren rascal," and Gray a "dulf fellow." Gray reciprocated. Byron's attack on the Scotch reviewers is will remembered. Goethe said to a warmy Indian appears. Deside Goethe said to a young Italian apropos Dante's great work that the "Inferno" was abominable, the "Purgatoro" dubious, and the "Paradiso" tiresome. These and such-like, whose name is legion, belong to the "amenities" of literature.

In addition to his books, Mr. Julian Russell Sturgis, whose death is announced in his fiftyfifth year, wrote the libretti for several operas, of which doubtless the best-remembered is that for the late Sir A. Sullivan's "Ivanhoe." opera was intended to inaugurate that reign of English works at what is now the Palace Theatre which was of so brief duration. Mr. Sturgis also furnished the "book" for Goring Thomas's "Nadeshda," and for Sir C. Stanford's "Much Ado About Nothing," produced at Covent Garden a season or two ago. Born in America, Mr. Sturgis was brought to England when a child, and was educated at Eton and Oxford. He became a British subject, and was called to the Bar by the Inner Temple.

From the Army Order signed by Sir E. Ward, which has just been issued, it is evident that "The Army Journal of the British Empire" is to be carried on in a thoroughly businesslike manner. It is promised that special articles by eminent civilians will be published from time to time, in addition to those contributed from officers and soldiers from all parts of the Empire, which should form the staple of contributions. It is explained that the journal is intended to deal with subjects of a professional and scientific nature, to encourage the study of military science and history, to circulate information on military matters, and to promote as far as possible a knowledge of the principles of Imperial defence among all ranks and all arms of the military forces of the Crown.

A special literature connected with railway ravel has been growing up in England of late years, and one of the most interesting and informing volumes is that just written by Mr. G. P. Neele, and published by McCorquodale and Co. The book contains notes and reminiscences of half a century's progress of railway working, for Mr. Neele began his career with the Eastern Counties Railway at Ely in 1847, and rose to be Railway Superintendent on the London and North-Western. The accounts of the working of the train in those years seem almost incredible nowadays. For example, Mr. Neele says that the guards of branch trains had a rough time of it. The brakes of the trains were worked from the roofs of the carriages, the guards riding outside in an unprotected seat at the end of the vehicle, and applying the brake by turning a hand-screw. As a young man Mr. Neele once travelled from Wymondham to Dereham with the guard. the end of the train were two of the vehicles with ourside seats for the guard. They were so arranged that the seats faced one another. The guard, as an old stager, sat in the one which enabled him to turn his back to the engine, while Mr. Neele, the novice, sat opposite, facing him. The dust, smoke, steam, and smother which filled well-found ship in such waters on such a voyage.

Temyson fares no better at the hands of this too candid and callous observer. Thus, in 1865, the poor poet is pictured as having "a diapidated kind of look," though his talk was "cheerful of tone." Again, in 1873, he is described as "good-natured, almost kind; but rather dull to me! He looks healthy yet, and hopeful; a stout man of 60—with only one deep wrinkle, crow wrinkle just under the cheek bones." Then, in 1873. dining at John Forster's—

In the charming article written by Lady Ribblesdale in last month's Nineteenth Century, she gives us a delightful glimpse of life at Hawarden, with its easy-going, irresponsible kind of hospitality, exemplified by the empty place laid regularly for Mr. Drew, who never came. At first, she remarks, the hiatus depressed her, but after a little she grew reconciled to the fact. A story was told of Lord Tennyson, which reminded one of the younger sister who said she was glad to be married, for now she would never be helped to the wing of a chicken or sit backwards in a carriage. Lord Tennyson, it seems, became a gournet with advancing years, and, lunching once with Professor Max Müller, remarked of the meal—a roast chicken and cutlets—that it was one you would get at any wayside hotel. He was carefully given the liver wing of the chicken, and then gave vent to the curious saying that "the liver wing is the only unitidate." gave vent to the curious saying that " the liver wing is the only privilege a Poet Laureate gets.

The Royal Literary Fund, which is not so prosperous as Viscount Goschen would like to see it, is an institution which has gradually grown from small things to great. An old pamphlet describes how it had its origin in a club that used to meet in the Prince of Wales's Coffee House, Conduit-street. We there read:—

Conduit-street. We there read:

"During the summer recess of the year 1788 an event took place which tarnished the character of English opulence and humanity, and afflicted the votaries of knowledge. Floyer Sydenhan, the well-known translator of Plato, one of the most useful, if not of the most competent, Greek scholars of his age, a man revered for his knowledge, and beloved for the caudour of his temper and the gentleness of his manner, died in consequence of having been arrested and detained for a debt to a victualler who, for a time, furnished his frugal dinner."

Hearing of this sad case the club organised the

Hearing of this sad case the club organised the fund, which held its first meeting for the election of officers on May 18th, 1790. The donations of those days were naturally small. We hear of a gift of five guineas to "a widow with a family of four young children unprovided for," and the largest of all the gifts was only twenty guineas awarded to a Doctor of Laws.

The old building once known as the Saracen's The old building once known as the Saracens Head Inn, in Glasgow, is doomed to demolition, and it should recall (writes Mr. James A. Kilpatrick, author of "Literary Landmarks of Glasgow") many literary reminiscences, for it was visited at various times by Thomas Gray, Johnson, Boswell, Adam Smith, Edmund Burke, Wordsworth and his sister, and Coleridge, and was, besides, a favourite haunt with the local celebrities of Glasgow—notably Carrick, Mothercelebrities of Glasgow—hotalby Carrick, Monter-well, and Henderson, the three genial contributors to the anecdotage of "The Laird of Logan." For many years it was also a haunt of the magis-trates, and there was one hospitable apartment popularly known as the Magistrates' Room; the Lords of Session used always to put up at the Saracen's Head when on circuit, and the celebrated sporting Duke of Hamilton used it as his headquarters when there was any good cock-fighting in the district. It was a great posting establishment in the coaching days. Its punchestablishment in the coaching days. Its punch-bowl was known far and wide. It had a capacity of about five gallons, was inscribed with the city arms, and on great festive occasions was carried into the dining-hall by the landlord shoulder high, and placed before the Chairman with great ceremony. There can scarce be any doubt that it was at the Saracen's Head that Gray first met the brothers Foulis, the great Classow printers, and arranged about their Glasgow printers, and arranged about their beautiful edition of his poems including "The Elegy"; Johnson and Boswell spent a couple of Elegy " merry nights under its roof in October 1773, on their return from the Hebrides; Adam Smith, Edmund Burke, and Alexander Carlyle of Inveresk (better known as "Jupiter" Carlyle) knew the flavour of its punch and its claret, which were in great favour with the professors; and Dorothy Wordsworth describes in her "Journal" (August 22, 28, 28, box lead her brether Calvidge and 22, 1803 how glad her brother, Coleridge, and she were to find themseves out of the coach and established in the "quiet little back parlour" of the Saracen's Head. Oddly enough, Burns never visited this famous hostelry, favouring the old Black Bull, which—greatly altered into a luxuri-

ons drapery warehouse-still stands at the corner of Argyle-street and Virginia-street. From this inn Burns wrote one of his remarkable letters to Clarinda, in which occurs the passage: "The hour that you are not in my thoughts—"be that hour darkness!" &c.

THE LAW COURTS.

"THE BOBRIK."

The examination with regard to the Russian sailing vessel *Bobrik*, which was captured on Feb. 17th at Hakodate by the Japanese warships Takao, and as to which its owners the Kamtchatka Commerce lodged a petition in the Yossisuka Prize Court for her release, having been concluded, judgment was delivered on May 18th deciding

The gist of the decision is that she tild not leave the port within the time stated by the Imperial ordinance regarding the capture of merchant ships, and that there is no question of the vescel status of the vessel.

It may be remarked that the Bobrik has been in Hakodate since Oct. 19th, 1903.

In the same Court, judgment was given on May 18th as to the Russian steamer Kotik, captured on Feb. 10th at Yokohama by the Japanese warship Amagi.

The purport of the decision is that the Kotik The purport of the decision is that the Kotik was not employed for mercantile purposes, but was engaged in watching secret fishing off Kamtchatka, and in transporting Russian fishermen and stores needed by them, which duties are authorized by the Russian government.

It may be remarked that the Kotik was in Yokohama since December 25th last and also belonged to the Kamtchatka Commerce and Industry Company.

Industry Company

CLAIM ON THE H. & S. BANK.

The hearing of the case lodged by Mr. Dhunamal Chillaram, an Indian merchant, against the Hongkong and Shanghai Bank, claiming yen 300, was resumed on May 24th in the Yokohama District Court before Judge Danno.

Plaintiff's counsel repeated his statement given at the previous hearing and added that the bank received by telegram five thousand yen from its received by telegram nive thousand yen from its Hongkong branch to be paid to plaintiff, on Dec. 14th last but delayed sending notice of its receipt to plaintiff until the 29th of the same month, so that the latter failed to ship some habutae silk ordered by his Hongkong customer on the due date. Consequently plaintiff lost the commission on the transaction.

Defendants' counsel held that on Dec. 14th the bank received a telegram from its Hongkong branch which message said, "pay five hundred did not arrive within due time and that the yen to Dhanamal." but not to D-h-u, which are the first letters of the name of plaintiff Dhunamal Chillaram. Defendants could not find any such gentleman as Dhanamal in Yokohama. If the telegram had said "Dhanamal Challaram" the telegram had said "Dhanamal Challaram" [18]. the Bank would perhaps have recognized the Yokohama was often visited by tourists any one of whose names might be mixed up with that of plaintiff, so that the bank awaited an enquiry till Dec. 28th when plaintiff inquired about the telegraphic remittance. The delay of the bank in giving notice to plaintiff of the receipt of the money could not be regarded as negligence.

Plaintiff's counsel insisted that this was not the first time a telegraphed draft had been sent through the bank to plaintiff; such business had been done by the parties five or six times. Evidently the previous telegraphic remittance had been read as "Dhanamal," using "a" instead of that it was not wrong "to swipe bananas from a "u" and the transaction had gone through with-

Mr. O. Koch stated that he paid a visit at the \$576,310 from minor industries, and \$1,278,394 end of October to the office of Mr. Bretschneider when the former introduced a gentleman, but witness did not remember the man's name. Bretschneider and the gentleman seemed to have been engaged in business probably on account of porcelain. But the witness did not pay particular attention as the transaction as it had no connection with him.

J. Hayashi, having been shown two samples of porcelain cups, stated that these were similar in quality and pattern and that he could not say which was inferior.

Counsel having discussed the commercial usage of Yokohama, the case was adjourned again.

T. AKASHI v. CORNES & CO.

The hearing of this case, in which plaintiff claims yen 750 and interest at the rate of 6 per cent. per annum from March 1st until the execution of judgment, for alleged losses on a worsted woollen issue transaction came up on May 26th in the Yokohama District Court before Judge Danno.

Plaintiff's counsel stated that his client made a contract on Dec. 3rd, 1900, with defendants for the purchase of 10 cases of worsted woollen cloths be 24 inches wide and 30 yards long, at the price of 20 pence per yard. The goods were to arrive in March, 1900, and were to be delivered within 60 days after arrival. On Feb. 17th, 1901, defendants from a partie to be delivered within 60 days after arrival. defendants' firm gave notice to plaintiff of the arrival of the staple and subsequently the latter inspected the merchandise when he found that the inspected the merchandise when he found that the quality and colouring were different from the sample. Consequently plaintiff refused to take delivery of the goods and requested Messrs Cornes & Co. to supply the cloth stipulated for in the contract. The foreign firm failed to do within due time so that plaintiff lodged a so within due time so that plaintiff lodged a claim in the Yokolama District Court assess ing his damage at yen 750, which was the net commission that ought to have been made on the business. In the first Court, judgment was given in favour of plaintiff and also in the Tokyo Appeal Court. Since then the final judgment was confirmed and in the time reserved for making further appeal defendants firm took no further step, neither did they pay the amount

Claimed by plaintiff.

Defendants' counsel, having admitted that a portion of the staple differed from the sample provided for in the contract, and that judgment had been rendered in favour of plaintiff in the previous case in the first and higher Courts, contended that the contract was null and avoid because one clause reads:-"If the goods fail to arrive after due time, the parties shall understand that this contract is cancelled." Now it was understood that the goods

it would give an interlocutory judgment on May

AMERICAN TOPICS.

All the high power electric lighting wires in Washington, D. C., are being placed underground, and later on it is intended to put all

out trouble.

The parties thereupon introduced their evitate enunciated by the strong nation which desdences after which the case was adjourned till poils the weak and pleads that "might in right."

Dr. R. V. Pierce, President of the World's Dispensary Medical Association, has begun suit against the proprietors of the Ladies' Home Journal, of Philadelphia, for \$200,000. In a recent article, the Journal charged that Dr. Pierce's Favorite Prescription contained 17 per cent. of alcohol and certain drugs that made the medicine

A new cognomen has been added to the already wearisome list of nicknames applied to American cities. Detroit is now the "Pill City." It is said that 70 per cent of the pill product of the United States is manufactured in that city. It has several large drug manufacturing houses, and, in fact, does a larger business in that line than any other place in the United States.

The folly of indulging in fads in exercise is shown by the experience of Hobart Chatfield-Taylor, the wealthy Chicagoan. He is living in Paris, where he read of some crank reducing his weight by skipping the rope 1000 times. Taylor's weight had increased from 160 to 210 pounds, so he jumped to the conclusion that rope-skipping was what he needed. Without preliminary training he skipped 1000 times, and now he is recovering from nervous prostration.

Attorney-General Knox has decided to start an Attorney-General Knox has decided to start an investigation against the paper trust to determine if it is violating the Sherman Anti-Trust law. Mr. Knox recently received a delegation of newspaper publishers, consisting of Don Seitz of the New York World, John Norris of the New York Times and a representative of the 5t. Paul Pioneer Press, who gave him an outline of evidence. neer Press, who gave him an outline of evidence, which they claim to possess, showing that the paper manufacturers exist as a combination in restraint of trade.

Prices considerably above the average were paid for George Washington's papers during the sale of the late Bishop Hurst's library. Washington's copy of his "Official Letters Written to Congress," brought \$2810. Nine other books bearing Washington's autograph were sold. The highest priced item was a copy of Gibbon's "Decline and Fall of the Roman Empire," London, 1783, in six volumes, for \$1626. The entire set brought only \$21 at a sale of Washington's books held in Philadelphia in 1876. in 1876.

A report of the United States Geological Survey on the anthracite production in 1903 notes the in-crease in the small sizes of coal during 1903 over those of previous years. This is especially noteworthy on account of the opinion generally expressed at the close of the anthracite strike, that bituminous coal had largely supplanted anthracite for steam purposes, and would continue to hold this trade to the exclusion of the small sizes of the latter product. On the contrary, however, the consumption of these smaller sizes of coal increased 2,468,694 tons in 1903 over 1901.

Mr. Franklin Allen, Secretary of the Silk Association of America, denies that the silk mills are now running to only 60 per cent. of their capacity, and he asserts that all the silk manufacturers are working full time. While there is ground, and later on it is intended to put all other overhead wires in conduits also. It is expected that in a few years the national capital will be an absolutely wireless city, so far as the surface is concerned.

A New York gamin recently haled before the Juvenile Court for theft put in the novel plea that it was not wrong "to swipe bananas from a present condition is forwardle for silk goods, in the demand for plain goods, every intelligent observer is of the opinion that the present condition is five under the silk industry at present for fancy goods, it nevertheless remains true that buyers for the fall season have not yet made up their minds as to what will be possible, because styles of new weaves are being shown to them regarding which they are undecided. Despite the backward season in the demand for plain goods, that it was not wrong "to swipe bananas from a present condition is of the opinion that the present condition is of the opinion that the present condition is of the opinion that the present condition is of the opinion that the present condition is of the opinion that the present condition is of the opinion that the present condition is of the opinion that the present condition is the silk industry at present condition is the silk industry at present condition is the silk industry at present condition is the silk industry at present condition is the silk industry at present condition is the silk industry at present condition is the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry at present conditions in the silk industry ent conditon is favourable for silk goods, in the United States.

A final accounting has been made before a Surrogate at White Plains of the estate of Braddences after which the case was adjourned till June 9th at ro a.m.

HAIM v. BRETSCHNEITER.

This case came up again on May 24th in the Yokohama District Court before Judge Danno.

Mr. O. Koch and a Japanese, T. Hayashi, were examined as witnesses.

The estate amounts to \$12,000,000 of which between \$3,000,000 and \$4,000,000 of which between \$3,000,000 of which on his deathbed to Miss Clara Schemmer of

John Kendrick Bangs, the humorist, and Miss John Kendrick Bangs, the humorist, and Miss Mary Blakney Gray were married in New York on April 27th. Miss Daisy King was the maid of honour and John K. Bangs Jr. acted as best man for his father. John Kendrick Bangs is best known for his "Idiot" series of humorous writings. He was born in 1862 and began his literary career when a student in Columbia His. ings. He was born in 1862 and began his literary career when a student in Columbia University. After his graduation he became an assistant editor of Life, and in 1883 joined the editorial staff of Harper & Brothers. In 1900 he was appointed editor of Harper's Weekly. He resigned this position and later became editor of the Metropolitan magazine. Bangs is the author of twenty-eight books. He lost his first wife about a year ago. about a year ago.

Daniel F. Kellogg, in the New York Sun, says; It should never be forgotten that there has been going on in America at a pace as rapid as at any time during the period, a gold inflation in values. It produced a speculative orgy for a time, from whose effects we are still suffering; but the great stream of gold still continues to flow. In the seven recognitions to the first dear of the present recognitions. years previous to the first day of the present month, as is shown by the Treasury figures, the circulation in the country has increased by \$847,000,000, of which \$650,000,000 has been in gold. This is an which \$050,000,000 has been in gold. This is an increase that is very much larger, proportionately, than the increase in population, and when the meaning of the fact is understood that three-quarters of the increase has been in gold, the matter assumes enormous importance from the viewpoint of the security market. It is a force sleeplessly and with power greater than can be described or imagined making for higher prices of everything having a variable value.

The story of the session of Congress just ended says Bradstreets, would not be complete without some reference to the appropriations. These have been, without question, large. Mr. Hemenway, the Chairman of the House Committee in charge of the matter, says that though the appropriations are large, our national government is the most economically administered of any in the civilized world. The total appropriations made during the session amounted to \$781,574,629. Of this symptops 26,80,842 was to pay deficiencies says Bradstreets, would not be complete without Of this sum \$26,801,843 was to pay deficiencies for prior fiscal years and \$56,500,000 was set aside for application to the sinking fund. Deducting these amounts, we get a total for the expenses of the Government for the fiscal year of \$6,000,000 below the estimated revenues for the period. But Mr. Hemenway says that if ordinary experience repeats itself, the expenditures will be about 5 per cent. less than the appropriations, in which event he looks for a surplus of \$40,000,000. As regards the relative cost of government, he presents a table showing the per capita expenditures of leading nations which puts the United States in the lowest place with a cost of \$7.97 per inhabitant.

That women really enjoy a scrimmage with each other, when no men are by to see that they are not living up to their blue-china reputation for tenderness, is beyond doubt. Witness the bargain rushes when women make an onslaught a counter of shirtwaists! Are any of the virtues, the gentleness, the tenderness, the sympathy for the week and needy for which woman is so justly famed, exhibited on such occasions to women older, feebler, poorer and more in need of bargains than herself? Nay, verily! "It is a brutal struggle to get the best," says Everybody's Magasine, "in which the feeble are trampled under foot, gowns are torn and hats smashed; a struggle in which women of stature and grip do not hesitate to snatch a bargain out of the of another woman and bear it off in triumph. In the peculiar creed of ethics that governs woman's conduct toward her sister-woman, it is considered perfectly legitimate to covet your neighbour's garments, or her cook, and to get them away from her if you can."

The religious census committee of the Massaand mother of Bradford McGregor inherits the entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in entire estate, except a dower to her daughter-in-chusetts Sunday-school association began in chusetts Sunday-school association began in entire estate, except a down of the properties of the results and except a down of the except and except a down of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properti the results are just published by the brassactinests bureau of statistics. Slightly over 40 per cent of the population of the city, namely 241,651 persons, indicated a preference. Of these the Roman Catholics were most numerous in every ward except two. They had in all 109,400. ward except two. They had in all 109,400. Next come the Baptists, counting 20,625; the Congregationalists almost as many, 20,319; of Protestant Episcopalians there were 17,698; of Methodists there were 14,013. The next in size Methodists there were 14,013. The next in size of the religious bodies were the Jews, who numof the religious bodies were the Jews, who numbered 11,399. After these came 9,157 Unitarians. Of Lutherans there were 4.437; of Universalists 4,118; of Presbyterians 4,108. No other body counted a thousand members. It may be interesting to note that the much talked of Christian Scientists, when they stood up to be counted, numbered only 931.—Churchman.

"According to a Pittsburg telebhone manager," says *Telephony*, "the telephone was put to a novel and unusual use in Washington county recently, enabling two boys, sons of farmers, to hold their positions in their classes in the public schools from which they will graduate in another year. Incidentally, the patience and long-suffering of the country school-teacher was put to an admi-rable test. Smallpox broke out in the neighborhood in question, and the two scholars were among the early victims. The home was quarantined, and there was every indication that the instruction which they had been receiving would be cut off for an indefinite period. But the teacher be cut off for an indefinite period, but the darks was resourceful and willing. He called up the stricken home one evening and proposed that the boys study their lessons as usual, and he would hear them over the telephone. The idea was hear them over the telephone. eagerly received. Each evening they took down the receiver, and the teacher, located several farms away, heard them recite. Neither suffered farms away, heard them recite. Neither suffered to an appreciable degree through their absence from school, and their chances for graduation are just as bright as before the disease entered their

It were well if every college, as a public insti-tution, made a full statement of its financial affairs each year, says Leslie's Weekly. Harvard affairs each year, says Leslie's Weekly. Harvard College does make such a statement. It is interesting to know some of the forms of the investment of the funds of our oldest university. Railroad stocks and railroad bonds represent a favourite investment. A hundred thousand dollars in the Chicago and Alton 4 per cent. collateral notes; \$100,000 in the Chicago Northwestern notes; \$100,000 in the Chicago Northwestern Railroad general mortgage 3½ per cents. of 1897; \$200,000 of the Louisville and Jeffersonville Bridge Company first mortgage fours of 1904; \$100,000 of New York Central and Hudson River Railroad 3½s. of 1898, and \$100,000 of Schenectady Railway first mortgage 4½s. of 1901 are entries found in a single column. A score of the great steam railways of the country are represented in the list of ways of the country are represented in the list of securities. Many street railroads, too, as those of New York, Minneapolis and Massachusetts electric companies, are found in the list. The notes also of great manufacturing companies, such as the Manchester Cotton Mills and the Merrimac Manufacturing Company, are a favourite form of investment. Manufacturing and telephone stocks and real estate trust stocks are not absent. estate, too, for purposes of investment makes an impressive presentation-it amounts to a value approaching \$3,000,000. The pieces are located in Boston. In parts in which land is valuable, and at the present time is increasing in value.

NEWS OF THE WEEK.

Silver bullion valued at \$310,000 from Shanghai was delivered on May 24th at Moji.

During ten days ended May 20th, Mexican silver coins amounting to yen 1,484,900 were imported at Moji.

steamer Sachsen. He lest by the 3 p.m. train for Tokyo.

A telegram from Nagasaki reports that a British steamer arrived there on May 19th with 6,500 tons of Cardiff coal.

The property, Lot No. 270, Bluff, was sold on Monday at public auction by Mr. Jno. W. Hall, and realized the sum of yen 7,700.

The Nippon Yusen Kaisha held a general meeting on May 27th when an interim dividend for last half year was declared at the rate of 6 per cent.

K. Mikami (25), who murdered a wealthy woman, in Honjo, Tokyo, on March 5th last has been sentenced to death by the Tokyo District

Ninety-two Russian officers and men captured in the fighting at Kumutan arrived on May 25th at Idzuliaru by the transport Kanagawa Maru on their way to Matsuyama.

Japanese gold coinsamounting to yen 3,350,000 and U. S. gold equalling yen 13,640 were exported on May 24th by the steamer Coptic to San Francisco.

A telegram from Chicago received on the night of May 22nd in Kobe, says new tea from Yoko-hama has been quoted at from 25 to 28 cents. The market was dull.

Lieut.-Commander Honda, commander of the steamer *Totomi Maru*, which was sunk at Port Arthur at the time of the third blocking operation, arrived on the state of the state o tion, arrived on May 19th at Tokyo from

Two samples of new raw silk from the Fujisawa and Hodosawa factories were put on the Yokohama market on May 23rd. They were Yokohama market on May 23rd. They were manufactured from cocoons produced in Idzu. The quality was fine.

The clothes and personal articles belonging to the soldiers who died in the fighting at Kiulientien were brought on May 25th by a transport to These souvenirs are to be sent to the families of the dead.

The Italian Minister at Tokyo, says the Official Gazette, on May 17th, informed the Japanese Foreign Office that Lieut Bargagli, attache of the Italian squadron on the Asiatic station, had been appointed naval attache to the Legation.

Mr. J. M. Somers of the Stanley Opera Co., charged with murder, was tried before the Chief Justice at Singapore on the 6th inst., and conveited of a rash act not amounting to murder, resulting in death," and sentenced to nine months' simple imprisonment.

Miss McCaul and party arrived on the evening of May 23rd at Osaka, and proceeded to the Osaka Hotel. The following day the party were to pay a visit to the barracks of the Fourth Division and some military hospitals.

Says Major-General Floug, Quartermastersays major-ocherat rioug, Quartermaster-general of the Russian Army, at the close of a telegram, dated May 13th:—"Some Japanese ships are hiding from our squadron on the Korean coast in the bay of Pallada." Well, well!

According to a Gratz newspaper, the Japanese Military Attachė in Vienna is negotiating with Prince Odescalchi, acting on behalf of the Prateli Syndicate, formerly the Austro-American Steam-ship Company, for charter or purchase of nearly the whole of the Syndicate's fleet for the transport of Hungarian horses to Japan.

Mr. H. H. D. Peirce, Assistant Secretary of State of the United States, was in Shanghai at last reports. Mr. Peirce is detailed for the duty of visiting the U.S. Consulates in different parts of the world, bringing them into a line of common action.

He is now returning from a tour which extended as far as Cairo, took in India, and will embrace the China and Japan Consulates.

The rain on Saturday prevented the carrying

of the Y.C. & A.C. in the afternoon by a match between the Captain's XI. and the Secretary's XI. Judging from the new material at the disposal of the Captain of Cricket, and the return of several old players, a good season should be anticipated, though the war, we imagine, will prevent any Naval matches from being arranged. The Baseball season may begin on the afternoon of Decoration Day. May 30. of Decoration Day, May 30.

Says the Spectator:-The journals, both at home and abroad, attribute much of the success of the Anglo-French negotiations to the King, possibly with justice; but we think it would be wiser to adhere to the old rule that as the King is not to be blamed for political mistakes, so he should not be praised for political successes. His Majesty is protected as well concealed by the screen of the Constitution.

mercial School were held on Sunday (May 22nd) off the Bund, Yokohama. Eighteen races were brought off, after which a junk fitted up were brought off, after which a junk fitted up to resemble a war ship and flying the Russian naval flag, was destroyed by gun-powder. In the events numbered 13 and and 15 the office staff of the Nippon Yusen Kaisha, the Specie Bank and seven other banks participated. The weather was very fine with hardly any wind and nothing the week interfered to mar the afternoon's enjoyment.

Music was supplied by a band and the affair was were filled. Closing price on the z1st was:—12.61 cents for May delivery 12.80 cents for Line due to May 21st has weakened again as demands were filled. Closing price on the z1st was:—12.61 cents for May delivery 12.80 cents watched by many spectators, both foreign and Tapanese.

THE British fleet, with Admiral Sir Gerard H. U. Noel in command, arrived outside Woosung from Hongkong on the 16th. Some of the ships will proceed up river as far as Nanking to make a friendly demonstration. The Admiral came to Woosung on the flagship Glory, transferring thence to the dispatch-vessel Alacrity, which went up river and moored at the Senior Naval Buoy. The fleet outside Woosung consists of the Glory, Albion, Centurion, Ocean and Vengance (battleships), and Amphitrite, Cressy, and Sirius (cruisers). It is reported that permission has been given to the fleet to go into summer quarters

She came across the hills as a morning vapour

According to a circumstantial dispatch printed by the Stampa, of Turin, from its correspondent at Shanghai, who gathered it in quarters favour-able to Russia, the early naval successes of the Japanese have all been obtained by the treachery Japanese have all been obtained by the treachery of Admiral Alexieff's valet—a Japanese in whom the Viceroy had complete confidence. This man, it is stated, succeeded in purloining not only a detailed plan of Port Arthur, but also a copy of the plan of mobilisation and of the Admiral's private telegraphic code. Provided with these documents, the Japanese were able to take their measures with full knowledge of the premy's dispositions. enemy's dispositions!

General Sir Frederick Maurice, in the Nineteenth Century, disposes of "Russia's Charge against Japan" by reference to his own volume, Hestilities without Declaration of War, compiled at the instant of Sir Archibald Alison, the head of the Intelligence Department in 1882. His conclusion is that the divergent action of different States in single a custing of corportunity. Mariconclusion is that the divergent action of different States is simply a question of opportunity. Maritime States have greater facilities for sudden strokes, and so since 1700 "Britain struck thirty of these blows, France thirty-six, Russia seven (not reckoning her habitual practice towards Turkey and other bordering Asiatic States, including China) Prussia seven Austria twelve the cluding China), Prussia seven, Austria twelve, the United States five,"

The following extract from the N.-C. Daily News gives some idea of the speculative spirit of

Shanghai: The following statistics with reference to the pari-mutuel and cash sweeps during the three days' racing are of interest. On the first the three days racing are of interest. On the first day 2,914 chances were taken in the pari-mutuel for a win, and 5,230 for places. On the second day, 2,807 investments were made for a win, and 6,105 for places. On the third day, 2,982 chances were taken for a win, and 7,112 for places. The total amounts in dollars which passed through the tree pari-mutuals and the cash expense are as the two pari-mutuels and the cash sweeps are as follow :-

First Day\$14,570 Second Day ...\$14,035 For Places. Ca \$26,150 \$ \$12,660 \$30,525 \$14,385 Third Day \$14,910 \$35,360

Totals\$43,515 \$92,235 \$56,710 Grand total\$192,460.

CORRESPONDENCE.

THE ENGLISH-JAPANESE DICTIONARY.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Will you kindly permit me space to make a few remarks relative to the Third Edition of the "English-Japanese Dictionary" just published by Messrs Kelly & Walsh, Ltd.

Messrs Kelly & Walsh, Ltd.

I have carefully examined the book and am convinced that it is by far the most useful and practical work on the Japanese language that has been published for many years.

The new Dictionary is one which every student of the colloquial should possess, and I unhesitatingly recommend it as quite indispensable to foreigners desirous of acquiring a correct knowledge of the Japanese language.

Realizing (as perhaps only few are able to realise) the immense amount of patient research and work involved in the compilation, I heartily congratulate Messrs. Hohart-Hampden and Parlett upon the successful conclusion of their labours, which certainly should earn for them the lasting gratitude of the foreign community.

I am, Sir, yours respectfully,

I am, Sir, yours respectfully,

I. E. DE BECKER.

Yokohama, May 25th, 1904.

THE UNION JACK CLUB.

(To the Editor of the "Japan Mail,")

SIR,—I have received a letter from Major Haggard, Hon, Sec. of the "Union Jack" Club, acknowledging the receipt of cheque for £102,13.2 for the Tokyo-Yokohama Room.

Major Haggard on behalf of the Committee of the Club begs me to let the different contributors know how much their generosity is appreciated. The grateful thanks of the Committee are also due to all those who took part in the Theatricals and thereby helped to realize so large a sum. The Committee hope that the room may be used not only by British but also by Japanese sailors when they visit London.

I am Sir, yours very faithfully,

CLAUDE M. MACDONALD.

British Legation, Tokyo, May 25th, 1904.

MARQUIS ITO ON THE SITUATION.

The following is an authorized precis of a speech delivered by Marquis Ito at a recent meeting of leading bankers in Tokyo:—
Though holding no direct official relations with you, I have nevertheless been requested by the responsible authorities to lay before you my opinions in regard to the present juncture of our national history.

history.

During the diplomatic negotiations which preceded the crisis, I entertained till the last moment a sincere hope that it might be possible to avoid war, without prejudice to the prestige and the interests of our country. I regret that my hopes and desires could not be realized.

not be realized.

Japan was obliged to take up arms, first, in self-defence and for the sake of self-preservation, and secondly for the maintenance of the principle of fair play and equal opportunity for all and of due respect for the territtorial sovereignty of other nations.

As to the probable consequences of the war, I am endeavouring to collect from various sources sufficient data for forming a precise judgment, but unfortunately in spite of my best efforts, I have not yet been able to arrive at any definite conclusion, and I am afraid that everybody else is in precisely the same situation as myself.

At any rate, in order to attain ultimate anneals.

At any rate, in order to attain ultimate success in the war, it is evident that there must be hearty and harmonious cooperation between the authorities and harmonious cooperation between the authorities charged with political powers, the men who are bravely defending the honour of our flag, and you, gentlemen, of the wealthier class of the nation, on whom falls the duty of supplying them with the sinews of war. It is, therefore, my earnest hope that you will not grudge your whole-hearted support to those in power, for thereby you will enable our armed forces at the front to carry on the war with undivided energy and freedom from all care and anxiety on the score of financial provision.

Turning now, to the outside world, it is to be observed that fortunately we enjoy in this war the hearty sympathy of a large section of the civilized public. The causes of this are various.

The first and greatest of these causes undoubtedly lies in the character of the fundamental policy which His imperial Majesty adopted once for all at the time of the Restoration.

Some forty years ago when I visited Europe for the first time, nobody, except a few initiated, knew

anything whatever about Japan, but to-day she is rivetting the attention of the whole civilized world.

That we have made such immense strides in so short a period of time is entirely due to the fact that at the time of the Restoration it was decided to make enlightened progress the end and basis of the nation's policy and, to the fact that the nation has never wavered in its aspiration to attain the object thus wisely set before it.

That the Restoration should have been combined with the opening of the country and the adoption of a policy of enlightened progress was a surprise to all. This great and decisive step is due of course to the keen foresight of the enlightened Sovereign and of the statesmen who surrounded and advised him at the time. No inconsiderable amount of credit, however, must in this respect be given to patriots and sarauts like Hayashi Shihei, Watanabe Kwasan, Takano Choei, Sakuma Shozan and others. As a result of the Imperial decision to adopt Western enlightenment, on the one hand the elite of the younger generation were sent to receive education in Europe and America, and experts were invited here to educate our youth. In short we have striven hard to introduce Western institutions and culture and to supplement thereby what was wanting in our ancient systems.

That celebrated measure, the abolition of feudaling and discussion and others.

That celebrated measure, the abolition of feuda That celebrated measure, the abolition of feuda-lism and its replacement by communal governments on the basis of modern Rechts Staat, which is only one out of the many innovations introduced under the new régime, was in one respect a political mea-sure, but in another respect it was a great and radical social revolution which destroyed to its very founda-tion the class system of the old world.

tion the class system of the old world.

The result of this revolutionary measure was to place Japanese subjects of all classes, high and low, on a footing of absolute equality before the law, to give them freedom of marriage, of abode, of profession, of speech and press, and other liberties, to grant them the right to be appointed to public office in accordance with their qualifications, and above all to foster in each and all of them the spirit of self-sacrifice for the sake of the common weal.

On the other hand, increasingly closer inter-

of self-sacrifice for the sake of the common weal.

On the other hand, increasingly closer intercourse with Western nations naturally led to the permeation of Western ideas amongst our people, widening their sphere of vision and inspiring them with ambition to compete and co-operate with the civilized world for the higher ideals of humanity.

The brave men now so willingly sacrificing their lives for the sake of their fatherland, and risking their all in defence of the flag and honour of the nation, amidst the attention and applause of the civilized world—these brave and honourable men are products of the great social revolution have mentioned, the gift and outcome of the wise Imperial policy adopted at the Restoration. And you, gentlemen, are assembled here to deliberate on the best way of providing the means, so as to enable them, as it were, assembled here to deliberate on the best way of pro-viding the means, so as to enable them, as it were, always to look forward and to fight with the con-sciousness that everything behind them goes on smoothly and needs no anxious attention on their

part.

Another cause of the sympathy we are enjoying at Another cause of the sympathy we are epjoying at present lies in the spirit of moderation and conciliation which had never failed to characterize the policy of our Government in its intercourse with other countries. Japan while always endeavouring to have her legitimate claims duly recognized and respected by other civilized nations has, at the same time, never once attempted to oppose the legitimate rights and once attempted to oppose the legitimate rights and claims which they in turn advanced.

claims which they in turn advanced.

But whatever the cause, that we enjoy the sympathy of the civilized world is a powerful asset in our favour, especially at a moment like the present when we are engaged in the greatest struggle our history has ever known. Our nationals must duly weigh the importance of this moral support and assistance, and do their best to be worthy of the spontancous confidence-reposed in them. In this respect, I attach special importance to the attitude of men of education and wealth like your selves towards the civilized world outside, and to our country's firm resolve to sacrifice everything in order to lead the war to a successful issue.

In conclusion, I would invite your attention on

to lead the war to a successful issue.

In conclusion, I would invite your attention on one other point. There are in this world many who without possessing requisite resources themselves, are always prone to obstruct the enterprise of others more happily situated than they in regard to intellectual or economical capacities. Such is not the course I would advise my countrymen to take. Firnly resolved as she is to enforce the due to take. Firmly resolved as she is to enforce the due recognition of her legitimate claims, Japan should also be satisfied with what is her due and with her proper mission, and must never for a moment waver in frank and broad-minded recognition of the

proper mission, and must never for a moment waver in frank and broad-minded recognition of the legitimute claims and interests of other nations.

There is nothing new in what I have here said. But it is a frank expression of what I sincerely feel, and I shall be very happy if my views may have in any way helped you in connection with the solution of the problem before you.

HIOGO AND OSAKA GENERAL CHAMBER OF COMMERCE.

THE WAR TAXES.

THE WAR TAXES.

An extraordinary general meeting of the above Chamber was held at the Offices of the Chamber, No. 26, Naniwa Machi, on Monday afternoon, to discuss the advisability of the Members taking joint action and coming to some decision as to what should be done in the matter of the additional taxes that have recently been imposed by the Japanese Authorities. We take the following report from the Kobe Herald.

Kobe Herald.

Mr. Bardens, President of the Chamber, was in Mr. Bardens, President of the Chamber, was in the chair, supported by Mr. de la Camp, Vice President, Mr. Buschel and Mr. Town (Committee men) and Mr. Dimock, Secretary, Amongst those present were Messrs, E. W. Niel, H. Clement, G. Weil, H. V. Henson, C. Roux, W. S. Taylor, Alex. Cameron, H. Marshall, W. W. Campbell, and A. W. Crombie.

The notice convening the meeting having been read by the Secretary.

The notice convening the intering along the stage of the better that the convenience of the Chairman said a requisition for the meeting had been set in by a number of the thember to discuss the advisability of joint action in reference to the additional taxes. It seemed to be the general opinion that the taxes should not be easif

part.
Mr. Weil thought that foreigners should refuse to
pay the additional taxes except under protest.
Mr. Matt. Smith considered the taxes should not

be paid at all.

After some discussion it was moved by Mr. Noel, and seconded by Mr. Stucken,

"That the Committee of this Chamber be asked to address a letter to the Corps Diplomatique, requesting a decision as to whether under the Treaties foreigners should be called upon to pay the increased Taxation authorized by the Diet in April last."

Mr. Noël understood that very much the same action had been taken in Yokohama and that the Ministers had advised their nationals to pay under protest. That, of course, did not bind Kobe and he thought that independent action should be taken here.

The Chairman suggested a rider to the effect that pending receipt of an answer either payment should not be made or, if made, it should be made under protest.

Mr. Noël asked if the notice regarding the tax had

Mr. Noël asked if the notice regarding the tax has been sent to every member.

The Chairman said several had not received notices; several on the other hand had.

Mr. Henson asked if the proposal referred to the business tax only or to other taxes.

The Chairman said it referred to the income tax and all other taxes on which the additional seventy

and all other taxes on many per cent, was imposed.

Mr. Henson said, then the question arose in his mind whether the Chamber of Commerce had any status as to any other tax than the business tax. The notice as read included other taxes.

The Chairman said the intention was to refer to the business tax only.

Mr. Sargent asked if the representation was to be

wired or written, because the taxes were due on the

25th.
The Chairman said it would be sent through the

Consuls.

Mr. Henson considered that the resolution went too far. In his opinion the Chamber had no status to consider the income tax or anything beyond the business tax. He considered that the Chamber of Commerce had no right to deal with anything but the business tax. As to the income tax that was a question on which individual members could approach the Consult or Minister.

the Consul or Minister.
The Chairman enquired if Mr. Henson would after the motion.

Mr. Henson said he was not sure that he was in

Mr. Henson said he was not sure that he was in favour of the motion at all.

The Chairman considered the Chamber had a right to protest against the increased income tax as well as the increased business tax.

Mr. Henson pointed out that the bill for increased taxation related to several taxes which did not concern foreigners at all, so why should the Chamber protest against it?

Mr. Noël was understood to say that members with the interested in one or the other.

might be interested in one or the other.

Mr. Henson asked why they could not particularize

Mr. Henson asked why they count not particular the taxes they objected to.

Mr. de la Camp thought that the only additional tax asked for so far was the business tax. Other applications might follow, but so far only the increased business tax had been asked for. The extra tax on piece goods and so on they would have to pay anyway. He considered it would be wise to protest only against the present demand.

anyway. The considered wand.
Mr. Noël pointed out that they were not making a protest but merely asking for the advice of their Ministers as to the validity of the increased taxation.
Mr. H. E. Green commented on the statement which had been made as to Yrkohama having had advice; surely Kobe might also be advised,

The Chairman asked Mr. Henson if he would

nove an amendment.
Mr. Henson:—No, I will make no amendment to

The Chairman then put the motion, which was

carried nem. con.
Mr. Matt. Smith suggested that the respective
Consuls should be asked to put the matter through

The Chairman :—In the meantime are we going to refuse payment or pay under protest?

Mr. Noël thought there would be no great hurry

(in collecting the taxes).

After some informal discussion, Mr. H. E. Green proposed that this meeting agrees to defer payment of the tax until the Chamber receives the decision from the Consuls, unless payment is made under

protest.

Mr. W. W. Campbell said he should decline to him should the proposition. He would be had imper protest.

from the Consuls, unless payment is made under protest.

Mr. W. W. Campbell said he should decline to bind himself to any such proposition. He would propose that the tax should be paid under protest.

Mr. Henson proposed that the question of the payment of the additional tax should be left to the individual judgment of members.

The Chairman said the meeting would not be linding on members who disagreed with the action taken. If 20 or 30 favoured the motion and 5 disapproved, the vote of the majority would not bind the minority.

Mr. H. J. Marshall seconded Mr. Noël's motion that this meeting resolves that payment of the extraordinary special tax should be deferred until a reply has been received from the Consuls, unless it is paid under protest.

Mr. de la Camp proposed as an amendment that the words "that this meeting resolves that it is advisable to defer payment," etc. should be used.

Mr. Noël accepted this as an amendment.

Mr. H. E. Green remarked that as the meeting appeared to be unanimous he would withdraw his motion.

Mr. Town suggested the substitution of the words, "that the word "additional." The Chairman then put the amendment to the meeting. One voted for it; one against it.

After a few further informal remarks, the Chairman put Mr. H. E. Green's motion minus the words "unless under protest." Ayes 12. Noes 6. Carried.

Mr. Henson said the Chamber had no means of enforcing the resolution. Might, he ask therefore what the object was, save as an expression of opinion?

Mr. Noël thought it would not much matter if the

Mr. Noël thought it would not much matter if the

opinion?

Mr. Noël thought it would not much matter if the last resolution fell through.

Mr. Cameron enquired if the Committee had moved in any way with regard to the Woollen Consumption tax.

The Chairman said the Yokohama Board of Trade had taken the question up. That Board had received some information which they (the Kobe Chamber) had not received and the Chamber was now awaiting a reply. The Yokohama Board of Trade made a protest but had received no reply yet.

Mr. Fischer understood that a firm in Yokohama had paid under protest and had subsequently received a refund from the Government.

Mr. Cameron asked if the Committee had moved officially in the matter or only written to the Yokohama Board of Trade. The Chairman said the Committee had written to Yokohama.

Mr Cameron thought that had independent action been taken here it would have strengthened the Yokohama Board's hands.

There being no further business, Mr. Noël moved a vote of thanks to the Chairman and Committee for calling the meeting, and the members dispersed.

CHRISTIAN CHAPLAINS FOR THE AMRY.

CHRISTIAN CHAPLAINS FOR THE AMRY.

Shortly after the opening of the war, a private "Instruction" was issued by the Minister of War authorizing the sending of two chaplains (fukyeshi) with each Division (shidan) of the Imperial army and one with the Commissariat. Judging from the terminology used, no restriction or limitations were made in favour of any religious 'sect, Buddhist, Shintoist and Christian, presumably all being placed on an equal footing. Accordingly the Central Committee of the Japan Evangelical Alliance (Fukun Domei Kwai) met without delay, and decided to apply for permission to send Christian chaplains, and to make an appeal to the church throughout the Empire to render the financial assistance required.

As the divisional captains (shidancho) were charged with the responsibility of selecting the chaplains to go with their men, application was made directly to the boson to go to the front, to give Christians a place side by side with other religionists, but in every case without success. There seemed to be a fixed purpose to choose only Buddhists or Shintoiss. It is was alleged among other things that at the time of the Japan-China war some of the Christian "Imonshi sent to Korea and China through the Government's diberality had taken advantage of their position for money making purposes, and a strong prejudice

evidently existed against allowing Christians any

evidently existed against allowing Christians any recognized place as army chaplains.

Though deeply regretting that there had been the slightest occasion for such an objection, the Committee could not but feel that there was a serious misunderstanding and they were prepared to make assurances that the greatest care would be exercised in the selection of men who would worthily represent the Christian community. Prominent officials were interviewed and various efforts made to secure a more liberal interpretation of the "instruction," but with apparently little result.

It was felt that in a war like the present any discrimination against Christians on the part of the Japanese authorities would not only be a violation of that religious liberty guaranteed by the Constitution, but would have an unfortunate effect upon Japan's relations with such Christian countries as Great Britain and the United States, who are known to be so thoroughly in sympathy with Japan in her brave struggle for national existence and the peace of the Far East.

And so, without relaxing the effort to impress efficieldant directly with the importance of strict.

of the Far East.

And so, without relaxing the effort to impress officialdom directly with the importance of strict impartiality in this matter, it was felt that the issues involved were sufficiently grave to warrant our asking for an expression of opinion from the official representative in Japan of that Christian nation with whom Japan's relations are most intimate, with Creat Britain.

nation with whom Japan's relations are most intimate, viz., Great Britain.

Accordingly, H. E. Sir Claude Macdonald was approached and informed of the progress of the negotiations, and of the appareant impasse which had been reached, and asked if he would be good enough to use his kind offices towards securing the appointment of Christian chaplains to the troops. To this request His Excellency very heartily responded and immediately called the attention of the Minister for Foreign Affairs—Baron Konura—to the matter, who shortly alter-Baron Komura—to the matter, who shortly after-wards informed him that the Government had decided to attach a certain number of Christian

wards informed him that the Government had decided to attach a certain number of Christian chaplains to the army, permitting them to visit different Divisions as circumstances might allow, and directing that applications be make to the divisional captains. In the meantime the Committee had become quite convinced that it was very desirable to have foreign as well as Japanese chaplains and His Excellency was pleased to make this known also. Formal requests were then presented in harmony with the information received, and time passed, but there seemed no evidence that the divisional captains were disposed to appoint any Christians. Whenever higher officials were approached, their reply was that the Government had already signified its attitude of equal favour to all religious sects, and that all that remained was to seek appointments through the channels already assigned. This however could only result in disappointment so long as the officers directly responsible for the selection of chaplains in fact excluded all Christians. The Minister of War was placed in a trying position. After handing over to the divisional captains the authority to choose the chaplains, he could not consistently withdraw it, while on the other hand the unwisdom of religious favoritism was becoming more apparent.

H. E. Count Inouye was apprised of the unfortunate trend of events, and he promptly brought it to the notice of the Cabinet and elder statesmen, and the broad impartial policy of the Government was soon vindicated by specific permission being granted to

the notice of the Cabinet and elder statesmen, and the broad impartial policy of the Government was soon vindicated by specific permission being granted to send six Japanese and six foreign (British and American) Christian "imonshi" with the first, second and third armies, and possibly more later. It was found easier to give separate and distinct permission to send Christian "imonshi" than to make any change in the order re "fukyoshi" (Either word may perhaps be translated "chaplain," the emphasis in the former case being upon their function as "comfortformer case being upon their function as "comfort-ers" of the soldiers, while in the latter it is more to ers" of the soldiers, while in the latter it is lived their work as religious "teachers"). The treatment however to be accorded to the former is understood to be practically the same as that accorded to the latter, freedom being allowed them to fulfil the duties of their calling among the men fulfit the duties of their calling among the men on the field, according as circumstance will permit, and they being provided with transportation and commissariat facilities, etc., by the Department of War. The time for sending them to the front must of course be left to the judgment of the Minister of War, according to the progress of events, but the expectation is that it will be within this or the coming month.

month.

The men to be sent are almost all chosen already, the nomination of the foreign missionaries being made by the executive of the Standing Committee of Co-operating Missions, while the Japanese chaplains are chosen by the Central Committee of the Evangelical Alliance, which also make the formal application for both to the Department. When the list is complete, the names of all will be announced. It is expected that the Missions from which the missionaries are chosen will make appropriations sufficient aries are chosen will make appropriations sufficient for their incidental expenses, but the appeal is being made to the Japanese churches everywhere through-

THE PRIME MINISTER AND RELIGIOUS LIBERTY.

Growing out of the negotiations for the appointment of Christian Chaplains to the army is an important announcement from H. E. Count Katsura, the Minister President of State, intended for all Japanese Christians and foreign Missionaries in Japan; and as it has already appeared in Japanese for the former, the earnest attention of the latter is hereby called to it.

When, in pursuance of Count Japanese.

hereby called to it.

When, in pursuance of Count Inouye's representations, the Rev. Y. Honda was invited by the Premier and the Minister of War on April the 8th, to make a statement of the request of the Japan Evangelical Alliance for the appointment of Christian Chaplains to the troops, the Premier requested Mr. Honda to convey to the Christian church in Japan, including the foreign missionaries, an expression of the Government's earnest wishes at this time of national crisis. Similar intimations had already been sent to the official heads of the different Buddhist and Shinto crisis. Similar intimations had already been sent to the official heads of the different Buddhist and Shinto sects, but in the absence of such ecclesiastical machinery in the Christian churches and the consequent difficulty of official communication, he desired Mr. Honda to transmit to the churches represented in the Evangelical Alliance a message from himself in behalf of the Government, of which the substance is as follows:—

ings of suspicion and distrust, and been guilty even of rude behaviour. Such things I deeply deplore.

"For my own part, regarding religion as an essential element of civilization, I have uniformly tried to treat all religions with becoming respect, and I believe it to be an important duty of statesmen under all circumstances to do their ulmost me prevent racial animosities. And so in the year 1895 at the time of the Japan-China war my soldiers had no sooner set foot on the Liaotung Peninsula than I took special pains to see that the greatest care was exercised by them in extending protection from all harm to the Christian believers and churches planted there by the English and French Missionaries.

"As the present war is one carried on against Russia—a professedly Christian nation—I have felt that redoubled efforts should be made, that no unworthy sentiments should be tolerated, that we should adopt a thoroughly unbiassed and equitable attitude towards all, and that the whole nation should give practical effect to the policy so clearly set forth in the Imperial edict, that this is a war which has no other object than the safety of the Empire and the peace of the Far East. I sincerely hope that no one will be betrayed into the error of supposing that such things as differences in race or religion have anything whatever to do with the presupposing that such things as differences in race or religion have anything whatever to do with the pre-

religion have anything whatever to do with the present complication.

"I had indeed thought of issuing an official instruction on the subject in the near future, but I wish through you to convey to the Christian churches and the foreign missionaries or mind at this time, so that all misgivings and misunderstandings may be prevented. I hope that each and all will act in this spirit of mutual forbearance, avoiding all racial and religious antipathies, and will use all means in their power to carry out the wishes of the Imperial Government."—Japan Evangelist.

out the Empire to contribute towards the support of the Japanese chap lains and their families. It is estimated that about 3000 yen will be needed for this purpose. It is believed that the missionary body as well as the foreign community generally will regard it as a privilege to contribute towards this important undertaking. Promptness in this matter will put heart into our Japanese brothers.

Subscriptions may be sent to the Rev. Harper H. Coates, 16 Tatsuoka-cho, Hongo, Tokyo.—Japan Evangelist. In the last number of the *Tour du Monde* Dr. Hagen, who has travelled in Korea, recounts in a most interesting way his impressions of the country and of its people. Of especial interest is Dr. Hagen's description of an audience and of a State banquet at the Court of Korea. "When the time fixed for the audience arrived we entered into a very lofty room, the carpets of which were by no means costly. Behind a table sat the Emperor with the Crown Prince and the ennuchs. The Emperor Li-Hsi thanked us for our visit, and asked us how our trip was progressing, and whether we intended to remain a long time in Korea. The Crown Prince asked us exactly the same Korea. The Crown Prince asked us exactly the same questions. He is about thirty years of age; he has an inert look, a beardless, fleshly face, and thus he does not give one the impression of being healthy and capable of doing much. He has several wives, but no children; he himself is the son of one of Li-Hsi's concubines. He certainly will not ascend the throne without a great deal of trouble; the Japanese already have another Crown Prince in readiness at Yokohama this latter Prince has joined the Japanese, and he will be supported by them when the proper moment comes. The Crown Prince joined but very little in the conversation; even the simple questions that he comes. The Crown Prince joined but very little in the conversation; even the simple questions that he asked were suggested to him by the leader of the ennuchs. It is scarcely to be supposed that the Crown Prince will ever think of shaking himself free from the influence of that powerful and feared caste, whose rôle in Korea, as in China in olden times, is noxious. At the end of the audience, which had lasted scarcely twenty minutes, the Emperor took his leave of us in a few amiable words.

"Before the dinner was were offered a class of ver-

reiss. Similar intimations had already been sent to the official heads of the different Buddhist and Shinto sects, but in the absence of such ecclesiastical machinery in the Christian churches and the consequent difficulty of official communication, he desired Mr. Honda to transmit to the churches represented in the Evangelical Alliance a message from himself in behalf of the Government, of which the substance is as follows:—

"At the commencement of the war with Russia one subject which gave me no small anxiety was the diagrer of misconception and confusion of thought arising from racial and religious differences, and the dissemnation of opinions calculated to foster mutual recrimination between the people of different nationalities and religious beliefs. Accordingly, the Minister of Home Affairs gave instructions to the governors of all the metropolitan provincial districts for the protection of all Russians in the Empire. Moreover the Minister of Education also issued an important instruction to be observed in educational circles.

"But in spite of these precautions, just as I had feared, numerous cases of religious rancour have occurred in different localities, indignities being heaped upon believers of the Greek church and and another, some have unfortunately at the sight of a Christian allowed themselves to be filled with feelings of suspicion and distrust, and been guilty even of rude behaviour. Such things I deeply deplore.

"For my own part, regarding religions as an essential element of civilization, I have uniformly tried to treat all religions with becoming respect, and I vanished finally.

uttered all kinds of weird sounds, and then they vanished finally.

"Thereupon about a dozen remote dancers appeared in beautiful gold-shimmering colours, and with their hats and other head coverings decked with flowers and with sandals and well-fitting white stockings on their small feet. Although they were young and pretty, their faces were much painted. Round their necks and on their foreheads they were pendants, and their dresses were covered with fligree. Their names were very pietty. for they were taken from flowers and trees. These dancers belonged to the denti-monde of Korea. At first they entered in pairs, went through various movements, and each crowned her partner with flowers. Then a large screen was opened in the room, and a dancer took her place on either side of it. Near the top of the screen a rather large hole had been made, through which a dancer had to throw a flower to be caught by her partner on the other side. There were fixed rules for this pastime; if the thrower missed the hole but could pick up the flower before it touched the ground, then she could begin again, and go on until she managed to throw it through. When she had done that a flower was stuck in her hair, but she at once pulled it out to present it to one of the audience. If the flower talls to the ground, then the thrower has to pay a penalty. This lively game was followed by a pantomime, which represented a family squabble between a man, his wife, and her triend. The evening came to an end with dancing and singing by the soldiers of the Fing-Yang Regiment. To their bravery in the war between Japan and Korean national costume, that is, the national hat and the broad white robe instead of the cap, trousers, and shoes that are worn by European soldiers. In this regiment certain musical traditions are kept up, and these traditions give the soldiers the honour of

being invited to great Court ceremonies. Eight soldiers danced to an accompaniment of a chorus and of tambourines, while others gave some scenes in burlesque of rather a free nature. At midnight we took our leave."—The Globe.

A RUSSIAN ACCOUNT OF THE YALU BATTLE.

St. Petersburg, May 3.

In a report received by the Emperor from General Kuropatkin under to-day's date it is stated that at least from 3000 to 4000 men were killed in the Yalu-river fight. It is now admitted here that both General Sassolitch and Kashtalinsky were wounded and that twenty-seven guns were captured by the Japanese during the recent fighting on the Yalu river.

Japanese during the recent fighting on the Yalu river.

The Emperor has received the following telegram under to-day's date from General Kuropatkin:—

"General Sassolitch's report, dated to-day, on the fight of May 1st, says that the battle was fought under these circumstances:—

"The Twelfth and Twenty-second Regiments and the Second and Third batteries of the Sixth Brigade of Artillery were engaged in the battle, which began with heavy cannonading of our right flank by seige guns at Wiju and field batteries in the distance.

"After a lull the fighting was resumed with extraordinary violence against the left flank of our main position at Chiu-lien-cheng, and our position at Potietinsky. A fusiliade was also begun by small parties of Japanese across the Ai river. The situation of the defenders' position became increasingly difficult, especially at Potientinsky, which was bombarded on the front and on both flanks.

"Thirty Japanese guns were pitted against our battery at Potientinsky, which, after having silenced the enemy's mountain battery, directed its fire on the Japanese infantry, and sustained few losses so long as it was not obliged to take up another position owing to the withdrawal of our infantry from the bank.

BAYONET ATTACKS MADE.

BAYONET ATTACKS MADE.

BAYONET ATTACKS MADE.

"The Japanese, under our fire, made continual bayonet attacks on our troops. Japanese bodies lay in heaps at the river fords.

"Simultaneously with the attack at Potietinsky an attack was being made on our left flank at Chiu-lien-cheng, and the Russian trenches had to be abandoned under the Japanese enfilading fire. Our reserves several times mingled with the first line, thus enabling it for a long time to maintain its position.

reserves several times mingled with the first line, thus enabling it for a long time to maintain its position.

"Finally all of the supports were brought up into the firing line, but owing to the great distance from our main reserve it was impossible for them to reach the advanced force in time, and our men retired from the principal position in the rear of Chiu-lien-cheng, followed by the concentrated fire of the Japanese, who could not make up their minds to descend from the crest they occupied and face the fire of our batteries. They dug fresh trenches and opened a heavy artillery fire on our position, and began to turn our left flank toward Chingow.

"Two battalions of the Eleventh Regiment and the third battery of the Third Brigade of Artillery, belonging to the main reserve, were ordered to Lao Fun Hou. They occupied a position with a double firing line, thus permitting our advanced line, which had suffered heavily, and our wounded to retire.

ALMOST HAND TO HAND.

"A battalion of the Eleventh Regiment, both flanks of which were repeatedly turned by the enemy, advanced with fixed bayonet, preceded by buglers to clear a passage. The Japanese, however, declined a hand-to-hand conflict and recoiled. In front of the regiment a chaplain with a cross was struck by two bullets. It was only by advancing on the Japanese with the bayonet that the Seventh Regiment was able to retire. On the arrival of the battalion if the Tenth Regiment all the troops were able to beat the retreat.

"The losses of the Eleventh and Twelfth regiments

battalion in the Tenin Regiment at the thoops were able to beat the retreat.

"The losses of the Eleventh and Twelfth regiments were very great, but they are not yet exactly known. In the Eleventh the killed included Colonel Laming and Lieutenant-Colonels Dometti and Raievski. The Twelfth lost nine company commanders killed or

Twelfth lost nine company commanders and wounded.

"The Second and Third batteries of the Sixth Brigade, having lost the greater number of their men and horses, were compelled to abandon their guns, after rendering them useless. For the same reason six other guns and eight timbrels, which could not be brought away, were also disabled. The mountainous nature of the country made it impossible to save the guns by means of drag ropes.

"Up to the present 800 wounded, including fourteen officers, have been brought to the hospital at Fengwhang. Their eventual transportation elsewhere is assured.

TRANSPORTING THE WOUNDED.

TRANSPORTING THE WOUNDED.

"The transportation of the wounded by hired Chinese bearers to Fengwhang was very difficult. Two-wheeled carts and horses lent by the cavalry were also utilized for this purpose. Most of the wounded, however, arrived on foot, assisted by their comrades, and reached Fengwhang within twenty-four hours.

"Lieutenant-General Sassolitch declares that the troops retained their morale notwithstanding the heavy losses and are ready for fresh engagements.

"The Japanese losses were very heavy at the passage of the Ai river, at their position at Chiu-liencheng, and on the hill occupied by the two battalions of the Eleventh Regiments.

"According to the statements of participants in the battle, at least 3,000 or 4,000 were killed."

ITALIAN DEPUTIES WAX ANGRY.

Rome, May 5.

There was a great sensation in the Chamber of Deputies to-day at the conclusion of the parliamentary inquiry into the administration of Signor Nasi, former Minister of Public Instruction. The inquiry proved Nasi guilty of the misappropriation of laws.

former Minister of Public Instruction. The inquiry proved Nasi guilty of the misappropriation of large sums of money, the falsification of documents, the suppression of evidence and continuous peculation. The law courts presented to the Chamber a demand that they be allowed to proceed against Nasi and arrest him, but under the rules of the Chamber the discusion of this demand was postponed until Saturday next.

Saturday next. Saturday next.

Meanwhile the news that Nasi had been declared guilty of the charges against him spread, and the former Minister fled.

Nasi was a strong politician, and it was believed he was destined to become Premier. The result of the parliamentary inquiry into his conduct has caused

great excitement. great excitement.

There was a lively scene in the Chamber of Deputies to-day when Deputy Mirabelli, Republican, proposed that greetings should be sent to President Loubet in the name of the Italian Democracy. The

Loubet in the name of the Italian Democracy. The President of the Chamber, interrupting, said:—

"A greeting should be sent to France in the name of the Italian Parliament."
Deputy Santini cried: "Remember Montana," alluding to where the French defeated Garibaldi, November 3, 1867, to maintain the temporal power of the Pope. Signor Mirabelli retorted:

"I listened to your panegyrics after the German Emperor's visit. Now be silent."
He continued: "Don't change a national demonstration into a party demonstration. I speak in the name of the Republicans."
The Chamber broke into applause, which the president quieted. The Deputies expressed varying opinions amid confusion.

The Chamber broke president quieted. The I opinions amid confusion.

Premier Gioletti disapproved of an attempt to have a national demonstration benefit a party, which, he said, represented the smallest portion of the Italian

people.
Signor Mirabelli exclaimed. "You deny history You knelt before the French empire and now

before the republic. Amid violent protests the president closed the incident

THE RUSSIAN PRESS ON THE YALU

A St. Petersbarg telegram says:—The Russian papers are rather sparing in their comment on the battle of Chiu-lien-cheng, evidently awaiting more complete details, but what they say contains no trace

complete details, but what they say contains no trace of discouragement.

The Novoe Vremya says the days of patience announced by General Kuropatkin have now begun, and declares that the Japanese difficulties will increase as they advance. The paper believes the chief danger now is in the attitude of the Chinese and says: "Our diplomats must make Peking realize the danger of Chinese violation of neutrality. Russia must win, but with heavier sacrifices a heavier price will be exacted from her enemies."

and fortitude that they escaped after staying and hired inflicting such tremendous losses upon the enemy.

inflicting such tremendous losses upon the elemy.

"General Kuroki probably has eight divisions. This force will be joined by General Oku's army when the latter is landed. The Japanese have every reason to follow the southern road, where they will have the advantage of the co-operation of their ships. The roads are less difficult and mountains the beauth the Fenchwang district, but the they will have the roads are less difficult and mounteer ships. The roads are less difficult and mounteer ships. The reads are less difficult and mounteer less and the tainous through the Fernand was a state of the less than the ships are ships does not believe the

A high officer of the staff, who does not believe the Japanese will make an immediate advance in Manchuria, said to-day:

churia, said to-day:

"They are too careful to commit such a blunder as to expose their flank to the Russians stationed at Feng-hwang. I think they will fortify their position at the Yalu and may land troops at Takusan and hold the sea-shore, but in no wise will they advance across the Liao-tung, where they might be taken on eithir flank by General Kuropatkin from Liao-yang and General Stoesset from the south."

THE FIGHTING AT CHEMULPO.

The following extract from a letter by Captain Lewis Bayly, of the British cruiser *Talbol*, at Chemulpo, dated February 20th has been published:—

In connection with the engagement between the Russian ships Varyag and Korietz and the Japanese fleet I beg to enclose the following remarks:—

Chaplain Rondneff states that the carrying away of the wounded on stretchers became impossible; several men when carrying them were shot down, and only five men altogether were brought down to the doctor below the water-line, while of these five the doctor of the Varyag says two were practically dead when they arrived. They had held classes on board the Varyag to instruct men in "first aid"; bags of bandages had been served out, and the doctor says that some lives were thus saved by being thus treated. The Russian sailors bear their perations wonderfully well.

There were 100 men employed on the Varyage. Chaplain Rondneff states that the carrying away of

wonderfully well.

There were 150 men employed on the Varyag's upper deck during the 'action, and nearly all the killed and wounded were out of this 150, which is—28 per cent. killed, 45 per cent. wounded. It must not be forgotten that, having no gun shields, her guns' crews were practically unprotected, and that shrapnel shell were largely used, to judge by the holes in the boats, funnels, etc. All was quiet in the engine-room, as though they had been at target practice. In one stokehold (they have five, with no fore and aft bulkhead) the water came up to the floor of the furnaces, but did not get into the other stokeholds. It is believed to have come through a hole made on the Varyag's water-line when she was inclined and travelling at a reduced speed while turning.

inclined and travelling at a reduced speed wind turning.

While suffering her severest punishment—i.e., when she was turning, thus keeping the range constant and her speed reduced, she had only four guns (I am told by her commander who is living with me) that were not temporarily disabled. One 12-pounder was knocked clean across the deck from port to starboard. One set of cartridges caught fire on deck and burned so rapidly that two men were burnt to death, the body of one falling down the ammunition hoist with the clothes on fire. There were five fires altogether, of which four were successfully combated by the fire mains, and the fifth (which was caused by a shell bursting in the flour-tank and which caused such a smoke that the scuttles had to be elepted would probably have been put out had not the surface of the solution. the ship sunk.

The range was taken by an officer on the forecastle The range was taken by an officer on the forecastle and shown to the guns by an instrument in the top but both men in the top were seriously wounded, one having his leg so nipped by a portion of the fractured steel of which the top is made that they had to cut some of the flesh of his leg away so as to extract him. The doctor was below the water-line; the gunnery, forpedo, and navigating lieutenants, together with the helmsman and a man for working the purple-group telegraphs. were in the conning-tower, In the Eleventh the killed included Colonel Laming and Lieutenant-Colonels Dometti and Raievski. The Twelfth lost nine company commanders killed or wounded.

"The Second and Third batteries of the Sixth in Brigade, having lost the greater number of their men and horses, were compelled to abandon their guns, after rendering them useless. For the same reason six other guns and eight timbrels, which could not be brought away, were also disabled. The mountainous nature of the country made it impossible to save the guns by means of drag ropes.

"Up to the present 800 wounded, including fourteen officers, have been brought to the hospital at Fengwhang. Their eventual transportation elsewhere is assured.

"Japanese cavalry appeared to the southeast of Fengwhang but seeing two companies with two guns opposed it, it did not venture to approach.

"April 30th, and adds: "Kashtalinsky foredoomed freed were so deaf with the noise that the voice working the neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russia must win, but with heavier neutrality. Russian stoud near the conning-tower in the conning-tower and main decks to stop fire, assist supply amountion, etc. The captain stood near the upper and orderly who followed him survivors of the heroic fight against overwhelming survivors of the heroic fight against overwhelming survivors of tube to the handwheel was of little service and the ship was steered with the propellers until out of action. The cause of the accident to the steering gear is very obscure, but the consensus of pinion is that the rods leading to the steering engine were shot through, all the connections, steam and electric and hydraulic, being cut through at the same time. Being only one rod as far as the telemotor, that would easily be the case were they not duplicated. The boats were riddled with holes except a steam pinnace, which was hoisted to davits on the starboard side forward; she was practically untouched, and has since been salved by the Japanese.

A very great deal of shrapnel must have been fired at the Varyag, judging by the round holes, and not much lyddie, for there seems to have been no inconvenience from poisonous gases. Much trouble has been caused to the wounded on account of the pieces of cloth that are constantly being extracted. Many men are wounded with punctures, holes about as large as the top of the little finger and from ½ in. to ½ in, or inch deep, but with no foreign substance such as iron, etc., being present in the wound, and no sign of scorching round the mouth of the wound.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

A RUSSIAN REPORT.

London, May 20. Dispatches from General Kuropatkin and General Sakaharoff describe the Japanese evacuation of several points occupied by them in the advance on Liaoyang, and their retirement on Fenghwangcheng, where they are constructing earthworks. The rain has rendered the roads very bad.

AUSTRO-HUNGARY'S BUDGET.

The Austro-Hungarian Minister of War has explained to the Delegations that the extraordinary expenditure in the Budget is no way connected with the political situation, but is necessary in order to make up leeway as regards rearming the Artillery and the equipment of vessels in accordance with the modern developments of the science of War.

THE COTTON QUESTION.

Lord Lansdowne states that Russia has replied to Great Britain's enquiry with regard to the Russian Notification of the 11th inst., (declaring cotton contraband-of war) that it applies to raw cotton only. BRITISH SYMPATHY WITH JAPAN.

London, May 21. The English papers express sincere sym-pathy and deep regret at the loss of the Hatsuse and the Yoshino.

A STRANGE REPORT.

Later. It is reported from St. Petersburg that it is expected Russia will shortly proclaim all Siberian ports, including Vladivostock, open to commerce.

ROOSEVELT'S NOMINATION.

London, May 22.

The nomination of Mr. Roosevelt for the Presidency is assured.

A TIBETAN AMBUSCADE.

Tibetans ambuscaded eight Sepoys carrying mails in rear of the British camp. The mail carriers reached camp after an hour's fight, with three casualties.

FRANCE AND THE VATICAN.

London, May 22.

France has recalled her Ambassador to the Vatican owing to the wording of the protest addressed to the Powers simultaneously with the protest sent to France on the 8th of May.

A RUSSIAN SORTIE.

It is reported in St. Petersburg that General Stoessel made a sortie from Port Arthur and drove back the Japanese, killing and wounding a thousand. The Russians lost

A RUSSIAN TRIBUTE.

The news of the Japanese disasters have also given orders, been received in Russia without exultation. The newspapers pay a tribute to the gallantry of the Japanese seamen.

JAPANESE MOVE ON LIAOYANG.

Reuter telegraphs from St. Petersburg that according to a telegram received from General Sakharoff, the Japanese advance upon Liaoyang has been resumed. The General reports the movement of several detachments at different points within 50 kilometres N.W. of Fenghwhang, The horses and the infantry are reported to be much exhausted.

FRANCE AND ROME.

M. Misard has left Rome, but a councillor of the Embassy remains as Chargé d'Affaires.

THE "OREL" IN TROUBLE.

London, May 24 The battleship Orel, recently launched, which stranded in the Neva owing to her great draught, again stranded at Cronstadt on May 19th. Her stern has since sunk deeply in consequence of her bilge-pipes having been opened for some unexplained reason. The ship is badly strained.

Later. The battleship Orel has been re-floated. It is stated that the accident was due to the careless rivetting of her plates.

THE "BOGATYR."

It is stated in St. Petersburg that the Russians blew up the Bogatyr, finding it impossible to save her.

NEWCHWANG.

The General Staff at St. Petersburg considers that the re-occupation of Newchwang is due to changes in the situation produced by the loss of the Japanese ships, which renders unsafe the despatch and arrival of transports at Liaotung

ADMIRAL SKRYDLOFF.

Admiral Skrydloff has arrived at Vladi-

VAGRANT MINES.

London, May 25.

There is increasing evidence that the Russians have been deliberately strewing mines on the high seas. This is evoking strong protests from the British press.

JAPAN PURCHASES STEAMERS

Japanese agents have purchased at Antwerp several steamers of two to three thousand tons.

May 22nd—The officer commanding the force that landed at Takushan reports that an officers' reconnaiseance in the distributions. The London Daily Telegraph says that

THE TSAR.

The Tsar returned on May 16th to St. Petersburg.

ARRESTS AT CONSTANTINOPLE.

Kemal Pacha, the son-in-law, and an aide-de-camp of the Sultan, were arrested on May 21st with other high officials, as the result of the discovery of secret correspondence with Princess Khadidje, daughter of the ex-Sultan Murad.

RUSSIA BUYING SHIPS

London, May 26. The Russian Government has notified and Rotbrokers in Antwerp terdam that thirty more large steamers are wanted, deliverable in Libau at the end of June. It is intended that they shall accompany the Baltic fleet.

ORDERS FOR TORPEDOES.

hundred of the latest model Whitehead torpedoes, hitherto only in the possession of Japan; France, Italy and Austria have

(RECEIVED AT THE LEGATION OF FRANCE.) FRANCE AND THE POPE.

Saigon, May 23.

The Ambassador of France at St. Peters, M. Misard, has left Rome in consequence of a note of protest addressed by the Pope to the Powers with reference to the visit of President Loubet to Rome.

THE FRENCH BUDGET.

The Budget Committee consists of 18 opposition members and 14 ministerialists, with M. Doumer as president.

JAPANESE OPERATIONS

General Kuropatkin confirms the report that the Cossacks have repulsed a Japanese detachment on the north of Fengwhang,

(RECEIVED IN TOKYO.) SUNKEN TREASURE.

The New York Herald has a telegram from St. Petersburg saying that the battle-ship Petropavlovsk had twelve million dollars on board when she sank. The report is that this money had been sent out, lest the Port Arthur communications should be severed and the place left in financial distress.

(RECEIVED AT HEAD QUARTERS). RECENT FIGHTING.

General Kuroki reports that the Russian cavalry attacked on the 20th instant was the 3rd company of the Betneftinsky Regiment of the Baikal Cossacks. Two officers were captured by the Japanese, namely, one captain and one lieutenant, and four rank and file were also captured. enemy left one captain and 9 rank and file dead on the field. Twenty-two Japanese had one men. I wenty-two horses were killed and 9 captured. The Japanese had one man killed at the time of making the prisoners. The enemy retired partly to Sungyuen and partly to Shalichai (a place in the direction of Fengwhang).

THE PORT ARTHUR RE-CONNAIS-SANCE

Admiral Togo reports that in the reconnaissance made at Port Arthur the destroyer Akatsuki was struck by a shell and had one lieutenant and 24 men killed.

OPERATIONS ON THE LIAOTUNG PENINSULA.

an officers' reconnaissance in the direction of Tashikiautsze encountered at Kaukiatang the remnant of the troop of Cossacks which had been defeated on the 20th instant and killed them all.

From the same source it is reported that an officers' reconnaisance sent to Wantaukan captured two troopers and several horses at Changkiatun.

MORE PRISONERS.

General Kuroki reports that on the 21st instant six members of the land transport corps who were in the vicinity of Shanchingtze on the S. E. of Tanshuntien, captured one first captain and one sergeant of the Chichinsky Brigade. These two men had penetrated far into the Japanese lines to make a reconnaissance.

FIRST ARMY OPERATIONS.

May 24.—General Kuroki reports that on the morning of the 21st instant a company of Japanese infantry encountered 200 Cos The Russian Government has ordered one sacks at Tautaukan, which is 101/2 miles

drove back the Russians to Aiyangtienmun. The Russians left 20 dead and four horses on the field. The Japanese had no casualties. [Note.—This is apparently the affair which General Kuropatkin reported yesterday in exactly the opposite sense. - E.D. J.M.]

THE FIRST ARMY'S OPERATIONS.

General Kuroki reports that there have been several skirmishes in the S. and N. of Fenghwang, all of which resulted in favour of the Japanese. These, however, were very trifling affairs, with which it is unnecessary to perplex our readers as the names given are not to be found on an ordinary map.

(RECEIVED AT THE FOREIGN OFFICE.) THE FOREIGN PRESS ON JAPAN'S LOSSES.

The German newspapers make no special comment on the losses recently sustained by the Japan navy, but all agree that while the incident is profoundly regrettable from Japan's point of view, it does not materially affect her naval strength. The Russian squadron continues to be blocked in Port Arthur and

can not go out to fight in the open.

The London Times says that while all nations will sympathise with Japan on this occasion she has the special sympathy of her ally, Great Britain. The loss, of course, is great, but Japan's command of the sea is not altered and is no danger of being impaired. Neither will the incident affect any of the strategical plans she has formed. The Ståndard, the Morning Post and the Daily Telegraph write in much the same sense.

ST. PETERSBURG NEWS.

It is firmly believed (May 21) in well informed circles in St. Petersburg that the Bogatyr has been lost. It is also stated that the battleship Orel, which recently went on a rock in the Neva, and went to Cronstadt for repairs, has met with some other accident and has gone to the bottom.

Viceroy Alexieff reports that intelligence having been received of the presence of a small Japanese force at Sanshilitao, a body of Russian troops was sent on the 16th instant to attack them. But it was found that the Japanese had two divisions and four batteries of artillery. In the fighting that ensued the Russians had 150 casualties, and it is believed that as the Japanese advance was not arrested by this attack the Russians must have suffered severely. General Nagien was slightly wounded and one officer was killed.

This is evidently the affair already reported by the Japanese. They had 146 casualties, as our readers will remember, and they estimated the Russian losses at 300. Their advance was not arrested in THE "OREL" losses at 300. Their any way.—ED. J.M.]

(OFFICIAL REPORT FROM TAKUSHAN.) THE FIGHTING ON LIAOTUNG.

Received at the Head Quarter Staff in Tokyo on the 24th instant:—" In the fight on the 20th inst (the day after the landing) at Wangkiatun the Russian officers of cavalry were either killed or taken prisoners, and the detachment was altogether dispersed. Subsequently Russian killed and wounded were found in the neighbouring villages. The people of the vicinity say that they saw troopers escaping without their horses and without any semblance of being military men. It would appear that the enemy's squadron was wholly broken."

(FROM THE " ЈІЛ ЅНІМРО.") THE JAPANESE AT LIAO-YANG.

London, May 18.

A Japanese detachment from Kwan-lien is believed

The Japanese to have advanced along the rivers Yao-ho and Baltic Fleet, which, if it reaches the Far East, will be highly another to the Japanese Fleet, and four horses and four horses.

RUSSIAN PESSIMISM. flanked the Russian force.

PESSIMISTIC VIEWS OF THE RUSSIANS

General Kuropatkin has presented a pessimistic report to the Tzar in which he said that defective strategy in the past is being followed by failure which the future gives faint hope of retrieving.

It is believed that General Kuropatkin and Admiral

Alexieff are at loggerheads.

ADMIRAL STOESSEL'S BELIEF.

Admiral Stoessel believes that the Pobieda was attacked on the 13th ultimo by a Japanese submarine.

THE TZAR

The Tzar in a farewell speech to the soldiers at Kalkoff said that the enemy was brave and powerful. JAPANESE LOAN BONDS.

5-per cent loan bonds to-day advanced £1; 4-per cents, 10 shillings; and 6-per cent new bonds still maintain a premium of £2½.

JAPANESE FORCE AT LIAO-YANG.

Twenty thousand Japanese troops landed on Monday (the 16th) at a place 75 miles south of Kai-ping, and they immediately advanced in a Northerly direction toward Haiching.

A Japanese detachment from Chin-yuen yesterday reached the frontier at Haiching.

RUSSIANS EVACUATE NEWCHWANG The Russians have absolutely evacuated New chwang. The Japanese are expected to occupy the

THE MISSION TO TIBET.

General Macdonald has telegraphed to the Government that the absolute safety of our posts in Tibet is assured, and there is no cause for alarm. The reinforcements will be employed in safeguarding the communications.

LAST SPEECH OF THE GREAT PARLIAMENTARIAN.

London, May 18.

London, May 18.

Sir William Vernon Harcourt, in a speech which he declared would be his last in the House of Commons, strongly supported a motion by Sir Henry Campbell-Bannerman condenning the recent increase in expenditure. He attributed this increase to the existing spirit of annexation, raids, retaliation, and appeals to international jealousy.

Mr. Austen Chamberlain, Chancellor of the Exchequer, repudiated these charges. He said that a reduction of the Army expenditure was being considered; but the shipbuilding programmes of France, Germany, and Russia showed the necessity that the two-Power standard for the Navy should not be changed. He did not share the view that the Japanese war had wiped out one of the great navies of the world. world.

The motion was defeated by 297 votes to 213, showing a majority of 84 for the Government,

GERMAN HOLD ON SHANTUNG.

Peking, May 19.
The German Minister (Baron Mumm von Schwarzenstein) has been consulting with the Chinese Government with a view to the placing of guard troops on both sides of the Shantung railway.

FISCAL HALF-WAY HOUSE, London, May 19.

The House of Commons has debated a motion by Mr. A. W. Black (L. Banffshire) welcoming the declarations by Ministers that the Government is opposed to the taxation of food.

An amendment

An amendment was proposed by the Prime Minis-ter (Mr. lialfour) reaffirming the Sheffield pro-gramme and shelving the fiscal question during the life of the present Parliament.

Mr. J. Chamberlain supported the Government.
The motion was rejected by 306 votes to 251 and the debate on the amendment was adjourned.

THE MISSION TO TIBET.

London, May 20.

The Tibetans at Gyangtse are treatening the truson's communications, and systematically fortifying the surrounding hills.

RAW SILK.

There has been a moderate amount of business during the week. Dealers have lowered their pretensions, especially for fine sized filatures, and considerable business is in progress for Lyons at the reduced rates. Sellers here have apparently realised the fact that crops are good all over the world and are anxious to close up their old ventures before the new season opens. New crop continues to go well in all countries. The cold weather of the present week has brought in a few complaints from some of the Japanese provinces, but they are of little importance and the recurrence of warm spring weather will soon abolish them.

And Other Itching, Burning, Scaly Eruptions with

Speedy Cure Treatment.

Bathe the affected parts with Hot Water and Cuticura Se cleanse the surface of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Ointment freely, to allay itching, irritation, and inflammation, and soothe and heal, and lastly take Cuticura Resolvent Pills, to cool and cleanse the blood. A single set is often sufficient to cure the most torturing, disfiguring, itching, burning, scaly, pimply humours, eczemas, rashes, irritations. and chaings, with loss of hair, when all else fails.

The agonizing teching and burning of the skin, as in eccema; the frightful scaling, as in psoriasis; the loss of hair and cruating of the-scalp, as in
scalled head; the facial disfigurement, as in pimples and ringworm; the
awful suffering of infants and the anxiety of worn-out parents, as in milk
crust, tetter, and salt rheum, — all demand a remedy of almost superhuman
virtues to successfully cope with them. Such are the Curricua remadles,
the purest, sweetest, most speedy and economical curatives for the skin,
scalp, and blood ever compounded. Mothers are their warmest friends.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA CINTERNT for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes and chafings, in the form of baths for annoying irritations and inflammations of women, or too free or offensive perspiration, in the form sil washes for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, 'd brated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and cures. Fut up in screw-cap pocket viais, containing m does.

from a special mission, will be employed on the Formosan line.

On the morning of May 26th a train was derailed at Nakayama, Iwate prefecture. An engineer was injured.

Five thousand tons of Cardiff coal were delivered at Nagasaki on May 26th, having been brought by a British steamer.

THRBE cases of diphtheria were reported on June 1st in Tokyo. The patients were all members of a family in Shitaya.

CAPT. PAUL A. DIFLEFSEN, who spent many years in Kobe as an Inland Sea pilot, died in San Francisco on April 24, aged 64 years.

THE advances to the Tressury by the Bank of Japan were increased on May 31st-by two million yen, making a total of seventy-three million yen.

Two cases of small-pox were reported on May 30th at Moji. Small-pox patients number 42 from the first appearance of the disease this year.

A JAPANESE woman arrived on June 1st at Nagasaki from Mukden via Taku, China. According to her story three Japanese women are still in Mukden.

On June 1st, hail fell in the district of Kamiminochi, Nagano prefecture, the depth of the fall being about three inches. Some damage was

THREE RUSSIANS from the Varyag who had been undergoing surgical treatment in the Matsuyama Hospital and who have since recovered, will shortly be sent home.

THE estate of the late Sir Edwin Arnold h been valued at £6,417 9s. 11d. Sir Edwin left all of his own property to his wife, Dame Kurokawa Tama Arnold.

Miss McCaul and party left Hiroshima on May 28th by the hospital ship Hakuai Maru for the front. The same day, Dr. McGee and her party arrived at Hiroshima.

A TELEGRAM from Nemuro reports under date of May 27th that owing to a gale five sailing vessels have been wrecked off Munijiri island. One of the crew was drowned.

A CASE of suspected cholera was reported on May 31st at Echizen-bori, Kyobashi, Tokyo, and the patient died on the evening of the following He was one of the crew of a junk.

THE Emperor and Empress were on June 1st During May, the export of coal from Moji rendered homeless at Miyako-machi, Iwate prefecture where an extensive fire occured on May

> THE price of the British steamer Westminster (3,859 tons) which Mr. Ukon, of Osaka, recently purchased is reported by the *fiji* to be *ren* 250,000. The ship was delivered on May 28th at Kobe to the new owner.

THE German steamer Quarta which stranded Maru was sunk at the entrance to Port Arthur On May 24th off Kurushima, Iyo province, was at the first blocking operations.

Hoated on the 27th.

According to intelligence brought by the British steamer Argo, which arrived on May 26th Minister of War, and the various staff officers, at Nagasaki from Chefoo, the Japanese officers including Marquis Oyama.

According to intelligence brought by the British steamer Argo, which arrived on May 26th Minister of War, and the various staff officers, at Nagasaki from Chefoo, the Japanese officers and men of the late Kinshu Maru captured by the Russians have arrived at Harbin.

take, near Chiba, committed suicide on May 25th by jumping with two of her daughters, one of seven years old and the other of four years, into a well. The cause is reported to be poverty.

THE Asahi says that the Nippon Yusen Kaisha has cancelled the service between Kobe and Yuensan, Korea, on the advice of the Government The chartered steamer Argo was authorities. to have left Kobe on May 29th.

The war correspondents of the London Daily Chronicle, the New York Herald, the Associated Press, the Chicago Daily News, and the Daily Mail, who returned to Shimonoseki after the battle of the Yalu, left again on May 29th for the

In spite of the war, says a telegram from Osaka, the business of the Osaka Shosen Kaisha for the first half year was very successful showing an increase in net profits of 10 per cent. over the previous account. An interim dividend was declared of 5 per cent.

A LANTERN procession participated in principally by cocoon, raw silk, and silk piece goods traders took place in Yokohama on the evening of Saturday (May 28th.) Over three thousand turned out in spite of the rainy weather and fireworks were displayed in connection with the demonstration. demonstration.

S. Ishrkawa, a coolie, Chitose-cho, Yokohama, attempted to murder his wife on the morning of May 30th, inflicting severe injuries on her head and throat with a sword and also attempted to commit suicide by injuring himself in the throat. He was arrested by the police. The cause is believed to be jealousy.

A Moji telegram to the Jiji reports that the steamers Jinsen Maru and Baito Maru collided on May 30th in the neighbourhood of the Taing-nyon islands (which are commonly known as the Sir James Hall group) off Hoan-Hai-do, Korea. The details are not yet known. The damage, however, seems to be slight.

M. Tomiyama (19) who purchased a post money order for sen 5 at the Shiba Post Office, Tokyo, and attempted to obtain money from the Akasaka Post Office, by changing its value to yen 5 was sentenced on May 30th in the Tokyo District Court to two years imprisonment with hard labour and to six months' police surveillance.

JAPANESE naval casualties from Feb. 9th to May 25th number 1,202. Of these 949 represent men killed, 88 missing (in the blocking operation on May 3rd); 15 died after receiving wounds; 78 were wounded but recovered; 83 were wounded and are still under treatment in the hospitals; and 89 were wounded and are under treatment but not in hospital.

LIEUT.-GENENRAL Baron T, Nagayama, who had been ill for some months past, died on the night of May 28th. His remains were sent on the following day to Sapporo, where his family reside.

The General was a member of the Satsuma Clan and fought on the Government side in the Satsuma Rebellion and also took part in the Restoration struggle.

Mr. N. Shirasu, Japanese Consul at Suchou, China, telegraphed on May 27th that owing to the recent rainy and cold weather, sericultural work was much affected and the crop of cocoons is poor. The cocoon market was to be opened on the 30th, the nominal price being \$36 to \$40 per hundred catties. The crop of silk is forecasted to be about 5 per cent. reduced and the market shows a weak tendency.

THE BATTLE OF NANSHAN.

Saturday, May 28.

Below we print the official reports received in connection with the Battle of Nanshan:-[Received at the Head Quarter Staff at 1 p.m. on the 21st.]

The enemy at the Kinchow position occa sionally opens a desultory fire, apparently with the object of drawing us on. It would seem that the artillery on Nanshan (near Kinchow) consists of four 15-cent, rifled howitzers, ten old pattern guns from 9 to 15 centimetres, and two 13-cent. quick-firers. There are also some large field pieces but their number and calibre are uncertain. On the summit of the hill (Nanshan) there are at least ten forts or breast-works. The most advanced are designed to protect the approaches from the north and the north-There are also wire entanglements and mines at the base of the north face and The above statement as to the enemy's artillery is based on actual observations of his fire. Judging from the fragments of the shells, there appear to be 101/2 cent., and 8½-cent. guns of old pattern, which have an effective range of 8,500

[Received on the forenoon of the 22nd.] The attacking force has to-day commenced operations as previously arranged.

[Received on the forenoon of the 23rd.]

The attacking force is advancing upon Kinchow.

[Received on the forenoon of the 24th.]

The attacking force assembled on the line of the Kiulichwang, Chinkia-tun and Chaitszho hills, and a reconnaissance was made by the staff. From to-night a reconnaissance will be made of the camping ground for the force and of the road to be followed by it.

ment the whole way. On the enemy's left wing there are no signs of defensive works. In Kinchow there continues to be only a small force of infantry and artillery.

[Received on the forenoon of the 25th.]

According to reports received from the will take part in the attack to-morrow, directing its operations against Nanshan

Kinchow to-morrow morning (26th). The naval force that was to attack from Kinchow Bay has not yet appeared.

[Received on the afternoon of the 26th.]

The artillery on both sides opened fire at daylight to-day (26th) and maintained it for five hours. During this time three of our ships arrived in Kinchow Bay and took part in the fight. A gun-boat of the enemy's opened fire on our left wing from Talien Bay. The artillery duel is now at its height. At 5.20 a.m. Kinchow fell into our hands.

[Received at 4 a.m. on the 27th instant.] The attacking force, after a fierce fight, captured the Nanshan position to-day and is

now pursuing the enemy.

It will be very difficult for any reader to follow the above without the aid of a mili-tary map. We may explain, therefore, that tary map. We may explain, therefore, that the key of the Kinchow position is the hill called Nanshan. It occupies the centre of the Isthmus, the railway from Kinchow to Port Arthur passing it on the east and the road between the same two places passing it on the west. Nanshan is within the range of heavy ship's guns from Kinchow Bay. The Isthmus has a width of about 2 miles. The Nanshan eminence and slopes appear to have been bristling with parapets and breastworks affording cover for artillery and riflemen, and the approaches on the east and north were protected with wire-entanglements and mines. How many guns were mounted it is very difficult to say from the above account, but there were certainly from 20 chow Bay at noon on the 25th instant, but to 25 of various calibres. On the west side, the wind was so strong and the sea so high to 25 of various calibres. however, the defenses seem to have been weaker, so far as concerns such things as could not be discerned, and the ships steam-[Received on the afternoon of the 24th.]

The result of the above reconnaissances was as follows:—On the Hoshangtau promontry the enemy have 8 large guns all pointing sea-ward. The calibre and nature of these pieces is not known. Some of these guns can be trained on the Makiatung position. In the vicinity of Liushutun there is a large store house. On the eastern eminence of Nankwanlin there are works which appear to be trenches for skirmishers. At three places (Yangpauying, Houying and Tsoying) in the southern vicinity of Liushutun vicinity of Liushutun vicinity of Liushutun there is a large store house. On the eastern eminence of Nankwanlin there are works which appear to be trenches for skirmishers. At three places (Yangpauying, Houying and Tsoying) in the southern vicinity of Liushutun vicinity of Liushutun there is a large store house. On the eastern eminence of Nankwanlin there are works which appear to be trenches for skirmishers. At three places (Yangpauying, Houying and Tsoying) in the southern vicinity of Liushutun there works which appear to be trenches for skirmishers. At three places (Yangpauying, Houying and Tsoying) in the southern vicinity of Liushutun there works which appears to be trenches for skirmishers. At three places (Yangpauying, Houying and Tsoying) in the southern vicinity of Liushutun there works which appears to be trenches for skirmishers. At three places (Yangpauying, Houying and Tsoying) in the southern vicinity of Liushutun there works which appears to be trenches for skirmishers. At three places (Yangpauying, Houying and Tsoying) in the southern vicinity of Liushutun there was directed originately appears to be trenches for skirmishers. At three places (Yangpauying, Houying and Tsoying) in the southern vicinity of Liushutun there was directed originately appears to be transfer the fall of the town of conjecture that after the fall of the town of conjecture that after the fall of the town of conjecture that after the fall of the town of conjecture that after the fall of the town At three places (Yangpauying, Houying Kinchow, which lies to the north of the Kono, killed 2 men and wounded 2 others, and Tsoying) in the southern vicinity of Isthmus, the Japanese moved down the road By 8 o'clock a.m. the enemy's batteries where three search on the western shore of the Bay and as Kiulichwang the enemy have three search-lights which they frequently turn on our positions. Judging from the fragments of the shells hitherto fired by the enemy, they have 20-cent., 15-cent., 10½-cent., 8.6-cent., and 7.6-cent., some of which are quick-firers. from 5.30 a.m. until 9 a.m. There was no at Talangshin was blown up by the enemy's change in the enemy's condition near Kin-Jinnies. Our troops fought for 16 hours to-day, and their endurance as well as the bravery they showed in attacking a strongly bravery. Our force will attack Nanshan and linjury. Our force will attack Nanshan and Kinchow to-morrow morning (26th). The Eart of our was chically reported. posted enemy must be specially reported. Four of our war-ships engaged in this action aud rendered material assistance to our right wing during the attack.

[Received at the Naval Department at 1.25 p.m. on the 27th, from Vice-Admiral Togo.]

According to report just received at the naval base by wireless telegraphy from Captain Nishiyama, whose squadron is on its way back, the *Tsukushi*, *Heiyen*, *Akagi*, *Chokai* and the Frst Torpedo Squadron steamed to Kinchow Bay at 6 p.m. on the 25th, and from dawn on the 26th took part in the operations on shore. It bombarded the enemy's position on the Sukiatun eminence. The Akagi and the Chokai, taking advantage of their light draft, assisted in the fight throughout the whole day. At 7 a.m. the enemy retired from the highland at Sukiatun, but continued to resist doggedly from the positions in rear so that the progress of the fight was not visible from the sea. At 8 p.m., however, it was seen that the enemy's positions had been carried. Captain Hayashi, who commanded the Chokai, was killed, and 9 men were killed or wounded. The ships did not suffer any appreciable damage.

Monday, May 30.

[Received at the Navat Department at 10.30 p.m. on the 27th instant.] The report of Captain Nishiyama, commanding the Detached Squadron has just been brought in by the Torpedo Division. He says:—"The Squadron reached Kinchow Bay at noon on the 25th instant, but that the enemy's positions at Sukiatung from Yenkiatun round by the north-base of forward to a second Plevna at the Russians, with all its guns on the the mountain to the north-west and as far Isthmus, and truly the question now arises, with all its guns on the the mountain to the north-west and as far Isthmus, and truly the question now arises, with all its guns on the tank. Same point about 1,000 metres to the north-can the Russians hold any position against batteries, and as it appeared, by 11 a.m. that the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians hold any position against that the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians hold any position against that the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians hold any position against that the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians hold any position against that the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians hold any position against that the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians hold any position against that the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians hold any position against that the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians hold any position against the point about 1,000 metres to the north-can the Russians hold any position against the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians hold any position against the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians hold any position against the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians had retired from Sukia-as point about 1,000 metres to the north-can the Russians had retired from Sukia-as point about 1,000 metres to the north-can the russian session of the heights there, we ceased firing In consequence of the falling tide it became necessary for the Tsukushi and the Heijen to steam out gradually from the shore, but the Akagi and the Chokai with a part of the torpedo squadron remained watching the enemy. Meanwhile our ships had established communications with the troops, and had learned that although the enemy had been bombardment a shell from the Russian bat the wire communicating from the battery to teries exploded near one of the Chokai's guns, the mines at the base of Nanshan on the east, killed Captain Hayashi and wounded Mid-shipman Sato and 3 men. The ship, however, was not injured, nor did any other of about 400 dead in the forts and their imthe vessels sustain any damage. At 7.30 mediate vicinity. We took the whole of

[Received at the Head Quarter Staff in the forenoon of the 38th.]

The report of the Kinchow attacking force is as follows:—" The Force, at 10.30 a.m. on the 27th, despatched under Major Nakamura a detachment consisting of infantry, artillery and engineers, which took possession of Nankwan-lin. The main body of the Force took up its quarters in the hamlets near Nanshan. The various bodies were reformed and as soon as they are prepared the advance will be resumed along the previously determined line. The enemy in the direction of Port Arthur and the de-tachment guarding the South Sanshilipao station, burned the station and withdrew at 10 a.m. (Sanshilipao is the point where the Dalny line joins the main railway). The principal objects captured from the enemy in the fight on the 26th instant were some 50 guns of large and small calibre. The enemy left about 400 dead upon the field. Our casualties were about 3,000.

(Later). [Received at the Head Quarter Staff.] "The Kinchow Attacking Force, as already reported, commenced the assault upon Nanshan at 6 a.m. But about one half of fortifications on the eminence were half of fortifications on the minence were of a permanent character. In addition to some 50 guns, large and small, mounted in the forts, there were two of the Naushan position. By 11 a.m. all batteries of field artillery (quick-firers), and the guns that were mounted in the open the defending infantry was posted in two on the Russian side had been silenced, being in trenches which completely screened but two batteries of quick-firing field-guns retreated to Nankwanlin, and Further, machine guns were placed at the most important points and altogether the guns were placed at the most important points and altogether the gun-boat of the enemy steaming to the east defence was most obstinate. Our Force deployed all its field artillery and can-left rear of our Third Division, keeping it up nonaded the enemy's forts so that by until 2 p.m. An attempt was also made to I p.m. the principal of these were silenced. Meanwhile he had withdrawn his quick-firers to Nankwanlin whence he continued to bombard us until the evening. Our artillery, after silencing the enemy's forts, directed its whole fire against his south of Nanshan, cannonaded our Third artitles and our infantry advancing. to effective range, opened a heavy fire, left wing replied to this fire but owing to thereafter advancing to within 400 or 500 metres of the position. But in front of the ground occupied by the enemy on Nanshan Russian position there were wire entanglements, mines, and stake-pits, while, on the other hand, his quick-firers and rifles had not been in the least weakened, so that he poured a hail of bullets upon us. Nevertheless our men advanced to within 200 metres, and attempted again and again to force their way through these obstacles, but again and again were lines of mines and barbed wire again they failed, officers and men being struck down so that none reached nearer than 20 or 30 metres from the position. Once more, therefore, artillery fire was opened by way of preliminary to a new advance, and towards evening this fire was times, and shortened the range, rendering developed to its utmost capacity. Simultaneously a last charge was made, and with difficulty the entrenchments were forced at one point. From this place the hills were rapidly rushed and the enemy's positions were all captured. During these operations four of our gun-boats assisted by cannonading the enemy's forts from Kinchow Bay. A gun-boat of the enemy's meanwhile fired right so as to bear back our left. By this killed during the attack on Naushan. He upon our left wing. The most fortunate time the ammunition that our guns had into action was nearly exhausted, naval circles he enjoyed a very high retaneously a last charge was made, and with enemy's resistance was so stubborn that up

and this having been cut, the enemy was unable to fire the mines. The enemy left

A LATER REPORT. [Received at the Head Quarter Staff at 9.45 p.m., 28th instant.]

General Oku reports that on the 25th the preparations for attack were completed as previously effected, and operations were commenced from mid-night. The Fourth Division formed the right wing; the First Division the centre, and the Third Division the left. The force was directed against Nanshan on the Kinchow Peninsula. The weather proved extremely unfavourable, a violent thunderstorm greatly impeding the move-ments of the troops. A detacliment attacked and took possession of the town of Kinchow. On the 26th at 4.30 a.m. artillery fire should have commenced from our side but it became necessary to wait until 5.30 owing to a heavy fog. Our whole park then opened against Nanshan, under the command of Major-General Uchiyama. At 6 a.m. one of our squadrons appeared in Kinchow Bay and added its fire to that of our park. The of the Hoshantou fort, opened fire on the until 2 p.m. An attempt was also made to land a force from 4 or 5 transports in the had very steep approaches and was fortified almost in a permanent manner. were about 70 pieces in position supplemented by 8 machine-guns, and round these several lines of entrenchments had been erected with shelter trenches affording complete cover for rifle-men. In front of these again were these of times and parped wire entanglements, the intervals between these obstacles being occupied by numerous machine guns. Our artillery exerted its whole strength to demolish these obstacles. Our guns changed their position several

and it therefore became necessary, in spite of the prospect of heavy losses, to push forward by way of preliminary to charging, the artillery meanwhile using all its remaining ammunition for the purposes of a final and vehement cannonade. Our First Dip.m. the Squadron ceased firing and returned the guns in the forts together with their vision rushed forward with extraordinary bravery, but the men dropped in their tracks under a hail of bullets and shells from overhead and from the flank and the advance was irresistibly checked. Happily at this moment our Squadron in Kinchow Bay poured a heavy fire upon the enemy's left, thus strongly re-inforcing the cannonade of our Fourth Division of Artillery. The Fourth Division took immediate advantage of this opportunity to advance vigorously and reached the heights. Thereupon the First. and Third Divisions renewed their rush along the whole line, and springing over heaps of corpses came so close to the enemy's entrenchments that bayonets were crossed, and the enemy being driven from his position it fell into our hands at a little after 7 p.m. The enemy fled in disorder towards Port Arthur. He exploded the magazine at Tafangshin station while retreating. part of our force went in pursuit and the remainder bivouacked on the field of battle. The men's spirit was splendid and shouts of "banzai" rent the air. The artillery fired hotly on the fleeing Russians. The enemy opposed to us had been about a Division of the Field Army, two batteries of field artillery, and a force of garrison artillery and marines. It would appear that the enemy did everything in his power to check us at Nanshan so as to cover Dalny and Port Arthur. There were evidences that he had contemplated additional works of defence. His casualties are uncertain, but he left at least 500 dead upon the field. We took some prisoners, officers We also captured about 68 canand men. non and 10 machine-guns, as well as an electric-battery, three search-lights, and a dynamo, together with 50 mines. There was further a quantity of rifles, ammunition and other matters. Our casualties were about 3,500. We have to thank the Navy profoundly for its valuable assistance.

> Any of our readers who have closely followed the course of the operations in the Kinchow distinct will probably have observed that the Tahoshang position has not hitherto been included in any official account of the fighting. We ourselves have been much perplexed by the omission, for without capturing Tahoshang-a mountain 2,210 feet high on the east of the railway immediately north of the Isthmus—the Isthmus itself could not have been attempted. But we learn now, incidentally, from the account of one of the wounded who have reached Hiroshima, that Tahoshang was captured on either the 16th or the 17th, and that the operation was very arduous and very sanguinary. The Japan-ese seem to have lost heavily. It will have been observed that the front of the Japanese, in their final advance against the Isthmus, extended from Sanlichwang on the west over the Shaukinshan and Shihkiashan eminences as far as Makiatun on the east. This last position could not have been includ-

be any strategical objection to Nanshan it is an incessant fire on the Japanese until eventingencies its defenders should have the clow Bay on the west and Talien Bay on the east. The Isthmus being only 2 on the east to appreciate the importance of the water approaches. Indeed there is much reason to conclude that but for the cooperation of a naval flotilla but for the direction of Kinchow Bay, the Japanese attack might not have succeeded without further heavy loss. What seems to have happened was that the First Division's repeated and most gallant attempts to force have happened was that the First Livision's did not show the same tacucal and strategirepeated and most gallant attempts to force cal ability displayed by the artillery. The
the position failed, and the failure appeared

He may Tuesday, May 31.

Some Tokyo journals speak as though the Russians made a strategical mistake in selecting Nanshan as their principal point of selecting Nanshan formidable obstacles an army was ever required to negotiate. An eminence crowned now stand, the next point of resistance can with a great park of artillery, surrounded by hith after line of shelter-trenches—trenches—which is some 15 miles south of Kinchow and which completely concealed the troops offers splendid facilities for defence, its only occupying them except so far as loopholes offered a mark for the fire of asholes offered and these again defended by it may now be assumed that the fate of Dalny sailants—, and these again defended by it may now be assumed that the fate of Dalny sailants—the entanglements and rows of is sealed, and if the Japanese can remove the mines; nothing stronger can well be consimines from Talien Bay sufficiently to allow ceived. One imagines that to launch troops of its use as a base, their subsequent operagainst such a position during broad daylight must be suicidal, and that night would Nanshan was much greater military feat that whatever protection darkness on this consists there can be no creater on proved that whatever protection darkness on this consists there can be no creaters on proved that whatever protection darkness on this occasion there can be no pretence on affords is more than counterbalanced by the the Russian side that the obstinate tenure of difficulty of effective cooperation and intel- the place was not contemplated. No mililigent direction. Besides, the darkness of tary man can doubt for a moment that the 50 years ago is not the darkness of to-day, resistance at Kiulien was intended to be nor is the darkness of South Africa the cardinal. Had the Japanese been badly nor is the darkness of South Africa the cardinal. Had the Japanese been badly darkness of Kinchow. The Russians had repulsed there, the immediate result would searchlights at Nanshan, and thus to have have been their confused retreat over the Ai attacked at night would have gained little and the Yalu under circumstances which, by in the operation.

The brigade that marched under Majorment. It was a magnificent fight. We offer the Japanese our highest tribute of admiration. That they would fight grandly and fruits of a successful defence at Kiulien, hold their against the best troops in the and he fully anticipated success. Still in the operation.

The brigade that marched under Majorment of the present of th

putation and was regarded as an officer of north-ward of Port Arthur, or have they shot Nanshan the preparations for resistance show

[Received on the afternoon of the 28th instant from General Oku.]

The enemy opposed to us on the 26th instant consisted of the Third, Fourth, Fifth, Twelfth, Thirteenth, Fourteenth and Sixteenth Regiments; a portion of the Kwan-tung Garrison Artillery; 5 companies of the Railway Guards and a section of marines. These various bodies camped at Nan-Sanshilipao on the night of the 26th, and from dawn on the 27th seem to have retreated to Port Arthur by train. There is no force of the enemy eastward of Tsienkeh-chingpau. In the Hwanshan fort there are neither men nor guns. On the 27th instant Major-General Nakamura's force occupied Liushutan, and took 4 guns with a quantity of ammunition as well as 5 covered railway waggons and 41 trucks.

Wednesday, June 1. It is explained that the fierce assault made by the First Division on the enemy's position at Nanshan after 5 o'clock on the evening of the 26th, was prompted largely by the necessity of relieving the enemy's pressure on the left wing, which pressure had then be-come almost intolerable owing to the fire from the sea, the strengthening of the Russian right, and the attempts made by the enemy to land a force from Talien Bay in the rear of the Japanese left. No effective way of changing the situation was available except to press home an attack from the centre, and for that reason, as well as because the time had come when the infantry must strike a final blow or the enterprise must be abandoned for the day, the First Division was thrown against the entrenchments, suffering terribly in the operation.

by-and-bye that these too were old guns taken from the Chinese

H.I.H. Prince Fushimi was in the battle, as commander of the First Division. induce him to seek a place of safety.

[Received on the afternoon of the 31st May from General Oku.]
According to the latest received reports there are over 100 warehouses and barracks intact at Dalny. The station and the telegraph office are also safe, and there are over 200 usable railway cars, passenger and goods. But all the minor railway bridges in the neighbourhood are broken. The large wharf has been wrecked and sunk, but there are some docks and wharves in good condition. Small steamers (or a steamer) are said to have been sunk at the entrance to the dock.

General Floug's version of the Kinchow battle is that the Russians had placed there only a few old guns and a small quantity of ammunition taken from the Chinese in the war of 1900, the object of the arrangement being merely to intimidate, not to seriously oppose. As to the positions southward of the Isthmus, General Floug alleges that without the command of the sea they are difficult to defend. He adds, however, that the fall of without the fullest confirmation. It will be Kinchow has nothing whatever to do with Port Arthur.

It would be difficult to render the Russians more contemptible than General Floug is rendering them. We begin to doubt whether he is a Russian at all. Nevertheless he is accredited to the world by Viceroy Alexieff, and his most unmanly subterfuges must therefore be taken as deliberate official expressions. It is a terrible necessity which drives the Russians to practise this miserable deception towards their own people at the cost of incurring the ridicule of the nations.

The gunboat which cannonaded the left wing of the Japanese army during its attack on Nanshan is stated to have been the Bobr, which passed the winter at Newchwang. She was recently chased into Talien by a Japanese cruiser, and it is now believed that she has committed suicide. Chefoo sends this news to the Kokumin Shimbun.

of officers in the battle of Kinchow amounted to 30, the highest in rank being a major. These officers' names are on the death roll. As yet no statement has been published of the deaths among the rank and file. They will probably aggregate some 800. Thus far the reports show that the loss

NEWSPAPER COMMENTS. The Vossiche Zweitung considers that the battle of Kinchow was one of the most terrible fights of modern times. It is truly marvellous that the Japanese troops should have set out from Liaoyang in a southerly have escaladed a position defended with direction. The idea is that they may be wire entanglements and other obstructions and garrisoned by men possessing all the But that seems to us very improbable. best modern weapons of war. The Japanese have clearly demonstrated their contempt for death, which is a special feature of their junction with the forces moving north from disposition. Such a position as the Russians the Newchwang and Tashikiao districts, with held must have seemed quite impregnable the ultimate object of seeking to check the from the point of view of European strate- Japanese advance beyong Haiching. Gengists. That the Japanese carried it, over-eral Kuropatkin's plans remain absolutely coming all obstables, is a clear proof that the inscrutable. Napoleon the Third. Once the Japanese have decided to carry out an object, no loss of life or material deters them. From every point of view there can not be any doubt [Received at the Imperial Naval Department, From that the Japanese will soon accomplish their Admiral Togo; dated 28th May.] said that with great difficulty could his staff that the Japanese will soon accomplish their first object in this war. It is their sacred duty to the prestige of their country to recover Port Arthur which they were formerly unavoidably compelled to give up.

The Nene Free Press of Vienna says that tactics. There is no possible excuse for her

The other leading papers of Austria-Hungary say that the origin of Russia's defeats is the inability of her military leaders. All the qualities in which her troops used to excel have now proved useless.

Thursday, June 2.
There are several statements all pointing to an unexpectedly low death roll at Nan-When the news came that there had been 3,500 casualties, people naturally con-cluded that there must have been fully 700 killed. But from 300 to 400 is the number now spoken of. The public will not be disposed to accept such a favourable estimate without the fullest confirmation. It will be ment on the 16th May when the Tahoshang position was captured, the casualties-146 in all-were said to include an extraordinary number of fatal wounds, which fact was attributed to the special knowledge the Russian had of all the ranges in the district where they were fighting. They must have had even better knowledge in the case of Nan-shan, and moreover they had what is above all essential to good markmanship, protection. It is probably true that the superior accuracy of Japanese rifle-fire in action is due to the coolness of the men: their aim is little disturbed by moral perturbation. the Russians at Nanshan were firing from shelter-trenches affording complete cover except at the loop-holes. If they did not hold straight then, they will never hold straight. Therefore one fails to see why the rate of mortality at Tahoshang should have so greatly exceeded the rate at Nanshan. It is stated that the losses were divided

some ground to be surprised at the delay in Promontory and to have erected one or two publishing accurate returns, but we presume new forts on the hill-side. that a good reason exists.

Friday, June 3. Tientsin states that 15,000 Russian troops intended to assist or to relieve Port Arthur. What is more likely is that these troopsif they have really set out-are to effect have a great effect upon the science of war. to send out numerous squadrons of Cossacks,

PORT ARTHUR AND DALNY.

On the 26th instant when the Sixth Squadron was watching Port Arthur, examination was made of a junk which had come out of the harbour. In her were found several letters from Russian officers. Among Russia has broken down in strategy and them was one which said that on the 21st instant certain Russian destroyers had been last defeat. It is plain that her army must blown up and sunk outside the harbour. In retreat and that it can not stand against the another letter it was stated in detail that on the night before the disaster to the Hatsuse a Russian torpedo squadron had gone out and laid mines at the place where the incident occurred.

> The Asahi Shimbun alleges that according to the latest calculations, the Russian troops defending Port Arthur consist of the 13th, 14th, 15th and 16th regiments of the Fourth Division of Rifles (about 7,000 men); also of the 25th, 26th, 27th and 28th Regiments of the Seventh Division (about 8,000 men); of a squadron of Zabaikal Cossacks (150 men); of 6 squadrons of Belfneschensky's cavalry (600 men); of 3 companies of the East Siberia Artillery (900 men); of 300 men of the Zabaikal Horse Artillery; of 1,000 men of the East Siberia Engineers; of the Kwantung Engineers, one company (300 men); and of a brigade garrison artillery with two torpedo-mine corps. This would represent a total force of about 22,000 men.

Tuesday, May 31. The Jiji Shimpo alleges that from information received in a certain quarter, the Russian force in Port Arthur is some fifty thousand and they have mounted guns even in boats on the river. In Talien Bay no less than 500 mines are placed.

Wednesday, June 1. [From Admiral Togo, dated the 30th May, 8.10 p.m.]

To-day at 1 a.m. four of our gunboats, 2 squadrons of destroyers and two squadrons of torpedo-boats, went to the entrance of Port Arthur, and passing through the enemy's fire, performed a reconnaissance in force. During this operation gunboat No. 3 was struck by a shell, which killed one man, wounded 3, and injured a gun. There were no other casualties. The enemy was seen to have mounted a search-light on Liautishan

Thursday, May 26. Chesoo says that the Russians have sold all their buildings at Dalny to a Chinaman named Chang, who is an agent of the Russo-Chinese Bank but a man of no sub-

Chefoo reports that on the 29th ultimo the Japanese took possession of Dalny. No Russians were found there. They had all retreated.

In connexion with this it is observed that the language of General Oku's last official report—or rather the language of such part of it as was published in Tokyo—suggested that Dalny had already been taken. The report said "subsequently it was found that so and so many barracks and warehouses were intact, &c." Unless the word "subsequently" referred to the previous capture of the place, its use in such a context seems inexplicable.

be necessary for him, we presume, to employ rode into Dalny on the 28th—if not on a park of heavy artillery, and the transport of such guns will require some time. If such guns will require some time. If the could be landed at Dalny, as was done they could be landed at Dalny, as was done to the war of 1894-5, matters would of the war of 1894-5, matters would of course be much facilitated, but Talien Bay 3 steamers, I dredger and some launches. It appears very being infested with mines, it appears very the railway, therefore, can not be used for in the war of 1894-5, matters would of course be much facilitated, but Talien Bay being infested with mines, it appears very doubtful whether it will serve for a base of doubtful whether it will serve for a base of operations during the present war. The operations during the present war. The Japanese have shown throughout this campaign that while they do not hesitate to paign that while they do not hesi paign that while they do not hesitate to sacrifice life or material when an imsacrifice life or material when an important object has to be attained, neither do they fail to utilize all the machines and implements of war that modern inventive genius has provided. At the Yalu General Kuroki waited patiently until he could deploy force of artillery much superior to that of the Russians, and we may expect that though General Oku will throw his columns at Port Arthur resolutely when the right moment comes, he will leave nothing undone to prepare the way for their effort. Port Arthur is encircled with forts on the land side. Beginning from the east, and omitting the batteries that point seaward, we count no less than 9 forts in which are mounted guns of various calibres, but mainly 6-inch quick-firers. The reduction of such a place will be a great military Besides, there remains the possibility of further resistance by the Russians on the route from Dalny to Port Arthur. problem. Two excellent positions offer for such resistance. One is at Shwantaikau, the other at Tuchingtsz. At each of these places the high-road passes through defiles where strong opposition may be organized by even a small force. Southward of Tuchingtsz, a small force. Southward of Indiana, again, there is a plain some 9 miles in length, which is fully commanded by the forts in rear of the fortress. It is scarcely forts in rear of the fortress. conceivable that General Stoessel will not take the fullest -advantage of all these opportunities. Therefore we regard as exopportunities. Ineretore we regard as ex-tremely apocryphal the information Reuter has been kind enough to convey, namely, that an assault will be delivered at Port Arthur within a fortnight from the battle of Kinchow: or, say, about the 9th or 10th of June. The last ten days of June seem to us believe that, so far at any rate as it concerns a much closer approximation.

Friday, June 3.

It is reported that when a Japanese torpedo squadron approached the "new landing on the 29th ultimo, a large conflagration was observed in Dalny. Great volumes of smoke were ascending, and it was conjectured that these appearances indicated destroying acts of the Russians preparatory to abandoning the place. The report refers to the 29th of May, and we know that a telegram from General Oku received at the Head Quarters in Tokyo on the 31st of May, spoke of 100 buildings barracks and store-houses—as being still intact. General Oku's statement may have heen intended to refer to the state of affairs following a conflagration. That, indeed, is the only hypothesis reconcilable with the the only hypothesis reconchable with the various rumours reaching Tokyo. What happened seems to have been that during the 26th of May—probably in the evening when the Nanshan position had been forced when the Nanshan position had been forced —, orders were conveyed to the officer com—, orders were conveyed to the officer com— enter Port Arthur—a perilous adventure. retire upon Port Arthur. All preparations for such an eventuality having been made previously, the match was applied and the current of electricity turned on, with the result that a big fire soon flared up, railway bridges were destroyed and railway tracks

K. Suzuki, (28) a farmer, in Owada-machi, near Chiba, was found murdered on the morning of May 31st, having been injured on the head of May 31st, having been injured on the leading for severely punished. This war will suffice to prove that no one can with impunity the house the previous night. The culprit is not flourish a sword in the face of Russia, solicitous as she is for peace."

fore the big fortress in five or six days wrecked. It may, perhaps, be assumed so far as distance is concerned. But it will that the cavalry van of the Japanese be necessary for him, we presume, to employ rode into Dalny on the 28th—if not on a park of heavy artillery, and the transport the evening of the arth—and found the creation been reduced to ruins?

Some Chinese who left Port Arthur on the 28th ultimo and reached Chefoo on the 1st instant, are represented as saying that in the former place 5 disabled men-of-war are laid up in the vicinity of the dock, and that their guns and crews have been landed. About 600 or 700 Russian artificers are employed in the docks, but they complain that they have not received any salary for 2 months. They are assisted by 300 Chinese. Materials for repairing vessels, and also coal for the furnaces are very deficient. As to the ships actually available for fighting purposes, they number about 20, inclusive of torpedo-craft. (We give this figure as it appears in the Asahi's report of the Chinamen's conversation, but inasmuch as there were recently 16 destroyers in Port Arthur, the estimate of remaining ships is obviously too small).
The stock of provisions would suffice for about 5 months. In the Chinese quarter there are some 2,000 residents, and the garrison numbers about ten thousand.

There is a rumour that the Russians have collected about a thousand junks in the Gulf of Pechili near Port Arthur, and that they believe that, so far at any rate as it concerns the combatants. There may be a plan to embark the non-combatants in Pigeon Bay and send them across to Newchwang, but nothing is less likely than that Stoessel thinks of surrendering or evacuating a place of

such importance.

It is noticeable that in the various estimates formed of the Port Arthur garrison, no mention is made of the sailors. Yet they form a most important element. Able or disabled, there are 6 line-of-battle ships in the port, and the crews of these number some 4,000 men. Then there are the men of the cruisers and the torpedo craft, aggregating some thousands more. These being be of no use on board their ships at the moment of the land assault, (unless, indeed, there is an idea of sending out the vessels to run the gauntlet of the Japanese squadron), might be landed for the purpose

FIERCE FIGHTING ON LIAOTUNG PENINSULA.

Saturday, May 28. A telegram from Moji says that out of 107 casualties on the Japanese side in the attack on Shaukinshan nearly two-thirds were killed. This great morality is attributed by the Japanese to the fact that the Russians had all the ranges determined before hand were able to open an effect. before-hand, and were able to open an effective fire on any point at a given moment. It is further said that a small body of specially skilled marksmen had been told off to shoot at the Japanese officers only. But Russians considered it necessary to work at to shoot at the Japanese omcers only. But Dainy. Immense sums had been spent in twe do not perceive how these explanations we do not perceive how these explanations suffice. The ratio of killed to wounded is suffice. The ratio of the weapon rather than of the a question of the weapon rather than of the marksmanship, and the Russian weapon has the provided to ruine? It will be observed that in the above reports a "new landing place" is spoken of Whether this is Kerr Bay or Talien Bay we have no information.

Some Chinese who left Port Arthur on the landing place who left bort at the control of the service of

to make a desperate fight at the Kinchow Isthmus. He is said to have exhorted his men to die rather than yield as they had only to hold out until a relieving army arrives. The position is naturally one of

immense strength.

BLOCKADE OF THE PENINSULA.

Admiral Togo has formally announced the blockade of the Liaotung Peninsula south of a line drawn from Pitsuwo to Pulantien. He announces that any vessel attempting to violate the blockade will be dealt with as an enemy. These limits comprise exactly the portion of the Peninsula leased to Russia. The following is the text of the announce-

ment:

I bereby declare, under command of His Imperial Japanese Majesty's Government, that on the 26th Japanese Majesty's Government, that on the 26th day of the 5th month of the 37th year of Meiji, the entire coast of that part of the Liau-tung Peninsula, Province of Shen-king, China, which lies south of a Province of Shen-king, China, which lies south of a Province of Shen-king, China, which lies south of a Province of Shen-king, China, which lies south of a Province of Shen-king, China, which lies south of a Province of Shen-king, China, which lies south of the in such and it is now, and will continue to be in such state of blockade; and that all forcible measures authorized by the Law of Nations and the respective authorized by the Law of Nations and the respective Treaties between the Empire of Japan and the different Neutral Powers, will be enforced on behalf of ferent Neutral Powers, will be enforced on behalf of His Imperial Japanese Majesty's Government against all vessels which may attempt to violate the blockade. Ship Mikasa, this 26th day of the 5th month of the 37th year of Meiji.

Togo Heihachiro.

Vice-Admiral Commander-in-Chief

Vice-Admiral Commander-in-Chief of Combined Fleet.

THE RUSSIAN GOVERNMENT'S NOTE.

The Port Arthur journal of May 5th, having published Russia's grandiloquent declaration that she will not listen to any intervention, comments in bombastic terms on this display of resolution. "It is pro-foundly gratifying to Russian subjects," says our contemporary, "but in the ears of Tokyo it must sound like a funeral knell. Japan's preconceived plan of appealing to her ally in the hour of calamity, an outlook which betrayed her into taking up arms, thus becomes a bubble in the water, and one can not but feel sorry for her. Readers of the Novy Krai will remember that when the diplomatic relations were broken off between Japan and Russia, it was declared that terms of peace would be dictated by a Russian General in Tokyo. The foe who treacherously attacked peace-

OPERATIONS IN MANCHURIA

Saturday, May 28. From Peking it is stated that General Tseng at Mukden offered to send his troops against the Hunghutze, but Viceroy Alexieff declined, saying that the Russian troops were sufficient for the purpose. Considering that quite recently Alexieff was said to be urging upon Tseng the necessity of undertaking this duty, it would now seem that the Viceroy has become inspired with some sudden distrust of the good faith of the Chinese troops

Peking further alleges that preparations are being made to retreat from Liaoyang in are being made to retreat from Liaoyang in and are transporting the rails and sleepers to case of need, and speaks of a bridge that the Russians are throwing over the Liu River in we have no doubt that these rails and connexion with that programme. But it is impossible to discover any relation between the two things, unless the Russians apprehend the cutting of their direct line of com-munications with Harbin, and are therefore contemplating a westward march. Little faith can be placed in any of these stories. The Russians are not going to give up Haicheng or Liaoyang or any other of their

positions until the impossibility of holding them is very clearly demonstrated.

We find in the Hochi Shimbun a statement which would bear out Viceroy Alexieff's report that a detachment of Japanese troops was recently repulsed in the vicinity of the mountain road from Fenghwang to Liao-yang. Our contemporary says that on the 15th instant a company of Japan-ese infantry and a troop of cavalry the 15th instant a company of Japan-ese infantry and a troop of cavalry were attacked by 1,500 Russian cavalry with defeat, lost about 4,000 in killed and wound-4 guns. The Japanese retreated slowly to Fenghwang, having ascertained the enemy's strength. A battalion was then sent out from Fenghwang, and the Hochi's correspondent opines either that the Russians have withdrawn or that they have been driven back. Our readers may remember that Viceroy Alexieff reported this affair to have occurred near the Saimuchu high-way (written on some maps "Samuzi"), and that as the place indicated in his report suggested a march by the Japanese via the Motienling pass, we ventured to question the accuracy of the report. But it would now appear that the small Japanese force engaged was merely a reconnaissance. Japanese had 22 slightly wounded in this brush. They do not know the Russian casualties but they think that there were a good number.

A telegram to the Nichi Nichi from Shanghai alleges that General Tseng, apprehensive lest the Russians should fire Mukden when they march out of it, is adopting precautions against such a contingency.

Tseng is surely a little previous.

The Chinese General is further said to have remonstrated with General Kuropat-kin against some of the bridge-building operations of the Russians, which are considered to be violations of Chinese neutrality. Does this refer to the bridge over the Liu River mentioned above? The river named

Shanghai alleges that a thousand Russians We had 3 killed and 22 wounded in Colonel stationed at a place transliterated into Yoshida's force. The enemy's casualties are 'Tosakashi' have surrendered owing to not yet known. The detachment that subwant of provisions. No map in our possession shows a "Tosakashi." Along the killed and 6 wounded. of the same characters becomes " Jurikashi." But why there should be a force of a thousand Russians anywhere in that neighbourhood; why they should be in a starving condition; and why there should be any Japanese troops in their immediate vicinity, we do not immediately see. It is possible, however, that the right wing of the Japanese from Pitsewo has moved northward along the railway, and that the service of trains has been entirely interrupted south of Tashikiao. It is also possible that this is an undiluted Shanghai canard.

Peking telegraphs that the Russians are breaking up the railway south of Tashikiao sleepers will be ultimately utilized in doubling the road between Harbin and Lake Baikal. If the Russians get time to accomplish that engineering feat, their strategical position will be materially changed.

Shanghai sends a story that a sanguinary engagement took place on the 22nd instant at Fanshuiling, which is a place north-east of Fenghwang on the route of an army marching towards Liaoyang and Mukden by the road through the vallies on the eastward of the hill high-way. Shan story is that the Russians, having Shanghai's falsely informed that the Japanese had retired to Fenghwang, sent a force of 15,000 men to obstruct any renewed advance from this direction, and that this force encountered ed, and had 1,000 prisoners takon. If such an engagement had taken place, it is scarcely imaginable that news would not have been published by the Head Quarter Staff in

· Wednesday, June 1. [Received on the forenoon of the 29th instant from General Kuroki.]

On the 27th instant at 6 p.m. we captured Second Lieutenant Labovski and seven men at Taikiapautsz near Kaulimun. This party had come on foot to reconnoitre. lieutenant-who belongs to the Guards and had arrived at Liaoyang from Russia on the 4th of May-says that several reconnoitering parties sent by the Russians to the rear of the Japanese army had been killed or taken prisoners and only a few of their number had returned. The dangerous operations were partly due to the command of the General but mostly to the desire of the officers and men to win distinction. To-day, a Japanese reconnaissance riding near Shantangkajisu on the Liaoyang road, was fired on by some foot soldiers and a trooper and and a horse were wounded. The enemy numbered about 20.

[Received on the 30th from General Kuroki.]

Colonel Yoshida's detachment, at 10 a.m. on the 28th instant, attacked some 2,000 of the enemy at Aiyangpienmun kiver mentioned above? The river named in connexion with Tseng's remonstrance is the Liao, which seems much more probable than the Liu, but we do not profess to understand either.

Monday, May 30.

Shanghai alleges that a thousand Russians stationed at a statio

Also an infantry reconnaissance encountered 5 Russian cavalry about a mile from Shatzukang on the Haiching road, and captured a trooper with his horse

Telegrams to the Asahi Shimbun indicate that the First Army is directing its lines of march along the valley of the Taitsu River; in other words, is heading north and west from Fenghwang towards Liaoyang, or pos-sibly towards Mukden. The army that disembarked at Takushan, on the other hand, is directing its march via Sungyuen towards Haicheng. These forces must soon come into action.

Friday, June 3.
London telegraphs to the fiji Shimpo that Japanese troops have taken possession of Motien-ling. This is the celebrated pass on the high road from Fenghwang to Liaoyang. There is, of course, a possibility that a force of Japanese cavalry belonging to the First Army may have seized the pass, but we doubt it. No evidence was forthcoming that General Kuroki's troops were moving by this difficult road. He seemed, on the contrary, to have chosen for line of advance the valley of the Taitsz river, which flows into the Liao near Liaoyang.

In this context we may mention that communications have now been completely established between Fenghwang and Takushan, where the last landing was effected.

London reports official statements made in St. Petersburg that much confusion exists at Liaoyang owing to scarcity of provisions and activity on the part of the Hunghutze. Orders have been issued for sending away-all the women and children.

Shanhaikwan sends word that a portion of the Japanese First Army has reached the north of Liaoyang and threatens the Russian left wing. How are we to reconcile that assertion with the news that Kuropatkin has despatched 15,000 men southward from Liaoyang for the relief of Port Arthur, or for some other occult purpose? If Liaoyang be threatened by Kuroki, Kuropatkin is not likely to be detaching large bodies for service elsewhere.

Each day the wonder grows as to what Kuropatkin is doing with his troops. If he has 270,000 men under his command, where are they?

THE YALU FIGHT.

Saturday, May 28. The Russians say that their force actually engaged in the battle of the Yalu consisted of 15 rifle battalions of 800 men each, 12,000 men in all, and 5 batteries of artillery with 80 guns, which would give some 1,200 men more. Besides these there were 3 battalions and two batteries at Antung, which did not, it is said, take part in the fighting. it would appear that the Kiulien position was held by from 13,000 to 14,000 infantry and artillery, and that there was a further force of from 2,500 to 3,000 at Antung. It is Antung is only 6 miles down stream from Kiulien, and if Zassulitch did not summon

The Russians further say that they were

Japanese. It is not unnatural that they should exaggerate the numbers of their victorious enemy, but this exaggeration is beyond all limits. General Kuroki can not have had anything like eighty thousand men at the Yalu. It is extremely doubtful whether his three Divisions mustered more than ten thousand each, of all arms. We should say that 15,000 Russians and 35,000 Japanese may be taken as a very close approximation to the forces actually engaged. What deserves to be noticed is that the Japanese deserves to be noticed is that the Japanese officers have shown no disposition to exaggerate the Russian number. They put it originally at from fifteen to twenty thousand of all arms, and they adhered to that esti-

mate throughout. Russian critics are saying that Zassulitch should have retired during the night of the 30th of April; retired before the Japanese delivered their attack. Why should he delivered their attack. Why should he have done anything of the kind? We must have done anything of the kind? We must assume that he had a tolerably accurate knowledge of the force the Japanese would put into their fighting line. His Cossacks must have kept him informed on that point at least. Suppose then that having some fifteen thousand men posted on a line of heights which could not be approached except by crossing such a formidable obstacle as the Ai river with the flat-lands on its banks, he saw himself threatened by an attack of thirty thousand or even forty thousand Japanese, and supplement this by thousand Japanese, and supplement this by crediting him with supreme contempt for the fighting qualities of his enemy, contempt which Russian officers, high and low alike, had been freely expressing from the time when the war broke out, is it conceivable that he should have retreated tamely? Is it not much more conceivable, if not actually certain, that he believed in the ability of his troops to inflict a crushing defeat upon in the neighbourhood of Wei-hai-wei. She the Japanese, that any Russian General in his position would have entertained the same belief and that Kuropatkin not only intended him to stay but looked to see very substantial results from his staying. It was with Zassulitch and Kashtalinsky just as it was with the captain of the Varyag and the captain of the Korietz. The naval men imagined that they were going out to force their way gloriously through the Japanese squadron, and the military men conceived that they were going to hurl the Japanese army back over the Yalu and strike a blow which would stagger the enemy. To tell which would stagger the enemy. To tell us that a Russian General in command of some fifteen thousand men was posted in a splendidly defensible position merely for the mounted infantry and a few troops of Cos-sacks would have been the proper force for such an inconclusive operation.

Wednesday, June 1. General Kuropatkin reports that his total casualties at the battle of the Yalu were 2,347 of all ranks, and that he left upon the field 1,080 as to whose fate he is uncertain. Now we know that the Japanese buried 1,363 Russians and took 613 prisoners, making a total of 1976. There remains a difference of only 371 between this total palm off such deceptions on the world.

the public would like to hear it.

It is well to place on record the fact that by the Russians only is an attempt made to pervert the present war into a religious con-The Russians marched to the attack in the Yalu battle with priests at their head holding up the cross to encourage them, and one of these priests was shot. Therefore it is by the Russians that the idea has been introduced of Cross against Crescent. They are the true Yellow Peril, as we have often They it is who in this twentieth century thrust their religion into the forefront of their fights and seek once more to awaken the terrible prejudices that plunged mediæval Europe in everlasting disgrace.

ERRANT MINES.

Saturday, May 28.

Shanghai says that the British Squadron is carefully refraining from going north owing to the danger of errant mines in the Gulf of Pechili and neighbouring. Gulf of Pechili and neighbouring waters When will that peril be removed, we wonder. Thus the master of the Fazzan reports that on the afternoon of the 24th instant he sighted, in latitude 28° 25' and longitude 121° 16', a large object tripped with end and having a red flag field. striped with red and having a red flag tied fifteen thousand as having been laid, but it to it. This he presumes was a torpedo-mine that had broken away from its moorings. It was right in the fair-way of vessels navigat-ing from Newchwang to Chefoo. The Independent also, a steamer chartered by the Osaka Shosen Kaisha, reports that on her recent voyage from North-China ports, she observed a number of mines floating continued her voyage to Japan, but the Nippon Yusen Kaisha has considered it expedient to suspend its North-China service.

Monday, May 30.

A telegram from the Nichi Nichi correspondent at Moji says that the Russians, employing Chinese junks for the purpose, have laid something like ten thousand mines in the seas adjacent to Liaotung. Already the field of mines is not so impassable as the the number observed and destroyed by the Japanese amounts to about a thousand. Probably these figures are exaggerations, but the fact emerges clearly that the maritime routes to north-China ports have been rendered absolutely insecure by the reckless planting of Russian mines. purpose of retreating so soon as the enemy we shall have international tribunals enact-had unmasked their strength, is to tell ing laws to avert such proceedings, but in us more than we can credit. A battalion of belligerent will respect these laws? The truth is that war becomes more and more incompatible with modern civilization. When the nations abandon the savage resort of fighting, these problems will ceases to perplex them.

Wednesday, June 1. The Chinese report that the Russians laid a quantity of mines in the neighbourhood of the Shoupingtao islands about the 23rd instant. Lest the inhabitants should observe the position in which the mines were placed, making a total of 1976. There remains a every one was driven into his house, and a difference of only 371 between this total and General Kuropatkin's, so it is to be door. The Shonpingtao islands are off the assumed, if the General reports truly, that his killed were largely in excess of his wounded. What extreme silliness it is to make the carried off the field only 371 and that his killed were largely in excess of his wounded. What extreme silliness it is to make the case of the sequent to a similar performance off the sequent to a similar performance off the palm off such deceptions on the world.

General Kuropatkin reports also the capture of Feng-hwang by the Japanese on Japanese gunboats and torpedo-craft, and have forwarded them to Mukden, apparently

the 6th May, or reports rather the retreat of the Russians from that place. But he offers was not effective as a means of preventing was not effective as a means of preventing the chind of explanation. If there was a strategical reason for evacuating Fenghwang, the public would like to hear it found by the Japanese that Russian destroy-ers were blown up by Japanese mines outside Port Arthur on the 21st, which was the day after Togo's operation. There is now no secret whatever that the principle by which the Russians are guided in laying mines is to use them as means of defence and offence in waters that are beyond the range of fort-artillery; that is to say, in waters over which, according to universally ac-knowledged principles of international law the Russians have no belligerent rights whatever. The old three-mile limit of territorial waters was fixed with reference to the utmost range of mediæval gnns, and ought therefore to be now extended in accordance with the increased power of modern artillery. But to deliberately lay mechanical mines outside the range of modern ballistic weapons, in other words, in waters where all commercial vessels are entitled to expect security of navigation, such procedure is savage warfare. No other term describes it, and the Russians will have to answer for it.

Friday, June 3.

It is stated that the Russians have placed an enormous number of mines in the neigh-bourhood of Port Arthur. Some speak of such stock of mines can have been at hand when the war broke out, and there can scarcely have been leisure to carry them by train. However, the main fact may be credited, namely, that every accessible place has been strewed with these engines of destanting and that the Province have been truction and that the Russians have been guided by no consideration save that of preserving Port Arthur until the arrival of the Baltic Squadron. On the other hand it is to be observed that Admiral Togo has been able to make a reconnaissance in force at the mouth of the harbour twice within the past 10 days, the latest occasion being the 30th of May. If gunboats and destroyers can approach the place for such purposes, it would seem that above account suggests.

NEWCHWANG.

Saturday, May 28.

There appears to be no doubt that the Russians have again occupied Newchwang. They evacuated it on receipt of the news that a Japanese force had taken Kaiping, but they sent back five thousand men so soon as this Kaiping movement was found to be unreal. The news is that they have wrecked the railway between Niukiatung and Tashikiao, but that one line has been preserved for the purposes of their own retreat.

Monday, May 30. It is stated that the Russians are now engaged repairing the railway between congaged repairing the railway between that the injury was done by Hunghutze, for although the Russians themselves were said to have broken up the road between Newchwang and Tashikiao, nothing has been applied to the control of th hitherto been heard of similar destruction eastward of the latter place.

The Russians are said to have purchased

for the purpose of mooring the bridge of boats they are said to be building over the Tsunghiantsz.

Shanghai says that the buildings in the Russian quarter of Newchwang are in process of being broken up, but no explanation of this singular proceeding is vouchsafed.

A Shanghai telegram alleges that the Japanese force which landed at Takushan has occupied Sungyuen and pushed its sconts as far as Tsungchi (?), which is only some 30 miles east of Newchwang. Sungyuen is 63 miles from Newchwang. If the main body be only at Sungyuen, its outposts would scarcely be over 30 miles in advance, but possibly Shanghai's indication may not be possing sharing. General Floug's latest report (dated at Mukden on the 27th) bears out this statement in a general sense. This accurate annalist says that the only change in the field of war is that the Japanese are advancing towards Sungyuen.

KOREA.

Saturday, May 28. The question of granting fishing facilities to Japanese subjects along the coasts of Pyong-an-do and Hwang-hai-do came up for discussion by the Korean Cabinet on the 25th inst. Opinions are said to have been divided, and the matter will be left for decision by the Emperor. These two provinces represent the district through which the Japanese First Army moved from Seoul to The concession in question has considerable relation to commissariat ar-allow their country to be devastated by a rangements.

But the resources available locally for such a purpose are very limit-Japanese force in Possiet Bay or Unkwi Bay. ed, and if the line of communications were severed at any point, one of two things must of war are becoming interesting, and as the

It is stated that the Japanese application epithet "barbarous" plainly applies. It is two north-western provinces of Korea has now received the approval of the Emperor

and will be at once promulgated.

The Korean Government has at length consented to pay to Mr. Asada compensation amounting to 18,000 yen for the destruction of his store in Chemulpo nearly a year ago.

Tuesday, May 31. The long awaited concession of fishing privileges on the coasts of the two northwestern provinces of Korea, was duly granted on the 28th instant.

The Russian raid in north-eastern Korea has reached Iwon, and the telegraph between Hamheung and Pukchhong is inter-

There was a battalion of Korean troops in Hamheung, but they have retired

Wednesday, June 1.
The Russian scouts are reported to have reached Pukchhong, whence all the inhabitants have fled. Although Pukchhong is nearly 100 miles from Wousan, the Japanese certifors in the latter place according to ese settlers in the latter place, especially the women, are much perturbed, and are expected to retire to Fusan immediately.

From Iwon, however, comes a report that the men of that region, to the number of 100, have banded together and attacked the Russians, killing or wounding 7 Cossacks and 7 horses. It is indeed incredible that the Koreans should be so lacking in spirit as to handful of Russian cavalry.

Monday, May 30.

The Russians appear to be developing succeeded by Chhin Sang-heung. This incident is ostensibly attributed to a dispute There is again trouble in Korean politics. The Russians appear to be developing formidable activity in north-eastern Korea. On the 24th inst. 800 with 12 guns reached Sougjin and are supposed by this time to have pushed on to Tauchlion, which is 36 miles further south. It is stated that these men form the van of a force of several thousands moving down the coast.

Shimpo thinks, however, that Cho himself, or his friends, have started the pro-Japanese story in order to win the support of Mr.

Soul A succeeded by incident is ostensibly attributed to a dispute about the appointment of local officials, but a report has been put about that Cho's trouble is due to his excessive earnestness in promoting Japanese interests. The Jiji of the birth-rate among the Chinese in the Colony certainly calls for remark, but there is something more to be said on the subject

at 5 p.m. on the 24th to meet and welcome a reconnoitering force of Russians approaching from the north and having 7 guns with them.

Vet another telegram sent from Wonsan to Fusan Thursday, June 2. and Seoul. The Russian van has reached ht is further stated that the inhabitants of days have passed some decisive mea-akchhong, which is the third village south-sures will be taken to deal with this raid. affair has an aspect of almost reckless rashness, the Russian communications being exposed to attack from the sea throughout of war are becoming interesting, and as the speedily follow, either the invaders must perish available maps are difficult to follow, we publish this morning a sketch map showing the principal places in north-east Korea from Possiet Bay to Wonsan.

in Korea should be robbed of all their belongings to support a body of Russian troops which engage in campaigns without any properly organized commissariat. fundamental principle of civilized warfarc—
if any war can be called civilized—is that private property should be respected by the belligerents, but Russia seems to regard all private property as duly seizable for the prosecution of her operations.

The Russian outposts were pushed as far as Hamheung on the 30th of May. They are said to be busily collecting provisions for the main body, which has probably followed by this time. The telegraph between Wonsan and Hamheung has been interrupted. Evidently this raid is assuming dimensions too considerable to be neglected. We are prepared to learn at any moment that some strong counter-move has been made by the Japanese.

The Japanese Minister in Seoul is said to have submitted a strong representation to the Korean Government on the subject of telegraph cutting between Seoul and Fusan. He has ascertained that this is the work of Korean subjects, and he asks that the perpetrators be punished in the severest manner, if apprehended apprehended.

The long standing question about compensation for outrages against Christian (Roman Catholic) life and property in Quel-part, has at length been settled by the payment of a sum of 6,300 yen. This money has been handed over by the Governor of the island, Mr. Hong Chhong-u, who has

than what one is accustomed to find in the Registrar-General's annual report. "The number of the Chinese births registered," the Registrar-General says, "does not give an accurate record of the total number of births on the 27th, says that the Russian force at Kilju is 700 strong; that of these 100 advanced to Songjin; that 29 proceeded to Kopsan.

It is further stated that the inhabitants of days have a speed some decisive many decisive many gistered births the number of infants of one gistered births the number of infants of one month old and under that die in the Colony, and as I suppose those children which survive the first month do eventually come on to the register the corrected birth-rate which the Registrar-General gives us may be taken as approximately correct. The rate here must certainly be far below that of any town on the mainland, and the explanation must surely be found in the great preponderance of males among our Chinese population, for it seems to be quite the thing for the wife to live at Canton and the husband in Hongkong. This state of things has been brought about by the increasing cost of living in Hongkong owing to the growing density of the population, and the necessity for sanitary measures

THE BASIS OF ENERGY AND LIFE.

Under the title "Alter und Tod," Dr. A. Buhler, of the Anatomical Institute of Zurich, Buhler, of the Anatomical Institute of Zurich, discusses the nature of life, and the cause of old age and death, in the Biologisches Centralblatt (Leipsic). The Review of Reviews, translating the article, says that the doctor asserts that the measure of the active energy of a living body is determined by its course. of a living body is determined by its power of changing matter from one form to another; and this change of condition, in the main, is a chemical process. Potential energy stored up through chemical combinations are formed, and this may be considered as the only source of the energy of an organism.
Through the activity of the cells composing the different systems of organs of the body, this energy is changed from potential to, some form of kinetic energy, such as heat, motion, etc., or in changed chemical form is again stored up as potential energy in the material composing the body. From a knowledge of the process of growing old in a single system of the organs of the body, or of a single system of cells, comes an explanation for the growing old of the whole A growing organism takes up more nourishment in comparison to its own weight than an adult, and the building up and tearing down of material is more rapid; but these processes of growth depend upon the innate nature of the organism, which fits it for the greater development of energy, and it is not the great amount of nourishment consumed that makes it grow. The dif-ference in the activities of old and young cells is not due to changes in chemical media external to them, but to changes in the cells themselves, which can only be brought about by the dying out of the vital processes; and the longer the exchange of material has lasted, the more energy the living protoplasm has taken up and transformed, the more it losse its recover to continue the process. loses its power to continue the process. For example, metallic potassim will unite most violently with a definite amount of water, freeing, as it unites, great energy of heat, light, and motion. Generation of these forms of energy ends when the chemical changes of energy ends when the chemical changes are they would have been told so, since they would thus have been saved much futile waiting and much needless expense. simulates chemical substances in the process of metabolism, forming loose chemical compounds which change and form other combinations, at the same time releasing the binations, at the same time releasing the charge used in the various manifestations of intention of sending them forward. The resignilation of new material and alternative evaluation in course. life. The assimilation of new material, and alternative explanation is much more the resultant transformation of the energy acquired in this way, can take place only so long as chemical differences exist between the living matter and its food material. If these differences are removed through the activities of life processes, if all the any degree of accuracy and are for the toward the equalization of these differences, and when this is effected, no more
assimilation is possible;
growth, motion,
heat, building up and
complex chemical bodies terminate, as well
as all the appearances by which life is are sensible of the value of the world's
manifested. Death is the processes of importance in the strongest terms and
filment of life. In life, the processes of importance in they have shown much skill in securing
chemical combination are not rapid, as in they have shown much skill in securing

Wednesday, June 1.

The Chinese Government is reported to
have held a council for the purpose of determining what course should be pursued with
regard to local officials in regions evacuated
by the Russians. It was decided that such
filment of life. In life, the processes of importance in the strongest terms and
filment of life. In life, the processes of importance in the strongest terms and
shown much skill in securing

and protoplasm do not produce a noticeable change in the appearance of the cell. As might be expected, the cells which have the shortest life are those whose protoplasm is most highly differentiated along certain lines,—that is, the red corpuscles of the blood. These cells can paither grown nor form new cells, and also lack. neither grow nor form new cells, and also lack the power to unite with anything except oxygen. The manifold forms of regeneration harmonize with the view that the continuance of life depends on the constant formation of new combinations by bodies in a state of unstable chemical equilibrium. Frequently, renewed or an entirely different kind of growth is brought about through the influence of new cell material capable of forming new chemical combinations. For example, a slip from a vine, when planted, will reach to the stimulus of its new environment by regenerating all the organs, such as roots, etc., which it lacks. Or, in the case of galls formed on plants, the insertion of an insect's egg in the stem or leaf or root of a plant will cause it to develop in a way entirely different from the usual growth of that part.

THE WAR CORRESPONDENTS.

Tientsin reports that the foreign correspondents with the Russian Army, not having been allowed to go to the front in the field, have returned in large part to Tientsin. This is decidedly a vexatious and unprofitable war for correspondents. Even among those that have been permitted to go forward with the Japanese First Army, there are some who complain that they are not treated with confidence and that the liberty accorded to them is quite insufficient for their purposes. Others appear to be tolerably content. Meanwhile the large band remaining idly in Tokyo murmur bitterly. They take the ground that if there was from the outset no intention They take the ground of allowing them to accompany the Second The assimilation of new material, and alternative explanation is much more the activities of life processes, if all the chemical affinities are satisfied, chemical rest, naturally inclined to consult their own equilibrium is established, no new construction of profess to understand the delay fully, and is death. The chemical transformation of profess to understand the delay fully, and matter plays an important rôle in the there occurs to us one very apposite reflecmatter plays an important rôle in the life of the whole body. Assimilation is possible only so long as there are chemical affinities to be satisfied, or, in other words, as affinities to be satisfied, or, in other words, as there are compensable electro-chemical differences between the living protoplasm and the non-living matter in the blood. The life-process, as such, works constantly toward the equalization of these differences, and when this is effected, no more

the union of metallic potassium with water, it diplomatically. But now they appear to the union of metallic potassium with water, it diplomatically. But now they appear to and changes brought about by the successive union and separation of new material indifference. They leave their work unand protoplasm do not produce a noticeable crowned through failure to recognise the appearance of the cell. As assistance the press can render. We can nothing of the palpable loss of alienating the good-will, if not of actually arousing the wrath, of a number of men possessing access to the ear of the public. That phase access to the ear of the public. That phase of the matter has been fully weighed, we or the matter has been runy weighed, we presume. But have the Japanese considered that they are deliberately hiding their candle in a bushel, and that by the time they get ready to set it on the hill-top, there will be upne to cooperate in the work? will be none to cooperate in the work?

CHINA.

Saturday, May 28.
The United States Consul, Mr. Davidson, who is now at Newchwang, is expected to proceed at once to Antung, there to take up his duties. The Japanese Authorities are said to have intimated that no objection offers. It will be remembered that when the Russians were on the Yalu, they declined to allow the new Consul to proceed to his Mr. Davidson's appearance at Antung will herald the materialization of the post. Yellow-Peril spectre.

Monday, May 30.

There is a rumour of a Mahommedan rising in the Sinkiang region; that is to say in the extreme north-west of China. The Chinese Government has been directing attention to this region of late, and has made several changes of local officials, doubtless in consequence of memorials addressed to the Throne pointing out that if the Russians were defeated by Japan in Manchuria, they would probably turn their attention towards aggressions from the direction of Ili. We learn also (Jiji Shimpo's correspondence) that M. Lessar is showing activity in a manner which may have roused China's alarm on account of the north-west. His Excellency is said to have informed Prince Ching that if the Peking Government grant to Russia a concession for building a line from Kiakta to Changkiakou, Newchwang will be restored, and that if certain lands be leased to Russia in Ili, she will surrender Manchuria alto-gether. The time seems so ill-suited for advancing such propositions that we greatly doubt the truth of the above stories.

Tuesday, May 31.
The Jiji Shimpo's Shanghai correspondent telegraphs that Wei Kwan-tou, Chang Chihtung and Sheng Isai have memorialized the Throne, urging that China should follow Korea's example by annulling all her treaties with Russia. Any patriotic or shrewd Chinaman may well be excused for entertaining such a view, yet the wisest thing the Chinese can do is to remain quiet. contemporary adds that this news requires

confirmation. General Tseng reports that the Hunghutze have wrecked the railway in the neighbourhood of Mukden. He also requests the Peking Court to issue a proclamation in the sense that as the Japanese army will soon be approaching Mukden, the people may pursue their avocations in peace.

Lord Justice Vaughan Williams responded to the toast (proposed by Lord Claude Hamilton) of "His Majesty's Judges" at the banquet of the Worshipful Company of Paviors, held at the Great Eastern Hotel, Loudon, on April 21. He said:—"I am told that in the Far East at the present moment there is nothing which the Japanese have so high a regard for and so fervent a desire to imitate as English administration of justice. This is illustrated by something which has happened in the course of the war. During the Napoleonic wars, when our ships were every now and then seizing prizes from the enemy, and when our enemies were every now and then seizing prizes from us, it was absolutely necessary for civilisation that some system for the seizure of prizes should be established. That system was established by English lawyers, headed by Lord Stowell. Is it not a marvellous thing that during this war the Japanese, having taken prizes, have already established a prize court, and the administration of justice there is just as true and just as firm as the administration of justice would be in an English court."

Commenting on this speech The Globe said:—"We hope that due importance will be attached by the English public to the remarkable eulogy of Japanese justice pro-nounced by Lord Justice Vaughan Williams. It is barely a hundred years since the system of prize courts was established even in this country, yet one of the foremost men upon the English Bench is able not only to congratulate the Japanese upon having a similar

permanently impaired.

Another telegram, however, says that the one idea of the Chinese Authorities is to place no manner of obstacle in the way of the Japanese, and that, as, far as possible, the latter will be left to come to an understanding with the local officials.

An english y Judge on Japanese Prize

boys and very young men have such "ways," conduct of judicial proceedings, and the result of the declares. Sometimes, alas! they stick by them through life. "What perversity is possession! Seriously, though, it does sometimes seem as if the citadel of self were shared by a sort of little, very inferior partner, who had no word in the graver transactions of life, but who made his disagreeable little voice heard every day in little things. Some delightful of source the demand for ourselve and bring it up to date is embodied in the present draft of 1004 Articles. Wether the Code of Civil Procedure and bring it up to date is embodied in the present draft of 1004 Articles. Wether the Code of the Government to improve the Code of in the present draft of 1004 Articles. Wether the Code of the Government to improve the Code of in the present draft of 1004 Articles. Wether the Code of in the present draft of 1004 Articles. Wether the code is a motor question, but, in view of the vital importance of an acquaintance with those legal rules and principles which direct the course of proceedings, and the result of the declares. Sometimes such "works is efforts of the Government to improve the Code of Civil Procedure and bring it up to date is a material improvement upon the present draft of 1004 Articles. Wether the Code of oil the present draft of 1004 Articles. Wether the civil Procedure and bring it up to date is embodied in the present draft of 1004 Articles. Wether the Civil Procedure and bring it up to date is embodied in the present draft of 1004 Articles. Wether the Civil Procedure and bring it up to date is embodied in the present draft of 1004 Articles. Wether the Civil Procedure and bring it up to date is embodi every day in little things. Some delightful natures manage to chuck him out of the window in that hour of depression when they perceive the departure of their very first youth, but not all. It is curious how much commoner perversity is in boys than in girls. Every woman knows, both by training and instinct, that part of her duty in life is to be agreeable, or at any rate that her happiness depends greatly upon her success in that undertaking. In a very attractive woman, firmly convinced of her powers, we see it now and then. We excuse it for the sake of her charm, and-

'All that's madly wild or oddly gay, We call it only pretty Fanny's way.

But for the most part it is not excused by the world, and, therefore, not indulged by the individual." In summing up his argument, the writer concludes that there can be no doubt that what we call "ways" are connected with what are, at any rate at first sight, faults of character; and yet the best beloved men and women have most of them.

Are people, then, loved for their faults, and the worse more loved than the better? That is an ethical question which, like so many other ethical questions, admits of no direct answer. Virtue and vice are sometimes arbitrary terms. All qualities vice are sometimes arbitrary terms. All qualities cannot be scheduled under two heads. There are some ill-balanced virtues which do not manage to hit off the happy mean between two vices, and which not only the outside world, but even those who possess them, often regard as faults.

So, on the whole, the Spectator leaves us at a point very much from where we started.

THE CODE OF CIVIL PROCEDURE.

We have received from Messrs. Kelly and Walsh, Ltd., a copy of the "Draft of the Pro-posed Code of Civil Procedure," translated

Of course the demand for such a work can scarcely be large and we fail to see where Messrs. Kelly and Walsh will reap their reward. The public to which it appeals must be very small: smaller nowadays than before we passed under Japanese jurisdiction, because with the dying down of the old, bitter feeling of antagonism has also faded away that meticulous scrutiny into Japanese laws that once prevailed so extensively among the residents in the former foreign Settlements. The average foreign resident of the present day is content to leave all these matters to his legal advisers, and to them therefore we recommend Mr. de Becker's book. The translator's reward will be found, we imagine, in having done the commendable service for his fellow men of undertaking such an uninviting task at the sacrifice of much time and labour. In conclusion we must compliment the publishers upon putting up the volume in such a neat and harmonious fashion, the type being excellent, the binding strong, serviceable, and in good taste.

THE PARISIAN SUNDAY GIRL

Every big city develops types of humanity particularly and peculiarly its own. But to Paris, we think, must be awarded the palm for the greatest variety in distinctive types, for the greatest variety in distinctive types, and for the infinitely greater charm and fascination which many of them exert over the foreign observer. What can be pleasanter than the following description of the "Paris Sunday Girl," which the correspondent of the Globe in the French capital sends

We have received from Messrs, Kelly and gratulate the Japanese upon having a similar system in thorough working order, but to declare that the administration of justice in these courts in Japan 'is just as true and just as firm as the administration of justice would be in any English court.' We wonder of how many other prize courts Lord Justice how many other prize courts Lord Justice how many other prize courts Lord Justice how many other prize courts Lord Justice how many other prize courts Lord Justice Kvaughan Williams could say the same thing!"

"ONLY PREITY FANNE'S WAY."

A recent number of the Spectator contains an article, written in a semi-whimiscial vein which is printed under the heading of "Ways." The writer begins by acknowledging that it is not easy to define exactly what is meant when one speaks of So-and-so's "way," for a "way" is something less findiamental than a characteristic, more significant than a habit. He then proceeds:

In summing up a character we must give some functional of the subject of "ways." In the summing up a character we must give some functional of the subject "en'ys."

In summing up a character we must give some functional of the subject "en'ys."

In summing up a character we must give some functional particles and the city of the subject is reasonable and the complete standard and the summing up a character we must give some functional particles and the complete standard and the summer of the subject is reasonable and the complete standard and the summing up a character we must give some functional particles and the summer of the subject is complete the summary of the subject is the conduct objected to is "only his ways." and in necesser presents his true character.

Turning to another aspect of his subject, the essaysis finds that at a fruitful cause of ("ways" which have no direct bearing upon character is pure perversity. Almost all conductive to the conduct objected to is "only his ways," and in necesser presents his true character.

Turning to another aspect of his s

mon vieux et apporte plutot deux bouteilles qu'une, is it to be feared that the whole party will shortly be is it to be feared that the whole party will shortly be in a state of hopeless intoxication. THE GRAND-DAUGHTER OF A KING.

The Sailor King of England, William IV., in the days when, as Duke of Clarence, he had little hope of succeeding to the Throne of England, married a charming actress, Mrs. Jordan, and by her had a numerous family. Of course the union was never recognised and so the time came when the Royal Duke had to put away his morganatic bride and ally himself to one in his own station in life, espousing the kindly lady who afterwards became Queen Adelaide. It is an old story and one almost forgotten by the present generation of men, but its memories are revived by the publication of a book by the Countess of Munster, King William's grand-daughter, who, at the venerable age of seventy-three has put her recollections into print. London literary critics accord the volume a hearty welcome. Says one of them :- "In reading 'My Memories' we seem to be listening in a twilit room to a gentle, reminiscent voice telling old stories, sad and gay, with the flickering flame of a log on the hearth lighting up a gentle time-graven face. The win-dows of the room look on an ancient plea-saunce where old lovers tread, lost roses bloom and wistful ghosts linger in the gloaming. The Countess of Munster gives us a book as rare as is the spirit of gracious, restful old age in which she writes. Her memory wanders far from the days when the child 'Mina' was the pet of King William IV. to the days when 'weak, sad and tired' "waiting to go Home—'for good and all,' as the children say." Very pleasant is it to read of the Countess's "affectionate and respectful testimony to the gracious and Christianlike love and tenderness ever offered to the poor actress's children by the Duchess of Clarence, afterwards Queen Adelaide, who to the day of her death, treated the numerous Fitz-Clarence family as table. They also printed many pleasant is able. They also printed many pleasant is books in an English edition of the "Tauchbooks in an English edition of the "English edition

many reminiscences to record, most of them exhibiting him in a favourable light. He could be rude, as many an anecdote still Longmans. could also be very sorry and apologise for his rudeness. The Countess remembers him well in connection with long stays at Brighton and at Windsor Castle. Of the youth of the and at Windsor Castle. Of the youth of the and at Queen Victoria she narrates several late Queen Victoria interesting stories, and the early Court of the Queen forms the subject of a separate chapter, in the course of which the Countess recounts the following incident at a ball:-" The Queen and the other Royalties had been in to supper, and the signal had been given for the return to the ball-room. The Queen, in a fit of absent-mindedness, as she turned from the supper-table, instead of taking up her fan, which had been lying by the side of her plate, took up a large fork! She went forward some steps into the ball-room before discovering her mistake, bowing and smiling as was her wont; but then the Prince Consort, discovering the awkward fact, took away the alarming weapon, substituting the less dangerous one (the fan) instead. a girl the Countess travelled a good deal and saw much of interest at foreign courts, and so we get glimpses of Dresden and Naples; of the Paris of Louis Philippe and the bourgeois homeliness of life in the Royal Family; later, in 1848, we renew acquaintance with the revolutionary mobs, the barricade in Faubourg St. Antoine and see passing in a one-horse flacre the fugitive King and Queen. The book also gossips about a sojourn at the Court of Hanover, and contains sketches of the old King Ernest August, stately and erect in his hussar uniform, and of the blind Crown Prince, later George V. In the "Miscellanea" which closes the volume are wise, womanly talks on "True Refinement" and "The Servant Question," and the story of "A Noble Life," told with sympathy for the brave worker and the erring children of her care. Altogether these Memories, though delightfully garrulous, yet wisely reticent, intimate and self-revealing, form a collection that the book-lover will like to read and possess.

PUBLISHERS IN DIFFICULTIES.

There are many residents in the Far East who will be sorry to learn that the big publishing firm of Sampson Low, Marston and Co. has gone into liquidation. For-tunately there is every probability that the firm will be able to pay all its creditors in It would take a long time to summarise the admirable work which has been done by this enterprising house during its existence the noble books of travel they have issued, beginning with the works of the late Sir H. M. Stanley. They have published the masterly volumes of Captain Mahan and the scholarly books of Professor J. K. Laughton, besides many a book on the Far East which occupies an honoured place on the bookshelf and library table. They also printed many pleasant books in an English edition of the "Tauch-

only a loving and gentle woman could."

NOTES ON CURRENT EVENTS.

A correspondent sends us the following quaint anecdote :-

The following anecdote may be of interest to your eaders. It illustrates something, though I am not

The following anecdote may be of interest to your readers. It illustrates something, though I am not quite sure what.

A lady living in the chief city of Satsuma had occasion to go to a lamp store to purchase a number of small chimneys. She asked for four, and passed out a twenty sen piece. The shop-keeper accepted the money and brought out four lamp chimneys but no change. It seemed to the lady that she had been getting chimneys cheaper t han that, and she asked if it were not so. The merchant replied, "No. The price is five sen apiece, or eighteen sen a half dozen." The lady quickly resended, "Very well, I'll take a half dozen," where upon the merchant, without demurring or evincing any surprise, went and got two more chimneys, and returned two sen change.

It would be interesting to know just what the merchant's view of this transaction was.

Perhaps something in your own experience will match it?

The Kanasana Many has a state of the st

The Kanasawa Maru has arrived at Moji with 92 Russian prisoners, of whom 89 are wounded, 30 of them severely. Among the wounded is Lieut. Wilhelm Honwari, already spoken of as the son of a Russian nobleman. He was shot through the stomach, but is said to be rapidly recovering. This second batch of prisoners brings up to 540 the number thus far carried to Japan.

The Saseho Prize Court has now dealt with all the cases brought before it. Its latest decisions have been the confiscations of the Mukden, Manchusia, Argun and Rossia, all fine steamers.

Viceroy Yuen is said to have issued orders that inasmuch as a Japanese subject named Sato has leagued himself with the bandits, he is to be arrested if found and sent to Tientsin.

Russia's announcement of free ports in the Amur region provokes a great deal of amusement in Japan. A Power which, in time of peace, imposes all sorts of restrictions upon trade, but which, when war breaks out and when it finds itself embarrassed for provisions, removes these restrictions and invites the nations of the world to pour contraband goods into its harbours, such a Power becomes a mere laughing stock.

It is justly asked in Tokyo when Kuropatkin is going to begin. Will he allow Port Arthur to fall unsuccoured? The answer is very simple, we think: Kuropatkin does not believe that Port Arthur will fall; does not believe in the competence of does not believe in the competence of the Japanese to reduce it. Possibly the accounts that will presently reach him of events at Nanshan may shake his confidence. If they do, it is rather too late for him to profit effectually by his conversion. But his present mood, we opine, is one of satisfac-tion. He sees a large Japanese force engaged in an enterprise which, according to

The returns of traffic earnings for the nine days ending April 30th, for the Canadian Pacific Railway show an increase of \$71,000 over the figures for the same period a year ago. The earnings for the month of April and for the ten months from July 1st last to April 30th, are as follows:

April 21 to 30 \$ 1,239,000 \$ 1,168,000 \$ 71,000 \$ Month of July 4,030,000 3,763,000 267,000 1,836,000 1,836,000

The fine new road from Miyanoshita to Hakone is now open to jinrikisha traffic neer-in-Chief of the Imperial Japanese Navy right through to the lake, and several foreign residents who have been over the track speak highly of the work and the facilities has been specially translated into English it offers. The other day 20 jimikisha left for Engineering, says that to discuss the history of the development of marine reach Hakone-machi in one hour and 50 engineering would involve many important minutes—an incredibly quick run: a record matters, and require too much time. His in fact, and one we imagine that will never again be attained. The official opening of the road by Governor Sufu will take place and in a table following we are shown how on the 1st of June. The cost of the new the gross i.h.p. of that Navy increased in road falls heavily on the few tax-paying residents of the District, for we understand that Miyanoshita declined to contribute to the fund and the contributions from the Imperial Household Department and Kanagawa Ken were smaller than expected.

There can be little doubt that the road will

Otowa launched in 1903; while the piston prove highly advantageous to the district.

Lt. General Oshima Yoshimasa, and the Maxim at Barrow the pressure of steam was Fourth under Lt. General Ogawa Mataji. 325lb. per square inch. It may be gathered Lieut-General Oshima, as a Major-General, from the figures quoted that although Japan directed the attack upon the Chinese at may have been somewhat behind the times Yashan in 1894 and subsequently the attack in engine and boiler design in 1892 she is upon Pyongyang. He is reputed to be a man well abreast of them in 1904. It was in Ogawa, on the contrary, has a reputation for in Great Britain the water-tube boiler which extraordinary skill in conceiving and carry- bears his name. ing out flank attacks and turning movements. of a couple of these boilers the reader is He has added to his fame on this occasion by enabled to note the simplicity of design and marching his Division through the sea the apparent readiness with which the tubes against the left wing of the Nanshan can be removed and replaced

ittle more than half the number of pure bloods a half a century ago. The causes that are bringing about this state of affairs are described by Mr. Lucien C. Warner in the Outlook. Mr. Warner says: "The general health of the natives, especially of the full-health of the natives, especially of the full-blooded Hawaiians, is far from satisfactory. They usually have small families, many of the children die in infancy, and among the adults consumption and other diseases indicating low vitality are prevalent. Their total number has been reduced from 70,000 in 1853 to less than 30,000 in 1900. The health and vigour of those of mixed Hawaiian blood is much superior to that of the pure Hawaiians. There are two leading types of these mixed races, the Caucasian was Chargé d'affaires in Constantinople he secured from purpose of these mixed races, the Caucasian centered and an indifferent one of Mrs. Griscom. Appended is the following paragraph:—

The United States Minister—It is well for our constituency at home to know the men who represent our Republic here. Last spring, a few days before constituency at home to know the men who represent our Republic here. Last spring, a few days before loss that sudden death, our beloved Minister Buck gave and a dout sixty-five pictures in black and white.

The United States Minister—It is well for our constituency at home to know the men who represent such gave and a few days before loss that the children die in infancy, and among the adults consumption and other diseases indicating low vitality are prevalent. Their from the Eastern part of the States, and he's all right." We have a man from the Eastern part of the States, and he's all right. The steamer Tweeddale left Hongkong for Durban on May 25th with 1,055 coolies, the first batch for the South African mines. The following representative, and a mindifferent one of Mrs.

The United States Minister—It is well for our days and and sympathetic with missionaries and their work as he was. To which he replied, "If you get a man from the

good and ready I will come down upon those pigmies with giant force and will roll them all into the sea. The division of their forces will then prove no small source of disaster to them." Unless Kuropatkin entertains that faith and intention, his attitude is inexplicable. And it will be for the Japanese to undeceive him. They have already done much towards that end already. The next great step is to force Kuropatkin either to fight before he is fully prepared or among the part Hawaiians is shown by the statistics of school attendance, which in 1902 showed 4,903 full-blooded Hawaiian children to a total population of 29,787, and 2,869 part Hawaiian children to a population of 7,848. In other words, the proportion of children is twice as great among the part Hawaiians as among those of pure blood. These facts force upon us the conclusion that within two or three generations the Hawaiian problem will find its solution in the gradual absorption of the natives by stronger races.'

Engineer Rear-Admiral Miyabara, Engiin a very interesting paper read before the Japanese Society of Naval Architects, which has been specially translated into English purpose is to give outline descriptions of twelve years from 71,249 in 1892 to 662,062 in 1904; and how the boiler pressure has increased from 70lb. per square inch in the Takao, the first Japanese man-of-war to be speed of the former, which was only 333 feet per minute, has increased in the It may have been observed that now for the first time reports from the Second Army are signed by General Oku. In other words the Army is now finally organized. It consists of Three Divisions; the First under designs by Messrs. Vickers, Sons, and the General Okhima. Voshimasa, and the Maxim at Barrow the pressure of steam was From the drawings given

In 1900 the total number of Hawaiians of just issued, has a good portrait of His Exboth pure and mixed blood was 37,635, cellency the United States Representative, little more than half the number of pure and an indifferent one of Mrs. Griscom.

The Jiji Shimpo says that the Russian prisoners now at Matsuyama number in all 556, of whom 22 are officers. Our contemporary's correspondent says that the clothes of many of these men are in an indescribable state of filth, and that steps are being liastily taken to supply new garments. Some of the officers are to be sent soon to the neighbouring hot springs.

In the Novy Krai of the 10th of May General Stoessel publishes a notification which suggests that things are not going well with his command. The gist of the announcement is that the Russian civil officials are disposed to sacrifice their offices and save themselves prematurely, and the General promises that unless they show more firmness and courage, he will try them by court-martial. That is a significant warn-

TWO NEW BOOKS ON JAPAN.

The publishers' announcements appearing in English papers at the present time bear witness to the great interest being taken in all matters concerning Japan. Among other items we notice that Mr. Heinmann has in preparation a volume written entirely by Japanese authorities, which should be a compilation quite unique and representative in character. For instance, Baron Sannomiya, of the Imperial Household, will write on the Imperial Flousehold, will write on the Imperial family; Marquis Ito on the Constitution; Baron Kaneko Kentaro on Parliamentary life; Marquis Oyama, on the Army; Admiral Saito, on the Navy; Count Okuma on Education, and Miss Shimoda of the Pagraga' School Tolking Shimoda, of the Peereses' School, Tokyo, on Women's Education; M. Sakatani, Vice Minister of Finance, on Finance; M. Yama-moto, Governor of the Bank of Japan, on Banking; Baron Shibusawa, President of the United Chambers of Commerce, on Industries and Commerce, &c. There are besides chapters on mining, labour, marine enterchapters on mining, labour, marine enterprises, railways, post office, police, and the press. The volume is edited by Mr. Alfred Stead, and was to be ready in the course of May. Present-Day Japan' is the title of a book by Miss Augusta M. Campbell Davidson, published by Mr. T. Fisher Unwin on April 25. The materials for the work were gathered in the course, of a length. were gathered in the course of a lengthy visit to this country, during which the author associated chiefly with Japanese, and enjoyed

THE WAR-TAX QUESTION.

明拾昔至年马月青日第三種蘇頓楠間可

IT is most unfortunate that there can not be established among the Foreign Representatives in Japan and their nationals some relation such as would dispense with meetings like that held in Kobe on the 23rd instant. Failing a relation of better understanding the line of distinction between the foreign communities and the people of the country will never be obliterated. This meeting was essentially arelic of the old time. It adopted the following resolution:--

That the Committee of this Chamber be asked to address a letter to the Corps Diplomatique requesting a decision as to whether under the Treaties foreigners should be called upon to pay the increased taxation authorised by the Diet in April last.

How can the Hyogo and Osaka Chamber of Commerce address a letter to the Corps Diplomatique? Presumably the Committee will send the document to Baron d'ANE-THAN, in his capacity of Doyen of the But Baron d'ANETHAN has no competence to receive such a document. He will return it at once with an intimation that he is Belgian Minister and as such can attend to the affairs of Belgian subjects only. That, however, is a mere question of procedure. Incomparably more important is it to find the foreign residents collectively raising the question whether they are not entitled to occupy in Japan a privileged position as compared with the Japanese themselves; to form, in fact, a the Japanese themselves; to form, in lact, a community apart from the people of the community apart from the people of the country, enjoying the same facilities but not discharging the same fiscal obligations. It because problematical whether any problematical whether any the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, for the purpose of endowing the parish of Hollom, and that many also devote much time to musical and the musical and really seems problematical whether any of the gentlemen who, on the 23rd instant, voted for the above resolution, had given the matter serious thought. Try to imagine a German for example, who, while living in London and carrying on business. living in London and carrying on business there under the provisions of English law, should assert a claim of non-liability to the payment of taxation increases arising out of payment of taxation increases arising out of War between Great Britain and some other Power. Or try to imagine a Japanese merchant residing and engaged in trade in New York who should venture to assert for himself exemption from taxes to which dence by those who have children to educate and York who should venture to assert for himself exemption from taxes to which himself exemption from taxes to which American citizens in general are liable. Either conception is quite preposterous: the German in England and the Japanese in America would be regarded as little short of a lunatic did he assume such an attitude vis-à-vis the law of the land. Why should the age of seven are admitted, has a separate building and a separate playground. There are the case be different for a foreigner residing in Japan? Some may thoughtlessly answer, "because we in Japan have special treaty privileges." We have nothing of the kind. The provisions of the treaties are explicitly reciprocal in this matter. What is the practice in England or America, that also must be the practice in Japan; whatever privileges or immunities are enjoyed by Japanese subjects residing in America or England, the same immunities and privileges, neither more nor less, are guaranteed to American citizens and British subjects residing in Japan. It is merely idle

superfluity to argue whether such and such words in the conventions can be constituted. Boarders are received in the houses of certain in such and such a manner or may have such masters, and day-boys must reside with their masters, and day-boys must reside with their masters, and day-boys must reside with their parents or near relatives. Residence with distant and such a meaning read into them. The parents or near relatives or friends is not permitted. A similar relatives or friends is not permitted. practice of Western countries constitutes the lexicon by which the treaties are to be interpreted in this case. Did the members of the Hyogo and Osaka Chamber of Commerce pause to examine the matter by that obvious light? We greatly doubt it. And we doubt still more whether, upon mature reflection, they would be willing to subscribe such a monstrous proposition as that foreigners who come to this country at their own convenience and simply for the purpose of making profit for themselves by trade or industry, ought to be more favourably circumstanced in a fiscal sense than Japanese subjects; ought to be exempted from fiscal burdens which all Japanese have to bear. On what principle of justice can we claim to be a specially privileged class in we claim to be a specially privileged class in Japan? Are we here by right of conquest, or have we some heaven-conferred title to partial discrimination? The whole thing is partial discrimination? The whole thing is extremely giddy and thoughtless. The hyperstrip in their work. Proper preparation of extremely giddy and thoughtless. days are past for arrogating the prerogatives of an imperum in imperio, and we can not too soon abandon the differentiations of the fine old time.

BEDFORD: A CENTRE OF SECONDARY EDUCATION.

(SPECIALLY WRITTEN FOR THE "JAPAN MAIL.")

great majority being day-boys. Each class has superfluity to argue whether such and such words in the conventions can be construed Boarders are received in the houses of certain relatives or friends is not permitted. A significant rule applies to all the four Harper schools. rule applies to all the four rearper schools. The fees for tuition vary from £10.10s, to £16.16s, yearly, and for boarding they are about £70. If the sons of parents living abroad are left during vacations in the charge of the master, he generally sends them to some country place, farm house or seaside, where about 25s. a week is charged. Thus the whole cost of maintaining a boy throughout the year may be reckoned at an average of £100, plus whatever is required for clothes and pocket-money. It may be gathered from the above observations that Bedford Grammar School differs from most other large public schools in the great numerical preponderance of day-boys, in the lowness of its tuition fees, and in its freedom from ecclesiastical domination.

The High School is intended to give girls an The thusiastic in their work. Proper preparation of thusiastic in their work. Proper preparation of the system of lessons at home is ensured by the system of making a girl return to school for further study in the afternoon if her answering in the morning has been unsatisfactory. The regular school hours are, as in most girls' schools, only twenty a week, from nine till one daily, except on Saturday which is a holiday. Music is generally taken in the afternoon. The reasons for the shortness of girls' hours compared with boys—the boys have about 30 hours a week—are that girls generally have to spend time in needlework at home, and that many also devote much time to music. advantage compared with Board School girls, and when they become mistresses of households they will be unfit to direct their servants if they have not remedied at special schools or at home the deficiencies of their high school training. For bodily exercises the High School has a large playing field where hockey is played in winter and have tone and cricket in support to the school has a large of the school has a large playing field where to be school has a large playing field where to be school has a large playing the school has and lawn tennis and cricket in summer. It also and lawn tennis and cricket in summer. It also has a gymnasium, but a very poor one, quite unworthy of the school. Each pupil has for twenty minutes twice a week what is called gymnastics, but what is really chiefly Swedish drill. Gymnastic exercises, in the proper sense of the word, are not much practised. There is an organ in the large hall, and the girls have an orchestra, but I observed that the violin was the only instrument they played in it. Girls' schools differ from boys in not encouraging social intercourse. At the High encouraging social intercourse. At the High School, and at many other schools too, the girls are forbidden to walk with one another to or from school without express permission from parents and head-mistress. As the strict rules of discipline forbid speaking even in the cloak rooms

the slightest draught from the outer world. different it is with boys! They mix freely with each other, and quickly form friendships. A well-brought-up boy may be trusted himself not to choose vulgar fellows as his most intimate friends. Why may not girls be equally trusted?

But I have wandered from the description of the How

friends. Why may not girls be equally trusted? But I have wandered from my description of the High School, and must return. The girls exceed in number 500. The fees are from £9 to £12 yearly, music of course being extra. The post of head mistress is according to the Journal of Education, worth £1,200 a year, and is probably the most valuable of its kind in England. The fees for boarding, which is permitted only in the houses of certain mistresses, are from £60 to houses of certain mistresses, are from £60 to £70 a year.

The other two secondary schools are the Boys' Modern School and the Girls' Modern School. These are both situated more in the middle of the town, and their buildings, though not so new as those of the two schools described above, are modern and well equipped. They aim more at giving a commercial education, but many of the boys enter the army or other public service. The numbers of pupils are about 500 hoys and 2001 numbers of pupils are about 500 boys and 200 girls and the fees are respectively from £4 to £9, and £4. The endowment of the Modern Schools being equal to that of the Grammar and

London, an hour's journey, in a flat agricultural district. It is a well-built clean town, without slums, and very largely composed of streets of private middle-class residences built to accomposed the families of the description. modate the families who flock to Bedford for the sake of the schools. The building seems to have been overdone, for a house agents' list describes over 150 vacant unfurnished residences with rents from £20 to £100 and 50 furnished residences with proportionately higher rentals. Furnished apparaments are easily to be found, and a family appariments are easily to be found, and a family intending to settle in or make a trial of Bedford could not do better than reside in lodging slefore making a decision. The soil is rather clary, and damp, though the rainfall is not great. Those who are liable to catarrh or rheumatism or whole the climate may be pronounced the better clavewhere, but on the whole the climate may be pronounced healthy. The River Douting and for bathing. The Embankment gardens and promenade extend over a mile below the town and are tastefully laid out with breach services and flower beds. There are two large parks as well as smaller public gardens and play-grounds. There is a theatre, and concerts are frequent, but in so small atown it is not to be expected that there should be many first-rate performances, either dramatic or musical. In none of the churches is there good singing, and the case where the companies of the churches is the seed over to look out of the service of the school and the proportion of Miss Abersohl, a most capable lack of opportunity of hearing first-rate performances, either dramatic or musical. In none of the churches is there good singing, and the seed that there should be many first-rate performances, either dramatic or musical, in none of the churches is the ere good singing, and the seed that there should be many first-rate performances, either dramatic or musical, in none of the churches is the ere good singing, and the seed that there should be many first-rate performances, either dramatic or musical in the search of the churches of the church is the search of the church is the search of the church is the search of the church is successful lady (searche, Miss Abersohl, and the considerable antiquity the churches generally of considerable antiquity the church is successful and the constraints of the search of the proportion of this Abersohl, and the constraints of the proportion of the service of the school of the course of the proportion of the proportion of the proportion of the proportion of the pro intending to settle in or make a trial of Bedford

are excellent, being made smooth with steam

The river is suitable for boating for three miles above the town and for all its course below. above the town and for all its course below. For lawn tennis there are several public courts, and there is also a club for golf. Good fox-hunting is to be had with Oakley hounds. Whether from choice or necessity, many families live very economically, the lady of the house doing a good deal of housework herself, having no resident servant but receiving assistance from one sleeping at her own home or from charwomen or boys. One hears a good deal about the difficulty of One nears a good deal about the difficulty of getting servants, especially maids of all-work or "general" as they are now called. But Bedford is a place where living is cheap, and where small means and corresponding frugality will not cause means and corresponding frugality will not cause a gentlewoman or a gentleman to be looked down on. "I know of no place," said one of my friends, an officer invalided out of the army before he had earned an adequate pension, "I know of no place where a man with a small in-come can hold up his head better than in Bed-ford."

As regards the cost of schooling it must be remembered that at Bedford it is the tuition fee which is low, not the boarding-house fee. Schools being equal to that of the Grammar and High Schools, while the number of pupils is about one half, the Modern fees are consequently much lower. But there is no reason to believe that the education is inferior. The inclusive fees for board and tuition are £50 to £60 for boys, and £45 for girls.

In the same town as these highly endowed schools it is somewhat surprising to find several private schools flourishing. Of these, the largest are the Crescent House for girls, and the County School for boys. And now, turning from the schools to the town of Bedford itself—What sort of place is it to live in? It is a town of 45,000 inhabitants and is situated some fifty miles from London, an hour's journey, in a flat agricultural district. It is a well-built clean town without the sake of company from £12 to £16. For the sake of company from £12 to £16. For well-built on set see where in England. The tuition fees are: Rugby—£30, Elon—£30, 44, and at the same town as these highly endowed schools of the for in the same town as these highly endowed schools of flourishing. Of these, the largest are the Crescent House for girls, and the County School for boys. And now, turning from the schools of the Girls' Public Day School Company from £12 to £16. The fees in private proprietary schools vary extremely and are generally higher in boys' schools than in girls'. the sake of comparison I shall quote from Hamp

PATERFAMILIAS.

THE MODERN SCHOOL.

The ceremony of prize giving at this school took place at the Public Hall on Friday afternoon, the meeting being presided over by Mr. J. P. Mollison. There was a large attendance of parents and friends, and the proceedings evoked much enthusiasm. Mr. Mollison in opening the

the boys would always be forthcoming. Unfortunately Mr. Schurr was not able to make very satisfactory arrangements for the maintenance of his School during what was believed to be only a temporary absence, and when it finally became known that he would not return at all, the whole edifice collapsed like a pack of cards. Mr. Mitford has stepped into the breach thus created and if we may judge from what we see before us to-day, he has every prospect of establishing amongst us a permanently successful educational institution. His opening I know was not very encouraging, the School roll for the first year numbering I think only some 7 to 8 boys. In fact the prospects just then appeared very discouraging, so much so that I don't think I am wrong in saying that Mr. Mitford was on the point of accepting an apof prospects just then appeared very discouraging, so much so that I don't think I am wrong in saying that Mr. Mitford was on the point of accepting an appointment in Hongkong that would have relieved him from all anxiety, when he honoured me by asking my advice on the subject. Feeling that his departure would be a distinct loss to Yokohama, and by adding one more to our long list of failures here in scholastic endeavours, perhaps deter others, from making the attempt, I advised Mr. Mitford to remain, pointing out that undoubtedly there was a good field and a fine opportunity for the right man. Further that here he would be working to make a name for himself and a school of his own; could carry out his own views in regard to scholastic matters without let or hindrance, and that if he once gained the confidence of the community his success was assured. That was, I think, less than two years ago and beginning then with 7 or 8 boys the school now consists of thirty with every prospect of an increasing roll as time goes on. In anticipation of this, as we know, Mr. Mitford has found it necessary to obtain assistance in the person of a thoroughly qualified and competent master from England. Mr. Argent only arrived the other day and I am glad to have this opportunity of tendering him a word of welcome on behalf of the parents of the boys under his charge. To Mr. Mitford I offer my sincere congratulations on what he has accomplished so far, and I am sure I am only echoing the wishes of all present when I express the hope that complete success will be the result of his efforts. I will now ask Mr. Mitford to read his report for the current year.

Mr. Chairman, References of the exhault Park.

Mr. Mitford said :-

Mr. Mitford said:

Mr. Chairman, References of the school, Ladies and Gentlemen:—It is not without some diffidence that I submit to you this the first report of a newly established school, Such a report must inevitably partake of the nature of a looking forward rather than a looking back. But Mr. Chairman, I am glad to be able to say that either is a pleasant process. We take pleasure in looking back because our efforts have been blessed with some measure of success and I may venture to add that, inasmuch as we are not without our hopes and ambitions, we are looking into the sky of the future with anticipations no less fair. That is because, Ladies and Gentlemen, the history of the school may be briefly summed up in the simple but pregnant words of the great American poet—"Something attempted, something done."

accompanying you on the platform, as well as from the parents of those first alumni. That support the bridged over for us pleasantly the interval of waiting. It was about this time that the fate of the school it was about this time that the fate of the school it was about this time that the fate of the school an offer which I received of an educational appointment under the Government of Hongkong. In view of this it was felt by those interested in the school of this it was felt by those interested in the school of this it was felt by those interested in the school of this it was felt by those interested in the school of this it was felt by those interested in the school of this to wait follows therefrom was urgently required, support that follows therefrom was urgently required. That demonstration, I am happy to say, was forthforward to the condition of the course of the succeeding term, the school was joined by no fewer than twenty-three new pupils.

Before that date, efforts had been made to secure qualified assistance. This is a matter involving considerable time and trouble, in view of the distance at which the appointment had to be made, and the slowness of communication. Further delay was caused by the regrettable outbreak of the present war, creating in Fngland at least a feeling of insecurity with regard to the conditions of life out here. All difficulties have however been surmounthere. All difficulties have however been surmounthere. All difficulties have however been surmounthere. Forest Hill, London. Short as has been the time during whice we have been working together I have no besitation in saying that the school has in Mr. Argent a capable and energetic master and myself a valuable colleague and collaborator.

Valuable assistance has also been rendered to the school for some time past by Miss Allison, who has taken almost entire charge of the Preparatory Form. So much did she endear herself to her juvenile charges, that I am told one wept when the time came for her place to be taken by our new ma

THE LATE MR. EVERS.

By the death of Mr. E. A. Evers, at the age of sixty-five another link with the early days of foreign residence in Japan is snapped Coming first to Nagasaki in 1862, he took up his residence later in Osaka when that port was first opened, being then Prussian Consular agent. He was an eyewitness of one of the decisive battles of the Restoration, when Keiki, the last Shogun, was defeated at Fushimi. Mr. Evers took an active part in the public life of both Kobe and Yokohama during his long residence in Japan and his death is universally deplored, for he was a man who won friends and kept them. The funeral takes place on Saturday.

The Yokohama Cricket and Athletic Club held

The Yokohama Cricket and Athletic Club held their annual sports on Saturday afternoon. Despite the threatening aspect of the weather there was a large attendance of spectators, and the grounds and Pavilion were gaily decorated with flags. The "Society" band played selections of music during the afternoon. The various events were generally well contested and the times, considering the heavy state of the ground, were good. Unfortunately before the sports concluded rain fell steadily, and most of the spectators sought the shelter of the Pavilion.

The 100 yards flat race for the "Silk" prize

The 100 yards flat race for the "Silk." opened the proceedings, and was run in three heats, Fairhurst, Lambert and Libeaud not comheats, Fairhurst, Lambert and Libeaud not com-peting. The first heat was won by Drummond, Correa being a very close second. Mason and Wheeler contested the second heat, the former winning by a small margin. Later in the after-noon the final heat was won by Mason in 10½ secs. (equalling the Club record made by E. Abbott in 1884). Drummond was a close second and Correa third.

The high jump is always an interesting event, and in this instance the final efforts of Drummond to beat the Club record of 5 ft. 676 in. were watched with keen interest. Foster fell out at 5 ft. and E. W. Kilby at 5 ft. 1 in. Graham

cleared 5 ft. 5 in., jumping in excellent style, and being conceded 2 inches by Drummond won the "Tea" prize.

There were six competitors in the quarter mile race for the "Ladies" prize—Wheeler, 10 yards; Mason and E. W. Kilby 13 yards; Fairhurst, 15 yards; Cooper and Correa, 20 yards. The latter went off at a pace that could not be kept up, and was overtaken at the top bend by Mason and Kilby, the former winning by about three yards from Kilby in the record time of E22 secs. The Club record was 524 sec. time of 52% secs. The Club record was 524sec.

Immediately after the race the prize, a hand-some silver bowl, was presented to the successful runner by Miss Amy Mendelson with a few grace-

runner by Miss Amy Menoeison with a lew graceful remarks, Mr. Mason suitably acknowledging and presenting the donor with a bouquet.

Messrs. Kingdon, Kuhn, Drummond, E. W. Kilby and Thorn competed for Mrs. J. Carey Hall's prize for putting the shot. The result was rather weak compared with the Club's record (36st. 8½in), Kuhn (who has just risen from a prizes closed a good afternoon's sport.

sick bed) winning with 29st. 1 in., Kingdon second.

S. H. Kuhn A. Kingdon....

In the 120 yds, hurdles (3 ft. 6 in.) race for the "Insurance" prize there were five competitors and another record was broken. In the first heat E. W. Kilby, B. C. Foster and W. Graham ran. Foster (15 yds. 2 hurdles removed) dropped out, the winner being Kilby with Graham second. J. F. Drummond (scratch) and W. E. Mason (8 yds. and 1 hurdle removed) simply trotted over the course in order to qualify. The final was won by the winners of the first heat in the same order and in the record time of 16 secs.

E. W. Kilby W. Graham....

There were seven "starters" for the "Doctor's" Cup (to be won twice before becoming the property of the winner). A good race resulted in a win for Correa, with E. W. Kilby second, the rewin for Correa, with E. W. Kilby second, the remaining competitors being Wheeler, M. Mendelson, Dannaher, Mason and Cooper. The prize was presented directly after the race by Mrs. W. M. Garton with a few appropriate remarks, and briefly acknowledged, the donor being presented with a bouquet by the recipient of the prize.

The half mile race for the prize recented by

The half mile race for the prize presented by Messrs. Arthur and Bond brought forth E. W. Kilby, (scatch) H. W. Kilby, (25 yds) T. W. Kilby (35 yds), Graham (35 yds) and J. E. Drummond (40 yds.). The latter ran in fine style and won by about ten yards, T. W. Kilby being second. Time, 2 m. 8 sec.

J. E. Drummond...... T. W. Kilby

There were five competitors in the long jump contest for the Broker's prize, viz., J. F. Drummond (Scratch), Mason (1 ft.), Wheeler (1 ft.), E. W. Kilby (2 ft. 3 ins.), and J. I. Graham (2 ft. 6 ins.). Drummond cleared 20 ft. 10½ ins., but was bester on the bandican by Graham with but was beaten on the handicap by Graham with a jump of 19 ft. 6 ins., Mason being second with

The rain marred the competition in throwing the cricket ball for the "Bankers" prize, making the ball slippery. The event was won by Dannaher with a throw of 100yds. 1st. 10ins. (including 20yds. handicap), T. Temme second.

H. Dannaher 1

(winner to beat the Club record to win the cur (within to be an outright) was contested by E. W. Kilby (scratch), H. W. Kilby (50 yds.), J. S. Graham (75 yds.), T. W. Kilby (100 yds.), and W. Graham (100 yds.). The first time round H. W. Kilby and J. S. Graham were running together, W. Graham being third and E. W. Kilby gradually coming up in the rear. The scratch man, however, could not overtake the leaders and the race was won in a final spurt by J. S. Graham, with H. W. Kilby second time, 4.55 %.

J. T. Graham H. W. Kilby T. W. Kilby

Fire couples competed in the three-legged race, the winners being W. B. Mason and H. Y. Irwine; S. Wheeler and J. M. Mollison second.

The sack sack caused considerable amusement and was won by H. Russell, with T. W. Kilby

The obstacle race, with which the sports con-cluded, evoked much merriment, the rain having made the truck soft with mud. In consequence, by the time the competitors got to the winning tape, having gone through the water jump twice, under netting and tarpauling, etc., they looked literally like "drowned rats." Mason came in first

WAR PICTURES.

The illustrations published by the picture papers in England are improving considerably in quality, though still some things appear that irritate people acquainted with the Far East. The Illustrated London News, among other matter of great merit, includes a sketch headed: "Taking the Mikado's Shilling" and showing a number of "new recruits following a sergeant to the rendezvous at Tokyo after the outbreak of the war." Japanese soldiers are not recruited, do not take any vous at Tokyo after the outbreak of the war." Japanese soldiers are not recruited, do not take any coin resembling the shilling, and if the scene here represented ever existed, the "recruits" were conscripts or reservists being conducted to the quarters assigned to them. A sketch on April 16th illustrative of the Japanese operations in Korea is of a highly imaginative kind, which is about its only claim to approval. The views of the Russian fleet emerging from Port Arthur in single line, ahead on Feb. 9th to repel the Japanese attack, and of the Retvisan and Cesarewitch, after being torpedoed, are exceedingly good. We must, however, resent the suggestion plainly conveyed by some pictures that have come under our notice, which pretend to be reproduced from "the first photopretend to be reproduced from "the first photo-graphs of a naval action." These, as could be graphs of a naval action." These, as could be easily ascertained, are not the first photographs of a naval action. A series of photographs of the battle off the Yalu during the China-Japan the information of enquirers. They

were taken from the Saikio Maru.

The Bystander continues to present periodically much interesting and valuable matter. We protest, however, against the introduction of a part of the Ginza in Tokyo as "The Main Street of Yokohama." There is a capital portrait of Admiral Makaroff and a whole supplement is devoted to the city of Bath and its attractions.

BASEBALL.

Dr. W. M. Garton, Captain of the Y. C. and A. C. Baseball Team, kindly sends us the following schedule of Baseball games so far arranged, together with some remarks interesting to players and spectators alike :--

June 4, Y.C.A.C. Ground......Tokyo High School.

" 11. Honmoku "U. S. Naval Hospital,
" 18. Y.C.A.C. "Keio University.
" 25. Honmoku "U. S. Naval Hospital,
" 10. Y.C.A.C. "Waseda University.
" 4. Y.C.A.C. "U. S. Naval Hospital,
" 9, Tokyo "Keio University.
" 16, Y.C.A.C. "U. S. Naval Hospital,
" 23, Open. " 39, do

Games are to be played later with the Nobles' School of Tokyo and the Commercial School of Yokohama.

Mr. W. S. Stone has been appointed the official unpire of the Club and Mr. E. Mendelson the official scorer.

A cup, given by the older baseball members, is to be played for during the season between the Y.C. & A.C. and the U.S. Naval Hospital teams—best three out of five games.

The Grand-stand for the ladies will be in its usual place, while no one but the players will be allowed on or around the players' bench; great annoyance was caused by this being tolerated last year.

A new supply of baseball goods has just been re-ceived, also New Rules of 1904 in which a number of changes have been made since last year.

The foul strike rule, pitching distance, infield fly, and forced run are the most important.

Players to be chosen from those who come down to the grounds and practice. Practice every evening at 5 p.m.

The U.S. Hospital baseball team opened their YOKOHAMA AND TOKYO FOREIGN RESI-DENTS ASSOCIATION FOR THE RELIEF OF SUFFERERS BY THE WAR.

The Executive Committee beg to acknowledge with thanks receipt of the following further

VACHITING.

The wind was light northerly when half a dozen ar raters started on Saturday afternoon for a race to the Hommoku Buoy and back. Winsome took the lead early and maintained it to the close, winning the first prize and two record points, while Valkyrien took second prize and one point. The times were:

	Finish.	Handicap.	Corrects.
	h,m.s.	m.	h.m.s.
Valkyrien	5.53.05	_	5.53.05
Sunbeam	6.10.03	_	6.10.03
Winsome	5.41.32	***	5.41.32
Beatrice	_	_	
Chocho	6.17.12	00.1	6.16.12
Pima		9.00	6.16.19

Thirteen "Larks" started but only five went round the course prescribed for them. The first prize went to No. 13, with two record points and the second to No. 10 with one point. The times the second to No. 10 with one point.

U.S. MEMORIAL DAY.

Memorial Day was celebrated in Yokohama on Monday, May 30th, by the holding of services in the buildings of the U.S. Naval Hospital, the gathering being presided over by His Excellency Lloyd C. Griscom, U.S. Minister in Tokyo. The ceremony was largely taken part in by ladies and was, as such events usually are, highly impressive. There was m very large supply of flowers, which added in no small sense to the interest of the gathering.
Shortly after 4 p.m. Mr. Griscom called the

Shortly after 4 p.m. Mr. Griscom called the meeting to order and the exercises were proceeded with. These were opened by the singing of the National Anthem, (the leading parts in which were taken by Mrs. McIvor, the Misses Mendelson, and Mrs. Jas Waiter) and afterwards, responses preceded the reading by Rev. H. Loomis of Psalm 19 and readings from Rev. 7: 9-17 and from Matthew 25: 34-40. Psalm 100 was then supposed in by then sung after which prayers were engaged in by Rev. E. S. Booth, The final hymn "Oh! wor-Rev. E. S. Booth. The final hymn "Oh! worship the King," amounced by Mr. Griscom, was surg under impressive conditions and at the close the benediction was pronounced by Rev. J. H. Ballagn. Afterward Mr. Griscom intimated that for the most part the flowers provided would be placed upon the graves of American soldiers and sailors in the Cemetery by men from the Hospital, but other flowers were at hand which it was hoped would be taken by those present and, in lots of three bunches, be used in decorating the graves in the Cemetery. The store of flowers was then distributed in accordance with the arrangements intimated by the Chairman. The weather was beautifully mild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the service concluded a beautifully wild and bright and from the Hospital grounds at the time the

J. McLean of the Consular-General Staff, Lieut.-Col. Wood, U. S. Military Attaché at Tokyo, Dr. Mattholius, of the German Naval Hospital,

Out of respect to the memory of the late Mrs. L. E. McChesney, whose sudden death has evoked wide-spread sympathy with her bereaved husband, the baseball match fixed for Memorial Day was abandoned.

NOTES AND COMMENTS ON WAR NEWS.

The following notes have appeared from time to time in the *Daily Graphic* over the initials "C.B." On April 14th the sinking of the *Petro-pavlosk* is discussed and much of what is said applies to the Hatsuse :-

"C.B." On April 14th the sinking of the Petropavlosk is discussed and much of what is said applies to the Hatsuse:—

The incidents leading to the sinking of the Petropavlosk were preceded by the usual routine movements. Looking back over my notes in the Daily Graphic of last month, I find the following reference to the tunes at Port Arther: "Such mines in tidal waters subjected to gales as well, are likely to be more dangerous to friend than to foe. In Port Arthur there is a rise of tide of from eight to twelve feet." Well, the event has happened, though it is conceivable the mine in question was one laid by the Japanese. I incline strongly to the view that it was one of the Russian mines. In any case there is once again the thought which I have reiterated in this column again and again, of how much better to take chances of a night action to damage the Japanese fleet than to be caught like rats in a trap at Port Arthur or impaled on their own mine defence. For that Togo would succeed in blocking the harbour of Port Arthur with sunken ships, I have never doubted, and I am confident that the past attempts would have succeeded, but for the fact that they were on too cheap a scale with old steamers of a date earlier than 1880. Now the complement of the lost battle-ship was 636 officers and men, and 600 have perished uselessly, and the morale of the squadron is probably at its lowest ebb since the war began. The Petropavlovsk, like her sister ships at Port Arthur, the Scuastopol and Pollaton, was in many respects an extraordinary ship. She represented in many respects the high-water mark of the craze for tramming in armaments without much regard to the other qualities required by a sea-going battleship. I have by me some of the Press comments of the period, pointing out how this marvellous ship could beat our more modern Majestic of over 4,000 tons greater tonnage. This was enforced on the reader by the usual elaborate comparisons of muzzle energy in foot tons. The light armour on the sides which would only serve t information on this head, and as to what internal explosions took place on board to wound so many men. The water-tight doors would naturally have been closed, as there had been a possibility of meeting the enemy, and Admiral Makaroff had probably every reason to distrust the mine field. The loss of the Victoria was due to the water-tight doors not being closed. The organisation required for closing these doors requires constant practice, for there are no fewer than 208 in a ship of the Majestic class. Curiously enough, Admiral Makaroff had probably made a closer study of the sub-division of ships into water-tight compartments, so as to prevent sinking made a closer study of the sub-division of ships into water-tight compartments, so as to prevent sinking by mines, than any living man. He advocated models of ships being supplied, so as accurately to give the compartments, and allow the officers to

guncotton in most of the mines did not exist, as I was informed was the case some time ago, it is very certain that it was in place in the mine that blew up the *Penissei*. In the former case the Russian officers would do as they did in a previous war, when they substituted an equivalent weight of sawdust for the powder they had sold. If, however, this precaution was omitted, the mines would have considerable buoyancy, and I can well understand the gale blowing them out to sea. In the Russo-Turkish War there was a story of a field battery which disappeared. The enemy never claimed to have captured it. When I heard the stories of peculation in the Far East I thought the best confirmation would be if losses were attributed by the Russian to "acts of God." I expected to hear of fire destroying food stores at Port Arthur, and so forth. Nearly 400 mines being blown out to sea is, however, rather beyond the courage of Russian invention, and suggestive of the inventive genius of an American skipper.

In nothing are we likely to learn so much from the Japanese as in the use of destroyers, Our present ideas are that destroyers must be re-coaled and have fresh crews every third day, that they require depôt ships to nurse them, and that they require depôt ships to nurse them, and that they must be towed as much as possible by day to give rest to the officers. Considering that destroyers have done the journey from Port Said to Colombo, or 3.550 miles, without stopping, and arrived with coal in their bunkers, and then gone on, after two or three days, we must allow that we under-estimate the possibilities of the craft. I expect the Japanese will teach us that the can increase the demands on destroyers. It is of great importance to us to arrive at some approximation to truth on this subject, for if we have to provide a division of eight destroyers for blockade each French torpeds station in the Mediterranean, as well as a reserve division, we shall absorb forty-eight destroyers for that station alone in war. It is a train of

war would have broken out at all.

Togo has been teaching the Japanese fleet his methods ever since October 21st, but Admiral Makaroff will never have the opportunity. He cannot teach manneuvres on a blackboard, and even the entrance and exit of warships to Port Arthur is done by pilots and tugs. This last is apparently a slow process, and Admiral Togo must now regret that he did not find an opportunity to strike with his torpedo craft again on the night of February 9th—the first attack was February 8th—for the Russian ships were not all taken into the inner harbour until February 5th.

The following note which appeared on February 22 is out of date in some respects, but it gives reasons for the failure of the Russian Fleet.

gives reasons for the failure of the Russian Fleet.

If there are no imperative orders to the contrary, I think the human factor will decide for this course. If the ships remain at Port Arthur, they will be caught like rats in a trap, without having been able to inflict any injury on the enemy. There is also likely to be a strong inclination to do something before the arrival of Admiral Makaroff, and most men of spirit would prefer to sell their lives dearly in a fight to the long-drawn siege on short commons, or to a repetition of the inglorious par played by the Russian Navy in the Crimean War. The chief reason is, however, the desperate feeling engendered by the knowledge of the naval officers that they have lost caste among the military. There can be no question as to the magnitude of the Russian Navy's failure, and to a proud nation there can be only one atonement. Whatever course the Russians take must be a choice of evils. It is better to do their best for Port Arthur by inflicting what damage they can on the enemy, and then sink with colours flying if they cannot regain Port Arthur, than to crouch insign die the harbour with the stinging disgrace that now clings to the Russian naval officers; so that I quest tion if they dare show their faces on shore.

Last Saturday I commented on the corruption and want of training of the Russian Navy, but there is

was a drunken freak, but the painful part of the business is that it was characteristic. Of all profes-sions, a navy least of all can tolerate drunkards. sions, a navy least of all can tolerate drunkards. The chief point, however, to bear in mind as affecting the present is that the Russian naval officers at Port Arthur have lost caste both in the eyes of their men and of the military. Admiral Makaroff is reported to have said: "They want men in Port Arthur, and I am going." They must surely be only too anxious to wipe out their disgrace, and, though demoralised, yet prove that they can face death.

death.

There is only one course for the Russians with regard to the large store of coal at Port Arthur, and that is to store all that is not required for present day purposes under sea water. Stored in sea water it will lose none of its qualities, for salt water does not injure coal, while there is no risk of it causing conflagration under a bombardment. A great deal of the town had much better be destroyed in advance, and storehouses and docks will require protection by sandbags. I hear at second hand from a Japanese military authority that Japan has accurate knowledge of the amount of corruption and peculation that has gone on at Port Arthur, and that the place is not provisioned to the extent it might have been under honest rule.

The blocking operations are criticized on March 28th as follows:—

The second attempt of the Japanese to block the entrance of Port Arthur is probably connected with the coming transport operations, for since the Russians are showing more initiative it becomes more sians are snowing more initiative it becomes more than ever necessary to prevent them from displaying that initiative. However much Admiral Togo might personally prefer a direct issue by a fleet action, he has ever to bear in mind that he has no possibility of reinforcement in this war, while the autumn will threaten him with the appearance on the scene of a formidable force from the Baltic. The Russians are employing skilled men from other countries as well as their own on the new battle. possibility of reinforcement in this war, while the autumn will threaten him with the appearance on the scene of a formidable force from the Baltic. The Russians are employing skilled men from other countries as well as their own on the new battleships, and throughout the night as well as the day work goes on unceasingly. The result is that I must now revise my estimate, and add the Orel to the Borndino, Imperator Alexander III., and Knius Swaroff as likely to be ready in the early autumn. If Admiral Togo could only seal Port Arthur, and the Japaneae troops capture it before September, he would have no difficulty in beating the Baltic reinforcements, while the Port Arthur fleet would be eventually added to Japan's naval strength. This double failure in the attempt. It is undoubtedly a more difficult operation than in the early days of the war, for the Russians are more watchful and have learned by experience. This time they met mobile force by mobile force, and they upset the whole operation through the destroyer Silni, very rightly making the leading steamer her objective, successfully firing a torpedo. I am inclined to attribute the Japanese failures in part to too great economy over the enterprise. The operation is essentially one to be performed rapidly, and therefore modern steamers of high speed should be used with an engine-room complement trained to the engines. If the Japanese can seal Port Arthur, any sort of craft will do for transport. Let them then try the experiment, even at this late hour, of using three of their finest mail steamers with a speed of 18 knots. One thing puzzles in Admiral Makaroff's telegram. Because the leading steamer was torpedoed and sheered off to starboard (to the right), why did the others follow? It is essentially an enterprise which must not be made to depend on one vessel, and it appears to have been the case that the second and third steamers were basing their movements on the first. According to the St. Petershurg account telegraphed from the East, there are over forty

With regard to the probable attack on Port was killed,

Arthur the following note appeared on March

A number of absurd paragraphs have appeared to A number of absurd paragraphs have appeared to the effect that the Emperor of Japan has ordered that Port Arthur is to be taken at all costs. This suggests visions of direct assault and hazarding the battleships against the fortifications. It is difficult the later that marking for the party of the control of the contro suggests visions of direct assault and hazarding the battleships against the fortifications. It is difficult to believe that anything so foolish is contemplated. Expectations of Port Arthur falling an easy victim—based on the want of preparation and the general corruption—are being indulged. Similar forecasts were formed about Sebastopol, which Sir Edward Hamley has told us, in his "Campaign of Sebastopol," was expected to fall "after shot cannonade." The siege lasted nearly a year. Port Arthur is very liberally defended, and there is no sure evidence that corruption has led to an insufficient supply of ammunition. The defences of Sebastopol were mainly created by Todleben in the presence of the besieging force; those of Port Arthur are already in existence. A certain faith is being pinned to the long-range fire of the fleet. I repeat that such long-range fire with cordite ammunition is disastrous to the life and accuracy of guns which may be required to meet a naval attack in September. If the Japanese had reserve 12in. guns and plenty of reserve ammunition they would be justified in using up these guns, but I do not believe they have reserve guns.

The following criticisms of the Japanese opera-tions appeared on March 9th:—

The reason so many criticisms of the war are proved by the events to be untrustworthy is that the critics do not possess the necessary detachment to enable them to see that the Japanese can make mistakes as well as the Russians, and that the disadvantages under which the Russians are fighting are not necessarily infinite. So when it was known that the Japanese had bombarded Vladivostock for nearly an hour the Russian accounts of the pracare not necessarily infinite. So when it was known that the Japanese had bombarded Vladivostock for nearly an hour the Russian accounts of the practical absence of all damage were rejected. One naval critic is thrown back on the somewhat futile statement that "the fear of the attacks was planted in the hearts of the defenders." I should think that the power of the Japanese fleet has distinctly lost ground through recent futile efforts to "do something." They have wasted ammunition, which does not matter if they have plenty sent out to them by merchant ships, but they have also used up some of the accuracy and the lives of their guns. There is no more dangerous feeling, and one which has to be more steruly repressed in war, than the desire to do something theatrical instead of the unore useful drudgery of culting off supplies by blockade work. Popular opinion is largely responsible for this attitude, and has infinitely greater respect for the winners of a victory than for a long-drawn blockade, involving a display of seamanship and tenacity as brilliant at that of Cornwallis. The greater, therefore, is the necessity for the critics to and tenacity as brilliant at that of Cornwallis. This greater, therefore, is the necessity for the critics to endeavour to inform public opinion, and to preach the doctrine that armed forces, which constitute the vital defence of the country, should be used for vital work where the probabilities of success are for vital work where the probabilites of success are good. As instances I would select the Chemulpo fight, the lorpedo attack at Port Arthur, and the long-range action with the Russian fleet at Port Arthur. In the case of the attempted blocking of the entrance to Port Arthur no vital forces whatever were hazarded, and therefore it was a very proper operation to engage upon. If guns which can range over six or seven miles were mounted upon specially strengthened marchant versus as a very proper operation to engage upon. upon specially strengthened merchant vessels, as I have again and again suggested, nothing vital would be risked in carrying out a bombardment of the dockyard of Vladivostock. There must be many guns with their aumunition in the fortifications of Japan which are now absolutely useless, and could, therefore, be used for such a purpose.

FIRES.

The Kurata kerosine oil refining factory, Niigata, was destroyed by fire on May 26th. The loss is estimated at over ten thousand yen.

On May 27th at 11.30 p.m., fire broke out at Miyako-machi, Shimo-hei, near Morioka, destroying about seven hundred buildings including the forestry office, the village office, etc. Some persons were injured. Details are not yet known.

A telegram from Otaru reports that fire broke out on the morning of May 29th in the district of Takashima, burning down about 130 buildings.

Fire broke out on May 30th at 5 a.m in the Buddhist temple, Amida-ji, Kita-Matsu-ura, near Nagasaki, burning down the building. A priest

THE CLUB HOTEL, LIMITED.

The annual meeting of the shareholders of the Club Hotel, Limited, was held on Monday, at the Club Hotel. Mr. H. C. Litchfield, presided and there were also present, Messrs. H. J. Neville, W. R. Bennett, Capt. A. Weston, and Mr. R. J. Ward.

The CHAIRMAN said he presumed from the absence of shareholders that the report of the directors was approved of. As to the declaring of a dividend there was a quorum and con-sequently he moved that the minutes of the last meeting be taken as read and that the dividend

be paid as stated.
This was duly seconded and the meeting then adjourned.

adjourned.

REPORT.

GENTLEMEN,—The Profit and Loss Account and. Statement of Assets and Liabilities for the year ended the 31st March, 1904, are now submitted to you. The Cross Receipts for the past year were year 100,551.38, including Rent and Transfer Fees. An interim Dividend of year 7 per share was paid to Shareholders in November last. The Directors recommend that the balance at credit of the Working Account be applied in writing down value of properties. The Directors are pleased to be able to report that the litigation against the Company at the instance of a former manager is finished; the final decision being in favour of the Company. Two members of the Board, Mr. LITCHFIELD and Mr. RYSSELD, retire by rotatation, but are eligible for re-election. re-election.

HENRY C. LICHFIELD, Chairman,

I have compared the above statement with the Books and Vouchers of the Company and find the same in accordance therewith.

J. Cox-Edwards, -Auditor, Yokohama, April 23rd, 1904.

AMERICAN TOPICS.

The Standard Oil steamship Hudson, from Philadelphia for the Far East, and the schooner T. Charleton Henry, from Baltimore for Boston, were in collision 80 miles off Cape Henlopen on May 2nd. The steamship had her bows stove, and Captain Bennett was compelled to jettison some cargo from the forehold between decks in order to raise the bow of the Hudson. The Henry was leaking badly.

That no further proceedings be taken is the recommendation of the Court of Inquiry appointed to investigate the explosion in the after turret of the U.S.S. Missouri on April 13th. The Court finds the explosion was due to a "flare back" coursed by control of the back," caused by an inexplicable combination of oxygen with certain usually latent gases in smokeless power. The officers and crew of the Missouri not only are relieved from all responsibility for the accident, but are warmly com-mended for the bravery they showed after its occurrence in rescuing the victims.

In recent speech at Philadelphia, President Eliot of Harvard University said:—"The public school system of our country is a very great success the greatest success in our land. It is a success, the greatest success in our land. failure only relatively to our attainable ideals. In recent years I have been making a test at Harvard of the value of our public schools in comparison with our endowed and private schools. Our students are drawn in about equal numbers from these three types of schools. I have found that the public school boys pass the best entrance examination, and they are the best at gradua-

President James J. Hill, of the Great Northern Railway, will supplement his many gifts to the Roman Catholic church by a donation of \$1,500,000, given jointly by himself and Mrs. Hill, toward the erection of the new \$3,000,000 cathedral, in which two of the wealthiest of St. Paul's parishes will join. The announcement was made public by members of the clergy in connection with further statements of the progress of the cathedral movement. The remaining \$1,500,000 tion with further statements of the progress of the cathedral movement. The remaining \$1,500,000 is already in sight and will be subscribed by wealthy citizens. The cathedral will be the most costly edifice in the West, and will crown a height on St. Anthony Hill, in the centre of the aristocratic residence district of St. Paul (Minn.) The cathedral is only a few hundred yards from President Hill's residence.

A prayer that President Roosevelt might be returned to the White House caused an unusual demonstration during the opening exercises of demonstration during the opening exercises of the twenty-second quadrennial conference of the African Methodist Episcopal church, held in Chicago on May and. Shouts of "Bless him, Oh, God," "Yes, yes," and "Amen" greeted the words of Bishop W. J. Gaines, of Georgia, when he invoked the blessing of God on the President of the United States, "who has had the manhood and courage to stand up and do his duty at all times to men of every colour and creed, in spite of bitter criticism." "If consistent with thy will, Oh. God, when his term of office expires," con-Oh, God, when his term of office expires, continued the speaker, "send him back to the White House to serve another four years." The utter-ance of this sentiment was the occasion of deafening shouts by the assembled delegates.

The request for Japanese silks has been large this season, says the New York Commercial. If merchants understood where the Japanese silks have gone and what the present supply is they would appreciate better the situation. The cutwould appreciate better the situation. The cut-ting-up trade has taken large quantities of these silks this year for silk waists. One American silks this year for silk waists. One American factory alone has already used 1,000 pieces for silk waists. Then there are other factories in addition that are needing the silks for cutting-up purposes. The demand has been early and heavy. When the counter trade begins, the situation will be better understood by merchants. If the war has been early and heavy with the counter trade begins, the situation will be better understood by merchants. If the war has been early and heavy with the stream and four companies.

The growth of a permanent criminal class, showing persistency in a course of crime, is made When the counter trade begins, the situation will be better understood by merchants. If the war continues six months, prices will be very much higher than they are now and there may be great difficulty in getting them. Both the natural and four tompanies.

It is interesting to note that the Varyag was called after the "Varyags," or Vikings, who in showing persistency in a course of crime, is made the eighth and ninth centuries came over to Russia in great numbers from Scandinavia and fourth annual report of the Board of Prison Infounded the Grand Duchies of Kieff and Novether founded the Grand Duchi

weather has not affected silk fancies, illustrating the great popularity of fancy silk this season.

An interesting decision involving the question of the duty of the captain of a ship to a wounded sailor was rendered by the Supreme Court of the United States in the case of Chesebrough et al. United States in the case of Chesebrough et al.
vs. Bridges. It appeared that on a voyage from
New York to San Francisco, while the ship
Iroquois was in a gale off Cape Horn, the appellee
fell from aloft and broke his leg. The fracture
was set by the captain and apparently knitted,
but on arrival at San Francisco the hospital surgeons found it necessary to amputate the leg because the bones had not been properly set because the bones had not been properly set. The sailor sued for damages on the ground that the ship should have gone back to the Falkland Islands, or else put in to Valparaiso for medical treatment. The Supreme Court affirmed a judgment for \$3,000 in favour of the sailor, holding that while the interests of the ship and her cargo ware aggingt the return to the Falkland Lelands. were against the return to the Falkland Islands, which would mean a delay of perhaps a month, the captain should, on the ground of humanity, have put into Valparaiso, where, with proper medical attendance, the leg might have been saved at the expense of a delay of but four days.

Some curious statistics bearing on the amounts of legislation and of oratory in Congress have been compiled by a clerk of the House of Representatives. The session just closed was the shortest first session in years. It lasted only 124 days, the next session in order of duration bears fiven days longer. During the having been fifteen days longer. During the session 16,170 bills were introduced, the greatest number since the Fifty-first Congress. The number of reports made. 2,945, was also the largest made, in the period covered. There does not, however, appear to be any constant relation between the number of bills introduced or of reports made and the amount of public legislation enacted. It seems, for example, that the Ffty-third Congress, whose committees made the smallest number of reports for the period, and which was not among the leaders as number since the Fifty-first Congress. period, and which was not among the leaders as regards the number of bills introduced, is credited with the largest number of public laws enacted, with the largest number of public laws enacted, building third place in this with the largest number of public laws enacted, the session just closed holding third place in this respect. The session, however, heads the list as regards the number of private laws enacted; the Fifty-third Congress, which enacted the greatest number of public laws, passed the smallest number of private ones. The amount of discussion had in the last mentioned ession was avidently not in the last-mentioned session was evidently not very large, for it does not figure among the leaders in that particular, and the session just closed ranks

According to a report recently issued by the Minister of Railways and Canals, the length of railways in the Dominion of Canada on June 30, 1903, was 19,836 miles. Of this, 12,077 miles were operated by steam and 759 by electricity. The latter includes street as well as suburban and general lines, which latter are growing with some rapidity, especially in Ontario. The capital regeneral lines, which latter are growing with some rapidity, especially in Ontario. The capital reported as being paid up on both classes of roads was \$1,193,647,222. The gross earnings amounted to \$103,298,404 and the working expenses to \$71,945,381, leaving net earnings of \$31,843,822. The number of passengers carried was 177,881,554, with 47,744,703 tons of freight. The steam railways number 167, including two lines owned by the Government. However, owing to tendency toward amalgamation, this classification may cy toward amalgamation, this classification may be classed rather as nominal than real, as the be classed rather as nominal than real, as the number of operating companies, in addition to the Government, is seventy-nine. The length of the roads (in Canada) controlled by the leading systems is as follows: Canadian Pacific, 7,439 miles; Grand Trunk, 3,154 miles; Canadian government, 1,255 miles; Canada Atlantic, 458 miles. More than the thirds of the railways of the country it

sylvania, just issued. Last year 436 prisoners were received at the penitentiary and of these seventy-six have served one or more terms there. seventy-six have served one or more terms there. There is one prisoner in the institution who is serving his ninth term there. Eight of his sentences were for larceny and one for counterfeiting. He was 18 years old at the time of his first conviction and 42 at his ninth. One convict is serving his seventh sentence for assault; five are there for the fifth time; three for the fourth and seventeen have been there three times fourth and seventeen have been there three times. On December 31st last there were 1031 prisoners in the penitentiary. Many of these, it is said, prove that crime is hereditary, and some of them have relatives in the same prison. Almost every crime in the calendar is represented among the convicts, who belong to almost every trade and profession. Of those now in prison 173 were born in Pennsylvania and seventy-three in Philadelphia. The other convicts come from twenty-three states and sixteen foreign countries. Russia leads the foreigners with fifteen. Italy comes next with the eleven, and England with ten, is third. Maryland and Virginia lead the states outside of Pennsylvania, with twenty-two each, mostly negroes. There is one Chinese in the prison.

NEWS OF THE WEEK.

Prince Arisugawa, who has been visiting Saseho and other places in the west, left Moji on May 31st for Tokyo.

The Nichi Nichi reports that Russian notes amounting to over twenty thousand yen were delivered on May 28th at Kobe having been brought from Korea.

The Yokohama Specie Bank received a telegram on May 31st from its branch in London to the effect that Japanese loan bonds have generally advanced. The quotations were: 4-per cent. £86.7.9; and new bonds, £90.1.9.

A meeting of the Yokohama section of the Omori Rifle Club was held at No. 23, Yokohama, on Friday evening. After some discussion Mr. J. C. Hartland was elected President of the okohama Section, a Committee consisting of Messrs. G. Gilbert, A. Scott, A. Baud and G. Weinberger being appointed, Mr. L. Mottu being elected Hon. Secretary.

At about a quarter to six o'clock on Friday morning a shock of earthquake was felt in Yokohama. It was very slight and proved premonitory to another shock of greater violence three minutes later. This was of a most pronounced character, but we have not heard of any damage being done. Shortly before eight o'clock there was a third shock, but this time in lighter degree of intensity.

Miss Kemmel, one of the party of Dr. McGee, whose departure from America was delayed on account of illness, arrived on May 28th at Yokohama by the steamer Tremont. Some lady nurses of the Red Cruss Society and Mrs. Taniguchi, wife of the secretary of the Kanagawa Prefectural Office, welcomed her on her arrival. Miss Kemmel puts up at the Grand Hotel, and will leave shortly for Tokyo.

L'Echo de Chine has a leading article by " X." in which the Russians are consoled for their defeats by being assured that they have all occurred through their undervaluing their enemy. This will now be remedied, and in his concluding paragraph "X." warns the Japanese what they have now to expect:—"The wounded white bear will rise un again more terrible then age. his fur will rise up again more terrible than ever, his fur bristling as he shakes off the few drops of blood which might stain his robe, and throws himself on his prey with little thought of pity as a slight irritation near his heart reminds him of the first bullet he received."

and the beginning of the present Russian Empire. Most of the old aristocracy of Russian Empire.

Most of the old aristocracy of Russia, prior to
the invasion of the Tartars, were of "Varyag,"
or Norse, origin. This can be seen by studying
the names on the old treaties between the Grand Dukes of Kieff and the Emperor of Byzantium. One of the Grand Dukes of Kieff married the daughter of the brave and unfortunate Harold, King of England.

With perhaps the single exception of the Hackenschmidt and Madrali encounter at Olympia in January, said a London paper of April 22nd, no match since the wrestling "boom" commenced has created so much public interest as that arranged between James Mellor, of Staly-bridge, the English light-weight champion, and Yukio Tani, the popular little Japanese wrestler, which took place at the Tivoli Music Hall before a crowded house. In the result Tani won the match by two falls to one, and with it the £200 stake money. There was a scene of excitement at the finish. Tani's friends rushed on the stage, clapped him on the back, shook his hands, almost embraced him.

MONTHLY SUMMARY OF THE RELIGIOUS

As is no doubt known to many of our readers the Shin Bukkyo (New Buddhism) is the organ of the Buddhist Protestants, a denomination which aims at presenting old Buddhist doctrines to the modern world in a form that shall suit the tastes of modern world in a rom that shall stift the disces of persons of ordinary education. There are many people who hold very strongly that neither Buddhism not Christianity can be altered to phase the palates of people of different ages. But history shows that the alteration has been going on personal the palates of the world of the world the world of the world the world or the world shows that the alteration has been going on per-petually in almost every country of the world and in every age. The extent to which Chiristianity has been altered in this country might well form the subject of a bulky volume, and the alteration is going on still and nobody can stop it. The new Buddhists have been sneered at as the new type of Christians are habitually sneered at by the orthodox school of Buddhist thinkers. But at the same time it is well worthy of note that at any big Buddhist gathering which may be held it is the men of the new school of Buddhist thought who succeed in making the deepest impression on their audiences and the large body of learned Buddhist laymen to be met with in every town of Japan are almost invariably found to be supporters of the reformed Buddhist faith. The creed of the new Buddhists is stated in 6 short articles which appear on the opening page of the Shin Bukkyō. They are as follows:—(x) of the Min Bukkyō. They are as follows:—(r) Our fundamental principle is steadfast faith in Buddhism. (2) We endeavour to reform society by stimulating and spreading religious faith and morality. (3) We maintain the principle of free religious investigation. (4) We aim at getting rid of superstition. (5) We do not recognise the importance of preserving the traditional Buddhist system nor its ceremonies. (6) We object to Government patronage of and interference with religion. In the May number of this magazine a religion. In the May number of this magazine a very well written article appears entitled: 1Vaga Kokumin no kompon-teki jikaku to wa nanso Kokumin no kompon-leki jikaku to wa nanso ya (What is our deepest national self-consciousness)? Nations, like individuals, says the Shin Bukkyō, certainly realize what they are and what part they aim at playing on the world's great stage. The self-consciousness of nations reveals itself in many ways; and the self-consciousness of one country often clashes with that of another country and leads to war. In record to the position we aim at occupying in regard to the position we aim at occupying in the Far East in politics, commerce and industry, our national self-consciousness has been taking very rapid strides within the past decade. So that we find ourselves to-day acting a part in the great drama of the world's politics. In the use we have made of the material part of Western

we come before the world with a deep-seated conviction that we are the emissaries of a high type of civilisation—of civilisation that has real religion and a superior moral code as its basis. It is only by our making sure that as individuals we have this higher mental consciousness that we can but does the foundary to the constitution of the consti consciousness that we can lay deep the founda-tions of true national greatness. The fate of nations is decided to a very large extent in this world of ours by the nature of their ideals. There everywhere a survival of the fittest. militarism will not serve the purpose of a reliable foundation for any State. After discussing the views of Count Tolstoi and dwelling on the effectiveness of such reforms as have been instituted by well-meaning Russian Emperors, the Shin Bukkyo proceeds to dwell on the function that religion will fill in the Far East when an entirely new situation shall have been created by the success of the Japanese arms in China. When success of the japanese arms in China. When that time comes, and it will soon come, says the Shin Bukkyo, it will only be religious teaching that is abreast of the age, which is purged of the superstition and the lifeless, irrational dogmas on which the slaves of tradition rely, that will be qualified to act as a beacon light to the nations. qualified to act as a beacon light to the nations in the creation of a new far Eastern world. The New Buddhists aim at laying deep the foundations of the reformed faith.

It is realized by Christians of all denominations that the present situation of the adherents of the Greek Church is a very difficult one. Their connection with Russia has ever been and still continues to be of the closest kind. It has been tinues to be of the closest kind. It has been maintained by one or two Christian journals that it is quite natural that a certain amount of sympathy should be felt for Russia by the Greek Christians. Several journals have undertaken to map out the course which Greek Christians should follow in the present crisis. The Scikyō Shimpō has dealt with the questions brought up for discussion in a very able manner. The advice given by the Kirisutokyō Shāhō (Christian Weekly News) some weeks ago was that the Japanese branch of the Greek Church, in order to remove all suspicion from the minds of the general numbers of the magazine in reply to the editor of the fidai Shicho () The Flow of Contemporary Thought," who, it seems, had tendered the same kind of advice. The numbers referred to same kind of advice. The numbers referred to are not now in our possession, but what is said in the copy of the Mugazine we are now dealing with leads us to think that the Greek Church resents interference on the part of outsiders in this matter and sees no reason whatever why the Japanese Christians should sever their respection with a man so disinterset devoted. ever why the Japanese Christians should sever their connection with a man so disinterested, devoted and single-minded as Bishop Nicolai. By statements made in the Seikyo Shimpo we percieve that certain silly Protestant Christians have been trying to make religious capital out of the present situation to the detriment of the Greek Church Christians. It is stated that an expensive on Christians. It is stated that an evangelist con-nected with a Protestant Episcopalian Church in Shimosa, in order to attract an audience, placed the following words after a preaching notice:— Warera wa Rokoku ni kwankei aru kano Nikowarera wie Koronu in kwankei ari kano kiro-rai no ha ni arazu; Dômei-Koku naru Eikoku no kokkyō nari. "We do not belong to the Russian Nicolai Sect, but to the Church Established by England, our ally." The Seikyō Shimpō says that the tone of the comments of the Christian Weekly News is not to the liking of Greek Church Christians. It seems to think that the words used by that journal in expressing its sympathy bear

tions of States. He reaches the conclusion that every State has three principal aims in view. (1) The thorough development of the intellectual powers with which each individual is endowed. (2) The fulfilment of the moral aspirations of each (2) The miniment of the moral aspirations of each individual. (3) The effective protection of the persons and property of each individual. Mr. Ishikawa further observes that States are to be regarded as instruments for carrying out the will

Among the quotations from religious contemporaries published monthly by the Scikyō Shimpō we find one from the Kirisutokyō Shahō (Christian) we find one from the Kirisulokyo Shuho (Christian Weekly News) on the term "A Christian Country," written by the editor of that journal. He says, countries are called Christian either because Christianity is, as in England, the State religion and enjoys certain privileges as such or because, as in America, Christianity is the religion professed by the majority of the inhabitants. professed by the majority of the inhabitants, though without any direct connection with the State. In neither of the above-named countries can it be said that Government administration is can it be said that Government administration is invariably carried on in accordance with Christian principles; and in the case of countries like Russia, where the Emperor declares himself the head of the Church, the acts of the Government are in many cases un-Christian or anti-Christian.

When we come to actual Christian practice and real faith, then it is quite certain there is no such thing as a Christian State in the whole world. Were there one, the Kingdom of God would have been already set up among men and we should now see an ideal State that would be as different from see an ideal State that would be as different from all existing States as heaven is from earth. The position of Christianity in professedly Christian countries cannot be ascertained by simply comparing the number of persons who attend places of worship with the number of those who stay away. The strength of Christianity in England and America and even in Russia is seen in the belief and lives of individuals. Christianity in whole families is certainly comparatively rare, (Kirisutokyō-teki kojin (MA) noōkii hodo Kirisutokyō-teki kazoku wa ōkarazu.) If this is the case in the most advanced Christian countries of the West, much more is it so in this remote corner branch of the Greek Church, in order to femove all suspicion from the minds of the general public as to its sympathy with Russia, should at once take steps to sever its connection with are there? Speaking generally, Christian families that country. In finance and management life cannot be said to have been established here the West, much more is it so in this remote corner of the civilised world, says the Kirisutokyō Shūhō. once take steps to sever its country. In finance and management life cannot be said to have been established here this church should no longer be subject to the (Waya kuni no Kirisutokyō voa imada kazoku no control of Bishop Nicolai. In No. 562 of shūkyō lo narazaru nari). And when from control the Scikyō Shimpō Mr. Suzuki Tōru refers sidering the state of households we pass on to examine the state of villages, towns and cities, we see tention to two articles that appeared in the April ly slight. (Sono seiryoku sara ni hakujaku to nari). So that on the State as a whole it is naturally slighter. Though among officials there are sincere Christians yet these men have not suffiare sincere Christians yet these men have not sufficient influence to prevent the Government's acting in an un-Christian manner. Japan is still merey long way off from being entitled to be called "A Christian Country" in the true sense of that term, concludes the Kirisutokyō Niñhō. But still the work that has begun in the hearts of individuals will go on till by degrees the State is reached.

Last month we epitomized from the Seisho no Renkyū a portion of Mr. Uchimura Kanzō's statement of his attitude to existing Christian Sects. This statement covers nearly 30 pages of the magazine. While acknowledging that he is a member of the invisible church of Christ, Mr. Uchimura denies that he is under any obligation to join any one section of the visible church. different sects of Christendom, says he, cannot lay claim to authority over individual Christians. They were all founded with the object of emphasizing some special doctrine or doctrines. They were the creation of special circumstances and are historically connected with certain countries or with certain classes of Christians only. As for their having world-wide claims to perpetuation, the notion is absurd. What has the Calvanism we have made of the material part of Western civilisation we have reason to congratulate ourselves. But to fight well, to trade well and to manufacture well does not by any means exhaust the potentialities of a nation. There are higher things than these. It is not enough that we should realize the necessity of self-assertion. In the latest number of the Scikyō Shimpō the Christianity in Japan? Nothing whatever. To exalt these sects into bodies possessing authority among the great Powers. We have to show that

world is to mistake the accidental for the essential, the form for the substance. No Christian sect can lay claim to permanency or to universality. They are all mere temporary expedients, with nothing more than local and extremely limited claims to consideration. This is proved by their very numbers. From extreme sacerdotalism to Quakerism every shade of religious helief and emission finds bers. From extreme sacerdotalism to Quakerism every shade of religious belief and opinion finds zealous supporters, and the authority set up by one constitutes a real though a tacit denial of the paramount authority of another. These sects may claim as much authority as they please, but the amount that is granted to them by the general public depends entirely on the indulgence each one receives from its special adherents. Their historical raison d'être does not suffice to establish claime raison detre does not suffice to establish claims of a far-reaching kind. Methodism may have been needed in England when it was founded by John Wesley. That does not say that it is needed in Lagrange of the control o John Wesley. That does not say that it is needed in Japan to-day. The one mistake of all mission work has been the attempt to perpetuate European and American forms of Christianity in countries where the soil is uncongenial for their develop-ment. If a Methodist Christian comes to Japan ment. If a Methodist Christian comes to Japan and preaches the gospel of Christ to me, I willingly listen to that Gospel. But when he asks me to become a Methodist, I reply, "What have I to do with Methodism, or Methodism with me?" In order to become a Methodist I should have to change the potture which God has bestowed on me and order to become a Methodist Ishould have to change the nature which God lass bestowed on me and that would not be pleasing to God. Mesodesulo Kyōkai wa nijū seiki no Nihonjin naru wadakushi ni wa nani no yō mo nai mono de arimasu. Moshi watadkushi ga shiite Mesodesulo Kyōkai no naran to hossuseba watakushi ma tashō kai-in to naran to hossureba, watakushi wa tasho (3 1) watakushi no honsei wo mage-nakereba narimasen. Soshite kakaru koto wa Kami ga narimasen. Sosiute Rakaru Roto wa Kami ga kesshile watahushi yori motome-lamau koto de wa arimasen). Asked whether he thought that the existence of Churches was necessary for stimulating the faith of Christians, Mr. Uchimura replies in the negative. Christian faith is not a product of the Christian Church por dependent on the church for Christian Church nor dependent on the church for its existence or increase, says Mr. Uchimura. The planting of churches in foreign countries is to be distinguished from the planting of Christo be distinguished from the planting of Christianity. The acceptance of the outward forms of a creed is no proof that real Christianity has been accepted. At one time the King of Hawaii was an Episcopalian Christian and hundreds of Hawaians were Congregationalists, but great political changes have come to that country, resulting in religious backsliding. How has Congregational Christianity fared in Madagascar of all that is written are the Bible and Christian experience. The principal object of the writer is on show that apart from rites and ceremonies there under French rule? There has been a wholesale exit from the Protestant churches in that country. How far has English Episcopalianism been success ful among the 300 million inhabitants of India? that among the 300 million inhabitants of indiar-let us come to Japan. What is the result of over thirty years' Christian work in this country? Is it the creation of a large number of self-supporting, independent Churches? No. If the 40 odd missions which send money and workers to this country were to decide to leave us to our own resources to-morrow, how many churches would be able to stand this test of the faith and sincerity of their members? Very few. What is the reason of the backward state of Christianity in this country? Simply this, that so much time is spent every year in explaining the non-essentials connected with every sect. We need men who will only with every sect. We need men who will only preach Christ and who make no attempt to form Church bodies. The notion that after a per-Church bodies. The notion that after a person has accepted Christianity his or her soul
has to be nourished and attended to by
human instruments or it will not thrive is essentially Roman Catholic. It is of the essence of
sacerdotalism, which we Protestants condemn in
tolo. To place church teaching on a level with
biblical exposition, with the preaching of the
Gospel, is to debase the latter and rob it of its claim
to special attention. In order to show in what
light regard I hold the authority claimed by

The Rev. H. Haas has favoured us with a copy of the Kirisutokyo no Shinzui (The Essence of Christianity); which is a translation made by Mr. Christianity); which is a translation made by Mr. Wada Rinkuma of Professor D. Adolph Harnack's Das Wesendes Christentums. The work contains two prefaces, one by Mr. Haas and one by Mr. Wada. In his preface Mr. Haas informs us that Dr. Harnack has promised to write a history of Christianity specially adapted for Japanese readers, to be called "The journey of Christianity from Japanese to Christianity from Japanese to Christianity from Japanese readers, to be called "The for Japanese readers, to be called "The journey of Christianity from Jerusalem to Edo." In the mean time, in order to acquaint Japanese readers with the learned proacquaint Japanese readers with the learned pro-fessor's views, the present work has been publish-ed. Three books recently issued in Germany have caused a great stir in the thinking world, says Dr. Haas. One was Mr. Chamberlain's (brother of Mr. B. H. Chamberlain) Grandlagen der Zivilisation des 19 Jahrhunderts (The Basis of 19th century Civilisation), the next Professor Ernst Haeckel's treatise on Monism entitled Web trätsel (The World's Riddle) and the third is Dr. Harnack's work on Christianity alluded to above. "The Essence of Christianity" has already been "The Essence of Christianity" has already been translated into French, Russian, English and Italian. It is most desirable, says Mr. Haas, that Japanese Christians should familiarize themselves Japanese Christians should familiarize themselves with the trend of modern German thought on Christianity. It seems that Dr. Harnack's work was partially translated into Japanese some time ago by Mr. Takaki Jintarō, a Christian pastor, but Mr. Haas says that Mr. Takaki's translation is in some parks and adaptation, and begins have but Mr. Haas says that Mr. Takan's transactors is in some parts an adaptation, and having been made from the English translation of "The Essence of Christianity" is not always an ade-quate rendering of the original. Then, too, Mr. quate rendering of the original. Then, too, Mr. Takaki has made it too evident that he disagrees with Dr. Harnack's views, interposing his own criticisms in various places in the original work, an objectionable practice in a translator.

In his preface Mr. Wada calls attention to the great stir in the European and American Christian world made by the publication of Dr. Harnack's book in 1899. Mr. Wada furnishes a list of the principal replies and critiques on Dr. Harnack's work published during the past three or four years. In order to fully appreciate Dr. Harpack's treatise, it is necessary, says Mr. Wada, to show that apart from rites and ceremonies there to snow that apart from rites and ceremonies there exists a religious life of the most sublime kind. In a sense this book opens up to view a new heaven and a new earth. This is its strong point. In parts the argument may appear unsatisfactory to certain readers. Some will object to Dr. Harnack's views on the miracles, on the resurrecnack's views on the miracles, on the resurrec-tion and on the nature of Christ! The pur-pose of the work is to exalt experimental Chris-tianity above doctrinal and even rational Chris-In doing this Dr. Harnack has struck a chord of sympathy in many hearts. His work should correct a fundamental mistake commonly made in the way of regarding the object of the Christian religion. When the lectures which form the basis of this work were first delivered, Dr. the basis of this work were first delivered, Dr. Harnack told his audience that his observations were founded on 30 years of Christian experience. He has never aimed at figuring as a mere logician or as a mere historian, but at expressing the sentiments and the belief of an enlightened and well read Christian in these modern days amid the wreck of ancient faiths.

The Japanese edition of Dr. Harnack's book covers 300 good-sized pages. The work is divided into two parts. The first part deals with the Gospel of Christ as taught in the Bible, the second part with the historical development of the creed, to special attention. In order to show in what slight regard I hold the authority claimed by beginning with the Apostolic age and going on to Christian sects for their special tenets, I keep aloof from them all and stand before the world as a Church-less Christian. I ask no one to follow my example; nor do I advise even the persons whom I have been the means of leading to Christ to follow my example. Some of them have in answers the questions: Whence and Whither? in a manner that neither science nor mere logic dists. I leave them to do as they please.

aspirations of devout souls to a greater extent than any substitute which can be found for it. The Kirisutokyō no Shinzui is published by the Shinrisha and sells at 55 sen a copy.

* * * We find in the Koye a very interesting editorial entitled "The Attitude of Buddhists in the Present War." It appears by two letters published by the Koye that in certain parts of Japan there has been an attempt on the part of ill-informed and unenlightened Buddhist priests to make the war an incomplete of the stirring up anti-Christian feeling. The enlightened Buddhist priests to make the war an occasion for stirring up anti-Christian feeling. The first letter given by the Koye was sent to Umai Benkó (an assumed name), a Rector of a Tökyö temple, by a young country priest called Küden Konryu. In this epistle it is stated that the war has been the means of stimulating flagging Buddhist zeal in many parts. Charms and amulets have been in request. The priests have been called upon to attend farewell meetings and their prayers. been in request. The priests have been called upon to attend farewell meetings and their prayers have been solicited, &c. But the writer goes on to add that this war being against a Christian country, all Buddhistsmust feel that they are fighting for their religion, &c. "Umai Benko" severely censures this spirit, remarking that great harm would be done to Japan's reputation in the world did she sanction the notion that this war is connected in any way with religious creeds. He then refers to the big meeting held in Tokyō a few weeks ago, at which all creeds were represented, weeks ago, at which all creeds were represented, as a proof that the cause for which Japan is fighting is one for the success of which Buddhists and Christians and Allie were the succession of the succession of the succession of the succession of the success of which Buddhists and Christians and Allie were the succession of the succes Christians can alike pray. It says much for the enlightened modern Buddhists represented by "Benko" that they should take this sensible and liberal view of the situation, and the Kope is to be commended for making this known to its

Christian readers.

In the Rikugō Zasshi Mr. Matsuo Otojirō discusses the function of religion in an article entitled Gojin wa Shūkyō ni tai shite nani wo motomu-bekiya (What are we to expect of religion)? It seems to me, says Mr. Matsuo, that in past ages seems to me, says Mr. Matsuo, that in past ages men have either expected too much or too little of religion. There are those who think that religion should control every part of man's complex life; that even government, finance and general business should be subject to it. There are others who, on the other hand, consider that religious is a mere device for governing weak are others who, on the other hand, consider that religion is a mere device for governing weak minds and a means of providing ceremonies for those who have a craving for such things. I, continues Mr. Matsuo, am neither a believer in the universal power of religion nor in its inadequacy to effect anything. It certainly cannot do all that is claimed for it, but it can do some things. Religion is accepted by most people for two reasons. (1) It confers benefits on those who believe in it. (2) It affords comfort the them ind. Perhaps it is correct to say that the utility of religion is the chief reason for accepting it, in of religion is the chief reason for accepting it, in the case of 99 out of every hundred persons. It the case of 99 out of every hundred persons. It is supposed to improve a man or woman's mind in various ways, to enable him or her to discharge the duties of life more efficiently. But many are those who accept it on the ground of the comfort it gives them. The craving for comfort is almost universal, and religious offers salaces to those who universal, and religion offers solaces to those who

can accept it.

The Rikugō Zasshi (No 280) prints a long address delivered at the Unitarian Hall by Dr. Murakami Sensei on "Man's Capacities." He considers man (1) As a being endowed with certain intelligence and knowledge; (2) as a being actuated by benevolence; (3) as a being whose life is controlled by etiquette, that is by a sense of what acts are proper and what improper; (1) as a being endowed with a sense of shame; (4) as a being endowed with a sense of shame (4) as a being endowed with a sense of shame; (5) as a being who realizes that he has received favours and gifts from a higher Power; (6) as a national unit, and (7) as a being endowed with religious ideas. Dr. Murakami does not clearly define wherein human attributes differ from those with which the higher animals are endowed. Many of his assertions would be contradicted by a modern naturalist. would be contradicted by a modern naturalist. Dogs, for instance, in addition to being intelligent and to possessing many other human attri-butes are highly endowed with a sense of shane and come skulking to their masters in a most

humble manner when conscious of being in dis-grace for bad behaviour. So when Dr. Murakami says "To be conscious of shame is to be human, he is not correct; as there are many animals besides dogs that distinctly show that they possess this sense of shame. At the end of his address Dr. Murakami points out very clearly that religion Dr. Murakami points our very clearly that length more than anything else differentiates man from the lower animals. In discussing religion Dr. Murakami, as is his wont, dwells especially on its relation to the pursuit of truth. To know its relation to the pursuit of truth. To know what is true is one of the highest of man's aspirawhat is true is one or the nights of main's appra-tions and it is only by a close study of the work-ing of the higher laws of nature, says Dr. Murakami, that we can obtain glimpses of the purpose which the great machine of the universe is carrying out.

Dr. De Forest, of Sendai, writes to the Kirisuto. kyō Sekai on the connection between Missionaries and Evangelists. He says that his experience goes to prove that the plan of making evangelists work under missionaries, and receive their salaries direct from missionaries is a mistaken one. It has the disadvantage of leading evangelists to think that their chief responsibility is towards the missionary instead of to the native churches which they serve. A church run on this method is manifestly in a very unstable position. If the missionary and the money he supplies were suddenly withdrawn, in most cases the work would stop. Dr. De Forest says that it is better to begin from the first to give Christian Churches small grants of money in aid of the support of evangelists and pastors. The engaging and management of these men should be left entirely to the native churches. The foreign missionary should never interfere with their action. It is only by removing the restraints which in some missions harass the movements of evangelists that you can turn out a set of men who will act on their own initiative and who will become enterprising in the work in which they are engaged. A man who is brought up only to do what the missionary orders is a very poor specimen of a Christian worker. As a rule his one object in life is to please his employer. With the flock which he is supposed to shepherd his connection is anything but close. Dr. De Forest says that for many years he has adopted the plan he recom-mends in and around Sendai with most satisfactory results.

The Kirisutokyō no Sekai publishes a favourable

review of Mr. Wada's translation of Dr. Harnack's "Essence of Christianity," mentioned above. Mr. Wada is at present one of the teachers in the Döshisha, and a leading man in the Kumiai Kyökai.

Commenting on the views of Mr. Pownall, as stated in his article published in the Nineteenth Century and After, already alluded to in these columns, the Kirisutokyō Sekas observes that while it cannot endorse altogether the opinion of the missionary quoted by Mr. Pownall in reference to the extreme difficulty of getting to know the Japanese thoroughly, since it does not represent the whole truth bearing on the subject discussed, yet it must be acknowledged that there are in this country still a very large number of people who have all the exclusiveness and narrow-mindedness of the proverbial islander. The attitude of a certain section of the nation towards foreigners still resembles that of feudal times. (Höken jidai no seishin imada jokyo (陰士) seraresu; jōi-teks seishin wo motte gwaijin ni lai suru mono mata mattaku naki ni arazu). II should be the endeavour of all Christians, says the Kirisutokyo Sekai to banish this spirit and to encourage cosmopolitanism as much as possible.

The large religious meeting held in Tōkyō already reported fully in these columns is favourably commented on by the Kirisutokyô Sekai and other Christian journals. It would be perhaps true to say that as far as Japan is concerned the days of strong religious bigotry and jealousy are past, if they ever existed here as they were known in Europe in past ages. Certain it is that among all enlightened Buddhists, Shintoists and Christians

on the political situation in the Far East. Liberality in religion is natural to the Japanese. They are made that way. Their indifference to Christian dogmas that in the past have set the world ablaze, literally and figuratively, is one of the most conspicuous traits of national character, explain it how one may.

THE JAPAN SOCIETY.

THE NUN RYONEN.

At a meeting of the Japan Society held on April 13th, at 20, Hanover-square, London, W., a paper by Professor Lafcadio Hearn, on "The Nun Ryonen; Fragments of a Japanese Biography," was read by Mr. Arthur Diosy (chairman of the Council). Professor Lafcadio Hearn, in the course of his paper, wrote:—

About 250 years ago, during the reign of the Emperor Go-Mizuno, a samurai scholar from Suruga, named Kudzuyama Taméhisa was a descendant of Takéda Shingen, the famous Lord of Koshu (than whom there is no more romantic figure in Japanese history). His father, Kudzuyama Yoshihisa, was high priest of the cult of the Goddess of Fuji in Suruga. As being the eldest son, Tamchisa was entitled to succeed to that office: but he did not wish to become succeed to that office: but he did not wish to become a Shinto priest, his tastes being literature and painting. His wife died young, and he vowed not to marry again. He went to Kyoto with his little daughter Fusa, an only child, and there he adopted the profession of an expert in literature and art. This venture proved successful, and his real learning scope won. Jim the favourable consideration of some Inis venture proved successful, and his real learning soon won him the favourable consideration of some of the Kugć, or Court nobles. Kudzuyama's daughter, Fusa, grew up into a very charming woman, At the age of 16 she was said to be the most beautiful girl in Kyoto, and also the most learned. Her father had been her only instructor. At one time he desired she should also learn music, embroidery, and the other accomplishments of a lady, for he hoped that she would marry into some family of such pool. father had been her only instructor. At one time he idesired she should also learn music, embroidery, and the other accomplishments of a lady, for he hoped that she would marry into some family of rauk; but she had protested that she wished to study only literature and painting, and that she did not want to marry, so he let her have her own way. More than once he had been informed that: Fusa would be gladly received as daughter-in-law by persons of distinction; and it seemed likely that some proposal would soon be made, which, by reason of the rank of the person proposing, might have the weight of a command. But Fusa herself unexpectedly found means to quiet her father's anxiety. One id day she said:—"Father, the matter of marriage is indeed a matter about which I do not now like to think. You have taught me that it is the duty of a woman to marry; but I am still very young; and I believe that I ought first to enter into the service of some noble household, where I should be able to train myself for the duties of a daughter-in-law. Having thought carefully about this subject, I may now venture to say that I hope to be received into the service of Tofuku-Mon-In Sama (the widowed empress). If I could obtain even the lowest place in that august service, even the place of a kitchenservant (osui or hashitlamic). I should be very happy." Kudzuyama answered:—"That wish of yours, my child, is the wish of a noble heart. But it is a wish, and it may be difficult to fulfil. However, there is to be a meeting of Kuge to-morrow at the residence of my patron, the Lord Yanagiwara, who belongs to the Imperial household, and I have been ordered to attend that meeting in order that I may give evidence about the date of certain manuscripts. I think that I shall then find an opportunity to tell Yanagiwara Sama of your good wish."

Next day Kudzuyama went to the meeting, at which there were only five old scholars present—all of them Kuge, and patrons of literature. He found a chance to inform Lord Yanagiwara about Fusa's wish, and h

a chance to inform Lord Yanagiwara about Fusa's wish, and he was requested to send for her. They questioned her and were astonished at her learning. One of the Kugè then proposed a subject to Fusa, asking that she should first make a Chinese poem about it, and afterwards a Japanese poem. Without a moment's hesitation Fusa improvised a Chinese composition of four lines; then a Japanese poem of 31 syllables. She then wrote down both improvisations, and respectfully presented the writing. In the poems there was no fault, and everybody was amazed at the beauty of the written characters. Each of the the beauty of the written characters. Each of the Kugè in turn then tested the girl's powers, and each time she improvised, with equal skill and quickness, a Chinese and a Japanese poem. At last the Lord Yanagiwara, speaking in the name of all, thanked Fusa for the pleasure which she had given, praised her accomplishments, and promised that he would speak in her behalf to the Empress.

The next day Fusa was summoned to the palace.

The next day Fusa was summoned to the palace, and there also she pleased and astonished everybody. The Empress graciously thanked Yanagiwara body. The Empress graciously thanked Yanagiwara Sama for his recommendation, and said that she there is at present a very strong desire to act Sama for his recommendation, and said that she charitably towards each other and especially to was delighted to have the opportunity of attaching keep the matter of alien creeds out of discussions such a charming girl to her service. So Fusa was

received into the household of the Empress as a personal attendant, and a high rank was conferred upon her, together with the name of honour, Yadorigi (Misletoe). Fusa gave to her new duties the same patient and loving attention that she had formerly give to literature and to painting. The kind old Empress soon came to regard her with the affection of a parent. But in the very happiest year of Fusa's life the good Empress died. To pierce her own throat, after the manner of a samurai woman was Fusa's immediate wish, so that she might follow Tofuku-Mon-In, and continue to serve her in the world of the dead. But the girl had been trained never to act according to her feelings only, and in the moment of this great sorrow did not allow her heart to hecome the master of her will. She thought carefully about her duty as a woman and as a subject, and after much unselfish and patient reflection she decided what to do. She went to her father and told him her decision. "Father," she said, "a long time ago you taught me that it is received into the household of the Empress as a and as a subject, and after much unselfish and patient reflection she decided what to do. She went to her father and told him her decision. "Father," she said, "a long time ago you taught me that it is the duty of a woman to marry and to bear children. I wanted to die: but I remembered your honourable teaching, and I hope to follow it. Now Lam ready to become a wife. But I will marry only on this condition—that my future husband shall make a written promise to divorce me as soon as I have borne him three children." Kudzuyama agreed, but doubted whether a worthy husband would be found upon the terms. Indeed several who had desired to marry Fusa gave up all hope when informed of her conditions. But there was one young scholar, Matsuda Bansui, who was not discouraged by the strangeness of the terms. "Fusa cannot now foresee how greatly her heart will be changed when she has become a mother." So Matsuda Bansui became the husband of Fusa. He was a true and loving husband; and Fusa proved a matchless wife; but he began to perceive that he had not rightly judged the quiet force of Fusa's character. Capable of great tenderness, but equally capable of great sacrifice, this strange woman had the patient resolve and the courage of a man.

A year after the marriage Fusa gave birth to a on, and Matsuda's jou was creat. Fusa proved to

had the patient resolve and the courage of a man. A year after the marriage Fusz gave birth to a son, and Matsuda's joy was great. Fusa proved to be the most loving, the most wise, the very best of mothers; and Matsuda's hopes began to strengthen. But at the end of another year Fusa bore another son. This time Matsuda felt less joyful, and he hoped that he would have no more children. For five years he did not. Then Fusa gave him a daughter, and he tried to persuade himself that the pious resolve had been quenched by maternal affection, One morning, after she had again become strong, Fusa said that she wanted to visit her father, and Matsuda suffered her to go out, unattended, taking the haby said that she wanted to visit her father, and Matsuda suffered her to go out, unattended, taking the baby with her. At a late hour she same back, accompanied by a pretty young woman, who carried the child. "I could not help being anxious about you," said Matsuda. "This is the first time you were so long away from me. Who is this young person?" "She is a very good person," answered Fuss, " and she has come to take care of the child. She will be an excellent nurse, or, if you wish, she will be a good wife for you, and a kind stepmother to the boys. I have known her since I was very young, and I trust that you will permit her to take my place. For you must now divorce me, according to our agreement Tomorrow I shall be a nun."

Matsuda was too much troubled at the moment to answer a word. He took his baby from the arms of

Matsuda was too much troubled at the moment to answer a word. He took his baby from the arms of the strange woman, and walked up and down with it awhile, trying to control his feelings. At last, in a choking voice, he appealed to her; but she reminded him of his seal and signature, and that he was a man of honour. Not without tears Matsuda yielded, and wrote the necessary declaration. Then she bade her boys be good samurai and good scholars, and left her home for ever, returning to her father. She told him all that had happened, and showed him the writ of divorce, and she said that she wished to go to Yedo as soon as possible to study the Good Law under the direction of some great teacher. On the morrow Fusa, in the garb of a travelling nun, departed from Kyoto, and began her long journey to Yedo.

Fusa reached Yedo on a bright spring morning; but, as a stranger, she had some difficulty in finding her way through the great city, and the bats were already beginning to fly when she arrived at the gate of Kofukuji, the temple of Tetsugiu Zenshi. She gave her story, at which Tetsugiu Zenshi smiled an unpleasant smile, and said:—" Your present wish is probably sincere; and all that you have stated I can suppose to be true. Even if you had not told me the fact, I could not but know that you had been a court lady. You now want to become a nun; but that fact, I could not but know that you had been a court lady. You now want to become a nun; but that desire is likely to weaken in time. The fashionable world to which you have been accustomed will call to your heart again; and you will find the call hard to resist. But, in any event, I would not receive you here. You are young, and you are still a temptation to the eyes of men. Among my pupils your presence would prove a distraction, perhaps a scandal. What you ask is quite impossible. I will not receive you."

After she had been dismissed by Tetsugiu Zenshi After she had been dismissed by Tetsugiu Zenshii Fusa felt her courage give way, and thought of drowning herself in the Sumidagawa, but having to wait till some timber rafts passed by, she heard the conversation of the raftsmen who spoke of Tetsugiu Zenshi as having a great name—but what a name! "Iron Cow!" But they spoke also of the priest of Komagome; "they call him Hakton. That is a fine name, "White Seabird." Everybody likes Hakuo."

Next morning she went to the temple, and was able

Hakuo."

Next morning she went to the temple, and was able to see Hakuo, a gentle and courteous old man. He heard her story with interest and much sympathy; he asked no harsh questions; he commended her pious purpose. But at last he said to her, "There is one reason—one reason only—why I cannot accept you. To admit you into this temple, as a novice, would be a cause of distraction to the young men here; and it might also be a cause for evil-speaking on the part of evil-minded persons. You are too beautiful to be received as a novice." This time Fusa did not lose heart; her samurai blood had quickened again. She thanked the old man for his frank and kind words, and she returned to the cottage where she had passed the night. From the housewife there she bought a small hand-mirror of bronze, and on the back of the mirror she wrote, in the Chinese manner*:—"In time long past, when amusing ourselves in the palace, I used to burn incense. Now, going to the Dhyana Grove, I burn the skin of my face. So vary and pass the seasons of life. No more is recognisable the person herein reflected."

There was in the room a large brazier containing lighted chaptical, and heside the brazier was an Next morning she went to the temple, and was a

There was in the room a large brazier containing lighted charcoal, and beside the brazier was an ash rake. Fusa heated the ash-rake in the embers and take. Find headed the abilities in the chew it strongly across her face, over and over again, burning and seaming her beauty out of existence for ever. She then went to the Temple. Hakuo came to the entrance, and saw at the foot of the steps a veiled then went to the Temple. Haking Came to the entrance, and saw at the foot of the steps a veiled woman holding up to him a mirror inscribed with a Chinese poem; and he took the mirror from her hand and rend the poem. Then Fusa uncovered the wreck of her face, and the old man understood, and his eyes filled with tears. Immediately descending the steps he prostrated himself on the ground before Fusa; then, with his own hands, he loosened the strings of her sandals, and with his own silken robe he wiped the dust from her feet. And he led her into the temple, and seated her there in the place of highest honour, and again bowed down before her, saying, "My daughter-in-the-law, assuredly you shall be my disciple, so long as I can humbly serve you by my teaching—so long as you will deign to continue my pupil." And yet a third time he bowed down before her, exclaiming, "Surely another Buddha has descended into our world! How wondrous that a woman should display such holy courage."

courage."

So Fusa became a disciple of Hakuo, taking the Buddhist name Ryonen; and she studied so well that she became the most learned nun of her time that she became the most learned nun of her time. In Buddhist literature she is remembered by several names—such as Sodaikin and Chishu; but she is best remembered by her popular appellation, Ryonen-Ni, "the Nun Ryonen." She night have been in charge of Taiunji, the temple of Ochiai-mura, but wished to remain the disciple and the assistant of Hakuo. He went to Ochiai-mura, taking her with him. Afterhis death she succeeded to the management of the temple, and lived to 65 years. Her tomb is still to be seen at Ochiai-mura, in the cometery of Taiunji.

In the course of discussion which took place afterwards Professor Longford, in proposing that the heartfelt thanks of the meeting be conveyed to Mr. Hearn for what he considered one of the most Hearn for what he considered one of the most beautiful narratives he had the pleasure of listening to, said such determination as was shown by the Nun Ryouen was one of the characteristics of the Japanese, both male and female, and would bring the nation through all trouble and trials. He likened the impressive language of the story to that of the Bible.

Bible.

Mr. Osman Edwards seconded, and the vote having been carried, Mr. Diosy in closing the meeting, made reference to the Red Cross Fund, of which the Japan Society had charge. The amount subscribed through the Society was nearly £2,000, an amount which he considered very satisfactory, seeing that their Society did not push the fund beyond

CORRESPONDENCE.

A LETTER OF THANKS.

To the Editor of the "Japan Mail." SIR.—I shall much appreciate your kindness in allowing me a little space in your paper to publicly tender my warmest thanks to every one who gave their services in the production of the operetta: "Three Little Kittens," held at the Public Hall on the 24th and 26th inst

Yours faithfully, Yokohama, May 30th, 1904. M. HENKLER.

JAPAN CLUB OF HARVARD.

(TO THE EDITOR OF THE "JAPAN MAIL.")

(To the Editor of the "Japan Mail.")

Sir,—The Japan Club of Harvard University was organized during the past winter with the object of promoting social intercourse between the Japanese students and other members of the University, both officers and students, who are specially interested in Japan. Incidentally the club loped to contribute its modest share toward making Japan and her institutions better known to the people of America and thus to make more solid the grounds for sympathy already existing between the two countries. The club abstained, however, from making any formal declaration of its objects at the start, preferring to show what it could actually accomplish before defining too exactly the scope of its efforts. The organization of the club was influenced by no thought of the impending war, but after two or three social meetings had been held, and the members had become well acquainted with each other, the war broke out and had been held, and the members had become well acquainted with each other, the war broke out and the club assumed the duty of seeing to it that the Boston and Cambridge community; at least, should be posted as accurately as possible on the merits of the issue. The Honorary Japanese Consul in Boston, Mr. Osborne Howes, was invited to address the University at the Harvard Union on the conflicting claims of Japan and Russia, and his address was prefaced by an historical sketch of Japan's international relations, given by the President of the Japan Club, Mr. B. S. Kimura of the Harvard Graduate School. Next, Professor Ira N. Hollis, of the United States Navy, gave at a private meeting of the Graduate School. Next, Professor Ira N. Hollis, of the United States Navy, gave at a private meeting of the club an informal address on the strategic aspects of the present struggle. Every week since the war began members of the Japan Club have been in demand to speak about Japan and the war in different parts of New England, and even so far away as New York City. Ten bound volumes of the Japan Weekly Mail and Ecurent subscription through Weekly Mail and morner subscription through one of the members have been given to the University Library in the name of the club, and the improvement of the Library's collection of books relating to Japan has been actively begun. Last week, under the patronage of Boston society, several members of the club, with the co-operation of several Japanese residents, gave in that city a play entitled "Danjiro no Tanjobi"; and the proceeds, amounting to over me thousand dollars, were forwarded to Consul-General Uchida of New York for the Japanese Red Cross Society.

Ochida of New York for the Japanese Red Cross Society.

On Baron Kaneko's arrival in the United States an urgent invitation was sent to him to revisit Harvard, his alma maler, as the guest of the Japan Club, and this invitation, which was re-enforced by one from the Faculty of the Harvard Law School to speak under its auspices on Japanese law and the constitution, was happily accepted. The Baron arrived in Boston on April 27th, accompanied by his Secretaries, Messrs. Suzuki and Sakai. That evening he was entertained at dinner by the Dean of the Law School. Professor James Barr Ames, and then gave his address at the Law School. The following evening the Japan Club gave a dinner in the Baron's honour at the Harvard Union, whence the company went in a body to Sanders Theutre where they listened to a moving but dispassionate address by Baron Kaneko on "The Present Situation in the Far East." In spite of the fact that the worst Baron Kaneko on "The Present Situation in the Far East." In spite of the fact that the worst storm of an exceptionally inclement season was raging without, a large audience representing teachers, students, and the Cambridge and Boston

giving notice to members of the existence of the same. The fund would benefit the Russian wounded in Japan as well as the Japanese.

Kurino during the six months before the war, showing as it did the candour and forbearance exhibited by Japan throughout the negotiations, his unanswerable Japan throughout the negotations, in a manswerable disposition of the Russian baby-cry of treachery and violation of international law on Japan's part, his demonstration of Japan's advantage over Russia with regard to civil and religious liberty, public education, and the practical observance of some with regard to civil and religious liberty, public education, and the practical observance of some fundamental Christian teachings, and finally his declaration of Japan's allegiance to the "open door" policy made a deep impression on all his hearers, and repliced what was in many of them a mere prejudice in favour of Japan, with a genuine conviction of the righteousness of her cause. A Harvard audience naturally welcomed with cheers the reminder that both Baron Komura and Mr. Kurino were Harvard graduates; and after the recital of their important labours in the present crisis Baron Kaneko's hearers heartily agreed that these men had worthily upheld the traditions of loyalty to country and to truth which were their Harvard heritage.

Harvard heritage.

The Japan Club of Harvard has asked Baron Kaneko's consent to publish his address in pamphlet

form.

Though I have already trespassed too much upon your space, I venture to add that the Japan Club of Harvard is glad to be of service to Japanese students intending to enter the University, whether before their departure from Japan or upon their arrival in Cambridge. Letters of inquiry may be addressed to the Secretary of the Japan Club, in care of the undersigned.

I remain, Sir, etc., your obedient servant, JEROME D. GREENE.

Harvard University, Cambridge, Massachusetts, U.S.A., May 4, 1904.

A DENIAL.

TO THE EDITOR OF THE "JAPAN MAIL." Str.,-In your issue of the 25th inst., the following paragraph, under the heading of "News of the Day" appears:-

"Armstrong, Whitworth & Co., shipbnilders, of Elswick, Newcastle-upon-Tyne, are, it is announced, contracting largely to replace the Russian fleet after the war."

In reply to a telegram from us enquiring as to the above, Messis. Sir W. G. Armstrong, Whitworth & Co. Ltd., wired at once stating that they knew nothing whatever about the matter and asked us to contradict

whatever about the matter and asked us to contradict the report absolutely.

We shall feel very much obliged if you will give the same publicity to this denial as you did in connection with the above paragraph, which we observe crept into several of the Japanese papers.

May we ask you, further, for the source of your information?

We are dear Sir Voyer faithfully.

We are, dear Sir, Yours faithfully,

JARDINE, MATHESON & Co., Per H. IRVING BELL.

SIR W. G. ARMSTRONG, WHITWORTH & CO., LTD. Yokohama, May 30th, 1904.

[The paragraph was taken from the China Mail, which copied it from a Bombay journal, which received the news, we presume, in its regular London cable service.—ED. J.M.]

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

JAPANESE OPERATIONS IN MANCHURIA.

London, May 26. Reuter's correspondent with the Russian Headquarters at Mukden reports that the Japanese have resumed their advance. Several columns are moving northward, though the bulk remain near Feng-hwang. Small bodies of Japanese troops have been seen north-east of Mukden, but no important

body has been located.

^{*}Readers of my Gleanings in Buddha Fields may remember that the young woman, Hatakeyama Yuko (who in 1891 offered up her own life by way of a national expiation for the attack made at Osta on the Tsarevitch), wrote a verse upon the back of her mirror before cutting her throat. The custom of the mirror before cutting her throat. The custom of the mirror before cutting her throat. The custom of the mirror before cutting her throat. The custom of the mirror before cutting her throat. The custom of some memorable or solemn act still exists. To understand Fusa's use of the mirror purchased at the farmhouse, one should remember that the mirror is a symbol of truth, as well as the symbol of a woman's soul.

London, May 27.

The London Daily Standard publishes the following from a well-informed Russian the following from a well-informed Russian the attention and won the repeated applause of a runoured that after the recent disturbance at Warsaw, 600 persons were hanged by administrative order without trial. There is a symbol of truth, as well as the symbol of a woman's soul.

by troops. This correspondent gives the gloomiest account of the effect of the war upon commercial and agricultural life. He also forecasts poor crops

GREAT BRITAIN AND RUSSIA. London, May 27.

Sir Charles Hardinge, the newly-appointed British Minister to Russia, in presenting his credentials to the Tsar, handed his Majesty a private letter from King Edward, and also expressed the latter's desire for the maintenance of the best possible relations between Great Britain and Russia.

ANGLO-FRENCH AGREEMENT.

The French yellow-book on the Anglo-French Agreement contains the letters sent by M. Delcassé to the French representatives abroad. M. Delcasse, in referring to Egypt, says that the Agreement safeguards the financial interests of Frenchmen, which are strengthened by the undertaking not to convert or redeem their Egyptian bonds for several years.

ANOTHER ATTEMPT TO SEAL PORT ARTHUR.

London, May 27

A report from Admiral Witgert, dated the 25th inst, states that a fresh attempt was made by the Japanese to block Port Arthur by means of mines on the night of the 19th inst. It is believed that two Japanese torpedo-boat destroyers and a launch were sunk between the 18th and the 21st. Russians have removed eleven of the Japanese mines

RUSSIA PURCHASES STEAMERS IN ENGLAND.

London, May 28. It is stated that the Russian Government has recently bought in England a number of fast cargo vessels adaptable for troopships. A DENIAL.

The Russian executions at Warsaw, reported on the 26th inst., are declared in St. Petersburg to be purely imaginary

ENGLISH PRESS ON THE KINCHOW VICTORY

London, May 29. The Japanese victory at Kinchow has been hailed by the London press as establishing an even stronger claim than the Yalu victory, and proves the superiority of Japan on land as well as on sea. The Russians at Kinchow, they say, had ample time to prepare

The Daily Telegraph says that the victory is one of the most perfect examples possible of how a fight ought to be conducted and of the principles with go to make and develop an ideal army. The Japanese soldiers are now the compeers of the proudest European

The Standard says that the valour of the Japanese soldiers has again refused to recognize any obstacle as insurmountable. All the odds were against the victors.

The Graphic says that the Russians were driven out of their stronghold by superior generalship and indomitable bravery.

CAPTURED BY BANDITS

The Moorish bandit, Ras Zuli, has captured a European named Varley and an American named Cergeris (?) in the vicinity of Tangiers. The United States has refused the terms of the suggested ransom and has ordered seven warships of the South-Atlantic-European squadron now at Tenerific and the Azores to proceed to Tangiers.

THE BATTLE OF NANSHAN. London, May 30.

The Japanese casualties at the battle of

leaving the city at the dead of night escorted Nanshan are now estimated at 3,500. captured Russian guns are estimated at 70. The Japanese hope to be able to storm Port Arthur within a fortnight. They realise that the losses will be of the heaviest, but they think that better than keeping a large army idle for three months.

[Nore—This is really carrying coals to Newcastle. If Renter has nothing to tell us, he had far better save the expense of telegraphing such "news" as the above and hold his hand until something worth sending occurs.—ED. J.M.[]

JAPAN'S TERRIFIC EXPLOSIVE.

London, May 31.

Washington Government advices dwell upon the terrific power of the Japanese Shi-mose powder. The results following the ex-plosion of shells astonished the United States Army observers.

FIGHTING IN TIBET.

The correspondent of the Daily Mail, wiring from Chumbi, says that Lieutenant Garston and three sepoys were killed, and Captain O'Connor, Lieutenants Mitchell and Walker, and nine men were wound-ed on the 26th May while clearing a village which the Tibetans were fortifying near the Mission Camp. The Tibetan losses were heavy

CHINESE AT THE CAPE.

The Governor of the Cape has withheld his assent to the Chinese exclusion bill, awaiting His Majesty's pleasure.

THE FIRST ARMY.

Reuter's Mukden correspondent says that Cossacks are harassing Kuroki's rear, hence there is a suspension of the Japanese advance.

JAPANESE NAVAL PRISONERS REACH TOMSK.

London, June 1. Two hundred and sixty-eight Japanese isoners have arrived at Tomsk. They are prisoners have arrived at Tomsk. largely naval men captured at Port Arthur from the blocking steamers. The officers receive an allowance of 50 to 75 roubles a month; the men 16 kopecks a day. Rusmonth; the men 16 kopecks a day. Rus-sian visitors to the prisoners' camp are sur-the taking of Dalny evoked in Great Britain prised at the men's cleanliness and neatness.

MOORISH BRIGANDAGE

It is stated in Washington that Mr. John Hay, U.S. Secretary of State, has asked shown by the Japanese will dispel Europe's France to exercise her good offices in order dream and will show that Japan ranks with to secure the release of Mr. Pericardis (who, the first military power in the world. with an Englishman named Varley, was recently captured by brigands near Tangiers) to which request France has consented. In the meantime four U.S. warships have arrived at Tangiers. The British Admiral arrived at Tangiers. has also arrived from Gibraltar on board the dispatch-boat Surprise to confer with the British Minister at Tangiers

DERBY BETTING

The latest betting on the Derby (run Wednesday, June 1) is as follows:—7 to 4 against Gouvernant; 4 to 1 Henry; 5 to 1 St. Amant; 11 to 2 John-o'-Gaunt; 100 to 8 Andover; 33 to 1 each against Lancashire, St. Denis, Coxswain, La Rogue, Bobrinski, Jupiter Pluvius, and Montem.

THE DERBY.

London, June 2. 1 St. Amant..... John o' Gaunt 2 St. Denis 3

A RAMPANT PAN-SLAVIST.

Prince Dolgorouki violently assaulted Count Lamsdorf when the latter was walking in the streets of St. Petersburg. Prince was arrested. The Pan-Slavist feelings of the Prince are strongly opposed to Count Lamsdorf's pacific policy. He is believed to be

[Note-Prince Dolgorouki comes of one of the oldest families in Russia. An ancestor of his once blunt-ly reminded the Emperor Nicholas of this fact. As Russian Ambassador in Paris this Dolgorouki offended the Emperor and was ordered to return. Instead of doing so the Prince replied that his ancestors were Grand Dukes of Moscow when those of his Majesty were not even Dukes of Holstein-Gollorgo, and that he would not accept the recall.] THE ANGLO-FRENCH AGREEMENT.

The House of Commons has passed the second reading of the Bill giving effect to the Anglo-French agreement.

DEATH OF GENERAL IVANOFF. General Ivanoff, Governor-General of Turkestan, is dead.

THE DERBY. The Derby was run in a thunderstorm.

(RECEIVED AT THE LEGATION OF FRANCE.) FRANCE AND THE VATICAN.

Saigon, May 29.

The Chamber of Deputies, in connection with the interpellation relating to the Pontifical protest, approved by a vote of 427 to 95 of the recalling of the French Ambassador from the Vatican.

(RECEIVED AT THE FOREIGN OFFICE.) FRENCH COMMENT.

The principal French journals do not make any special comment on the Kinchow battle, but in publishing the report, they call the affair a brilliant success, and agree that it illustrates Japanese bravery, patriotism and loyalty. They do not consider, however, loyalty. They do not consider, however, that the battle will have any cardinal effect on the issue of the war.

WHAT THEY SAY IN ENGLAND.

even stronger praise than did the battle of the Yalu. The papers say that the bravery, celerity, discipline and strategical ability

RUSSIAN COMMENT.

The Russian newspapers do not withhold their meed of praise.

JAPANESE BONDS.

Japanese bonds have gone up greatly in

KUROPATKIN ORDERED TO RE-LIEVE PORT ARTHUR.

It is expected in London that as the Russian fleet is largely officered by noblemen, the Tzar will order General Kuropatkin to advance to the relief of Port Arthur.

GERMAN COMMENT.

The Vossiche Zeitung says that despite all the Russian pretence that the defences at Kinchow were merely of the nature of temporary intimidation, the fact that strong forts had been erected there disposes of this fiction. The fight at Kinchow may be taken as an indication of the fate of Port Arthur. As a military feat it ranks with the ALCO MAN

soon reduce Port Arthur cannot be doubted. The Tzar is said to have ordered General Kuropatkin to advance to the relief of Port Arthur, but if that be true it is a most unfortunate step. It will be like Mac-Mahon's obedience to orders in spite of the promptings of his own better judgment.

(FROM OUR CORRESPONDENT.) DEATH OF MR. EVERS.

Kobe, June 2. Mr. Ernst August Evers, head of the firm Mr. Ernst August Evers & Co., died this of Messrs. Simon Evers & Co., died this morning, after a long illness. The flags morning, after a long illness. The flags at the Clubs and steamship companies are half-masted. Universal regret is being expressed by all foreigners in Kobe.

IMPORTS.

In Yarns there is no business worth mentioning; the market for Lancashire spinnings is be coming a dead letter. Considerable sales from stock of Grey Shirtings are reported; no contracts for forward delivery have been made as Manchester is still above local prices. There has been a fair demand, both "spot" and "future," for White Shirtings and sales have been made at quotations.

FOR BABY'S SKIN SCALP AND HAIR

Something for Mothers to Think About

EVERY CHILD born into the world with an inherited or early developed tendency to distressing, disliguring humours of the skin, scalp, and blood, becomes an object of the most tender solicitude, not only because of its suffering but because of the dreadful fear that the disliguration is to be lifelong and mar its future happiness and prosperity. Hence it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest, and most effective treatment available, viz., THE CUTICURA TREATMENT.

Warm baths with CUTICURA SOAP, to cleanse the akin of crusts and soales and soften the thickened cuticle, gentle anointings with CUTICURA OINTMENT, to instantly allay itching, irritation, and inflammation, and soothe and heal, to be followed in the severer cases by mild doses of CUTICURA RESOLVENT PILLS (see below), to cool and cleanse the blood, are all that can be desired for the alleviation of the suffering of skin-tortured infants and children and the comfort of worn-out, worried mothers. A single set in often sufficient to cure when the best physician fail.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scale of cruets, scales, and dandruft, and the stopping of falling hair, for softening, whitening, and southing red, rough, and sore hands, for haby rashes, itchings, and chaffings, in the form of buths for amonying itriations and inflammations, or too for offensive perspiration into form of washes for ulcerative weaknesses, and for many sanative, suitseptio purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the tolici, bath, and sursary.

CUTIOURA RESOLVENT PILLS (Chocolate Coated) are prepared to meet the wants of delicate women, and sensitive children, and are pure, sweet, and tasteless. They are beyond question the most successful blood purifiers and humour cures yet compounded.

COTIOURA BENEFITS are seld throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: 37-38, Charterhouse Sq., London. Franch Dapot: S Rue de la Faix, Faria. Forzan Dans Anto Chem. Conr., Sale Pron., Reaton. U. S. A. P. 211, howeth 6 shirt "Con.

YOKOHAMA: SATURDAY, JUNE 1174, 1904.

DEATH.

On April and, at Cairo, C. WILLSON PORTER, of pneumonia.

SUMMARY OF NEWS.

THREE cases of typhus are reported at Motomachi, Hongo, Tokyo.

THE hospital ship Rosetta left Ujina on June 6th with nurses for the front.

THE Red Cross Society has opened hospitals at Hiroshima, Matsuyama, and Saseho.

Two rats bearing plague bacili have been found at Kojimachi 12 chome, Tokyo.

M. SAKUMA, late of the Bluff Police Station, has been arrested on a charge of fraud.

ANOTHER Russian undergoing treatment in the Matsuyama Hospital died on June 4th.

A case of cholera appeared in Tokyo on June 1st. The patient died on the following morning.

Mr. Megara, Director of the Tax Bureau, left

THE Emperor has presented one of his horses, Ki chi by name, to Prince Kan-in. It was bred in Miyagi

A Norwegian steamer with four thousand tons of Cardiff coal arrived on June 7th at N gasaki from Shanghai,

THE rumour that the Government proposes to float another loan in the United States is contra-

that twenty-six nurses of the Red Cross Society left there on June 7th for Kinchow.

Mr. M. Marta left Saseho on June 5th for Korea and China to investigate the condition of commerce and industry.

Two men who were charged with robbery and murder are to be executed this morning (the 6th) in Ichigaya Prison, Tokyo.

Five hundred emigrants will leave Kobe on June 18th by the steamer Akebono Maru (the former Crown of Aragon) for Mexico.

MR. C. FUKAZAWA, President of the Yonezawa City Assembly, says the Jiji's correspondent, was arrested on June 3rd on suspicion of fraud.

MR. TAKAHASHI, Vice-President of the Bank of Japan, who is now in London, will leave England in the middle of June for home via America.

VARIOUS spoils of war captured at the battle of the Yalu were brought to Tokyo on June 2nd. They were immediately shown to the Emperor.

MR. R. TANIGUCHI has been appointed a member of the Upper House. Baron T. Kikuchi, a member of the same House, retired on June 1st.

VISCOUNT MATSUDAIRA YASUHIDE, ex-Daimyo of Kawagoe, was promoted on June 5th to the Junior Cross of the Second Rank. He is seriously

A TELEGRAM from Shidzuoka reports that during a gale on June 6th, a junk capsized off Umaesaki point. One of the crew was drowned and seventeen were saved.

THE interim dividend of the Tokyo Electric Light Co. for the first half year is believed to be 6 per cent. A general meeting of shareholders will be held on June 15th.

MAJOR VON ETZEL and another military attache of the German Legation paid a visit on June 5th to the War Department, where they inspected the spoils brought from the front.

LOCOMOTIVES and cars for the Seoul-Wiju railway, brought by the steamers Mongolia and Tremont from America, were re-shipped at Yokohama last week on the Fushiki Maru and Kagoshima Maru.

MR M. Noma, Japanese Consul at Hongkong, says the Official Gazette, reports that during the week ended May 21st, thirty-nine cases of plague appeared there and of these thirty-five proved

A TELEGRAM from Shidzuoka reports that the crop of barley and wheat in the prefecture for this year is expected to be about 515,340 koku. The estimate shows 36 per cent, of an increase over that of the previous year.

THE leading politicians of the Sciyu-kai held a Saselio on June 4th for the front by the steamer Saghalien. Mr. Uchiyama delivered a detailed report with regard to industrial conditions in the

> THE Yokohama city assembly has decided to borrow yen 136,800 from the Seventy-fourth Bank to spend in preparations for preventing an outbreak of plague this summer. The rate of interest is reported to be sen 1.4 per yen 100 per

with a large knife on the other's neck and breast, The culprit was arrested at the scene. The Isezakicho police say that the men quarrelled as to which should convey m gentlemen who needed a vehicle and the excitement led to a fight.

THE barley harvest in Ishikawa prefecture this year seems very prolific. A telegram from Kana-zawa says that the crop is expected to be about a hundred thousand koku (one koku about five bushels) which shows an increase of 50 per cent. over that of last year.

A TELEGRAM from St. Petersburg to the Paris Journal, about the middle of April, says:—
"Many corpses are being thrown up by the sea on the shores near Port Arthur. Most of them are disfigured, but it is believed that the body of Admiral Makaroff had been recovered."

THE funeral of the late Lieut. General Baron Nagayama took place on June 2nd at Otaru, Sapporo. The commander and officers of the Sapporo. The commander and omcers of the Seventh Division, and five thousand inhabitants took part in the obsequies. The Emperor presented fifteen hundred yen to the family of the

K. IKOMA (39) who stole several articles from the residences of Marquis Hachisuka, Count Inouye, Viscount Kuroda, etc., to the value of over thirty thousand yen, was tentenced on June and in the Tokyo District Court to five years' imprisonment with hard labour and one year's police surveillance.

MR. Li Yong-ik, lately Korean Minister of State, left Tokyo on June 8th for Ashikaga, Kiryu, Ashio and other places near Nikko, accompanied by Mr. M. Kato, Japanese adviser to the Korean Court. The distinguished visitor is to investigate the weaving and mining industries.

THE Kagacho police report that the Kokumin Shimbun has been prosecuted on a charge of having infringed the press regulations regarding the movements of the Army and Navy. It sppears that the Kokumin on June 8th published a statement in which it identified the place where a certain Japanese army landed.

THE sailing vessel Kowo Maru collided on May 31st at 8 a.m. with the British steamer Heath-May 31st at 8 a.m. with the British steamer Heath-dene (chartered by the Hokkaido Tanko Kaisha) between Nambu and Sendai. The junk was sunk. R. Okajima and eight others of the crew were rescued by the British steamer and brought to Yokohama on June 3rd.

THE Governor of Ishikawa prefecture telegraphed on June 3rd at 11 p.m., tl at fire broke out at Shimo-Omi-machi, Kanazawa, burning down 257 dwellings, a temple, 2 banks and several telegraph and telephone poles. The Asahi adds that the loss to be paid by the fire insurance companies is estimated at about half a million yen.

REAR-ADMIRAL TAKAGI passed away on June 2nd. He belonged to the Saga clan of Kyushu. At the time of the Restoration he was a midshipman on the Kinonie Maru and fought at Hakodate where Enomoto (now Viscount Enomoto) and the supporters of the Tokugawa made their last stand. He also fought in the Satsuma rebellion. In 1882, he was promoted Lieutenant and appointed Commander of the Iwaki. During the appointed Commander of the Iteaki, appointed Commander of the Ineal. During the Japan-China war he was on the flagship Matsushima as vice commander. In 1895 he was promoted Captain and decorated with the Golden Kite of the Fourth Class. At the time of his death he was Chief of the Kure Naval Barracks, THE rumour that the Government proposes to float another loan in the United States is contra-ABOUT 5 o'clock on the evening of June 7th in dicted by Tokyo papers.

Benten-dori, Yokohama, K. Akiyama (30), a Jjinrikisha coolie, attempted to murder another coolie, S. Tomita (44) by inflicting severe injuries

IT is reported by telegram from Takamatsu coolie, S. Tomita (44) by inflicting severe injuries

| Image: Coolie of the Coolie of the Fourth Class. At the time of his death he was Chief of the Kure Naval Barracks, and also chief surveyor of the Hydrographic Office.

destroyers used to remain outside harbour of Port Arthur, chiefly near Golden before the close of June. Hill Fort and Liautishan promontory, they Hill Fort and Liautisnan promontory, they now keep inside altogether, perhaps because some of them have lately been sunk by mines. The Russians are straining every nerve to place the coast defences in an efficient state and to guard against any constant of the best later at the part of the later. renewed blocking attempt. Since the battle but some also suggest that operations were of Nanshan vigorous efforts are being made to fortify the Tuchingsk position, which is the last of the outlying works where a determined stand can be made before the final investment. left Port Arthur, but the wives and families of Russians more than the repeatedly success-the officers and soldiers are in the new town ful attempts of the Hunghutze to destroy the officers and soldiers are in the new town. July attempts of the Hunghutze to destroy. The troops of the original garrison number, fuel collected for use on the railway. A 15,000, to whom must be added 6,000 wholesale operation of that kind is said to 15,000, as well as some 8,000 that have have recently taken place at the Manchuria marine, as well as some 8,000 that have have recently taken place at the Manchuria come in from Dalny, Nanshan and other places. Thus the total is about 29,000. The so-called gun-boat that the Russians used in Talien Bay at the Battle of Nanshan was a steamer of the East China Railway Company which had been armed for the occasion.
Dalny has already fallen into Japanese hands but the Bay is said to be thickly strewn with mines. From other sources information is given that fully 10 days will be required to clear out these impediments. The Chinese inhabitants of Kinchow and Talien welcome the Japanese enthusiastically, and gladly supply any labour that is required.

Wednesday, June 8.

Japanese leading newspapers agree that But does this prelude a final dash for the explosions recently heard at Port Arthur freedom?

The Till Chimag hear a leading the explosions recently heard at Port Arthur freedom? are to be connected, not with any destruction of material, as war-ships or docks, but with attempts to clear away the obstructions at the entrance of the harbour. This impression is confirmed by the proceedings there are indications that such is the case. But which involved the loss of the Gramiastchy and the Gaidamak. These boats and sent towards Liaotung are understood not to their torpedo consorts were clearing away object of providing for the exit of the Ruster and the railway is free. It is just possible, of san squadron when the supreme moment course, that an inconveniently large quantity the Japanese mines, evidently with the comes. It is almost inconceivable that the of rolling stock has been tied up southward Russians should sink their ships in the harbour instead of making an attempt to but can we assume that Kuropatkin would run the gauntlet of the Japanese squad have undertaken to despatch an army south-ron. They could at least inflict some ward without previously assuring himself injury on the latter and they would have a reasonable chance of effecting their escape, in part at any rate. They need not steam for Vladivostock. What they might do would be to head direct for Saigon where they could get coal enough to carry his final break for safety? If he take that be at once detected and stopped by the Chispirits of the garrison will be disastrous. If he defer it until after the assault its difficulties will be greatly augmented. It is a perplexing situation. Meanwhile the Japanese must be nearing Port Arthur. It is 12 days since the battle of Nanshan was fought and the distance is insignificant. Twenty days separated the landing at Pitsewo from the assault of Kinchow. We are getting very close to events of immense historical interest.

been connected with the destruction of mines

It is stated that nothing embarrasses the

Thursday, June 9. News continues to come of explosions at The steamer Wenchow, which arrived at Chesoo on the 7th, reported that on the 6th—the hour is uncertain—she Port Arthur. heard the sound of what seemed to be heavy guns, and a Japanese who came from Dalny on the 7th says that at 7 a.m. on that day the noise of a violent explosion was heard and a heavy column of smoke was seen ascending. Apparently the Russians are ascending. Apparently the Russians are making strenuous efforts to free the entrance of the harbour. There is no visible reason why they should not succeed if they

The Jiji Shimpo has a telegram saying that the Russians in their southward movement find themselves embarrassed for provisions and are cating horse-flesh. At least culty in keeping them supplied so long as the railway is free. It is just possible, of

of his ability to supply it.

The Chinese in Dalny are said to be carrying on their business in tranquillity.

In foreign diplomatic circles in Peking it is said (liji Shimpo's) that the arrangements for wireless telegraphy on Liautishan are intended to connect with a station at the between that alternative and wholesale Russian Consulate in Chefoo. How could suicide there can not, we think, be much that be? A wireless telegraphic apparatus what moment will be regarded as psychological. When will the Russian Admiralthink and conspicuous object. Any attempt to logical break for each treat. It is a big, unwieldy and conspicuous object. Any attempt to make such an installation in Chefoo would be seen break for each treat. It has taken that he at once detected and storage has the Chileston and the control of the control of the chileston and the

If, however, it be deemed necessary to utilize shan which was just then beginning, and PORT ARTHUR AND DALNY.

If, however, it be deemed necessary to utilize which was just then beginning, and may sail be beginning. The Jiji Shimpo's Chefoo correspondent writing on what he calls good authority, says that whereas several of the Russian says that whereas several of the Russian outside the selves do not look for anything decisive the wharf. They did not however destroyers used to remain outside the selves do not look for anything decisive the wharf. They did not however decision to the principal official buildings and which was just then beginning, and which was not won by the Japanese until 7 p.m. on the 26th. The Chinese further said p.m. on the 26th. The Chinese further said that before leaving Dalny the Russian burning and which was just then beginning, and which was just then beginning, and which was not won by the Japanese until 7 p.m. on the 26th. The Chinese further said that before leaving Dalny the Russian burning and which was not won by the Japanese until 7 p.m. on the 26th. The Chinese further said that before leaving Dalny the Russian burning on what he calls good authority, position must require many days. We ourselve the what the calls good authority, position must require many days. We ourselve the what the calls good authority, position must require many days. the wharf. They did not, however, destroy the wharves or the dock. General Sakaroff left the place at 11 a.m. having before the close of June.

Chinese junkmen report hearing repeated detonations in the vicinity of the coast of Liautung south of Talien Bay and at inland points on the 3rd and 4th instant. Some of these sounds would seem to have some of these sounds with the destruction of mines. if it be credible, would indicate that there was something like panic. Another strange allegation is that the Russians openconflagration at Dalny, but were of course ed the prison and released some 300 crimunable to determine the origin of the fire. They spread in all directions and commenced crusade of pillage and murder. Chinaman who tells the story and who is described as a responsible person, says that he himself saw 60 corpses, and that, being seized by the rioters, he had to pay 600 roubles to be released. Some Chinese residents were mulcted to the extent of thirty thousand. These 300 criminals subsequently embarked in junks, taking with sequently embarked in junks, taking with them their booty, and set sail, probably for the Shantung coast. They seem to have robbed indiscriminately, taking Russian property as well as Chinese. It may prove, however, that they were not purposely released, but that they took advantage of the demoralization of their guards.

There is a strange story about a yacht which arrived at Weiheiwei from Dalny on the 31st of May. She belonged to a Mr. Soper (or Sopher) of the iron-works at Dalny and when she left the latter place had on board her owner and two Russians. They were bound for Chefoo, but the yacht ultimately made Wei-Russians only on with the haiwei with the Russians only board. They declared that owing to rough weather they had been unable to reach Chefoo, and had to run for Wei-hai-wei, losing Mr. Soper en route. He was washed overboard by a heavy sea, with all his money on his person. Grave suspicious are entertained as to the truth of this statement, and the British Consul at Cheioo is said to have made application that the two Russians should be sent on to that place.

Another report says that the men on the yacht were originally 4, namely, the owner, an Austrian subject, a Russian subject and a British subject. The little vessel was overhauled en route by a Japanese war-ship, but nothing suspicious being found, she was released. This statement we take from the Asahi, which adds that subsequent examination convinced the authorities of the innocence of the men.

It is alleged that Port Arthur has been kept supplied with coal throughout the whole period of the war by Norwegian vessels plying between Shanghai and that

Friday, June 10.

It is alleged in the fiji Shimpo's telegrams that the Port Arthur Squadron has received orders from St. Petersburg to break out of. orders from St. Petersburg to break out of Port Arthur at all hazards and join the cling to the faith in its invulnerability and to Port Arthur at all hazards and join the refrain from any desperate enterprises Vladivostock ships. There is just a possi-bility that the attempt has been made. London reports the receipt of intelligence from Chetoo and Tungchow (in Shantung near the Liao Islands) to the effect that from the afternoon of the 6th until the morning of the 7th the sounds of violent cannonading were heard in the direction of Port Arthur. Now Admiral Togo's latest "reconnaisance in force," which included, we presume, the laying of mines, enemy raised the white flag, whereupon the took place between midnight on the 6th and Japanese ceased firing and moved forward, daylight on the 7th, consequently unless only to be received with a hot fire from both Cheloo and Kinchow have been mistaken in flanks. Naturally the men were much intheir dates, the sound of cannonading re-ported by them must have been connected raised the flag, no attention was paid to it. with some operation distinct from Togo's Probably we shall hear something from the an operation on shore, but scarcely at Port at Pulantien where, having themselves gross-are careful to keep out of range of Japanese Arthur, for the Japanese can not yet have ly abused the Red-Cross Flag, they sought planted guns to bombard the place. There to turn the tables by charging the offence do fit all is merely to keep the outposts busy of it all is merely to keep the outposts busy in the course of the place. reconnaissance. It may possibly have been Russians on this subject just as was the case is, however, the Tuchingtsz position, which to Japanese account. It is stated that we have already indicated as the place Russia's complaint with reference to this where another stand is likely to be made by incident was actually forwarded through the the Russians before allowing the Japanese to approach the last line of forts. Government declared it to be wholly untentuckingtsz is 7 miles from Port Arthur, able, the fault being really on the Russian and the sounds of a battle there might side. and the sounds of a battle there might side. easily be heard at Chefoo and Tungchow, In this context may be mentioned another supposing the wind to be in the right directerrible accusation against the Russians, and, if discovered, will emerge boldly and tion. On the other hand, such a battle Prior to the fight at Tahosang on the 16th would not commence at noon and continue of May, a reconnoitering party of 4 or 5 men pursued by the insurgents in Formosa, but throughout the night, and the same comunder a non-commissioned officer was sent gives no indication of decisive movements. the Russian squadron to effect its escape was assumed that these men had fallen into from Port Arthur; instead of setting out by the enemy's hands. Such proved to be the mid-day it would probably choose mid-night case, but the result is almost incredible.

Japanese troops applied themselves to ex- for the moment of making the essay unless, For when Kinchow was taken, the corpses Vladivostock, the sounds of firing would not Japanese soldiers to extreme fury, as well it have been heard at Port Arthur alone; they would have gradually extended sea-ward. We must await some clue to this mystery, but, on the whole, it seems more likely that privates of the Guards were made prisoners the cannonading had to do with an operation on shore.

In estimating the probability of a naval rush from Port Arthur, we have to rememvizan have not yet been rendered sea-worthy, and we also know that the Pobieda adventure, and though the world watches for able. To us what looks more probable is that the Russians will rely on being able to hold Port Arthur. The fortress is immensely strong and unless there be some secret source of weakness, the course most consistent with Russian methods would be to justifiable only on the hypothesis of its fall.

RUSSIAN METHODS.

Monday, June 6.

It is affirmed that the Russians grossly abused the white flag at the Battle of Nanenemy raised the white flag, whereupon the

ment applies to an attempt on the part of out by the Japanese and did not return. It

Then there is another consideration. leaving no doubt that they had been this been a sea-fight having for ulti-It is affirmed that the spectacle roused the might. This is the second story related of savage mulilation. The first was connected with the skirmish at Husan when some by the Russians, and the body of one of them was subsequently found entangled in the branches of a tree overhanging the river and horribly disfigured.

A first-class private of the 24th Regiment of the Twelfth Division, Horio Zenroku by name, declares that he was an eye-witness of the nurder of wounded Japanese by the Russians. Having been struck by a bullet in the cheek, he had rolled into a kind of ditch and was there endeavouring to bind up his wound when two companies of Russians charged the position and drove out the few survivors of its Japanese holders. Horio Zenroku, raising his head, saw the victorious Russians use their bayonets as daggers to stab the prostrate Japanese. They spared none, and as they gradually approached the He sprang to his feet, so disconcerting the Russians nearest to him that he obtained a minute's respite which he utilized to fly at top speed amid a shower of bullets.

Peking reports that according to statements made by Chinese in Manchuria, the Russians have transported a quantity of poison to the upper reaches of the Yalu, their plan being to throw it into the stream and thus destroy everything, man or beast, that drinks the water. Is this a Chinese invention? One can not readily credit such utter savagery, nor will it be credited without the strongest evidence. The Chinese themselves have resorted to such a device on many occasions. To poison the wells in a district is one of their recognised modes of warfare; or, at any rate, it was so once. May they not have judged the Russians subjectively?

Wednesday, June 8. Mr. Kuroda, the well-known correspondent of the Nichi Nichi Shimbun, writes under date of May 28th from the position of the First Army that so far as fighting is con-Now Admiral Togo's shan. When the First Division delivered its cerned it has degenerated into a succession nee in force," which in- attack in the afternoon, m portion of the of skirmishes. The Russians seem to confine their operations to the despatch of small parties of Cossacks and mounted infantry. About 6,000 of these with several mountain guns are scattered through the district in the neighbourhood of Aiyangpien and Samazi. They threaten the right wing of the Japanese and they aim at attacking the line of communicawithout in any way impeding the doings of the main army. Not an infrequent occurrence is the inroad of a small reconnoitering party deep into the Japanese lines. A young Russian officer and two or three men will conceal themselves in a grove to watch the movements of the Japanese,

LIA01UNG.

Saturday, June 4. London telegraphs that according to St. if he makes preparations to destroy it the effect upon the morale of his troops will be great. But how has he been placed in receipt of instructions? And if he possessed them before his communications were severed, is it conceivable that they were instructions of that nature? We know the bombastic tone adopted by Admiral Skrydloff before he set out from St. Petersburg. To him the fall of Port Arthur did not seem into the manufacture of the relief of Port Arthur. If he manufacture, instructions of that nature? We know the bombastic tone adopted by Admiral Skrydloff before he set out from St. Petersburg. To him the fall of Port Arthur did not seem into the category of even remote. The second Army appears to have pushed into the sequel of the recent skirmish at the latter place when the Russians evacuated Wafangkau. Chiukiatun is 28 miles north rather than attempt anything so suicidal. If clusable in the category of even remote clusable in the category of even remote

Russian guns which were in great part put out of action. The battle commenced at 5.30 a.m., and the Japanese waded through shan to the celebrated Temmoku-zan in the sea up to their waists to attack the Russian Japan where Takeda Katsuyori met with his left. From Chesoo we learn that on the 28th

An officer who returned to Moji on the and instant compares the position at Nan-the part of the Russians in Foochow. left. In consequence of the greatly superior strength of the Japanese, the Russians retired to Nankwanlin at 8 p.m., having previously destroyed such of their guns as had not already suffered from the Japanese fire. The Russian losses were 40 officers and 800 rank and file killed and wounded. The Japanese scent to have suffered very severely. There is nothing to be said against this report until the veracious General comes to speak of the killed and wounded. These he outs at 840, whereas the Japanese claim to speak of the killed and wounded. These he puts at 840, whereas the Japanese claim to have found 500 Russian dead upon the field. General Floug has studied his art badly. His reports never fail to provoke incredulity. But he seems to be improving. His latest essay stands certainly on a higher plane than its predecessors.

The statistics of the killed and wounded incredulity. But he seems to be improving. In fact, the Japanese ultimate success was due mainly to their artillary which from an early hour directed its fire. The admission as to the superiority of the Japanese artillery is very noteworthy. We know that the Japanese captured 78 guns, and that, in addition to these, the Russians had a battery at Tafanshan and two field batteries on Nankwanlin. That makes 98 guns accounted for, and we can not suppose that they failed to carry away any of the quick-firers posted for the defence of Nanshan. Altogether, therefore, their park of artillery was not inferior to the Japanese park, numerically—taking the figure (120) of Floug himself—and whereas the Russians had guns of position and had bills 300 feet high for platforms, the Japanese had only field-guns—so far as we know and so far as seems probable—which were posted on much lower elevations. Yet Floug admits that a great part of the Russian had made splendid preparations for much lower elevations. Yet Floug admits that a great part of the Russians had generally a proposed that their park of artillery is becoming a very indeed.

Shanghai contributes information as to the laster can within 150 metres. Shanghai contributes information as to the capture of the plapanese remained the laster can be kept secret, the better. northward of Mukden.

Floug telegraphs from Mukden, under date of the 4th, that on the 3rd instant a conflict took place at Wafangkou near Tehlisz between a Russian detachment and augmenting the Japanese force by captures, 2 or 3 battalions of Japanese infantry with and to the Russians that may seem the two squadrons of cavalry. One of the Japanese squadrons had a hand-to-hand fight they can clear away the blocking steamers, with a squadron of the Siberia Cossacks and they can not have any latitude of choice. was virtually annihilated. The other squadron was attacked by Russian mounted infantry and suffered heavy loss. The Japanese account of this affair is, as usual, very different. They claim that the enemy numbered 2,000 infantry, with some cavalry and battery of artillery, and that they were driven back, the Japanese casualties amounting to 4 killed and 4 wounded. General Floug's story is a triffe too tall.

An officer of a Japanese torpedo-craft which has just entered Moji is reported to have stated that the Russians are making every possible effort to put Port Arthur in a state of defence. They have built and armed new forts and are omitting no precaution. But their positions within gunshot from the sea have been much damaged by Japanese fire. The harbour is effectually sealed, no vessel larger than a destroyer, being able to emerge. The Russian shells range with accuracy to a distance of 10,000 metres and are very formidable. The clearing of Talien Bay is going on, but many mines are still in place there and navigation is very dangerous.

This may be supplemented by a report from officers who recently took two Japanof Tiger's Tail Spit for the purpose of re-connoitering. The result of their observations was that the third blocking operation succeeded admirably. The steamers were sunk right in the fairway, and ingress or egress became impossible for anything large than a gunboat. Thus the Russians are now compelled to carry on their business with the other world by means of Chinese junks when destroyers are not suitable. As confirming this account we may note that since the blocking operation on May 2nd, now more than one month ago, there has not been whisper of the emergence of a Russian war-ship from Port Arthur. The Russians may perhaps explain this by saying that they have received orders not to send out any ship pending the arrival of the Baltic Squadron, but the blocking steamers constitute a more pending the arrival of the Baltic Squadron, but the blocking steamers constitute a more credible explanation. We suspect, however, that strenuous efforts are being made to clear the passage. No other explanation offers of the explosions reported to have been heard within the past few days, for it would be extravagant to suppose that any precautionary destruction of material is going on. Connected with this matter is the vitally interesting question of the squadron's behaviour in the event of an assault being delivered by the Japanese at Port Arthur. Will the ships emerge and fight for their lives, or will they remain dependent upon the result of the land conflict, surviving if the

seems scarcely credible. The question for threatens a point between Mukden and them will lie between death and life, and if Liaoyang; one to meet and contain Nogi's they are to die, their business is to die hard, force, which, so far as we can see, threatens, To sink one Japanese cruiser would be a distinct gain from the Russian point of view; on the other hand, there is the chance of Concerning the suggestion that the Russian they can clear away the blocking steamers, it is to be observed that no indications

KOREA.

Friday, June 3.

The military critic of the London Times, writing on the 26th of April, makes the following remarks which have much interest in view of the development of events in

north-eastern Korea:—
The Russians still talk of finishing the campaign The Russians still talk of finishing the campaign in September, and the favourite plan for the attainment of this end is a march from Vladivostock upon Gensan. It is considered that during the summer a large army can be collected between Kharbin and Vladivostock and that no insuperable difficulties intervene to prevent the march proposed. The defeat of the Japanese, the occupation of Seoul, and the humble acceptance of peace by Japan are all discounted in advance. It is a model of that essential trait in strategical plans-raressima simplicitus. The appearance of Cosacks at Chang-seng will certainly serve as a reminder that General Kuroki's right flank is in some degree vulnerable unless the necessary measures are taken to protect it, but it is very improbable that any serious danger threatens from this side at the present juncture. We have, it is true, lost sight of General Mishchenko and his Cossacks for the best part of three weeks, and after his departure

If the advance of the Russians along the east coast is taking place in any force, the fact points to a somewhat contemptuous regard for the enemy. The coast line of march is at the mercy of the side controlling the sea, and by the slightest effort this advance can be checked and thrown back upon the mountains. In view of the opinions held in Russia respecting an eventual attack in force on this line, it would, however, be a prudent measure for the Japanese to reserve for themselves a sally-port upon the mainland, well in advance of each flank of the Gensan-Anju barrier. A detended harbour near the Ya-lu on one flank and at Songching or Plaksin Bay on the other would make it dangerous for the Russians to advance upon Gensan and Seoul, reached; another mentions Kowon, which Fraksin Day on the other would make a transgrous for the Russians to advance upon Gensan and Seoul, since Japan could always land troops at these places and attack her enemy in flank and rear. Each port would then fulfil the rôle assigned to El Arish by Napoleon in the defence of Egypt against a land attack from Stria. attack from Syria.

Meanwhile the Japanese Consul at Wonsan has warned his countrymen there that the Russians are advancing and that serious events may at any moment be expected. to make timely preparations for departure in case of need. But there are always many folks who can not possibly make such preparations, since their getting ready depends upon finding a market for their goods and chattels and no market can be found in a moment of panic.

The Russians appear to be advancing steadily. Their base is said to be Kyongsong where they are collecting large quantities of ammunition. Their requisisitions for supplies continue on an increasing scale. It is alleged that the so-called Korean soldiers are working in the service of the Russians. It is also reported that the Russian outposts have reached Kowon, which is only 25 miles north of Wonsan, but inasmuch as the telegraph is not working, rumours of this kind can not be implicitly accepted. We hear nothing of the strength of the Russians, but it may be taken as very doubtful whether they are in considerable force. We have frequently pointed to the fact that such a line of march as that along the north-east coast of Korea is in the last degree perilous, being within easy striking distance of the sea-shore throughout its entire length. This must be just as evident to the Russians as it is to outsiders, and the presumption therefore is that they are employing a very mobile force, probably of cavalry only, or perhaps of cavalry and mounted infantry, which, should its com-munications with Kyongsong or Possiet Bay be severed, could without much hardship ride westward and recover touch with its starting-place by the Tumen route. On the other hand, to possess such capabilities a force must be small. Even a small force, however, may work great mischief in the absence of opposition, and the Japanese public will be glad to hear that some step has been taken to check this incursion. The capture of Wonsan would place the Russians within striking distance of Pyongyang, for it will be remembered that in the China-Japan war of 1894, one Division of the Japanese army landed at Wonsan and marched thence to the attack of Pyongyang,

reached; another mentions Kowon, which is only 131/2 miles distant. Wonsan telegraphed on the 3rd that the Russian force in Hamheung is 220, and that at Kapsan there are over a thousand, who seem to be about to move to Songjin.

It is stated that the rapid growth of

Roman Catholicism in Korea has led to various abuses of an indirect nature, inas-He urges them to be calm and collected, and much as men of bad character embrace the foreign faith for the single purpose of availing themselves of its protection against the consequences of their own law-breaking. There has therefore been much negotiation between the French Representative and the Korean Government, with the result that a draft to receive final approval. Its principal pro-visions are (1) that French religionists shall houses before evacuating the place, and they not employ any improper methods to propather retired to Kowon, where they set the gate their faith; (2) that French religionists then retired to Kowon, where they set the gate their faith; (2) that French religionists the torch to 52 houses. Moreover, at the latter shall not have unlimited liberty to acquire place they stabled the chief local official. lands and build places of worship in latter shall give them up, and shall not be subject to arbitrary domiciliary visits from local officials; (6) that French missionaries shall not interfere directly in civil or criminal cases, but shall submit their complaints, if they have any, to their own Legation; (7) that French missionaries shall strictly forbid converts to take advantage of their religious status for illegal purposes, and shall duly inform against any persons violating this interdict; and (8) that further details essential to the carrying out of this convention shall be subsequently discussed and arranged.

Sunday, June 5. The Russians in north-eastern Korea have advanced far enough to come into collision with the Japanese. A force of twenty odd Cossacks reached the vicinity of Munchhon hon, and at 12.15 p.m. supply.

hastened in with news that the Russians were advancing. The Japanese rode out, and presently sighted two Cossacks at very close range. One of these was killed and the other wounded. The Japanese then the other wounded. The Japanese then cocupied an elevation which commanded the Russians are in very paltry strength. We hear now of 200 men arriving at Yongheung and striking thence westward towards marched thence to the attack of Pyongyang, a distance of 119 miles.

Korean domestic politics seem to have fallen once more into a welter. We hear again of rivalry between the tactions of Lady Om and the Crown Prince. This is alleged to be the remote origin of the trouble while for proximate cause students of the situation say that Hyon Yong-un and Liry Yong-tai have been acting in collusion to effect the overthrow of Cho Pyong-sik, but that Hyon's power having declined, he has resigned and is likely to be replaced by Chhin Seng-heun. What the precise significance of these things may be we are not effect anything warlike in the field or on the only in the field or on the original base. Had the invasion been an original base. Had the invasion been an original base.

sea, they wreak their vengeance upon private

property.

The Russian force at Hamheung, already 600 strong, is said to have been re-inforced by 200 Cossacks, a portion of the band of 700 that attacked Anju on the 10th of May. The foreign residents of Wonsan are said

to have sent away their families.

Monday, June 6. The Russian raiders seem to be now stationary at Yongheung, which is about 25 miles north of Wonsan. They appear to have miles north of Wonsan. They appear to have been effectually checked, for the moment at all events, by the skirmish at Munchhon on the 3rd instant. There is no news of any re-inforcements reaching them from Pukchhong, which is regarded as the advanced base of the invading column. What did these Cossacks expect, we wonder. They can scarcely have looked to expel the Japanese garrison from Wonsan without a struggle. It is altogether a very inexplicable movement.

Tuesday, June 7. The Russians appear to be establishing a most cruel record is north-east Korea. After convention has been prepared and is likely their repulse at Munchhon, where they had to receive final approval. Its principal pro- 2 men killed and 3 wounded, they burned 8 lands and build places of worship in Korea; (3) that French missionaries when travelling in the interior must have passports; (4) that when converts violate the law they shall be impartially judged by local official; (5) that if any law-breakers take refuge in the houses of missionaries, the latter shall give them up, and shall not be subject to arbitrary domiciliary visits from Korean hunter, and that a private person in Korean hunter, and that a private person in Kowon met his death at the hands of the Cossacks.

As for the raid itself, the appearances are that the Russlan intention had been to capture Wonsan, where the presence of a Japanese garrison was seemingly unsuspected, and to make that place a base of operations against Pyongyang. Failing in that part of their design, the Russian forces are said to have struck westward from a point northward of Kowon. They live upon the resources of the country and therefore it matters little to them whether they have or have not a base, or whether or not they become a column in the air. It is a comparatively new method of warfare, not unlike Cossacks reached the vicinity of Munchhon that pursued with so much success by the on the 3rd instant at 1.45 p.m. That forenoon a squadron of Japanese cavalry under generally carried ten days' provisions in Lieutenant Nakamura proceeded to Munchhon, and at 12.15 p.m. some Koreans hastened in with news that the Russians were advancing. The Japanese rode out, some column should not give a great deal of the col that pursued with so much success by the

almost impossible. We do not doubt that some step will be taken by the Japanese,

The Korean local officials along the line of the First Army's advance seem to be now seeking to reap profit for themselves out of the disturbed conditions. They are said to have forwarded a vague statement to the central authorities, in the sense that the Japanese, while requisitioning large stores of provisions and fodder, paid in some cases one half of the cost and in others nothing at all. Hence it became necessary to defray these charges out of the public funds. This complaint is said to be regarded simply as a device for diverting the proceeds of taxation into the hands of the officials themselves, and the Seoul Government has addressed a strong note to the complainants, censuring them for such vague statements, declaring that nothing of the kind is credible with regard to the Japanese Army, and ordering that chapter and verse should be given for the charges preferred. It is a difficult task to deal with such people as the Koreans

A disturbance is reported from Kyong-sando. We gather from the reports that it was a very disorganized attempt on the part of three or four hundred unarmed Koreans either to wreck the Seoul-Fusan Railway or to destroy one of the con-struction stations. A small force of 6 Japanese gendarmes sufficed to dis-perse the victors, who could only oppose stones to bullets. One or two of their number were killed and 3 or 5 taken prisoner—the accounts vary. The place of the occurrence is some 70 miles from Fusan, and the rioters are called by a name which suggests that incendiarism is their principal employment.

A small section—apparently only one mile—to the north of Yongsan on the Seoul Wiju line has been completed and a trial train has run over it.

The long-sought privilege of fishing along the coasts of the two north-western provinces of Korea has been granted to the Japanese. A formal declaration of the fact vas conveyed to the Japanese Minister in Seoul on the 4th instant.

Mr. Hayashi is expected to return im-mediately to Japan for the purpose of con-sulting with the Government in Tokyo.

Prince Li Chi-yong and Messrs. Chhin Sang-heung and Li Hwai-on are said to be contemplating a strong movement for the reconstruction of the Korean Cabinet and for general administrative reforms. Their success, however, is considered problematical unless they can secure Japanese support.

Wednesday, June 8. Kowon has not died from the wound inflicted on him by the Cossacks. The latter
burned 59 houses in Kowon. The bodies of
the Russians who perished in the Munchhon

a Chinese official who upbraided him for skirmish lie still unburied. The hunter who helping the enemies of his country, that he shot a Russian says that the Russians, after the skirmish at Munchlon, retired to Kowon and proceeded thence westward towards Pyongyang. The 300 Russian troopers who had come as far south as Chongpyong,

Meanwhile M. Lessar is said to be vehein 1902, \$45 a share: in 1901 and 1900, Pyongyang. The 300 Russian troopers at when occasion arose.

Meanwhile M. Lessar is said to be vehenate now moved towards Nyongwon, which is among the mountains in northern Korea. There are now no Russian soldiers in Yong-heung. This hunter says further that the Cossacks, more suo, carry no provisions.

At when occasion arose.

Meanwhile M. Lessar is said to be vehenated to be the control of the Chinese Government of the Chinese Government of the Standard Russian railways and in 1897, \$33 a share; in 1901 and 1900, heavy the Russian soldiers in Yong-heung. This hunter says further that the Cossacks, more suo, carry no provisions.

affair of any magnitude such a step would. They live on the resources of the country, involve its immediate collapse. But being and when the natives are unwilling to what it is, to deal with it strategically seems furnish supplies, the Cossacks simply take what they want. It was because the head-man of Kowon did not show sufficient but in the meanwhile demoralizing effects alacrity in the matter of supplies and because will have been produced on the Korean he failed to give information of the propinhe failed to give information of the propin-quity of Japanese troops, that the Russians stabbed him.

> Thursday, June 9. It is reported from Wonsan that on the 6th instant a detachment, of Cossacks destroyed the telegraph office at Pukchhong and carried away one of the operators. They have similarly treated the office at Songjin. There is uncertainty as to the place whence the former detachment came, but as Pukchhong is the point where the coastwise road joins the road running inland to Kapsan whither some of the Cossacks are understood to have proceeded, it is evident that the town lies exposed to raids from both directions

> In all this business the salient fact is that the Russians are fighting against Korea, not against Japan. The people they rob are Koreans, the murders they commit are done on the persons of Korean subjects, the women they outrage are Koreans, the houses to which they apply the torch are Korean. There has been no declaration of war against Korea, nor is there any pretence that a state of war exists. On the contrary, the Russian Government has declared its emphatic intention of declining to regard as autonomous any announcements made by Korea so long as Japanese, troops are within the latter's borders. No grounds whatever can be per-ceived for this cruel warfare which the Cossacks are carrying on. It would be in-excusable even if they were openly fighting with Korea. But truly one is reluctantly obliged to admit that their strength in this combat has been exercised mainly against defenceless and peaceful persons and their prowess displayed against private property.

> Cossacks are said to have appeared in the vicinity of Nyongwon, away in the interior of northern Korea among the mountains, They seem to be playing a kind of bogie

> There is talk of organizing a Korean militia and distributing it in bands here and there thoughout the raided regions. Such a remedy would probably be of little avail.

CHINA.

Monday, June 6.

We read in the Peking correspondence of the Asalu Shimbun that some of the Hunghutsze, to whom the Russians have furnished arms and provisions, are only awaiting an opportunity to made a coup on behalf of the Japanese. One band of 500 or 600 is especially mentioned. It is under the command of the often-heard-of Tien Ipan, and It is now stated that the headman of has its head-quarters at Teian, a town some

causing much annovance to the Russian army generally. He believes that their possession of modern arms and munitions of war clearly indicates receipt of assistance from some powerful source, and he suspects the Chinese Government of being that source. Unless speedy steps be taken to check the nuisance, he declares that the consequences will be on China's head. It is almost amusing to find a Russian Representative taking such a line. If Russia expected China to reserve order in Manchuria, why were the Chinese officials deprived of all efficient administrative authority? It is too late to appeal to these officials now. By her own arbitrary aggressions Russia has thrust aside the Chinese, and she can not expect them to suddenly recover authority for the purpose of exercising it in her interests.

Tientsin says that the Russians have formally announced that in the event of any wrecking of the railway, all residences of Chinese subjects within 20 kilometres on either side of the line will be burned. is the second time that such a threat is said to have been made. We shall believe it when it is actually put into operation.

Wednesday, June 8.
We hear again (Asahi's telegrams) of approaches by M. Lessar to the Chinese Government with reference to a lease of the Sinkiang district. This project is supposed to be a set off to England's doings in Tibet, and to be also intended to remind China that if the pressure be relieved on her eastern frontier, it will begin to be exercised on her north-western. The Peking Government probably regards Sinkiang with very little favour. A constant source of outlay, the region contributes nothing to the Empire except a certain measure of extension, and if its leasing to Russia could materially relieve the political situation, Chinese statesmen would probably not be averse. What one can not but admire is the vitality of Russia's diplomacy. Her hands ought to be full enough in all conscience, yet at this moment when the districts in Manchuria upon which she has lavished such immense sums are rapidly slipping from her grasp, she seems to be thinking of launching out in new directions. If she can not reach Peking and strike for the domination of China from the East, she will change her point of advance and attack from the north-west. Such indomitable perseverance should succeed.

Thursday, June 9. The Chinese Government (according to the fiji's Feking correspondent) have rejected Russia's application for railway, telegraphic and mining privileges in Sinkiang. The formal refusal was handed to M. Lessar on the 6th. This is very natural. China must be blind indeed if she consent to the construction of any more Manchurian railways.

STANDARD OIL DIVIDENDS.

On the 15th of June the holders of the \$100,000,000 of stock of the Standard Oil Corporation will receive \$8,000,000, making the dividend for the past half of the current

OFFICIAL TELEGRAMS.

(Received at the Headquarters Staff, on the afternoon of June 3rd).

The total Japanese casualties at the battle of Kinchow were 4,204. The killed numbered 749, amongst whom were 33 officers and 3 sergeant-majors. The wounded totalled 3,455, including 100 officers and 12 sergeant-majors.

(Official Telegram.)

Liaotung Peninsula, June 2. A body of Japanese cavalry, in the neighbourhood of Likiatun, some 23 miles from Pulantien, on the 30th May at a little after noon, encountered a force of the enemy consisting of one or two companies of infantry, five or six squadrons of cavalry and a company of mounted infantry. After a fight of about 2 hours, the Russians were compelled to retreat northwards. The were compelled to retreat northwards. The Japanese casualties were 26 killed, including one officer (lieutenant), and 37 wounded, including 4 officers, namely, a captain and 3 lieutenants.

(Received in Tokyo, June 3rd.)

The Harbin newspaper states that great inconvenience has been caused owing to the hurning of fuel by the Hunghutze. This burning of fuel by the Hunghutze. This fuel was intended for use on locomotives arunning on the Manchurian and Chinese

The ingress and egress of Chinese into and from Blagovestchensk is strictly forbidden. Admiral Skrydloff is accompanied by

Prince Kilkoff, Minister of Communications, arrived at Harbin on the 23rd of May.

from his hands.

[Received from the Officer commanding the Second Army on the afternoon of the 4th.]

Our cavalry detachment which took up a position near Chukiatien on the instant, found itself gradually attacked by the enemy in increasing force at 3 p.m. Reinforcements were therefore despatched and by 5.30 p.m. the enemy was driven back in the direction of Tehlisz. His force consisted of about 2,000 infantry, some cavalry and a battery of artillery. Our casualties were 4 men killed and 4 wounded.

(Received from General Kuroki on the forenoon of the 5th.)

A detachment of our troops in the neighbourhood of Aiyangching sent out a company on the 3rd instant to reconnoitre in the direction of Samazi. At 2 p.m. this company encountered a force of 500 or 600 of the enemy's cavalry and drove it back, inflict-ing heavy loss. We had one man killed and 3 wounded. This occurred to the west of Sinkailing.

[Received at the Naval Head-quarters on the 5th instant.]

Captain Takagi, of the Chitose, which ship is on guard duty off Port Arthur, sends word by wireless telegraphy, that 4 poles and a building like a guard-house have been erected on Liautishan. One of these poles is apparently arranged for purposes of wireless telegraphy. This morning (4th) several heavy explosions were heard in the direction of Port Arthur, and columns of smoke were seen to ascend. Commander smoke were seen to ascend. Commander lishida, of the Second Destroyer Squadron, at 7.40 p.m. the Russian ship which was laready finished. At a point about 1,000 reports that the Ikasuchi sighted and des-

troyed a mine (or mines) off the Nan-Sanshan Islands.

Captain Takagi further reports that no signs of a wireless telegraph station are to be seen at Tachin-tao or Pechinhwang-tao (i.e. the Miao Islands). Again at some time after 7 p.m. on the 4th fresh explosions were heard in the direction of Port Arthur, but there was no smoke.

Some French citizens are reported in Tientsin to have erected a wireless telegraph station at Chingwan-tao. (This station may be in connexion with the constructions made by the Russians on Liautsihan.)

[Received at the Imperial Naval Department .5th instant from Vice-Admiral Togo.]

This morning the Fifth Destroyer Squadron, returning from watch duty at Port Arthur, reports that at 7.40 p.m. on the 4th instant, when scouting on the immediate east of the port, a Russian gunboat like the Giljak was seen to blow up and sink off the Chingtaoshan promontory. Probably she struck one of our mines. Another gunboat, several torpedo-craft and some steamlaunches, which were engaged clearing the approach, hastily entered the port on observing the disaster.

(The Giljak is a gun-boat of 1,300 tons displacement. She was launched at St. Petersburg in 1897 and had a speed of 12 knots.)

[Received at the Foreign Office.]

The Vladivostock journal of the 26th Admiral Bezobrazoff, who is to take com-of April alleges that the circum-Baikal mand of the first squadron now in the Far line has been completed. It is not yet complete, but it amply suffices for the transport of troops. The cost of the line has been immense, namely, 217,777 roubles Batches of wounded men from the Yalu per verst. The most expensive of the are constantly arriving at Liaoyang. As Russian railways hitherto constructed in the each arrives they are visited by General Far East had been the Zabaikal, which cost Kuropatkin, and many received decorations 77,170 roubles per verst. The total outlay on this circum-Baikal section was 53,620,745 roubles. There are 19 tunnels and 189 bridges. The work was commenced in

[Received at the Naval Department on the forenoon on the 6th.]

Vice-Admiral Kataoka reports that a section of the Talien Bay clearing squadron re-entered the northern Sanshan Islands and also Taku-kau on the 4th, and found no houses in the former place nor any hostile preparations. The people said that several days previously the Russians had removed the telegraphic instruments, and that in retiring they had poisoned the sources of the drinking water. Steps are being taken to analyze the water.

Admiral Togo reports in reference to the operations of the squadron engaged in clearing Talien Bay, that the work, begun on the 3rd, was continued with unexpected success, despite the unfavourable weather. Forty-one of the enemy's mines had been found exploded by 2 p.m. of the 6th. Also a person employed by the enemy in the capacity of pilot, had been engaged, and by his aid a good channel was discovered so that light draught vessels are enabled now to ply in the bay. The clearing squadron continues to work hard, and crews and ships are all safe.

[Received at the Naval Department on the forenoon of the 7th instant from Admiral Togo.]

have been the gunboat Gremiastchy (1,492 tons). The Destroyer Squadron when approaching Hsienshang Promontory was fired at several times from the Laoluichui fort. The Squadron therefore drew off to the south, whereupon the Russian vessel advanced from Port Arthur to attack the destroyers, when suddenly, at a point about a mile south of Chingtao Point, she blew up with a heavy explosion and went to the bottom. At the same time another vessel like the gunboat Gaidamak (411 tons), which was near her, disappeared. The which was near ner, disappeared. The enemy appear to be working hard to clear away the mines at Chingtao and Liautishan promontories. Several small craft thus engaged were observed, but immediately on the explosion they hastened to enter the port. Several of the enemy's shells fell near our squadron but did not inflict any

(The Gremiastchy was built in 1893 and the Gaidanak in 1894).

[Received at the War Department on the forenoon of the 7th from the Takushan Army.]

On the 5th instant in the morning the detachment stationed at Fankiatun on the Kinchow road, proceeded to Chienkiatun, about 10 kilometres to the north-west of Takushan, and lay in ambush for a squadron of 30 Russian cavalry. The enemy was driven off in disorder. Two troopers and 13 horses were captured. This cavalry detachment belonged to the 2nd company of the 5th Regiment of Siberian Cossacks.

[Received at the Naval Department on the after-noon of the 7th instant from Admiral Togo.]

Four gun-boats went in to Port Arthur after midnight on the 6th instant and performed a reconnaissance in force. enemy opened a fierce fire on them. No 4 gunboat was struck 8 times and suffered some injury; she had one man killed and 2 slightly wounded. All the rest are safe,

(We presume that explains the sound of cannonading heard in the direction of Port Arthur by Chinese junkmen during the night of the 6th.—ED. J.M.)

[Received at the Foreign Office in Tokyo.]

The Harbin Daily News of May 27th says that Prince Kilkoff reached Harbin on May 24th and left on the 26th for Moukden, where he had a consultation with Viceroy Alexieff. He subsequently set out for Liaoyang.

Viceroy Alexieff reports that when the battleship *Pobieda* had been repaired and was about to take her place at the battleship anchorage, she struck a Japanese mine which had floated into the harbour, and was again injured. This happened between the 6th and the 12th of May.

The whole of the Manchurian Railway has been placed under military control, the Director-in-Chief being General Chitoroff, who is now in Moukden.

Vice-Admiral Kataoka reports in a telegram received at the Naval Department on the 8th instant at 11 p,m. that the Squadron engaged in clearing Talien Bay found 11 mines on the 7th and 10 on the 8th, all of which were exploded. The vessels and their crews are all safe. (The Authorities at the Naval Department note that from the 3rd to the 8th instant the total number of mines destroyed in Talien Bay was 62.

[Received on the 8th instant at 4.20 p.m.]

at a point south-west of Southern Sanshantao there are sunken ships. The former seems to be the Bayarin, the latter the Noni.

[Received on the afternoon of the 8th from Admiral Togo]

to Port Arthur to perform a reconnaissance in force. The enemy directed some fire against them. The Yakumo's launch had one warrant officer and one sea-man killed. All the rest were uninjured.

[Received at the Naval Department on the 8th at 9.40 p.m.]

Vice-Admiral Kataoka state that on the 6th instant a party of marines were landed on Southern Saushan Island from the Matsushima. The light-house appeared to be undergoing construction: some ma-terials for the purpose lay near. There was no lighting apparatus. Of four attached brick-buildings one was destroyed and three had their floors broken, but these three can be used. There were signs that the electriclighting station and machinery had been blown up. One look-out roofed with iron stood intact. In the left bay there were two wharves. Their sides had been broken, but they offer facilities for landing. On the south-east of this island there were 5 building which appeared to have been used for hospital purposes. They were entirely un-furnished, and their floors, doors and windows were all broken, but the fire-places and the plaster were intact so that some use could be made of the buildings. One of these had evidently served for disinfecting purposes. The implements were intact but one of the interior boxes was missing (Here follow some other unimportant particulars, including the taking of some horses, cattle and fowls).

The Japanese Consul at Lyons telegraphs under date of the 8th instant with reference to the increased duty on silk fabrics:—
"The French Chamber of Deputies has unanimously approved a bill for increasing the import duty upon pure silk fabrics and habutaye.

DEATH OF MR. JNO. W. HALL

One of the most prominent and wellknown figures in the Yokohama foreign community passes away with the death of Mr. John W. Hall, which we record to-day with regret. Mr. Hall, who was born at Sevenoaks, Kent, in 1848, came to Japan in 1870, and engaged for some time in teaching in the Kaisei Gakko, Tokyo. Afterwards he came to Yokohama and spent some years in the firm of Busch Selventh and Co., and in conducting the Schraub and Co., and in conducting the No. 61, finally starting as an auctioneer in 1884 and occupying the large premises at No. 58, now converted to the use of the Chartered Bank. It was as an auctioneer The title "Patchwork" seems to be derived introduced on the Government experimental that Mr. Hall became so well-known to the partly from the cover, which is in fact what farms in the Hokkaido, its cultivation has foreign communities of Tokyo and Yoko-the name implies, and partly from the con-rapidly spread until at the present time it is hama. A man of keen business instincts, the tents which consist of contributions by several most as cheap and as succulent in Yoko-

demand upon his nervous energies, for he their talented editress promise further issues, was never the same man again. The end and we venture to predict that they will find a constantly increasing number of readers. a.m. on June 3rd, those gathered around his bedside being Dr. Wheeler, Mr. Tom Abbey, and Miss Wright, the nurse. He had been also partake of the character of patchwork, and prominent Ergermason, and held high It should be mentioned that the frontispiece Between the night of the 7th and dawn a prominent Freemason and held high It should be mentioned that the frontispiece on the 8th, eight torpedo-launches were sent office in the Craft but latterly retired from consists of three flags, the Stars and Stripes, participation in its proceedings. Though the Union Jack and the Rising Sun, united averse to assuming part in the public affairs by a true lover's knot, and that beneath of those among whom he lived, Mr. Hall was this auspicious combination some very clever a warm supporter of any movement for the relief or the betterment of others and many have had occasion to be grateful for his marching, to the unostentatious kindness. The deceased are patchwork. leaves a widow, who is at present residing in England, a mother, age 91, and some sisters to whom we extend our sympathy.

> The mortal remains of Mr. Jno. W. Hall, were interred in the General Cemetery on the afternoon of Sunday last in pre-sence of a very large company of mour-ners. A service was opened at 5 p.m. in Christ Church, Rev. W. P. G. Field officiating, after which the urn with the many floral tributes sent by friends of the deceased gentleman, was conveyed to the Cemetery and the concluding portion of the funeral service was performed. The pall-bearers were: Dr. E. Wheeler, Capt. Tipple, and Messrs. H. C. Litchfield, E. P. Pallister, R. Abbey, P. Nyffenegger, H. J. Neville, and S. Moss. Mr. F. J. Moss and Mr. T. Abbey were present as chief mourners. There was a large representation of the Freemasonic bodies, with which Mr. Hall was closely connected, and the tributes of which were duly rendered to the memory of the deceased gentleman.

" 10KYO PAICHWORK,"

One of the most touching and not the least effective devices for assisting the wives and children of soldiers at the front, is a monthly journal published in Tokyo under the editorship of Miss Dorothy Barclay. This little maiden of some twelve summers tells the story of her enterprise in verse

This spring, though you and I be glad The people of Japan are sad; For many families are left Of Father, Son, or Friend bereft. We English wish to help Japan, And children must do all they can To help collect the gold to send Far, far away to suffring friend. Now I have just a little plan, Which, though it would not save Japan, Will save a household from starvation And give us all some occupation. Its just a simple little book, Inside of which you cannot look, Unless you pay a ten sen fee; But ah! what wonders then you'll see. Such tales you never can have read, And you on literature 'Il be fed.

Now surely you 're not going to shirk

The reading of this fine "Patchwork."

draughtsman has depicted two soldiers, a blue and a white, marching, in very truth marching, to the war. The soldiers, too,

THE BAKU OIL FIELDS.

The total production of the Baku oil fields in Russia for 1903, according to the report prepared by United States Consul Chambers, was 71,626,611 barrels, as compared with 76,383,463 barrels in 1902. This represents 76,35,465 barress in 1962. This teptes the adecrease of 4,756,852, which is at the rate of 13,000 barrels a day. In addition to the Baku oil fields, there is a production at Grosni of about 3,000,000 barrels, which would bring the total yield Russian oil up to 74,626,616 barrels, or 204,456 barrels a day. Mr. Chambers estimates that the total fire and strike loss in the Russian oil fields in 1903 was about 4,200,000 barrels. In the Baku fields the average daily production in 1903 was 196,237 barrels, as compared with 209,270 barrels in 1902. Allowing 75,000,000 barrels for the production of the United States, the total yield of the world in crude petroleum for 1903 must have been about 155,000,000 barrels. were 189 wells completed in the Baku oil fields during 1903, with an average yield of 317 barrels each. In 1902, 236 were completed and the average output was 292 barrels. The new wells ranged from 1,225 to 1,500 feet in depth. There were 2,431 wells at the close of 1902 and 3,434 at the close of 1903. Of the total on Dec. 31 last, only 1,420 were actually producing, while 1,276 were standing idle, and the remainder were being drilled deeper or undergoing the process of cleaning out and repairing. No new territory was added during the year and the Russian oil fields are still confined to a few square miles on the Apsheron peninsula, near the borders of the Caspian Sea. The most remarkable fact in connection with the Russian oil industry is that such an immense amount of production should come from such a comparatively small number of wells, and from such | limited area of productive oil lands.

ASPARAGUS.

Asparagus, which is still somewhat of a luxury in England and some parts of the United States, is a vegetable greatly en evidence on the tables of foreign residents in Japan throughout the Summer. Originally hama. A man of keen business instincts, the tents which consist of contributions by seveexercise of which was only slightly impaired by the deafness with which he was principal qualification being that the ininflicted, he conducted the operations of terior limit of a writer's age must be 8 and

rica, all within the space of some three sympathise, and so successful have they
months. There is no doubt that this hurried been that although the perusal of the journal
stock of strength, besides making a great been collected. The little contributors and Pliny's time. In our own day the British farmer has been frequently urged to give on a large scale, with every encouragement and the gross increase over the income of on a large scale, with every encouragement and the gross increase over the income of that can be derived from the results obtained 1902 \$45,425,586. The net excess of that can be derived from the results obtained income over disbursement for 1903 was \$184. by the few who have done so. There is the standing case of the Californian grower, who made £1,200 out of asparagus in a single season. Speaking of which well-deserved success, the British grower dryly remarked, that bursements of the year were \$349,453,707, "if London drew its supply of the little an increase of \$36,522,152 compared with vegetable queen from California, one could 1902. Of the total, \$158,131,967 was paid understand why it costs about a penny a stick in London restaurants, and even then turns out all stick." As a matter of fact the best English asparagus bed contracts not involving life contingencies, requires three or four years to come to \$766,057 in dividends to stockholders, its full estate, but this being attained, it will \$62,994,980 for commissions, \$33,638,979 be prolific for twice as long afterwards. As for salaries and medical examiners' fees to the wholesomeness of asparagus, there are not two opinions. Evelyn instructed his poses. This classification shows that not two opinions. Evelyn instructed his poses. nourishing than asparagus," which must, while the cost of management, including however, be regarded as a far-flown fancy of the old gossiper. Of more interest is the fact that Queen Elizabeth was extremely fond of asparagus, which she preferred and a sparagus, which she preferred and a sparagus, which she preferred and a sparagus is the sparagus. fact that Queen Elizabeth was extremely 609,883 policies, insuring \$1,107,643,517, fond of asparagus, which she preferred cold, and terminated 317,640 policies, insuring early asparagus as a necessary, and he could get it both cheap and good. "Asparagus" comes to us through the Latin from either form, nor is it of much consequence from which. Dr. Johnson undoubtedly thus asked for another portion at the "Mitre," and also enrolled the word in his dictionary. The learned Dr. Parr always called it sparrowgrass; and the no less eminent Dr. King-who imitated Horace in an "Art of Cookery"-speaks of those who "your infant peas to sparrowgrass prefer."
Epicures, however, care less for the form of
the word than for the quality of that which it represents. Long may asparagus find its place on foreign tables in Japan.

LIFE INSURANCE STATISTICS.

The annual report of the New York State Insurance Department shows that the gross assets of the life insurance companies doing business in that State on December 31, 1903, business in that State on December 31, 1905, were \$2,226,423,202, an increase of \$163, 92,309 over 1902. Of this amount New York state companies have \$1,347,102,262, an increase of \$92,661,332, and companies of other states \$879,320,940, an increase of \$92,661,332, and companies of other states \$879,320,940, an increase of \$167,731,065. The liabilities of the several companies, excluding gross surplus of \$167,795,982 and special funds of \$151,006,074, and \$1 were \$2,226,423,202, an increase of \$163,-992,398 over 1902. Of this amount New

farmer has been frequently urged to grow it 977, making the gross income \$534,161,859 and the gross increase over the income of 1902 \$45,425,586. The net excess of 708,151, while for 1902 it was \$175,804,716. The total premium income for 1902 was \$393,-832,410; for 1903, \$431,839,093. The disfor claims, \$31,497,758 for lapsed and sur-rendered policies, \$30,617,368 in dividends to policy holders, \$528,556 on supplementary fond of asparagus, which she preferred cold, and terminated 317,640 policies, insuring and served separately, with oil. A household book of this period has an entry, "two cross of sparrowgres 12d.," which, being a housekeeping item, probably refers to two usekeeping item, probably refers to two is 976,191 policies issued, insuring \$1,759,500 for the above is 1,759,500 for the above is 1,750 for the above is 1,759,500 for the above is 1,759,500 for the a In those days asparagus was, doubtless, considered a luxury, and wealthy people had learned to appreciate it. But a century ago the French "ouvrier" looked upon his 69,020 policies more, and increased the amount of insurance written \$113,668,342. early asparagus as a necessary, and he amount of insurance written \$113,668,342. could get it both cheap and good. "Asparagus" comes to us through the Latin from its original Greek source; while the old English name "sperage" is as clearly derived from the French "asperge." But "sparrowgrass" may have been corrupted from either form nor is it of guest course. York.

THE GENESIS OF THE TORPEDO.

Mr. Alan H. Burgogne, Author of "Sub-marine Navigation Past and Present," sends the following interesting letter to the Globe

SIR,—In your issue of to-day appeared a small paragraph relating to the history of the torpedo. It is stated that the first application of this mode of offence was made in 1861. To David Bushnell, of Connecticut, is attributed the idea of attacking a ship by applying to its submerged part a magazine of powder, which when exploded by devices contrived for the purpose should disable or destroy her.

for the purpose should disable or destroy her.

In a paper read before the American Philosophical Society on June 8, 1798, Bushnell relates:—"In the year 1777 I made an attempt from a whale boat against the Cerberus frigate (British, 32 guns, Captain Sir Jacob Wheate, Bart.), then lying at anchor between Connecticut River and New London, by throwing a machine against her side by means of a line. The machine was loaded with powder to be exploded by a gun lock, which was to be unpinioned by an apparatus to be turned by being brought alongside of the frigate. This machine fell in with a schooner at anchor astern of the frigate, and concealed from my sight. By some means or other it was fired, and demolished the schooner and three men, and blew the only one left alive overboard, who was taken up very much hurt."

valuable experiments in 1831, and the same year Mr. Moses Shaw, of New York, and Dr. Hare, of Philadelphia, discovered simultaneously a method of

Mr. Moses Shaw, of New York, and Dr. Hare, of Philadelphia, discovered simultaneously a method of electric ignition, and at once constructed torpedoes to prove the utility of their inventions.

In 1837 Chevalier Lemelt advocated the use of an explosive mine for destroying rocks in fairways; this machine he called a "fulminifère." Two years later Col. Pasley destroyed the remains of the Royal George, sunk at Spithead in 1789, by means of an electric mine. In 1844, a Mr. Warner made his sensational experiments involving the destruction of a barque, and the Crimean War brought a Professor Jacobi, an eminent Russian chemist, to the front with torpedoes for the defence of Cronstadt and Sebastopol. In 1854 the first dirigible torpedo was proposed by Lieut.-Col. Hennebert, of the French Army. From then until the present day many hundreds of inventors have turned their minds to the invention of torpedoes, and the excellent weapon now in general use may be traced in gradual steps from the time of its recognition as an asset of value in warfare. During the American Civil War no fewer than 34 vessels were blown up by mines or torpedoes.

With reference to the present war, a few notes on the torpedoes of both combatants may be interesting. Russia has in use the Schwartzkopf and Whitehead, though only the latter are now constructed. They are made either at the Oboukov Works or the Loesner Factory, St. Petersburg, though there are torpedo depôts at both Sebastopol and Vladivostock. About 50 a year are turned out, but a new factory is shortly to be opened, and the capacity in expected to be doubled. The type in favour at present has a length of 19,68 ft., diameter of 17,72 in., and a speed of 30 knots. The charge is 3001b. of gun-cotton. Japan, until recently, favoured the Schwatzkopf, but Whiteheads, similar to the latest British projectiles, are now employed. A novel type was constructed for harbour defence; it has dimensions as follows:—Length, 16ft.; diameter, 24in.; charge, 200lb.; air pressure, 4,500lb. to the square inch; speed, 25 knots for 3,000 yards. A fruly formidable weapon. The more recent Japanese torpedoes are fitted with the Obry gyroscope. With reference to the present war, a few notes on

MR. HENRY NORMAN ON THE SITUATION.

Mr. Henry Norman, M.P., immediately on his return to England after having had private audience with the Czar, started a pro-Russian campaign in the English press. We give below extracts from a somewhat extraordinary letter which he sent to *The* Times, in the course of which he said :-

Times, in the course of which he said:

It cannot be realised too soon that the war can have but one ending. It is out of the question for Russia to be defeated by Japan. Such a defeat would be the destruction of Russian prestige for generations; it would be a national humiliation too colossal to be even thought of by Russia. If the war must endure for years, if the last Russian regiment must be mobilised, if the last rouble must be spent, if even vast international complications must be faced, and whatever losses or sacrifices must still be suffered, the end will be the same. Russia cannot and will not accept such a defeat. The statesmen of Japan should have thought of this before they declared war. It seems inconceivable, indeed, that so obvious a fact should have escaped their recognition. obvious a fact should have escaped their recognition, and therefore it is probably more correct to assume that they counted upon defeating Russia up to a certain point, and then inducing other Powers to intervene to complete their victory and Russia's defeat. If so, however, the calculation was no less baseless.

and that the greater staying power of Russia renders shall have note-issuing power up to 5 million lying down on one bed, were found asphya Russian victory ultimately assured. Under these yen, the notes to be of denominations of one xiated by charcoal fumes.

This measure is indirectly

would arise.

Now, it may be stated without hesitation that Russia will not accept intervention in any shape or form, and that until she is victorious she would regard everything beyond the mere offer of mediation, which she would politely decline, as an unfriendly act, and would at once direct her own course accordingly. What, then, would be the position of England? The answer is easy: she would stand alone face to face with Russia, with the direct possibility of war under conditions where there would be practically nothing for the Navy to do. I do not think any one familiar with American policy will suppose that the United States Government would join us in military operations on the mainland of Asia in order to attempt to coerce Russia into accepting intervention at a mocoerce Russia into accepting intervention at a mo-ment unfavourable to herself and favourable to the nation which declared war upon her. Of other poscoerce Russia into accepting intervention at a moment unfavourable to the nation which declared war upon her. Of other possible intervening Powers there are two only, France and Germany. The former, it need not be said, would not dream of joining in any attempted coercion of her ally; while as for Germany, she is, as many people know, making every possible effort at this moment to establish herself in cordial relations with Russia. In view of the vast service in the direct line of the gratification of the most cherished object of German foreign policy, which Russia can, if she choose, render her at a not distant date, there is hardly anything German statesmen would not do, even to rendering possible the removal of the flower of the Russian army from the Polish frontier, to cement a grass-alliance between the two nations. Japanese statesmen, and especially the Japanese people, when it becomes clear beyond doubt that the war, however prolonged, cannot have a successful issue for them, will look to the fact of alliance with us, rather than to the precise conditions of that alliance, and will doubtless feel a deep resentment against us, for—as they will say—leaving our allies in the lurch. It is a lamentable probability that the result of the Anglo-Japanese alliance will be that of all nations we shall in the end enjoy the smallest shareof the goodwill of the Japanese people. The end of the war will, of course, produce a different situation as regards the relations of Russia and other Great Powers. All will depend upon the Russian terms of peace, as regards both erritory and trade, and there is happily every reason to believe that, while assuring herself against the immediate, preparation of future attacks upon herself from the same quarter, it does not enter into Russian plans to seek to impose in either respect conditions which would inevitably provoke munion of European and American interests against her.

It is some twelve years since Mr. Norman was in Japan and much may therefore be

It is some twelve years since Mr. Norman was in Japan and much may therefore be forgiven him, especially when we remember the exceptionally handsome treatment accorded him during the past few years on the occasions of his frequent visits to Russia, treatment to which he modestly refers in every other chapter of "All the Russias."
But he has fallen wholly under the influence of Russian glamour. His sight is deared. of Russian glamour. His sight is dazed and nothing remains to him but a confused sense of Russia's colossal dimensions. Size, however, does not necessarily signify strength.

NOTES ON CURRENT EVENTS.

Among the killed at the battle of Kinchow was the eldest son of Lieut.-General Baron Nogi, who has just gone to the front, though it has not yet been announced in what capacity he is to act. Some speak of his taking continued of the Third Division, Lt.taking contmand of the Third Division, Lt.-General Oshima having been wounded; and some say that he will direct the operations against Port Arthur. At all events the Lieut.-General will have high command in the army with which his son was serving, and the fact is noted by Tokyo journals as strikingly parallel to the case of Lord Roberts, who, just before setting out to lead the British forces in South Africa, heard of the death of his only son Africa, heard of the death of his only son at the Tugela.

The Government has announced the abolition of the silver currency in Formosa,

Under these yen, the notes to be of denominations of one rintervention yen and upwards. This measure is indirectly due to the war, which enables the Japanese Government to find a large field for the use of silver. Hence no inconvenience will be experienced in dealing with all the stores of silver in Formosa, and thus extending the gold monometallic system to that island.

> Two buildings of the Imperial University in Tokyo were destroyed by fire on the 4th instant at 12 a.m. One contained the classrooms of the Marine Engineering College; the other those of the Civil Engineering College. Both were new buildings, the former having been finished in 1903 and the latter being still under construction. The loss is very heavy.

> A rumour was diligently circulated in Tokyo shortly after the Battle of Kinchow, to the effect that Lieut.-General Oshima of the Third Division had been seriously if not fatally wounded, and that Colonel Nambu, of the same Division, had been killed. These state-ments prove to be untrue. Both officers were safe on the evening of the 2nd instant, when telegrams came from them to their

> It is stated that the following promotions are imminent:

> Lieut.-General Baron Okazawa to be General.

Nogi Hasegawa Nishi Baron Kodama

Vice-Admiral Togo to be Admiral. Baron Yamamoto

Rear-Admirals Uriu, Dewa, Saito and others will also be promoted to be Vice-Admirals, and Major-Generals Islimoto and 5 or 6 others will become Lieut.-Generals.

It is stated that the recent promotions in the highest ranks of the Army and Navy will not involve any changes in the positions now occupied by the promoted officers. The usual custom is that a Major-General commands a Brigade and a Lieut.-General a Division, while a full General has command of an Army Corps (3 Divisions). Were this rule observed, Lieut.-Generals Hasegawa and Nishi, who are commanding the Guards Division and the Second Division, respectively, would now, on promotion to be full Generals, be obliged to give up their commands. But such will not be the case. The promotions are merely rewards.

It is now confidently stated that there will be no serious difficulty in raising the Yoshino. Careful examination shows that she has sustained very little damage. do not learn that salvage operations have actually commenced. The Hatsuse, however, went down in 300 fathoms of water, and to raise her would be impossible. There is talk of getting up her guns and other

There is reported from a hamlet in the Chartres district, not far from Corancez, a case which might be roughly described as persons—father, mother, and a son aged 20, have perished. The mother, who had just been released for the third time from a lunatic asylum, had obtained such complete ascendancy over her husband and son, that, notwithstanding her obvious chronic insanity, she succeeded in imbuing both with her

The Conference of Missionaries in Korea in 1904, has been postponed in consequence of the Russo-Japanese War. Due notice will be given when events make it possible to hold the Conference.

Forty Chinese students from Kwangsi and Szchuan have arrived in Nagasaki. There are fully a thousand of these youths now receiving instruction in Japan.

The fact that because a journal in Finland was sufficiently incautious to print the Czar's recent manifesto concerning the war without giving in full his Majesty's titles, all the Finnish newspapers were ordered to reprint the document with those titles in extenso, and not omitting the newest one, "Successor to the Throne of Norway," serves once more to illustrate the extreme sensitiveness in this regard entertained by Russian rulers, says the Westminster. A striking instance afforded in our own history when, not long before the Civil War, the then czar, replying to a letter from Charles I., wrote, as "Great Lord Emperor and Great Duke Michael Fedorvich, of all Russia absolute Upholden," that "to our Imperial Majesty in your letters you have not given us our titles of Vatskey, Rustoveskey, Yereslaveskey, Udorskey, Condin-skey; and in place of Everskey Land is written Everskey Mewe, and in place of Cuberdinskey is written Cuberdinskey Mewe, and the Duke of Udorskey is not written, but you should have written Cuberdinskey Land Charraskey Udorskey Dukes." His Imperial Majesty, therefore, testily desired "your Kingly Majesty our brother Carolus in your Kingly letters hereafter to write our name and true titles, as all other great potentates write unto us, both Christian and Heathen Princes, for the Heathens do give us our full titles and name"; and he urged that the "disrespective" secretary should be punished for lessening and leaving out his titles. But this pleasant request is not re-corded by "the Emperor's sworn inter-preter," who in 1637 translated the Imperial epistle "out of Russ into English," to have been in any way complied with.

A telegram to the Seattle Post Intelligencer dated at Los Angeles, Cal., May 23rd, says: But Dr. C. M. Harris, of the Methodist Episcopal Church was elected this morning to the missionary bishopric of Japan, and May 26 was fixed upon as the date for the consecration ceremonies.

The recent birth of a baby has placed a a family at Yeadon, Leeds, in the remarkable position of having representatives of five generations living at the same time. This is no doubt a most creditable record, but it is one that has been badly beaten more than once. A few years ago the following remarkable letter appeared in the columns of the Standard, referring to an experience of the correspondent in Newfoundland in 1849: "I there saw in a fisherman's tilt seven generations, all females. The youngest was one of hypnotism, used to induce suicidal a newly born infant; its mother was twelve mania. In the result a whole family of three years of age; its grandmother twenty-six; years of age; its grandmother twenty-six; and so upward. The age of the great-greatgreat-grandmother was such as to render it quite possible that before she died she might see a member of an eighth generation." At Byfelt, Massachusetts, there was living in 1887 a family of the name of Kent with living representatives of six generations; and except for purposes of subsidiary coins. It own mania that they were being persecuted. a few years ago, at Skillington, near Granis announced that the Bank of Formosa She then suggested suicide, and all three tham, there were five generations of a family all very much alive, beginning with Thomas Duffin, a hale veteran of ninety-six, and ending with George Duffin, a hale veteran of ninety-six, and ending with George Duffin, his great-great-grandson, a boy of

On the 16th of May the Russian Government, though the French Representative in Tokyo, complained that on the 5th of May, when a Russian hospital train containing 200 patients and flying the Red-Cross Flag, was proceeding northward from Port Arthur, it was fired on by the Japanese troops and two of the patients were wounded. The Japanese Foreign Office replied on the 23rd that, according to the report of the officer commanding the Japanese troops, an ordicommanding the Japanese troops, at our mary Russian train when passing, had fired upon the Japanese. They returned the fire, whereupon the people in the train displayed the Red-Cross Flag. But when the Japanese, having ceased firing, proceeded to examine the train, it resumed its journey at full speed. Other reports show beyond question that the train was loaded with soldiers and officers who were in a perfectly sound state of health. If the train were really a hospital train, why did not it submit to examination? There can be no doubt that the Red-Cross Flag was abused by the Russians and that their complaint was designed solely to anticipate remonstrances from Japan. The Japanese Minister of State for Foreign Affairs declared that the Imperial Japanese Government could not for one instant entertain such an outrageous charge.

The Democratic conventions held in the United States thus far show Judge Parker and Mr. William R. Hearst as the leading candidates for the Democratic presidential nomination. Up to date there have been 377 delegates chosen. There will be 1,000 delegates in the convention and 667 will be required to nominate, under the two-thirds rule. The action of conventions held up to date may be summarized as follows:

The Governor of New York State, to the great rejoicing of many folks in all parts of the republic, has vetoed the bill extending the corporate life of the Niagara, Lockport and Ontario Power Company. Mr. Odell and Ontario Power Company. has issued memorandum explaining his reason for the step, part of which we append:-

The plea that other corporations are enjoying similar privileges to those which this bill seems to bestow is no justification for the continuance of policies which dissipate the rights of either the state or the municipalities. That governmental policy which does not respect the expressed will of our citizens in relation to both safeguarding their rights and exacting a compensation for them, is sure to meet with just criticism and disapproval.

That these privileges are valuable is beyond question and the state has the right to demand a proper recompense for them, therefore, should never be lost Girls' School.

sight of. That this proposed act does not take cognizance of these facts makes it, in my mind, undesirable legislation.

There is another strong reason which has been urged against approval of this bill, a protest which is not confined to the State of New York only, but which has come to me from all over the Union. Our state has expended large sums of money for protecting and beautifying the surroundings of the falls. Ningara has been and is still the Mecca of all those who delight in scenic beauty and wonders.

Thousands of people from all over the world annually visit it, and among those who are actuated perhaps, largely by sentimental reasons there has arisen the fear that the constant inroads that are being made upon it under charters heretofore granted may result eventually in its destruction.

I am of the opinion that however we may discount and depreciate the interference of the sentimental with the practical in life, that we cannot get away from the fact that this sentiment is not one of retrogression, but of constant progression in civilized life. There is due to it, therefore, the same consideration which should be given to all practical affairs of life.

which should be given to all practical affairs of life.
This seems to me to be a second and fully as important a reason for objection to approval of this measure.

A QUARTER CENTURY OF MISSION WORK.

On June 1st, 1879, Rev. A. D. Gring and wife the first missionaries sent to Japan by the Reformed Church in the United States, arrived in Yokohama. Since then the Mission has grown until it now embraces nine families and four unmarried ladies. Tokyo was headquarters at first, but in 1886, at the earnest solicitation of Rev. M. Oshikawa, work was started in Sendai, which city is now the centre of the Mission's operations. Here a flourishing college including a theological department (the Tohoku Gakuin) and a rapidly growing young women's seminary (the Miyagi Jo Gakko) are maintained. The former has an enrollment of 254 and the latter of 199. In connection with the Tohoku Gakuin there is an industrial home department, in which needy students are given an opportunity to work their way through school. Most of the missionaries of the through school. Most of the missionaries of the Reformed Church live in Sendai, but there is also one family each in Tokyo and Yamagata. Besides its educational enterprises, the Mission carries on extensive evangelistic operations, aiding 43 congregations. The total membership is 2,126. The celebration of the Mission's twentyfifth Anniversary took place in Sendai June 1, 2, and 3. 1904.

In order to make a good beginning the Mission held a thanksgiving at 10 o'clock a.m. June 1st at the same time partaking of the holy communion of the Lord's Supper. Next follow-ed a Mission dinner with toasts and healths. These two functions, the only items in the day's

programme, were thoroughly enjoyable.

II. On the following day (June 2nd) ground was broken for the new buildings,—recitation hall and dormitory of the Tohoku Gakuin. This was rather a private affair and took place in the

forenoon at 10.30 o'clock.

In the afternoon at 3.00 o'clock the handsome new recitation hall of the Miyagi Girls' School was formally dedicated. Over two years ago, that is, on March 8th, 1902, the old school building was totally destroyed by fire. This catastrophe proved a blessing in disguise, for it fired the home Church with enthusiasm to erect better buildings. A very commodious dormitory was completed and occupied last September, 1903. The new recitation building is known as the Christine Vollmer Faust Memorial Hall, in memory of a missionary who died after being on the field about a year. Dr. J. P. Moore, the oldest member of the Mission, and formerly principal of the school, preached an excellent dedica-tion sermon on "The truth shall make you free." tion sermon on "The truth shall make you free." Quite a number of notable personages were present including Count Kokumune Date and family, the Governor of Miyagi Ken, the Mayor of Sendai, and others. It might be added that the new dormitory cost less than \$8,000 U. S. gold, and the recitation hall less than \$18,000 U. S. gold, exclusive of all furnishings. Both were erected under the supervision of Rev. W. E. Lampe. Miss Lena Zurfluh is principal of the Cirle' School

A reception to the foreign missionaries and other foreign residents of Sendai was held by the Mission in the evening. Music, congratulatory addresses and refreshments, &c., made the time pass pleasantly, and the gathering dispersed at a late hour.

III. The celebration reached its climax on June 3rd. A reception to Japanese Christian workers was held in the Bairintei (Sendai Cherry

workers was held in the Bairintei (Sendai Cherry Park) at r.30 o'clock, p.m., when a number of very pleasant congratulatory addresses were delivered by representative Japanese Christians. At 7.30 o'clock, p.m., a large public meeting was held in the beautiful Minamimachidori (2nd Street) Church. This meeting was under the auspices of Miyagi Classis (Presbytery) with which most of the Mission's work is connected. It so happenes that this year also the Rev. It so happenes that this year also the Rev. Kametaro Yoshida celebrates the 25th anniversary of his entrance into the Christian Ministry. Very appropriately, therefore, Mr. Yoshida was asked to preach the sermon. Professor Teizaburo Demura, in behalf of the Tohoku Gakuin and the Miyagi Jo Gakko; Rev. J. H. De Forrest, D.D., in behalf of the missionary community; Rev. A Kawasumi' in behalf of the Sendai Ministerial Association; Mr. Chikabaru Akihu, in behalf of evangelists working outside of Sendai; and the Hon. Saburobei Suzuki, burgess of Fukushima, in behalf of friends addressed the members of the Mission in words of warm appreciation. The general public was warm appreciation. The general public was represented by Count Date, Governor Tanabe and Mayor Hayakawa, who also in the kindest manner delivered congratulatory addresses. Rev. D. B. Schneder, D.D., in behalf of the Mission and of the Board of Foreign Missions made a suitable reply. The Miyagi Classis sent its greetings to the Board of Foreign Missions in a very practical way. A box containing a Japan-ese Bible and a copy of the new Hymnal, both beautifully bound in leather, was handed Dr. J. P. Moore for transmission to the Board of Foreign Missions of the Reformed Church in the Japanese were to be a symbol of what has been accomplished by the young Japanese Church. A characteristic picture of Mount Fuji, drawn upon silk and framed by teachers of the Tohoku Gakuin was also presented for transmission to the Board of Foreign Missions. The idea of this present is to express the fond hope that Japan will become as beautiful and excellent among the nations of the earth as is Mt. Fuji among mountains.

Mention should also be made of two very pleasant incidents connected with the 25th anniversary celebration. Steady growth of the Tohoku Gakuin has necessitated the erection of a new

dormitory and recitation hall.

Careful inquiries demonstrated that it would be Careful inquiries demonstrated that is impossible to erect both these buildings for the impossible to erect both these buildings for \$25,000, the amount appropriated for the purpose. The Mission with a view to future contigencies recently decided to ask the Board of Foreign Missions for an additional appropriation of \$3,000 U.S. gold, in order that the original plans might be carried out, notwithstanding the financial stress under which the Board is now placed. This action of the Mission was greatly appreciated by the Board of Directors of the placed. This action of the massion was given by appreciated by the Board of Directors of the Tohoku Gakuin, but when the Japanese members learned the circumstances they cheerfully and unanimously decided so to change their plans as to make the \$25,000 reach.

Another agreeable feature of the celebration was the decision of the Japanese workers to raise a special fund for missionary work. A meeting was appointed for June 4th at which to devise ways and means for carrying out this praiseworthy object.

It was hoped that His Excellency the American Minister, Hon. Lloyd Carpenter Griscom, might be able to attend the anniversary exercises, but being unavoidably absent, Mr. Griscom telegraph-ed his congratulations and regrets.

A Moji telegram says that five Russians captured by the First Army arrived there on June 8th by the hospital ship Hakuai Maru. They are to be removed to Matsuyama.

THE MILITARY SITUATION.

ward through the Liaotung Peninsula for Japanese at a point (Chukiatun) some 28 to an isthmus forming a strategical position not nearly so strong, it is true, as the Kinchow Isthmus, but still the second strategical position on the Peninsula. The Japanese are holding this position—from Pitsewo on the east coast to Adam's Bay on the west-and have evidently thrown out scouting parties to a distance of 20 or 30 miles along the railway running almost impossible for military men to be-Chukiatun on the 30th was followed by a Japanese advance against Tehlisz, and en route they had two skirmishes-one at Changkiatun and one at Lungwangmiaoin both of which the Russians were driven back. The enemy is still in possession of Tehlisz, and we shall presently hear of an engagement there or in its neighbourhood. Foochow, a town near the west coast in the region of these affairs, is said to have a garrison of 2,000 Russians, and something will soon be heard of it also. All these things tend to show that the Russians are assuming the aggressive, and that they see, or think they see, a weak point in the Japanese strategical programme. It is very conceivable, of course, that Kuro-PATKIN has received orders from St. Petersburg not to leave Port Arthur to its fate, and that he is about to throw an army of thirty thousand men against the Japanese lines from Pitsewo to Port Adams, hoping ultimately to catch the Liaotung invaders between two fires, his own and that of Port Arthur. But we think it more likely that he conceives the existence of a fragile link in the strategical chain and that he is about to strike at it. Two Russian Divisions, the First and the Ninth, are said, on apparently good authority, to have passed Tashikiao, moving southward, and to be concentrating in the neighbourhood of Kaiping, namely, at Kaichow, which is on the Liaotung Peninsula near its extreme north-west. London telegraphs that a cardinal difference of opinion between KUROPATKIN and ALE-XIEFF was submitted to St. Petersburg for decision, and that a council of war having been called, the verdict was in favour of KUROPATKIN with, however, a rider that Port Arthur should be succoured as a prime object of the General's assumption of the offensive. That is vague, but the impression conveyed is that ALEXIEFF held to the

341 miles beyond Mukden. It would undoubtedly be a heavy strain on Japanese THE indications are that a strong force of resources to have to feed an army more Russians is attempting to push south- than 600 miles from the sea coast, and if the purpose of succouring Port Arthur. On tion, great hardships would have to be the 30th ultimo the scouts of this advance borne. But it remains to be seen whether, even if Russia had sufficient moral courage miles north of Pulantien. This last place would play into her hands by going to lies, as our readers probably know, on Harbin. We should think not, most decidedly not. Were Mukden, Port Arthur and the East-China Railway between these however, the Great Northern Power seems to find such Fabian strategy quite intolerable, and KUROPATKIN is going to strike southward strongly and boldly. It appears to us that he is too late. In fact it is lieve that Kuropatkin seriously contemplates any advance into the Liaotung Peninlooks at the map he will perceive that from the moment when Russian force passes there is nothing in military history more relieve the pressure on that place sufficiently therto obstructed many a student's freedom to allow its garrison to beat off the assailants. It is a bold move and boldness, even to the

The funeral of the late Oki Teizuke, who was executed by the Russians in Manchuria on suspiconveyed is that Alexieff held to the policy of Dragomiroff, namely, that Port Arthur should be abandoned and that the Russians should retreat to Harbin, obliging the Japanese to follow them thither. Harbin is 617 miles from Port Arthur and dent of the Imperial University, were present. AN ENGLISH-JAPANESE DICTIONARY OF THE SPOKEN LANGUAGE.

E.M. HOBART-HAMPDEN, B.A., and Br HAROLD G. PARLETT. Publishers, Messis. Kelly and Walsh, Ld.

WE do not hesitate to say that the publication of this dictionary opens a new era in Japanese-speaking by foreigners. Such an appreciation sounds hackneyed, and so does the equally true verdict that the work supplies a long felt want. Nevertheless both expressions are absolutely accurate. The public already has access to tolerably good Japanese-English lexicons, but until the appearance places in Japanese possession, Russia would of this work there was nothing that could be be beaten for all practical purposes. Now, called even an approximately satisfactory English-Japanese dictionary. The authors tell us briefly on their title-page and explicitly in their preface that their book is a third edition of the Satow-Ishibashi Vocabulary. Well, the Satow-Ishibashi Vocabulary was good so far as it went: everything to which Sir Ernest Satow puts his hand is good. But truly one is moved to a little quiet mirth by this assertion of relationship. The second edition of the Satow-Ishibashi book appearsula southward of Kaiping. If any one ed in 1879, and we do not consider it an exaggeration to affirm that if a Japanese scholar of 1879 were suddenly transplanted from his own era into 1904, he would find Kaiping moving southward, its line of com- himself listening to an almost unintelligible munications to the north of Kaiping in the language, so greatly has Japanese changed, direction of Haiching, lies exposed to the as- so largely has it grown, in that interval of saults of an enemy advancing from Takushan viá Sungyuen. Nothing could justify the passession of the same the Satowsuch a programme except the possession of pears to be fully abreast of its time. Of sufficient force to hold Haiching against all course it would be mere presumption on the attacks from the east. Perhaps KUROPATKIN part of any reviewer to speak with absolute believes that he has sufficient force for that purpose. But then again the First Army under General Kuroki is operating on the still be an inconclusive performance, unless east of the Russian line of communications at the reviewer were himself better equipped a point northward of Haiching; point as than the authors for lexicographical work, far north as Liaoyang if not Mukden. Thus which ability could scarcely be claimed by any scholar in existence. A few misprints or errors might possibly be detected. One or two, perilous than the programme upon which indeed, have been pointed out to us; as when Kuropatkin seems to be now entering. To jiin kummin-dôji-seiji ("limited monarchy") is accomplish anything in the Liaotung Peninsula he must be prepared to mass a force
of fully thirty to forty thousand men south
of the Kaiping-Takushan line, and he must of the Kaiping-Takushan line, and he must is accidentally inverted. No volume was be prepared to keep it there for some time. He must be prepared to show an efficient has always appeared to us the very acme of front to the First Army, and in all probabi- impertinence and conceit on the part of a lity to the Third Army also. The one conceivship on a pile of minor blemishes discovered in the book he reviews. This the rear of the Japanese positions on the new dictionary, however, may safely defy Liaotung Peninsula, he hopes to delay the any reasonable scrutiny. We hail with deoperations against Port Arthur, and even to light the publication of exact equivalents for numerous English idioms which have hiof speech. Take for example the word "objection." If the average English verge of recklessness, sometimes succeeds. But in our opinion this new policy, if it has really been adopted, will greatly shorten the war.

Opicuon. If the average English speaker of Japanese be asked to translate "have you any objection to my doing so and so," he probably can not get nearer than "Ko ko shite mo yoroshine gozatimasu ka," a phrase which conveys the required meaning in only a very partial degree. new dictionary tells him to say "Ko ko shite mo go ison wa gozarimasenu ka," which makes the personal character of the appeal quite plain. Then again if we have to say "he refused," the old method used to be simply "muko de kotowarimashita," whereas educated men now-a-days say, as this dictionary shows, "kipozetsu shimashta." Messrs. Parlett and Hampden, we observe, include

" shazetsu" under the heading of "refusal," renderings of idioms never "tendency," again, it is a comfort to find the now much needed word "keikô" instead of the hackneyed "katamuki" alone; and under "confirm" one is glad to be introduced to "kakutei" and "kakutei" numerals, one of ordinary numerals, one of weights and measures, and one of cities, instead of "tashikameru" only. "Contradict," we venture to think, is not quite so satisfactorily treated. For instance, if a man under judicial examination were asked why he had not performed a certain duty and if he were to plead that certain duty, and if he were to plead that same one had obstructed him, the magistrate would naturally say "Sore wa köben no riyū ni wa naranu," where "köben" could scarcely be translated "contradiction." Moreover "bempaku" is given as the equivalent of "contradiction" and also as the equivalent of "refutation," which seems unsatisfactory. In illustration of the investigatory. satisfactory. In illustration of the immense difficulty of compiling an up-to-date dictionary of a language changing so rapidly as that of Japan, a difficulty which Messrs. Parlett and Hobart-Hampden fully recognise, we may quote the word "block" when used in a military sense. Six months ago, at the time when this dictionary was passing through the press, no such thing as the blocking of Port Arthur had entered people's heads, and therefore no one used the terms "fusa" or "heisoku." Now, however, they are in daily employment. It is not to be inferred, however, that the dictionary is deficient in military terms. On the contrary is dencent in minary terms. On the contrary, it is richly furnished. We may instance such expressions as "reconnaissance in force" (kyôkô teisatsn); "surround" (hôi as in hôi kogeki); "demonstration," i.e. of armed force (shii undo); "intimidation" (ikaku; "leint" (kensei undo); "contraband of war" (senji kinsei-hin); and so on. Of course students in special and so on. Of course students in special lines will probably find something to comcolloquial form, and that the dictionary is explicitly a lexicon of the spoken language. The same explanation would scarcely apply, however, to the every-day idiom hanjo wo gai suru (to "hurt the feelings"), which we do not find. And again, it may be objected that washirn ought to be inserted under "run after" (riron ni washitte jikko wo okotaru); that "kôdei suru" should be given as one rendering of "to be absorbed in " (sasa taru dôgi ni kôdei suru); that nusum-giki suru is used in the sense of "over hear" (tagen subekarasaru himitsu wo more hari nusumi-giki sittati tote nan no yeki ka aran); that a greater variety of "insurance" terms should be inserted (as kinshi hoken, yôro hoken, hoken, &c.) and so on.

Abi hoken, &c.) and so on. But in the meanwhile every complaint. student of Japanese should be profoundly grateful to Messrs. Hobart-Hampden and Parlett. They have given us a book far as not to be mentionable in the same breath. How great will be the assistance rendered to hundreds of persons, especially missionaries, now toiling to discover accurate

thus placing it on the same level as "kyozetsu," though in translating "decline" hyozetsu," though in translating "decline" cult to over-estimate. We offer the authors our most hearty congratulations, and we "kyozetsu," the latter being in fact much more emphatic than the former. Under "tendency," again, it is a comfort to find the now much needed word "keikh" instead walveble, tables are concerded to table.

BAPTISTS IN JAPAN.

By ERNEST W. CLEMENT.

[A PAPER READ BEFORE THE BAPTIST CONFERENCE AT ARIMA, MAY IOTH, AND PUBLISHED BY REQUEST OF THE CONFERENCE.

The history of Baptist mission work in Japan may be properly divided into three periods; one from 1860 to 1872; one from 1872 to 1889; and one from 1889 to the present time. The first period was under the auspices of the American Baptist Free Missionary Society; the second period was under the auspices of the American Baptist Missionary Union and the English Baptists; and the third period is that of the work of the American Baptist Missionary Union, the English Baptists and the Southern Baptist Conwere few. In the third period, especially in the first two years (1889 and 1890), the American Baptist Missionary Union received large acces-

joined the Expedition expressly for the purpose of spying out the land with reference to mission work. In Commodore Perry's official report this

In the following year (1872) the American Bapatist Free Missionary Society transferred its work in Japan to the American Baptist Missionary Union, opened their work in Nemuro. This year is also under whose jurisdiction thus fell not only Goble but the date of the death of the Baptist Nestor, Dr. also Rev. Nathan Brown, D.D. These two came Brown, who, in spite of the number of his years, to Japan in 1873: Goble, however, soon resigned; but others were added to the mission in the same

previously only of the missionary families; but in July of the same year the first Japanese convert; was baptized.

In 1874 the Arthurs removed to Tokyo and shortly afterwards opened on Suruga Dai a girls' school which has developed into the Sarah A. Curtis Home still in that locality. In the year following (1875), the first lady missionaries arrived in the persons of Miss Kidder and Miss Sands (now Mrs. Brand), both of whom are still on the field; 1875 was also the date of the baptism of the first Japanese woman. We counte from Miss Kidder's paper on "Japanese". quote from Miss Kidder's paper on "James Hope Arthur" before the conference of 1892: "The Kanda river, which flows between Suruga Dai and Hongo was our first baptistery, and into this were led, from time to time, sixteen professing faith in the living Christ. Mr. Arthur with his own hands made a safe way down the steep embankment, and in this stream on November 6, r875, the first Japanese woman, Uchida Hama, known to have received Christian baptism, was buried with Christ, from this grave to rise and work with her risen Redeemer." §

The first Baptist church in the capital of the Empire was organized in 1876. It was three years later that Kawakatsu, who was originally one of the Yokohama band trained by Rev. S. R. Brown, D.D., but had afterwards joined the Baptist Church, became the first ordained native Baptist minister. The same year (1879) is the date of the arrival of Rev. (now Dr.) A. A. Bennett and wife, who are the senior couple of the Baptist mission in Japan.

It was likewise in 1879 that the English Baptists established their work in Japan through Rev. W. J. White, who had already served several vention. In the first and second periods, the W. J. White, who had already served several workers were changing often and reinforcements years as a teacher in both private and government schools and was quite familiar with the language. Their work was finally transferred to the American Baptist Missionary Union in 1900.

Baptist Missionary Union received large accessions; and in 1889 the Southern Baptist Convention opened work and in the past few years have sent out several new missionaries. The first two periods may be united into one period, that of foundations; and the third period is certainly a period of expansion.

Baptists enjoy the distinction of having as a sailor in Commodore Perry's fleet one who had loined the Expedition expressly for the purpose its derivatives he resigned from that committee its derivatives he resigned from that committee and continued his labours alone. In 1879 he had the pleasure and the honour of publishing the first plain of here or there in the volume. Under "practicable," for example, we do not see the common rendering "hodokosubeki" (e.g. jigane no kakaku made geraku seshimuru no hoka hodokosu beki saku nashi; "there is no practicable plan except to let it fall to specie value"), but the authors would probably object that hodokosu beki is not a least the plant of the normal series of the marines named as "one of the marines named as "one of the marines named translation of the New Testament into Japanese. And, although, tor obvious reasons, this version whom the Expedition had picked up on the way does not enjoy a wide circulation, it is generally acknowledged to be clearer, simpler, and truer nickname of Sam Patch. Gothe, "finding in his to the original than the other version. A remote that hodokosu beki is not a begun with him a system of justruction which he magazine, called Kirisuto-kyo, to the effect that hoped would not only make the Japanese a students of the Bible "who understand English" begin with him a system of instruction which he imagazine, cancer Arrisan-spo, to the enect that hoped would not only make the Japanese a students of the Bible "who understand English fair English scholar, but a faithful Christian."* should use the Revised Version, and that those Sam Patch united with the Baptist Church who read Japanese only should use the New in Hamilton, N.Y., and awakened a hope in the Testament published by the Baptist Mission." I minds of Christians in America that he would It is not expected that this version will ever lead many of his countrymen to a knowledge of come into general use; but it will always be the country ment of the co

which amounted to almost 80 at his death, was but others were added to the mission in the same most indefatigable in labour. He died, loved and year. Dr. Brown at once gave himself to the mourned by both Japanese and foreigners. His work of translation, for which he was unusually constant prayer became his epitaph: "God bless

Not counting Sam Patch. She still survives, happy in the faith. Gleanings, January, 1896.

The period from 1889 till the present time has been denominated, so far as Baptist work is concerned, the period of expansion. It was opened by the arrival of 10 or more new missionaries in 1889 and several others in 1890. It may seem a little peculiar that such large reinforcements should come at just that time, which was the height of the anti-foreign and anti-Christian reaction. But, although it was a rather discouraging epoch in Christiau work in Japan, it was nevertheless a good opportunity for new missionaries to devote themselves to the language study which is such an important preparation for active work. Thus the new missionaries of the American Baptist Missionary Union and the Southern Baptist Convention were fully prepared later to improve the excellent opportunities afforded by the revival of interest in the Gospel.

From about the very beginning of the work of the American Baptist Missionary Union in Japan, the importance of female education was recognized. Miss Sands and Mrs. Brown in Yokohama, Mrs. Arthur and Miss Kidder in Tokyo, were the pioneers in this work. The first for-mally organized school was that now known as the Sarah A. Curtis Home, opened in Tokyo by Miss Kidder in 1875. The work among girls in Yokohama has grown into the present Mary A. Colby Home. The other schools all date from the second period of Baptist work in Japan: Sendai and Chofu* from 1891 and Himeji from 1892. Kindergartens came still later in organization: that in Kobe under Mrs. Thomson was the pioneer dating from 1894, while the two in Tokyo date from 1897. The girls' schools and kindergartens are now among the mightiest forces in the Baptist work in Japan.

The education of boys was sadly neglected in Baptist work until a comparatively late period. It is true that there had been no little attention paid, in a somewhat desultory way, to primary schools, where boys and girls were educated together, or even where boys alone were educated. But no provision was made at all for the secondary and higher education of boys until less than a decade ago. It was not until the fall of 1894 that the writer was appointed, and not until February of 1895 that he arrived in Japan, to start a school which eventually received the name of Duncan Academy. Its growth has been slow and steady, both in number of students and in equipment; and, thanks to the generosity of Mrs. Robert Harris, Mr. E. M. Runyan and others, it now has a fine plant with good prospects. And in April of this year it opened with the first year class of a three years' higher, or college, course (Kotokwa).

In 1894, Mr. Bennett, after just a decade of faithful labour in charge of the theological training work in Yokohama, gave over the presidency of the Seminary to Rev. J. L. Dearing. At the same time the institution moved into new buildings, including a dormitory and a recitation-building, to which has more recently been added a residence for the President, making altogether waluable plant. Moreover, the curriculum has been improved, the standard of admission raised, and the work of the school expanded in many ways. The alumni of the Seminary have been holding most important positions in Baptist work in different parts of lapan, from Nemuro in the extreme north to Kyushu and the Riukiu Islands in the extreme south, and even abroad, espe-cially among the Japanese on the Pacific Coast of the United States of America.

It was under Baptist auspices that mission work was opened in the Riukiu (Loochoo) Islands in 1891. The means for this expansion of our work was provided by a Scotch Presbyterian lady, whose interest therein was aroused by Rev. R. A. Thomson. The man to institute this work was Mr. Hara, who thus enjoys "the honour of being the first Christian Japanese evangelist to take up work "among that people. Mr. and Mrs. Thom-son made their first visit to the islands in 1892.

By the generosity of the same Scotch family mentioned above, the Baptist mission was enabled to open work in 1899 among the islands of the Inland Sea, famed for its beauty. This work is carried on by means of the gospel ship Fukuin This work is

* Burned down in 1902.

Maru, in charge of Capt. Luke W. Bickel, who is, indeed, "a rare man for this special field and fitted in every way for this peculiar pioneer work."

It was only by an accident that the Southern Baptist Convention was not among the very first societies on the Japanese field after it was opened to the work. In 1860 two missionaries of theirs started for Japan, but were lost at sea; and others who had intended to come later were prevented by the Civil War. An interval of almost 30 years passed before missionaries were again appointed and started for Japan (1889). The pioneers were Brunson and McCollum, the latter of whom is still in the work and may honestly say of it, Magna pars fui. These men lived a short time in Kobe and Osaka in study of the language: but in 1892, after a consultation with the A.B.M.U. missionaries, removed to Kyushu, which was to be their special field. The harmony and coöperation that marked all relations between the two Baptist bodies have been a source of great pleasure and comfort to all.

The evangelistic work of the Baptists in Japan has not been limited to any special locality or district, as in the case of some missions, but has been spread out over an extensive area. tions, for instance, stretch out, with larger or smaller gaps, from the Hokkaido in the extreme northeast to Kyushu in the extreme south-west, and jump over to the Riukiu Islands. At a few points it reaches to the west coast. The chief stations in geographical order, are Nemuro, stations in geographical order, are Nemuro, Otaru, Morioka, Sendai, Mito, Tokyo, Yokohama, Kyoto, Osaka, Kobe, Himeji, Fukuin Maru, Kyoto, Osaka, Kobe, Hintell, Pakum Maru, Chofu, Kokura, Fukuoka, Nagasaki, Kagoshima, Kumamoto and Naha. The biggest gaps in Japan proper are between Yokohama and Kyoto, Hintelli and Chofu. There appears to be still plenty of land to be possessed; but where are the possessors?

We wish, in conclusion, to institute some comparisons between conditions in 1853 and 1903, that we may better appreciate the progress that has been made. In 1853 there was not a single Baptist missionary in Japan, and only one in prospect in the person of Goble; in 1903 there were about 70 Baptist missionaries in all. In 1853 there was neither church nor chapel of the Baptist name; in 1903 there were 40 organized churches and more than 60 buildings used for Church purposes. In 1853 there was not a single Japanese who had received Christian baptism, unless possiby Sam Patch; in 1903 there were more than 2,300 nominal Baptists in Japan. In 1853 there was not a Bible or even a portion of a Bible publicly circulating in Japan; in 1903 a Baptist version of the New Testament was circulating along with the common version of the Bible. In along with the common version of the Bible. In 1853 not a single Christian hymn had been sung iu Japanese; in 1903, after several editions of Baptist hymnals had been used, a Union Hymnal had been issued. In 1853 there was not a Sundayschool in all Japan; in 1903 the Baptist schools alone numbered about 90 with over 4,000 pupils. In 1853 there was not a Christian school in the Empire; in 1903 the Baptists owned one theological seminary, one academy, four ladies' seminaries, two primary schools and three kindergartens.

But it is important to note that what has been said of 1853 and 1903 may be said, with only slight changes, of 1873 and 1903. We can not ignore the preparatory work done here between 1860 and 1873; but we can also see plainly that the greater part of the present results have been sionary Union came to Japan in 1873. We may rejoice over what has been done, feel asham-We ed of what has not been done, and push on with renewed vigour and faith to what is to be done.

THE LAW COURTS.

THE CAMPHOR MONOPOLY CASE.

The hearing of this appeal, instituted by Mesers.

resumed on June 4th in the Tokyo Appeal Court

before Judge K. Suzuki and four associates,

It may be remembered that the Yokohama
District Court ordered Messrs. Samuel, Samuel &
Co. to pay yen 226,250 to the liquidator, with interest at 6 per cent per annum from April 20th, 1902, till the execution of judgment, and also to bear costs; and also the costs arising from the intervention of the Hongkong and Shanghai Banking Corporation. The Court also rendered an interlocutory judgment as to the responsibility of Mr. E. C. Davis, one of the partners of Messrs. Samuel, Samuel & Do., dismissing the joint claim against

Mr. Hioki, the liquidator, appealed against the interlocutory judgment. For the convenience of the Court the two appeals were taken jointly, and Mr. Hioki took a seat as appellant and Mr. Akiyama and two other lawyers represented Messrs. Samuel, Samuel & Co. as respondents.

On account of the re-organization of the Court, Counsel repeated their statements made in the previous proceedings, after which Mr. Hioki added that Mr. E. C. Davis and Mr. W. F. Mitchell were carrying on business with two other partners—Mr. Marcus Samuel, and Mr. Samuel Samuel — under the firm name of Semuel, Samuel & Co. They made a contract with the authorities of the Civil Administrative Bureau, of the Formosan Government on . March 24th, 1900, with regard to the camphor monopoly for a term of three years. Mr. Davis and Mr. Mitchell also made a contract on May 18th of the same year with Messrs. Mourilyan, Heimann & Co. regarding the monopoly business under which the latter was to invest a sum equal to one-eighth of the capital required by the former, in respect of which Mourilyan, Heimann & Co. were to receive a share of the profits obtained and also to bear any loss arising from the transaction. Messrs. Mourilyan, Heimann & Co. paid to Messrs. Samuel, Samuel & Co. jen 12,500 in May 1900, yen 106,875 in June, and the same amount in August, making a total of yen 226,250. After July, 1901, the former received dividends of profits from the latter upon the invested capital. On April 18th the following year, Messrs. Mourilvan, Heimann & Co. were declared bankrupt by the Yokohama District Court and consequently the contract between the parties ceased. As a na tural result the capital invested by Messrs Mouril-yan, Heimenn & Co. had to be refunded by Messrs Samuel, Samuel & Co. It was, however, left unpaid. Messrs Mourilyan, Heimann & Co. had borrowed the money from the Hongkong and Shanghai Bank, agreeing to pay interest at the rate of 7 per cent per annum. Mr. Davis was not a partner of Messrs Samuel, Samuel & Co. when the contract with regard to the camphor monopoly business was made with the bankrupt He became a partner in December, 190 and assumed the rights and obligations of the firm as one of the partners from that date.

Mr. Akiyama, counsel for respondents, having admitted that Messrs Samuel, Samuel & Co. made a contract with regard to the camphor monopoly with the Director of the Civil Administration Bureau of the Formosan Government and that they also concluded a contract with the bankrupt firm as shown by Exhibit A-1, and that as the result of the contract the appellant's firm paid yen 226,250 in all, contended that Messrs, Mourilyan, Heimann & Co. borrowed the money from the Hongkong and Shanghai Bank after promising that Messrs. Samuel, Samuel & Co. should deposit the money with the Bank of Formosa in order to obtain Government loan bonds offered to the accomplished during the three decades since the Formosan Government as security of the mono-first missionaries of the American Baptist Mispoly business, and that after the expiration poly business, and that after the expiration of the term of the contract this money should be paid directly by Messrs. Samuel, Samuel & Co. to Messrs. Mourilyan, Heimann & Co. Counsel further said that (r) the firm under the name of Mourilyan, Heimann & Gomei-Kaisha (partnership association) as was the case of Messrs. Samuel, Samuel & Co. This fact was not found out until the decree of bankruptcy had been given in the Yokohama Court. Samuel, Samuel & Co. against a judgment given Messrs. Davis and Mitchell were quite jgno-in the Yokohama District Court in favour of Mr. rant before the camphor monopoly contract was Hioki, liquidator of Messrs. Mourilyan, Heimann concluded that Messrs. Mourilyan, Heimann & Co., which was adjourned on Sept. 29th last, was & Co. was an anonymous association and that

the partners were consequently "sleeping" and said that the statements of Messrs. Pi not active partners as was the case with their firm. (a) Mr. Davis was not one of the parties to the contract relating to the camphor business. The firm of Messrs. Samuel, Samuel & Co. was organized in accordance with British law, and capital needed in the camphor business the coording to the provisions of British law and capital needed in the camphor business the case of the camphor business the case of the camphor business the case of the camphor business the case of the camphor business the case with their series of the camphor business. Pi Baker were all in favour of respondents.

Having replied to the representative of spondents, Mr. Hioki stated that the statements of Messrs. Pi Baker were all in favour of respondents.

Having replied to the representative of spondents, Mr. Hioki stated that the most of the camphor business that the statements of Messrs. Pi Baker were all in favour of respondents. according to the provisions of British law any one partner of an association is held exempt from a responsibility which was entered into by the firm before he became a partner. (3) Mr. Davis had no responsibility for the contract, Exhibit A-1.

(4) The sum of yen 226,250 was not capital invested by Messrs. Mourilyan, Heimann & Co., but was employed by them as a guarantee or security with the Formosan Government. The money was paid at the application of Messrs.
Mourilyan, Heimann & Co. to Messrs. Samuel,
Samuel & Co., but as an actual fact the Hongkong and Shanghai Bank delivered the money to the latter firm under the name of the former, and the latter firm under the name of the former, and for the money thus transferred from one hand to the other, Messrs. Mourilyan, Heimann & Co., were to receive a share of profits arising from the camphor business, but if this guarantee was at any time confiscated by the Formosan Government, Messrs. Mourilyan, Heimann & Co. were to repay the amount themselves to the Bank. The foregoing arrangement was made between Messrs. Mourilyan, Heimann & Co. and the Hongkong and Shanghai Bank, but not put into a formal contract.

Mr. Masujima, another representative of the respondents, having delivered supplementary explanations as to the nature of the dormant partners of Messrs. Mourilyan, Heimann & Co. and as to the money received from the Hongkong and Shanghai Bank, stated that the contract of Exhibit A-z must be dealt with in accordance with British law as it was concluded by British subjects,

with the exception of one American citizen.
Judge—Where was the contact made?
Akiyama—In Yokohama.

Mr. Hioki, appellant, having presented the documentary evidence to Court, stated that the contract was signed by Mr. Harris per pro Messis. Mourilyan, Heimann & Co., which was a firm in Yokohama and which had a real qualification. Messrs. Samuel, Samuel, & Co. made a contract with the Formosan Government regarding the camphor monopoly in which business Messrs Mourilyan Heimann & Co. participated, investing a portion of the capital needed. The books put in evidence showed the entries concerned with the business. As the bankrupt firm borrowed the necessary money from the bank to invest in the camphor business the former paid the interest to the latter. The money borrowed from the bank was instantly deposited with the same bank on current account and Messrs Mourilyan, Heimann & Co. made out cheques which amounted to yen 226,250 in all and delivered them to Messrs. Samuel, Samuel & Co. Mr. T. S. Baker, sub-manager of the Hongkong & Shanghai Bank, did not touch this point when he was examined in the lower Conrt as a witness. The bank, however, lodged a claim when the decree of bankruptcy was given; the claim was made under the title of "over-drawn." On the other hand, Messrs, Samuel, Samuel & Co. gave receipts of the Bank of Formosa for yen 226,250 on July 4th, 1902, to Messrs, Mourilyan, Heimann & Co. It is clearly understood that the former recognized the relation between the latter and the Hongkong and Shanghai Bank with reference to the loan. Mr. Hioki further repeated the statements made by Mr. T. S. Baker, Mr. H. C. Pigott, and Mr. Y. Hijikata, a professor of the University, to support his contention.

Mr. Akiyama, Counsel for respondents, having

introduced his evidence, gave a brief explanation. He added that the bankrupt firm was not a legal person as provided for in the Japanese Commercial Code and that the incognito partners of the firm had no right to claim the guarantee money offered to the Formosan Government. After the expiration of the contract the money

Having replied to the representative of the re spondents, Mr. Hioki stated that the money in vested by the bankrupt firm was a portion of the capital needed in the camphor business though the other side said that the money was employed as guarantee only. Even if the money was only employed as guarantee, it made no difference as to the nature of the capital invested.

A brief discussion followed, after which the Court declared that the hearing was completed and that judgment would be delivered on June 9th at 8.30 a.m.

Judgment was delivered in this appeal on June 9th in the Tokyo Appeal Court by Judge K. Sudzuki and four associates as follows

1.—The claim of yen 226,250 with interest, lodged by the liquidator of the bankrupt estate of Messrs, Mourilyan, Heimann & Co., is dismissed.

2.—The appeal of the same liquidator against the interlocutory judgment given in the lower Court as to the responsibility of Mr. E. C. Davis

CLAIM FOR ADVERTISING.

is also dismissed.

The hearing of the case in which the Teikoku News Agency claims yen 313.23 from the Japan Super-Aeration Co. was resumed on June 6th in the Yokohama District Court before Judge Naka-nishi. B. Kakehi was examined as a witness,

He stated that he was employed by plaintiffs from June last till March this year. Defendants opened business last year in Yokohama. About the middle of August the firm entertained the journalists of Tokyo and Yokohama in celebration of the starting of the business, and this invitation was arranged by the news agents. On August 25th last, witness paid a visit to the office of defendants and enquired about advertising the defendants and enquired about advertising the aërated water in Japanese papers. Defendants asked witness to draw up an advertisement and an estimate of charges. These were later presented to them. At the end of August, defendants informed the News Agency, through Mr. Sasaoka, sole agent in Tokyo for defendants, that they had decided to publish advertisements in Japanese papers with a limit of yen 300. To ascertain the truth of this order, witness went to the office of defendants where the directors were just holding a meeting. Some gentlemen made an alteration in the advertising design and the corrected copy was later given to plaintiff through Mr. Sasaoka.

Defendant's counsel held that the advertisement was ordered by the agent in Tokyo and not by the company. Counsel asked the Court for leave the company. Counsel asked the Court for leave to examine Mr. C. K. M. Martin and T. Sasaoka as witnesses.

The Court rejected the application,

Plaintiffs' counsel presented two letters to the Court as evidence and explained that these documents show that defendants ordered plaintiffs to publish the advertisement in Japanese papers.
Defendants' counsel was quite ignorant of the

existence of these letters, and asked the court to adjourn the hearing till he could examine them with his clients.

The proceedings were adjourned till June 15th.

A LEASE CONTRACT.

This case, instituted by Mr. Paul Helmagainst two Chinamen, Chao-tze-chin and Chao-wei-li by name, petitioning for the cancellation of a lease and claiming yen 2,100, came up on June 7th in the Yokohama District Court before Judge

Plaintiff's counsel stated that Mr. Helm on Jan. 1st, 1898, leased the compound at Nos. 119 and 120, Yamashita-cho, and several buildings situated thereon to Chao-myong-lung, father of defendants for a term of twenty years. The lessee died last year, and his sons, the present defendants, succeeded to the lease and occupied the estate and buildings. Defendants, however, had not paid any rent since October last.

said that the statements of Messrs. Pigott and pute did not exist when the lease was made and some had been re-built after further agreement between the parties, so that plaintiff could not

claim on the new buildings.

As a mistake was found in the complaint of plaintiff, the Court ordered plaintiff's counsel to correct it and also to ascertain the point as to the succession to the lease by the present defendants.

The proceedings were adjourned till June 25th.

BAMBERGER v. SCHROEDER

In the Yokohama Local Court, the hearing of this case, in which plaintiff claims yen 50.85 and defendant counterclaims for yen 99.99, was resumed on June 7th before Judge Hasegawa. Mr. N. Morgin was examined as a witness,

He stated that the fire which occurred in the Central Hotel, No. 72, he believed to have originated from an oil-stove in an upstairs room. In the room were a wardrobe, a bed and some furniture. The matress of the bed having been stuffed with bamboo-shavings the fire seemed to have caught hold of the bed and further extended to the wall, which had been lined with thin planks. During the fire witness ordered some firemen to throw out the bed, and it was taken from the room when almost destroyed.

Having concluded the examination of witness, the Court adjourned the proceedings. The date of the next hearing was not fixed.

CLAIM ON SHARES.

In the Yokohama District Court the hearing of the case in which Mr. R. J. Ward claims yen 8,515,60 against B Sho, a share-broker, was resumed on June 9th before Judge Danno.

Defendant's Counsel stated that in connexion

with this case, plaintiff's counsel brought a charge in the criminal section of the Yokohama District Court against B. Sho and M. Muramatsu and subsequently they were examined by the Public Procurator. According to the statements Public Procurator. According to the statements given by them at the preliminary examination, it was found that last autumn Mr. Ward ordered Muramatsu to sell fifty shares of a Japanese association when the latter told the former that the market price of the shares was expected to reach yen 188.20 per share. Mr. Ward, however, did not give a limit of price to sell. Tokumiya, which is a share-broking office belonging to defendant, sold the shares on Ianuary 19th Tokumiya, which is a share-broking office belonging to defendant, sold the shares on January 19th for 19th 7,206. The money was delivered on Feb. 1st to Muramatsu who the same day paid the amount to Mr. Ward. Mr. Ward, who had been told by Muramatsu that the anticipated quotation would be 19th 188,20 per share, making 19th 9,410 for the fifty shares, was much astonished at the amount he actually received. There had consequently been a mis-understanding among the parties and the Public understanding among the parties and the Public Procurator acquitted them. Counsel further said that Mr. Ward carried on his share transactions with Muramatsu on joint account. At the close of the business, the Japanese owed the foreigner over one thousand yen. As the former could not pay the debt, he gave a note promising to pay in monthly installments and he affixed to it the office stamp used by Tokumiya. This also caused a misunderstanding between Mr. Ward and B. Sho, as the latter was certainly ignorant of the promissory note given by Muramatsu.

Plaintiff's counsel stated that Muramatsu was the Manager of the Yokohama branch of defendant's firm when the transactions between the parties took place.

Defendants counsel held that Muramatsu was a broker and had no relation with defendant.

Mr. Masujima, representative of Mr. Ward,

asked the Court for leave to examine the Mana-ger of the Tokyo Branch of the Sumitomo Bank, Osaka, as a witness regarding the stamp used by

The Court, having granted consent to this petition, adjourned the proceedings till June 21st.

CLAIM ON THE H. & S. BANK.

After the expiration of the contract the money any rent since October last.

In the nearing of this case, in which an Indian merchant, Dhunamal Chellaram, claims yen 300 hai Bank through Messrs. Samuel, Samuel & Co. Chinaman was strivited by many other sons besides against the Hougkong and Shanglai Bank, was In concluding his remarks, he criticized strongly the evidence offered by theliquidator.

Mr. Masujima supported Mr. Akiyama and Counsel further stated that the buildings in dis
The nearing of this case, in which an Indian merchant, Dhunamal Chellaram, claims yen 300 hair against the Hougkong and Shanglai Bank, was in the present defendants and that defendants did resumed on June 9th in the Yokohama District not succeed to the lease or occupy the property. Court before Judge Danno.

The parties presented several letters to the The hearing of this case, in which an Indian

Court as evidence regarding the spelling of the name of plaintiff and they discussed the difference between D-h-u and D-h-a, after which the case was again adjourned.

HAIM v. BRETSCHNEIDER.

This case came up again on June 9th in the Yokohama District Court before Judge Danno, when two Japanese were examined as expert

H. Tashiro stated that the original commission given in Yokohama was 5 per cent. or a little more, charged on the cost of merchandise. In case a manufacturer failed to supply goods which he had promised to deliver in due-time he was he had promised to deliver in due-time he was held responsible to pay damages, but the amount was not to exceed 5 or 10 per cent. except for special contracts. The witness having compared the porcelain cups made by defendant with the samples supplied by plaintiff, stated that the quality and pattern of the cups were quite similar, but that one of the cups seemed to be smaller than the sample. It was not defective in manufacture. The ware was a cheap lot so that nobody could complain about a slight difference in size.

K. Kawamuto another, witness, caye a state.

K. Kawamoto, another witness, gave a state-K. Kawamoto, another witness, gave a statement nearly similar to the foregoing and added that freight to Alexandria or Port Said was 40 shillings per ton of 40 cubic feet and that the rate of marine insurance had risen since the outbreak of war. He believed it to be between sen 50 and 70 per yen 100. The packing charges for inferior porcelain would be about sen 20 per cubic foot. Having compared the cups and samples he said that the larger one was superior to sample, but the smaller was inferior so that a reduction of about 10 per cent. should be made in its price.

The proceedings were adjourned.

YOKOHAMA AMATEUR ROWING CLUB.

SPRING REGATTA.

The spring regatta of the Yokohama Amateur Rowing Club, which began on Friday afternoon, was favoured by the very best of weather and happily there was a large attendance of ladies as well as of the other sex who are interested in aquatic athletics. Of course the attractions of the local sports were enhanced by the inclusion in the programme of several interport events, Kobe the programme of several interport events, Kobe having sent up several crews to contest the interport rowing supremacy. It may be said at once that the Junior Double Sculls were an easy win for Kenderdine and Schwabacker, that the Interport Fours were a "moral" for Yokohama, which got home easily in front, aided, no doubt by Kobe's exhausting effort at the outset of the race; that the Junior Fours was a close contest for the three hears involved, and that the contest for the three boats involved, and that the Senior Paris was a narrow business for Cartwright, whom Poole was pushing close. The Interport Single Sculls were easy for Irwine, though, here as in other races the rowers were greatly impeded by bamboo stakes in the course, of the Skiff Race by bamboo stakes in the course, of the Skiff Race little need be said except that the fair steers-women did their best to bring their craft home to victory; and the Senior Double Sculls ended as many people expected in a win for Irwine and Hayward against whom Timm and Poole made a very poor show. After the last race Miss Irwine very gracefully presented the Ladies Purse to the winners, the usual honours being paid to the vourse lady for gracing the occasion with her young lady for gracing the occasion with her

During the afternoon a band discoursed dance music and various selections. Following were the Committee:—Messrs H. C. Litchfield, President; F. J. Hail, Captain; Dr. Wheeler, H. E. Hayward, L. Motu, Rev. W. Weston, M. Schellenburg, W. Goddard, F. H. Abbey, Hon. Treasurer, O. Strome, Hon. Secretary.

It should be said that the arrangements of the Committee were most complete and that the boats were sent away very promptly from the pontoon, for which, as well as for energetic coaching of various crews the Rev. W. Weston deserves the thanks of the Y.A.R.C. and of others interested in the sport of rowing.

Following were the events:-

Kenderdine in the outside position took the lead at the start, both crews finding the sharp south-easterly breeze and following sea a bit awkward at first. Pzarl kept her lead till near the P. M. Wharf, where Nicolle drew up a little and, later, coming level fouled a bamboo stake and ran into the other crew. The race was re-started from this point but Kenderdine had it in hand any way and won easily by five lengths. The steering was bad on both sides, but perhaps that can be excused.

	,

Kobe had the outside berth and probably the worse of the water, which was pretty lumpy at the mile, but they got off feirly level. Kobe set a fast stroke—as to the wisdom of which it will, perhaps, be sufficient to point to the results—and drew out in front. At the ¾ mile Kobe was shaping for daylight between the boats, and as they neared the ½ mile the visitors, still going about t5 to the half-minute, were nearly half a length of clear water to the front. But here the Yokohama steady stroke began to tell and with no special call upon the crew, but doubtless with the aid of a favouring wave or two the black boat shot up and a powerful "six" disposed of Kobe's lead and sent the home stroke into the premier position. Yokohama kept it up for a minute or so, and then slowed down and rowed in through the smooth water of the inner harbour three lengths ahead of their opponents. This distance, as a minimum estimate, separated the boats at the finish. Time, 8.05.

	,	,	

The Junior Fours started on about equal terms, White (C. H. Abbey) being perhaps a little the promptest in getting off. All four crews rowed with admirable pluck over the first stage of the course, but Red (Nicolle) gradually came away and led comfortably at the breakwater, Figuerido and Graham fighting for second place. Nicolle got home by 2½ lengths, but Figuerido was only able to finish half a length ahead of Graham, C. H. Abbey, from whom better things were expected, a length behind third. Time, 7.46.

"NO. 3 BOAT." | 142 } 3

The Skiff Race was a bustle in from the P. M. Wharf which, after a hard-rowed race, resulted in victory for H. Goddard, who was steered to his win by Miss Cameron. It was a close race, about a length separating each boat from the other.

SENIOR DOUBLE SCULLS.—I Mile.

SENIOR DOUBLE SCULLS .-- 1 Mile. Ladies' Purse.

The Second Day of the Spring Regatta was even more favoured by the weather than was the first part of the programme. The sun shone strongly but the heat was tempered by the southerly breeze which prevailed all day. The water was also satisfactory. The ladies graced the occasion with their presence in even larger numbers than on the first day; a band was again in attendance and supplied plenty of music, and as, while the proceedings went on no fewer than four while the proceedings went on no fewer than four yacht races were sailed, and a series of Japanese crews had contests off the Bund, the regatta was animated enough to please both eye and ear. The Boathouse verandah with its parterre of bright colours was quite a pretty sight. Kobe lost the two interport events set down for this day; the Pairs proved a good race with a fairly close finish, but unfortunately the Double Sculls was a mere procession. A match between Timm and Irwine, procession. A match between Timm and Irwine, which had no place in the programme, aroused considerable interest. They went over the mile course in Single Sculls, and Timm, securing a lead at the outset, maintained it to the end, finishing over a length to the good. But it has to be added that one of Irwine's outriggers was sufficiently out of order to impose a considerable handicap upon him. The prizes were presented, at the close of the Regatta, to the winners by Mrs. F. J. Hall, wife of the Captain of the Club. Mrs. Hall also proposed and led three cheers from the ladies of Yokohama to the winners and also the Kobe visitors, boping they would come again. Mr. H. C. Litchfield, President of the Club, presented Mrs. Hall with a bouquet and called for three cheers for gifts the recipient, a call called for three cheers for gifts the recipient, a call which was heartily responded to. Mrs. W. Weston presented little personal souvenirs to the local interport crews to remind them of the stringency of their training. In the evening the Kobe visitors were entertained at dinner by the Yokohama Club. Afterwards they attended the dramatic performance in the Public Hall.

Mr. F. J. Hall acted as Starter, Mr. H. C.

We learn that the protest lodged by "Lark"

No. 15 against No. 11 has been sustained.

The protest by Nina against Daimyo for fouling at the Nagahama mark on Saturday has also, we understand, been upheld. The point involved was as to the blame involved by *Vina* closehauled, touching Daimyo as the latter bore away round the mark.

BASEBALL.

TOKYO HIGH SCHOOL v. Y. C. & A. C.

The baseball team of the Yokohama Cricket and Athletic Club opened their season on Saturday afternoon with a match with the Tokyo The yachts had on Saturday a fine whole sail High School, and in the result were completely snowed under. The score, 8 to 0, does not fairly The yachis had on Saurday a fine whole sail breeze. Among the cruisers Nina was quicket across the line on gun fire, but not setting a spinnaker for the run out of harbour was passed just before the entrance by Daimyo, disagao and Spray. At the lightship Daimyo, therefore be grossly unfair to apply to them the criticism which Mr. Dooley passed recently upon the present occupiers of Port Arthur: "They Wanderer and Kathleen in the order named, were prepared for what they expected, but not On the heat down to the Widow Broy. Wing for what they expected, but not were prepared for what they expected, but not for what they got." A school team with its abundant opportunities for combined practice

Daimyo until the wind fell very light again, and ing many a good hit over third-base. Third-base,

by the way, was held by J. Murray Mollison, and seldom have we seen better and neater fielding at seldom have we seen better and neater helding at that position. Time and again he put men out by smart stopping and throwing to first base and his display in the field alone atones for Yokohama's defeat. Given a few hard practices, the team should, however, acquit itself well in the coming season, and the memory of their first match will serve, we hope, but as a stimulant to greater effort. greater effort.

greater effort.

Dr. Garton brought his team on the ground in stylish order, amid the cheers of a very large gathering, and the game was called at five minutes past 3 o'clock. Tokyo went to bat, Kobayashi, their "star" hitter, opening with a strike that failed to earn first base. Nakano took first on balls, and slid down to second, which he reached only just in time. Kuroda took first on an error set down to Parker, and Nakano moved on to third. Ishikawa, after hitting mount foul, got down safely to first and all bases were filled. Nakano then ran home, but Konishi perishing at first and Sugiura going out on strikes, perishing at first and Sugiura going out on strikes, the side retired.

Yokohama began its iming with Parker, the first to bat, being badly hit on the inside of the arm, paralyzing the limb temporarily and handicapping him for the rest of the game. He took first, but was put out at second. Garton, taking first on balls, got down to second on an overthrow. Jenks took first on balls and then had the average had lack of being hit by a then had the extreme bad luck of being hit by a ball struck by Thorn as he was running to second; Correa being put out at first, the side retired.

Nothing was scored by either side in the second innings, the fielding being very smart all round. The third innings saw Tokyo put one more on to their score, Nakano making the point. This innings was marked by a capital catch by Messer in centre field, putting out Kuroda; and by a smart bit of double play between Messer and Garton by which Ishikawa was forced off first. Vakabama which Ishikawa was forced off first. Yokohama again went out for nothing. The fourth inning saw the home team rattled, the visitors scoring four runs, Tashiro, Uyeno, Kobayashi, and Nakano all getting back to the home plate. From this time on the play was all with the fielders; and it was hard to decide which side was playing the better game. In the fifth innings, for instance, when Tokyo went to bat, only four balls were pitched. Sugiura opened by rapping out the first ball pitched to him to third base. Mollison smartly fielded and sending the ball down to first put out the batter. Mollison repeated the movement with the next strike, Moreodsumi being put out; then which Ishikawa was forced off first. Yokohama the next strike, Moreodsumi being put out; then Pitcher sent down his fourth ball which Tashiro sent high up in the air and Parker held him—the inning lasting barely 60 seconds.

In the last innings Tokyo scored two runs-Nakano and Sugiura—and the game concluded with Yokohama failing to notch a point, despite all their efforts. A feature of the game was the number of times men were hit by the pitcher, both sides suffering about equally in this respect, Yokohama only made two hits that earned a base. The teams were:

THE WILLIAMS SHAKESPEARIAN RECITAL.

The plan of the Public Hall and reserved seat tickets for the recitals of Shakspeare's plays will be available after nine o'clock this morning Of the skill and cleverness of Mr. and Mrs. Williams in their special field there can be doubt. For his sixth performance in Bombay "Julius Caesar" was given, of which the following is an extract from the Daily Gasette:—

Caesar " was given, of which the following is an extract from the Daily Gasetle:—

"Mr. Hannibal A. Williams gave further evidence yesterday afternoon, at the Novelty Theatre, of his mastery of Shakespeare's plays by a remarkable performance of the greater part of the Roman historical tragedy, "Julius Cæsar," before the advanced students of the several schools and colleges of Bombay. The theatre was well filled and the students entered thoroughly into the spirit of the great drama. The well written comments assisted materially in giving a clearer idea of the scenes interpreted. Two portions of the tragedy were looked forward to with special interest—Mark Antony's famous address at the funeral of his friend, and the quarrel between Brutus and Cassius before the battle of Philippi. The oration of Antony was indeed finely delivered, the reciter interpreting with wonderful art the appealing pathos, the tender eulogies and above alt the sublety and astuteness of the faithful Antony, who compelled the crowd to "mould opinion on his gifted tongue." The delivery was listened to with wrapt attention and at its termination, hearty applause was accorded. Mr. Williams also exhibited great talent in interpreting the war of words between the deep bass tone of the gentler Brutus and the shriller voice of Cassius. The quarrel and subsequent reconciliation in which the nobleness of Brutus is evidenced was a piece of work of great excellence."

Admirers of Shakespeare who gathered at the

Admirers of Shakespeare who gathered at the Public Hall on Tuesday evening in large numbers were certainly not disappointed in their ex-pectation of an entertaining evening. Mr. Hannibal A. Williams is a really fine reciter, and his gift was shown by the keen attention displayed by the audience throughout the recital. It is not an easy thing to give a good inter-pretation of "Julius Cæsar," but Mr. Williams discharged his task with such success that the comments at the close were all of an eulogistic character. His finest efforts were in Scene 2, Act. III., where Brutus first wins the ear of the mob with his speech at the bier of Cæsar, only to to offer is that the biting sarcasm of the oft

repeated.
"Yet Brutus is an honourable man."

was scarcely emphasized sufficiently. With this one exception, to mention which perhaps is to pose somewhat hypercritically, Mr. Williams gave an excellent interpretation of the work selected, and his declamation of Brutus' speech in the Camp at Phillippi needs a special word of praise :-

Who is here so base, that would be a bondman? If any, speak; for him I have offended. Who is here so rude, that would not be a Roman? If any; speak; for him I have offended. Who is here so vide, that will not love his country? If any, speak; for him have I offended.

At the close of each scene Mr. Williams was rewarded by loud outbursts of applause from the delighted audience and at the finish of the recital he had to return to the stage to bow his acknow-

It only remains to say that the stage was most tastefully arranged and that Mr. Williams may be assured of a full house at his next evening.

FIRE ON THE BLUFF.

Fire broke out, about 3.20 p.m. on June 9th, in the engine room of the Japan Brewery Company No. 123, Bluff. It was put out before the flames extended far, so that the damage reported is very slight. A quantity of turpentine which had been piled near the engine boiler caught fire and caused the outbreak.

SOME AMERICAN TOPICS.

Ex-Governor William A. Stone, speaking before the Cieutenant James Lisle Post, G. A. R., took a fall out of Carnegie's hero fund as follows:—"I consider this newly established Carnegie hero fund, the most ridiculous, foolish and inane organization of the present day. True heroes need no official endorsement other than the friendship of their comrades and fellow men. Heroes who are heroes would shun public charity for their deeds."

Mr. Andrew McNally of Chicago, head of the printing and publishing firm of Rand, McNally & Co., died on May 7th of pneumonia at Pasadena, Cal. Mr. McNally was born 66 years ago in the north of Ireland, and landed in New York in the 1858, going to Chicago shortly afterward. He started a printing office and issued an evening paper. Later he became head of the *Tribune* job office, but after the fire he embarked on a larger scale for himself and gradually built up one of the greatest establishments of its kind in

Mr. Hearst's expenses are a matter of considerable interest, remarks *Public Opinion*. He has gathered together about forty instructed delegates gathered together about forty instructed delegates so far at an estimated expenditure of \$15,000 a day since the first of February. This is the figure given by the Washington correspondent of a Chicago paper who usually knows what he is talking about. One hundred days at \$15,000 a day would be a million and a half. Supposing that this sum will cover all his expenses and supposing that this sum will cover all his expenses and supposing, as Mr. Walter Wellman does, that Hearst goes to St. Louis in July with r50 delegates, each one will have cost him \$10,000. Only Mr. Hearst can say whether the investment has been a paying one because no one knows how much he is willing to charge off to advertising.

According to the National Geographic Maga-sine, the total catch of food fishes in the United States and Alaska, as shown by the last canvas, Stales and Alaska, as shown 5, was 1,733,314,324 pounds, valued at \$45,531,-165. The number of men employed was 214,056 and the capital invested was \$72,261,646. The salmon pack of Puget Sound alone in 1901 exceeded \$4,500,000, an amount more than four times as great as the entire silver output of the mob with his speech at the bier of Czesar, only to the have the crowd won from him by the more whole region drained by the Columbia river. adroit oration of the dead man's friend, The salmon output of Alaska for 1903 is valued Mark Antony. If Brutus' speech was very at \$10,000,000, which exceeds by more than effectively given the latter's oration—with the \$2,500,000 the amount which Alaska cost; shouts of citizens—was even more dramatically pourtrayed. The only criticism we have halibut and other fisheries of Alaska, the total offers that the hiting revoces of Alaska. greatly exceeds all the other resources of Alaska combined.

> Commissioner Wright's bulletin, says a New York paper, on the increase in the cost of living was not needed to convince people that prices of everything from bread to rent have gone up. But it is desirable to have the figures before us in the form of official statistics. Farm products have increased all the way from 5 to 59 per cent. Thirty-five articles of food have increased from 5 per cent. for bread to 72 per cent. for pepper. Fifty-six out of seventy articles of clothing are higher, fuel and light are also higher in price; in fact, the only thing that is relatively cheap is beef. The statistics show a decrease in the price of beef from 1902, but the relative price compared with the period since 1890 shows an increase in cattle prices of 4.7. The family that has been cattle prices of 4.7. The family that has been wondering why it was pinched on the income that formerly sufficed for its needs can have it all explained by reading the Bureau of Labour bulletin.

> Statistics of the coinage operations of the United States mints in the months of February and March rendered it certain that the coinage of gold for the current year would be exceeding-ly large, and the publication of the figures for April not only bears out the earlier anticipations, but indicates that the figures reached this year will be the largest in the history of the Government. The coinage for January was not large—only \$2.765.000—but that for February amounted to \$35,603,500, that for March to \$63,605.790 and that for April to \$26,177,600. The total

for the four months amounted to \$128,151,800. which represents an increase of over \$84,400,000 as compared with the gold coinage for the whole of last year and of over \$16,800,000 as compared with the previous record year, 1899. As the legal name of the denomination, has secured result of the heavy coinage of gold, coupled with an extended report in which the opinion is exthe gold exports, it is now found that the pressed that any change at this time is inexpedisupply of gold bars for export has been reduced ent. The report is to be submitted to the Geneto a very low level, and it seems as though resort at Convention, which will assemble in Boston would have to be made to the shipment of gold coin for exchange operations.

The Bureau of Insular Affairs of the U.S. War Department has issued a bulletin on gutta percha and rubber in the Phillipine Islands in which it is shown that the increasing demand for gutta percha, which has run parallel with the construction of submarine cables, has resulted in the exploitation of the rubber-producing zone in the Philippines. This zone is confined to the islands of Mindanao and Tawi-Tawi. The Government is deeply concerned because in the past the only way of gathering gutta percha known to the natives involved the destruction of the trees. The Forestry Bureau has prohibited this and has provided rules which require the tapping of the tree in such a manner, with a bolo, as not to destroy its future usefulness. The wild natives, however, continue to violate the regulation. Islands such as Mindanao and Tawi-Tawi cannot stand this for any length of time and already the gutta percha trees have entirely disappeared from the vicinity of the coast regions and of the large rivers. Most of the Philippine gutta percha passes through three hands and the rise in price is quick and decided, the native collector receiving about £xx. Maxican the native collector receiving about \$10, Mexican, for a picul of 162 1/2 pounds. This is then carried by the trader to export towns and sold to the Chinese at \$40 to \$80, Mexican, per picul of 137½ pounds and is worth at Singapore about \$150 per picul.

It is held by some that through the disruption of the Bessemer Lake Ore Association and the consequent curtailment of iron ore production, the United States may lose temporarily its position as the largest ore producer in the world. It is urged that should the lake output be limited to 12,000,000 tons, as now seems probable, and the southern output to 3,500,000 tons, making a total of 15,500,000 tons, Germany will pass the United States and take first place among ore producers. Last year the total ore output of the United States was about 28,000,000 tons, while Germany produced about 18,000,000 toos, Great Britain 12,000,000 tons, France 4,500,000 tons and Belgium 220,000 tons. The comparison of ore production, in tons, of the five leading countries for a number of years is as follows:

	1903.	1902.	1901.
United States*	27,500,000	33,000,000	28,887,479
Germany		-	16,570,258
Great Britain	,13,000,000	_	12,257,198
France		5,400,000	4,790,732
Spain	8,478,600	8,063,555	8,320,000
·	*Estimated		

The world's output of ore in 1901 was 86,868,000 tons, of which the United States produced 33.25 per cent., Great Britain 14.13, Germany and Luxemburg 19.08, France 5.51 and Belgium .25, In 1902 the United States increased its percentage of the whole to about 36 per cent., but in 1903 it fell below 1901. Germany is making the greatest strides next to the United States, both in ore production and pig iron out-put. It is considered practically certain that Germany's ore putput this year will exceed that of the United States because of the present situa

United States, though it was supported by a beautifully engrossed memorial, signed by 26 prominent Americans, including Cardinal Gibbons, Archbishop Farley, Bishop Potter, Senator and Mrs. Depew, General and Mrs. Miles, W. K. Vanderbilt, Mayor McClellan, George Gould and Mrs. Sage. It was proposed that she embody readings from Shakespeare, Tennyson and Longfellow, in her programme, the formation of which was left to herself. It was stated that part of the gross receipts would be devoted to charity. gross receipts would be devoted to charity.

General plans for reclamation projects in the West so far approved by Mr. Secretary Hitchcock provide for an expenditure of about \$27,000,000. These cover projects in California, in the vicinity of Yuma on the lower Colorado River, in North Dakota, in the vicinity of Fort Buford, in South Dakota north of the Black Hills, near Belle Fourche and in Oregon on the Malheur River west of Boise, Idaho. 'The projects will reclaim in round numbers 1,000,000 acres of land. Expenditures are to be made from the reclamation fund, which Congress created from the proceeds of land sales in the semi-arid district. It is intended to reimburse this fund from sales of reclaimed land after the projects are completed.

In a few years we shall read epitaphs like this, says the Portland Oregonian: —

Here Lies JOHN PITTSBURG SKIBO SMITH, Who was born in a CARNEGIE TOWN, Educated in a CARNEGIE INSTITUTE. Studied in a CARNEGIE LIBRARY. At the age of thirty he became a CARNEGIE HERO And has now gone to be with CARNEGIE.

Mr. John Langdon Dodge, for half a century one of the foremost men of finance in New England, died at his home in Great Barrington, Mass., on May 18th from apoplexy, in his 90th year. Born in poverty on a worn-out farm in New Marlboro, in the Berkshire Hills, in 1814, Mr. Dodge accumulated a fortune of nearly \$1,000,000. At one time Mr. Dodge owned nearly half the business section of Duluth and the principal bank. He came to Great Barrington in 1849 and was elected a director of the National Mahaiwe Bank, becoming its president five years later. He held this office 50 years, retiring on Jan. 1st last. He was well known in New York and western financial circles and a power in the Republican politics of Massachu-

From the Boston Transcript :- It is unpleasant to learn from Bishop Satterlee that "the tone of life in Washington has become less natural; social conditions have changed, and for the worse." In the old days whatever forter Wa worse." In the old days whatever faults Wa-shington may have had, it cultivated a wholesame and even anusing democracy. Every man was better than every other because no one knew when next he might be on top, and to whoever had the requisite clothes—even the clothes were not absolutely essential—the national free lunch not absolutely essential—the national free function route lay open day and evening through the houses of political and social notables. But lately all that has been changing. The beginning of the end appeared several years ago, at a Mrs. Antonio Navarro (Mary Anderson), has declined an invitation to reappear in public in the declined an invitation to reappear in public in the the foreign potentates and a few American exclu-United States, though it was supported by a sives were roped off from the herd of everyday beautifully engrossed memorial, signed by 26 folks in evening clothes. Since then, facilis descensus Eurorae.

> The New York Society of the Order of Founders and Patriots of America held its eighth annual din-ner at the Waldorf-Astoria on May 13. Admiral Dewey, the new Governor-general of the Order, and Lieutenant-General Nelson A. Miles were the several years he has been intimately identified guests of honour. Admiral Dewey spoke briefly with political management, scarcely any man of the U.S. Navy. He said that the officers and sustaining more confidential relations with Presi-

> The committee of fifteen, which was appointed by the National Triennial Convention of the Protestant Episcopal Church at San Francisco in the American people intend we shall have a 1901, to consider the advisability of changing good Navy, not for aggrandizement, but for protection to consider the advisability of changing good Navy, not for aggrandizement, but for protection. When the present programme of naval an extended report in which the opinion is expressed that any change at this time is inexpedient. The report is to be submitted to the General Convention, which will assemble in Boston next October. The committee recommends the passage by the Boston Convention of the following resolution: "Resolved that the committee be discharged from further consideration of the subject."
>
> The report is to be submitted to the General Robert Programme of the Japanese as hardy, fatalistically brave and loyal soldiers. He said the Cossacks knew how to fight, and that the Turks are deserving of respect when the green banner waves, but that the subject." The committee of fifteen, which was appointed enlisted men and the ships of the United States principle of fighting for republican ideas is absent," said the General.

Edward Bok, in a page of the May number of his periodical, addresses himself to array the Women's Christian Temperance Union against the patent-medicine industry. He prints a list of thirty-six kinds of "bitters" and other familiar patent remedies with the well-known official report of the analyst of the State of Massachusetts as to the percentage of alcohol each mixture contains. The percentages range from 12 to 475, the average being about 23. These patent medicines, which are enormously advertised and which are consumed in vast quantities by the medicines, which are enormously advertised and which are consumed in vast quantities by the public, are swallowed without scruple by great numbers of persons who are either outspoken foes of "rum" or are particularly wary in their use of it, says Harper's Weekly. They are, as a rule, unaware that they are using They are, as a rule, unaware that they are using compounds some of which contain more alcohol than ordinary whisky does, and all of which contain vastly more alcohol than exists in beer. Mr. Bok feels that the W. C. T. U. is neglecting a field of great promise in not opening a campaign against these deceptive beverages, which warm the insides of temperance folk who don't know what they are disking. what they are drinking.

Governor Blanchard, of Louisiana, was installed in office on May 16, and in the course of the proceedings said:—"Mob law in contravention and defiance of law will not be tolerated. Lynchings will not be permitted under any circumstances. The negro is here. He is a man and a citizen. He is useful and valuable within his sphere. Within that sphere he must be guaranteed the equal protection of the law, and his education along proper lines—mainly agricultural and industrial—is at once a duty and a necessity. He must be encouraged in industry and taught the labits of thrift. No approach toward social equality or social recognition will be ever tolerated in Louisiana. Separate schools, separate churches, separate cars, separate places of entertainment will be enforced. Racial distinction and integrity must be preserved. But there is room enough in this broad southland for Governor Blanchard, of Louisiana, was installed there is room enough in this broad southland for the two races to live on terms of mutual trust, mutual help, good understanding and concord. The South asserts its ability to handle and solve the negro question on humanitarian lines-those of justice and of right. We brook no interference from without.

Mr. George B. Cortelyon, Secretary of the Department of Commerce and Labour, seems very likely now to be selected as chairman of the Republican national committee. While in no sense endeavoring to anticipate the action of the Chicago convention or that of the national committee to be chosen at that convention, President Roosevelt and leaders of the Republican party generally have canvassed for months the subject of the national chairmanship, Several widely known and influential Republican leaders have been considered for the important position. Some time ago the name of Secretary Cortelyou some time ago the name of Secretary Cortesyou was suggested. It met with instant favour. It is known that Mr. Cortelyou sustains very close relations not only with the President, but also with party leaders throughout the country. He is regarded as being admirably equipped for the position, possessing fine executive ability and a thorough knowledge of men and affairs. For dent McKinley, Senator Hanna and President Roosevelt than he. If he should be elected national chairman he would resign his position in the cabinet and devote his entire time to the work of the campaign. In a measure this would involve a big personal sacrifice.

NOTES AND COMMENTS ON WAR NEWS.

he following comments appear in the Daily Graphic over the signature "C. B." It is easy to be wise after the event, and useful too. The following note, appearing on April 18, shows how the sinking of the Petropavlovsk might have been avoided, and discusses the comparative strengths of the navies:

It is noticeable that the Sevastopol did not come It is noticeable that the Secusiope did not come out with the ill-fated squadron under Admiral Makaroff on Tuesday, April 12th, a fact which appears to confirm the report that this vessel had been in collision with another. Such accidents, which amount to disasters in war, owing to the loss of fighting force, are usually the result of want of training. In nearly all cases of collisions of battleships in our force, are usually the result of want of training. In nearly all cases of collisions of battleships in our own and other navies it will be found that at least one ship had new officers in charge or was a newly commissioned ship. In the Russian Navy the accidents are the direct result of the attempt to organise a Navy with only four months' instruction in the year, and practically no fleet training. The anxiety which this state of affairs must have caused Admiral Makaroff must have been terrible. How else account for the Admiral himself spending the night in "a guard boat" (destroyer?), if he could place the implicit reliance on subordinates which is given by Admiral Togo to his devoted officers." We do not find the latter departing from his battleship to do the work of subordinates. Take this eighth attack on Port Arthur on Monday night, April 8th. Everything worked to perfection. The improvised torpedo depot ship was escorted to Port Arthur by destroyers to beat off other destroyers, and under cover of the clouds and rain lays mines, her movements, owing to the heavy rain, being unrevealed by the searchlights. The mines themselves are laid in positions fixed by gareful observations of the course Admiral Makaroff invariably steered in returning to harbour. Of course, the risks were enomous so far as the crew were concerned, but infinitesimal as regards the vital forces of the Japanese Fleet. Even now that the Petoparlorisk has been destroyed by these mines and the Pobiedat disabled, the Japanese Minister of Marine enjoins Admiral Togo to be careful of his precious armoured vessels, the substitute of the proper of the course and the robicedat disabled, the Japanese Minister of Marine enjoins Admiral Togo to be careful of his precious armoured vessels, the second of the course of the course of the course and minister of Marine enjoins Admiral Togo to be careful of his precious armoured vessels, the second of the course of the course of the course of the course of the course of the course of the paparlese of the p destroyed by these mines and the Pobledat disabled, the Japanese Minister of Marine enjoins Admiral Togo to be careful of his precious armoured vessels, for their work is not nearly completed. There are the Baltic reinforcements, and there is still a naval squadron in Port Arthur. Admiral Makaroff in his last sortie had also with him the cruisers Bayan, Askold, Diana and Norik. It is a thousand pities he did not adopt the common-sense plan of using one of the old steamers in Port Arthur to lead the way in and out of the harbour. She could have booms rigred out from her bows so as could have booms rigged out from her bows so as to explode the mines thirty feet away. It is better in any case to lose an old steamer and a junior officer than a battleship and a splendid admiral. After all, Admiral Makaroff had a good deal to fear from his own mines and a daily sweep of the channel might not have been an unnecessary precaution. In addition to the other losses, the Russian destroyer Strashru was found alone and sunk by the Japanese destroyers.

There seems little doubt that the explosion of a There seems little doubt that the explosion of a Japanese mine on the starboard side of Admiral Makaroff's flagship was followed by an internal explosion, and probably fires leading to fresh and final explosions as she was sinking. It should be remembered that weight was probably saved in the construction of the Petroparlovsk by the omission of the double bottoms, so that there was no ship inside a ship system, as we are in the habit of adopting. Such a ship would have far less resistance to damage from a mine or torpedo than a British battleship.

Though this has been a war of torpedo-boats and mines so far, in a note on April 2nd, the necessity of a strong backing of battleships is discussed in connection with the promises of a

reinforcement of battleships from the Baltic.

If the late Admiral Colomb had lived to witness the present war, his remarkable article on the future the present war, his remarkable article on the inture of the torpedo in war, which appeared in the North American Review, April, 1895, would have been very differently written, for a day of practice is worth a year of theory. I remember the distress with which I read the papers, a distress which was felt because of the effect so able an argument from so a year of theory. I remember the distress with manacuvring the whole time, especially at night, and which I read the papers, a distress which was felt because of the effect so able an argument from so high, an authority would have on the public mind. We had just embarked upon a programme of seven-battleships, and here was our leading public naval

that perfection was the sign of disappearance, and involving himself and the public in a maze of doubts; and one felt that, like the Duke of Wellington, in his old age Admiral Colomb had become an alarmist. The admiral's ideas, re-affirmed in a lecture at the the United Service Institution in 1897, were based in part on a fallacy which I have exposed several times in the Datly Graphic, namely, that you can compare in the Daily Draphe, namely that you can ompare cost of ships by mere comparisons of cost of building. In this way he assumed we could obtain twenty-five destroyers for one battleship, and if twenty-five destroyers attacked one battleship he argued that the battleship was doomed. As a matter of fact, the total annual cost, taking interest on first cost, destroyers attacked one battleship he argued that the battleship was doomed. As a matter of fact, the total annual cost, taking interest on first cost, depreciation, cost of crew, stores, maintenance, etc., is the only safe basis of comparison. Then we want practical experience as to how many destroyers must be built in order to maintain a certain number constantly in commission during war. If this is done I maintain that we should not obtain twelve destroyers constantly in commission for the same price as we obtain one battleship. Waiving this objection, however, we find that Admiral Colomb saw in the destroyer and the battleship mutually destructive principles which could not exist by side. In the discussion at the United Service Institution, Admiral H. J. May put the matter in its true light by saying that "under certain conditions the destroyer can belp the battleship, and other conditions much more likely to occur, the battleship imay help the destroyers." Admiral Colomb would have found all his questions answered in this war. "If our battleships are not going to meet battleships, what is the use of sending them to sea?" Well, the Japanese battleships have been the moveable base from which all the operations of their cruisers and torpedo craft have been made. The Russian battleships did not proceed to sea, not because they feared the Japanese torpedo craft, but because they feared the Japanese battleships. Hence their torpedo craft had to base themselves on Port Arthur, and, not having, like the Japanese. Other conditions being equal, supposing the Russians had to base themselves on the conditions being equal, supposing the Russians had to see a superiority in battleships, would they not naturally have proceeded to sea to fight the Japanese fleet, and to keep open the sea communications of Port Arthur? On the other hand, supposing the possessed a superiority in number of destroyers, what would it have availed them? In the answer to those possessed a superiority in number of destroyers, what would it have availed them? In the answer to those two questions lies the justification of the battleship. Admiral Makaroff's hopes are said to be to endeavour to weaken the Japanese fleet (battleships again), so that the Baltic reinforcements of five new battleships and three old ones can engage it with success. The battleships, we see, are the pivot of the whole pro-blem; and, apart from their special duty of acting as the eyes of the battleships, we only consider the armoured cruisers, with inferior guns and inferior armour, as capable of being used against vessels of their own class, or, as a last reson, as very inferior

It is understood in Japan that it is the navy that is pressing for an attack on Port Arthur. The critic of the *Graphic* takes a different view in a note appearing on April 20th.

In the news to-day will be found an interview with the Japanese naval attaché, which affords the comments of a clear-headed man with a thorough comments of a clear-headed man with a thorough grasp of the principles of naval strategy. My only fear is that the Japanese fleet will be sacrificed to the army, and when the gallant officer talks of a combined attack of the fleet and army on Port Arthur, I have in my mind the disastrous conduct of Admiral Dundas in sacrificing the prestige of our navy to the insistence of the allied generals, and attacking Sevastopol against his better judgment. Dundas had, however, no alarm that any naval force could interfere with him, and, therefore, in hazarding could interfere with him, and, therefore, in hazarding his ships he did not gamble with the fortunes of the campaign. It is very different with Admiral Togo. He has done magnificently with quite inadequate resour-ces, but he would be the first to acknowledge that he owes as much to the deplorable inefficiency of Russian naval officers as to his own skill. Nelson Russian naval officers as to his own skill. Nelson would probably have made a similar acknowledgment concerning the French and Spanish sailors of the Revolutionary and Napoleonic periods. "We are the laughing stock of Europe," said Villeneuve, of the allied fleet which fought at Trafalgar. The Russians have probably five months in which to train the new crews of the Bakic fleet. If the officers and men are trained as new officers and men have been trained in modern days, by being subjected to the strain of incessant work at sea, managuring the whole time, especially at night, and

duties. I think a very formidable fleet could be trained. On the way out there will be eight weeks on board the new ships. The great aim of the Russian Admiralty should be to insist at all hazards on night work, on the principle that a fleet which can fight by night will make light of day work. At Port Arthur they may repair some of the battleships, and the Daily Graphic correspondent at Sevastopol states that 1,500 shipwrights and artificers are being sent to Port Arthur from the Black Sea, together with 2,000 from the Balic yards. It is intended to employ them in building new destroyers at Port Arthur besides repairing the damaged warships.

With regard to the use of torpedo-boats and sons to be learned in naval construction the following note appeared on April 7th.

In my notes of yesterday there was a misprint concerning destroyers. What I wished to say was that to keep two destroyers constantly at sea required that to keep two destroyers constantly at sea required at least three destroyers in commission, and I might go further and say that to keep two destroyers constantly off Port Arthur would require four destroyers in commission. The latter proceeding the Japanese have never even attempted, as is proved by the daylight trips of the Russian fleet and the supplies carried into Port Arthur by Chinese junks. The Japanese have never used their destroyers except in conjunction with their fleet, so that if a destroyer of destroyers, such as the Novik, were to proceed to attack the Japanese destroyers, she would find herself cornered, by the fact that the Japanese cruisers are behind the destroyers. The Japanese small craft are soon likely to have quite other workto do, for as soon as the drift ice is clear of the Yalu they will be required to cooperate with the Japanese forces on the Yalu.

One thing the naval world wishes to hear from

Yalu.

One thing the naval world wishes to hear from correspondents is the experience of the Japanese of nearly two months' sea work. What breakdowns bave there been? Admiral Domvile's fleet was nearly crippled last year as regards information by the numerous breakdowns of cruisers. But the interest of the Japanese ships lies in the heavier-ermanent carried for me given displacement. It was confidently prophesied that they had economised on the framings, double bottoms, and scantlings, and that the ships would not stand the test of real service. framings, double bottoms, and scantlings, and that the ships would not stand the test of real service. I remember seeing the cruiser Kassaci, of only 4,784 tons, and I thought of the British Hermes, of even date 5,600 tons. How comes it that the Kitsagi does 22½ knots and the Hermes 20 knots? They both have the same coal capacity. The Kassagi has two 8-inch guns and ten 4,7-inch guns, against eleven 6-inch guns in the Hermes, while the Kassagi's guns are well protected by shields. In the armoured cruiser class the Idsamo, of 9,800 tons, has a 7-inch belt, does 22 knots, and carries four 8-inch guns and fourteen 6-inch. The British Monmouth class are of exactly the same tonnage and of even date. They are a knot faster, but have only a 4-inch belt, and carry only fourteen 6-inch guns. The gun protection in the Monmouth is 5-inch, as compared with 6-inch in the Idsamo, and the coming tower-10-inch, as compared with 14-inch. If the Idsamo and Kassagi are doing perfectly well, then we have clearly been are doing perfectly well, then we have clearly been cheated of a good deal of fighting strength through adherence to old-fashioned methods.

NEWS OF THE WEEK.

The scarcity of water is at present very much felt in Hongkong.

Marquis Ito proceeded to his villa at Oiso, on ane and by the 3 p.m. train from Tokyo,

The Vice-ministers of various Departments held conference on June 6th at the official residence of the Premier.

According to a telegram from Wiju, dysentery is prevalent among the Koreans in that neighbourhood.

Rear-Admiral Robley Evans's flagship, the Keniucky, has just made a record voyage from Hongkong to New York.

A violent shock of earthquake was felt in Yokohama on Tuesday the 7th about a quarter to five in the afternoon.

Telegrams report that serious shocks of earthquake were felt early on the morning of June 6th at Kure, Okayama, and other western cities.

yen 2,642,124.56 were paid out for sundry ex-

The Sixty-second Bank of Mito, Ibaraki, pre-fecture, which has suspended payment, was ad-judged bankrupt on June 8th in the Mito District Court.

Mr. M. Nambu, Director of the Engineering Bureau in the Interior Department, was released on June 6th, and Mr. R. Nakakoji was appointed to the vacancy.

The Tokyo Chamber of Commerce held a conference on June 6th and decided to convey pro-found condolence to the family of the late Mr. Tata of Bombay.

The amount subscribed in Hongkong, towards the relief of the wives and families of Russians and Japanese serving in the war, reached a total of \$29,587 on the 28th ult.

Mr. C. Fujikawa, editor of the Himeji Shimbun, was, on June 6th, ordered by the local Governor to leave the city. He is reported to have published a statement injurious to the public peace.

The officers and crews of the French gunboat Decidee saw the sea serpent, about 100 feet in length, in the Bay of Along near Haiphong. It was seen in the same bay by the French gunboat Avalanche in 1898.

A Chinese girl fell from a window on the third storey of a house on Connaught Road, Hongkong, on the 26th May into the street below. She luckily fell on a jinrikisha, which was smashed, but she got up unhurt, and quietly walked upstairs again.

The Rev. E. C. Corfe, formerly minor Canon of Rochester Cathedral, son of the late Dr. Corfe, of Oxford, and brother of the Bishop of Korea, was on April 28th installed Precentor of Truro Cathedral, in succession to the late Canon Donaldson.

During fifteen days ended May 31st, 4,652,400 kin of tea were brought from the interior into Yokohama market, and of this quantity, 4,198,700 kin were sold to foreign firms or exported direct by Japanese traders.

The members of the Naval Society held a meeting on the evening of June 6th when Major General Ishimoto, Vice-Minister for the Army, General Ishimoto, Vice-Minister for the Army, delivered a speech with regard to the fighting at Nanshan and Kinchow.

Mr. T. Obata (88) belonging to the former Mori clan, Yamaguchi, Nagato province, was promoted on June 6th to the Junior Class of the Fourth Rank on account of meritorious services at the time of the Restoration.

No fewer than 114 officers of the British Imperial and Indian Armies have, according to the Naval and Military Review, now qualified as interpreters in the Russian language. The study was almost unknown a few years ago.

A telegram from Gifu says that a panic has overtaken the money market. The Ogaki Ginko and other banks are about to suspend payment while creditors are endeavouring to withdraw deposits. The cause of this disorder is not reported.

Lady Durand, wife of the British Ambassador in Washington, has contributed \$100 (£20) to a tea-booth at the fair organised by the Countess Cassini, wife of the Russian Ambassador, for the Russian Red Cross Society. Sir Mortimer Durand has sent \$100 to M. Takahira, the Japanese Minister, for the Japanese Red Cross Society.

Although the late M. Verestchagin was considered a rich man he had nothing to leave except a country house near St. Petersburg and a little villa in the Caucasus. His long journeys and his exhibitions cost him much money, and he was very open-handed. He has left behind a large number of studies, but only one large picture, "The Burial Place of Kings," which he

twenty-two years of age, after being a lieutenant in the 1st Life Guards, served in the King's Royal Rifle Corps and on the Staff in the South African war, and was for some time an aide-de-camp to Lord Milner.

The P. and O. Company announce a new departure in that the steam yacht *Vectis*, 6,000 tons and 5,000 h.p. is to sail on a pleasure cruise tons and 5,000 h.p. is to sail on a pleasure cruse to Norway and the Far North in the first week of July. No expense has been spared in specially adapting the Vectis, and her cabins, saloons, card and recreation, smoking, music, and photographic rooms are in all respects equal to what they should be for the work. The Vectis is the company's former steamer Rome, which has been entirely altered to fit her for her new rôle.

The Twentieth Century Fund, formed in England to raise 1,000,000 guineas for the extension of Wesleyan Methodist Church work, has realised its ambition, for the donations and interest now amount to more than the desired sum. The majority of the donations were in contributions of one guinea, although there were some of less amount and others for much more. One or two donations were of £5,000, whilst at least one was for double that sum.

The performance at the Public Hall on Saturday evening, given in aid of the Perry memorial fund, went along very brightly and was greatly enjoyed. "The Queen's Messenger" improved somewhat upon second acquaintance, both Mrs. MacWilliams and Mr. Cyril Allen getting all that was possible out of their parts. The second half of the programme brought out two new perform-ers in Mr. W. H. Lewis and Mr. Glossop and they received a hearty welcome. The octett and double sextett brought down the house, and Mr. Windett and Mr. Horne were as amusing as ever.

Three Russian bluejackets of the destroyer Steregustchi, captured on March 10th, who under-went treatment in the Matsuyama Hospital, having recovered were removed on June 4th to Kobe to be sent home. At the Hyogo prefectural office they took an oath before Governor Hattori, office they took an oath before Governor Hattori, Mr. Mr. H. de Lucy-Fossarieu, French Consul, Mr. Mishimura, the Chief of Police, and other officials that they would not take any further part in the war; after which they embarked on the French mail steamer Australien. The Russians were attired in the uniforms of Japanese blue jackets. The Kobe branch of the Red Cross Society presented them with a box of cigars each.

Bankers in Yokohama have decided to subscribe the following amounts to the issue of Second Treasury Bonds.

	Yen.
Specie	5,000,000
2nd	750,000
74th	750,000
Yokohama	500,000
Soda	300,000
Yokohama Boyeki,	50,000
Kanagawa Noko	50,000
Chuwo	20,000

7,420,000

The Mogi, Wakao, Buso, and three others banks will shortly aunounce their offers.

A curious mistake was brought to the notice of the House of Lords on April 24, says the Standard, by the Lord Chancellor, in connection with the admission of a new Peer on his succession to the title. It appears that the late Lord Hartismere, commonly known as Lord Henniker, died during the present Parliament without taking up the writ which is issued to every Peer at the commencement of every Parliament. The writ accordingly lay at the office directed to him. His son at his father's death was unaware of this fact, and went to the office to obtain a writ to enable him to take his seat in the Upper House. His father's writ was handed to him by mistake; and without the difference of the Christian name valued at £1,200.

Lord Brooke left London on 27th April for took the oath and his seat among the other Peers.

Manchuria as Reuter's special correspondent with The Lord Chancellor moved that all the proceed-

the Russian headquarters. Lord Brooke, who is ings be cancelled, and the entry in the Journals twenty-two years of age, after being a lieutenant of the House deleted. He regretted, he said, in the 1st Life Guards, served in the King's that the mistake had occurred. It was a mistake, and nothing more, but he was compelled to make the motion. Accordingly, the motion was agreed to and Lord Henniker will have to go through the formalities of introduction again, when a writ in his own name has been prepared.

LITERARY GOSSIP.

Mr. T. Fisher Unwin is publishing "China from Within: A Study of Opium Fallacies and Missionary Mistakes," by Mr. Arthur Davenport.

The scene of Mr. John Oxenham's new story, to be published in the autumn, probably under the title "Hearts in Exile," is laid in Siberia, the tale dealing with exiles in that cold land. There is a flavour of "Enoch Arden" in the plot.

The original warrant for John Bunyan's arrest was sold at Sotheby's the other day for £305, and a quarto edition of Shakespeare's "Second Part of Henrie the Fourth," published in 1600 at the price of eighteenpence, fetched £1,035. A supposed autograph, "Wm. Shakespere," in a copy of William Rastall's "Collection in English of the Statutes now in force from Magna Charta to XXXV. O. Eliz." sold for £80. XXXV. Q. Eliz.," sold for £80.

Of the 7,865 books published in the United States in 1903, the New York State Library selected 784. They sent this list to other New York libraries in order to get a vote on the best fifty of these books. The result is now published. Among the chosen fifty are Senator Beveridge's
"The Russian Advance," Mrs. Ward's "Lady
Rose's Daughter," Hamlin Garland's "Hesper."
Mrs. Deland's "Dr. Lavendar's People," J. J.
Bell's "Wee Macgreegor," and Booth Tarkington's "Cherry." Of the fifty books chosen just half were fiction.

The new Master of the Temple, the Rev. H. G. Woods, who has been Rector of Little Gaddesden, Hertfordshire, since 1899, was presented to the living by Earl Brownlow, to whom he had acted as chaplain and librarian. He was formerly President of Trinity College, Oxford, and he has also held the appointment of Treasury Commissioner for the Inspection of University Commissioner for the inspection of Chiversity Colleges. Dr. Woods, who is in his 62nd year, has published an edition of Books I. and II. of "Herodotus, with English Notes." His wife is a daughter of the late Dr. Bradley, Dean of Westminster, and is well known as a poet and novelist.

Mr. Quiller-Couch told an amusing story against himself the other night (says the *Bystander*). In a little shop at Fowey, where the products of the press are mingled with pipes and tobacco, he was buying some of the latter commodity one day, when the good lady who kept the shop said to him:—" You'd be surprised, Mr. Couch, to know how many people ask for your books." The novelist admitted that he was at once surprised and gratified, and wondered why his works could be in demand. "Well, I suppose," said the old lady, "when folks is staying down here they wants to read something local."

The Delegates of the Clarendon Press have taken over the series of geographical memoirs known as "The Regions of the World," which is under the general editorship of Mr. H. J. Mackinder, and in future this series will be published by Mr. Henry Frowde. Two new volumes will be issued this year:—"North America," by will be issued this year:—"North America," by Prof. Israel Russell, of the University of Michigan, at the end of this month, and "India," by Sir Thomas Holditch, K.C.I.E, in the early autumn. It is hoped that "The Fat East," by Mr. Archibald Little will soon be in the press. The three volumes which have already appeared are "Britain and the British Seas," by Mr. Mackinder, "Central Europe," by Prof. J. Partsch, and "The Nearer East," by Mr. D. G. Hogarth.

The spring poet shooting season opened yester-day in Fleet-street and neighbourhood in dull weather (says a writer in the *Bystander*). Poets were weak on the wing, few reaching any height

willingness. Our total bag for the day was 240 brace spring poets, and two journalists, of beautiful yellow plumage, shot by Mr. Cadbury.

The figures of Jonathan, David and Samson in the Blackmore Memorial Window at Exeter are intended, we learn, to be symbolical of the charac

at all, and it was noticed that the large majority spencer's appearance disappointing at first sight, suffered from deformed feet. There is no more "The forehead was magnificent, showing delightful sport than that of spring poet shooting. The breed is easily recognised by the length of its hair, and the peculiar sound it emits when on the wing. One distinguishes a soft murmur of so as to screen the lower part you would say, "love-dove-above"—and then the poet darts before one's eyes, only the next moment to disspenser or fall beneath one's sum. When not mouth you would say, "What a feebly endowed." appear or fall beneath one's gun. When not mouth you would say, What a feely endowed flying, the common note heard amongst those emotional nature!" Another thing which Grant flying, the common note heard amongst those emotional nature! "Another thing which Grant poets is something like this: "Did you use my allen recalls was Spencer's touchiness in small things: "Mr. Andrew Carnegie was surprised to come the victim of one's powder and shot. During our first day over the Fleet-street coverts on board an Atlantic liner, 'You've brought me my party did a large amount of execution. Poets Cheddar; I asked for Cheshire.' That a philowere numerous, so that sport was good, and, sopher should be particular about its cheese seemed thank it is not the property of t though it was my first attempt, I myself brought to Mr. Carnegie incredible. But, indeed, in all down seven brace. Great keenness was shown such matters of every-day life Spencer was not offices mf certain weekly journals, the staffs of Spencer's conversation we are told that his talk these papers acting as bearers with the greatest was always in general terms—never of personalties. "Almost everything he said was a generalisation. If you observed that Mrs. Jones was a pretty woman, Spencer would reply: 'Her father was a West Highlander and her mother an Irishwan and Irishwan and Irishwan and Irishwan work produces physically hand. and Irish almost always produces physically hand-some but intellectually inferior children.' " The whole articles is excellent reading.

sarily follow from the mere fact of gregariousness Cattle do not help a wounded comrade, on the contrary they are more likely to dispatch him. To cultivate sympathy, you must be among living creatures and thinking about them. In the newspaper Asahi, I notice the two following remarkable instances of the expression of sympathy:

(1) When the news arrived of the death of a blue-inclusive integers.

(1) When the news arrived of the death of a blue-jacket, in the sunken man-of-war Yoshino, one of the staff of the Asahi hastened to visit his home. Awakened in the midst of a deep and peaceful slumber, and hearing unexpectedly the death of her cherished son, the mother became insane, as is reported in that paper of 25th ult. The reporter may explain that his motive was to inform and condole with the old mother as soon as possible. A deep sympathy indeed! But the result!

(2) When the news of the victory of Kinchow arrived some honourable gentlemen of Osaka, at the instigation of the Mayor of the city, celebrated the victory with a lantern procession and a splendid feast. In this way they celebrated the success of the victorious officers. But what about the sad hearts of the people whose sons and brothers are engaged in the War?

LIVERPOOL AND LONDON AND GLOBE.

Messrs Mollison & Co., Agents for this large and deservedly popular insurance Company, send us the sixty-eighth annual report, from which we extract the following figures:

FIRE DEAPREMENT.

Fire Deaprement.

The Fire Premium income for the year 1903, after deducting the sums paid for re-insuring surplus risks, amounts to £2,067,194. The Losses, inclusive of full provision for all claims that had arisen up to the close of the year amount to £1,043,512. The Account, after providing for Expenses, shows, without the addition of interest, a surplus of £337,742, to which £100,000 has been left in the Fire Account, to increase the Fire Re-insurance Fund. The balance has been carried to Profit and Loss Account from which the Directors have transferred £100 000 to the General Reserve Fund. The Fire Re-insurance Fund. now amounts to £900,000, and the General Reserve Fund to £1,400,000.

Life Department.

LIFE DEPARTMENT.

During the year the Company has received
1,006 proposals to assure the sum of 565,173
848 policies were issued for 486,923
of which £56,100 was re-assured
102 proposals were not completed for 55,850
56 proposals were declined for 22,400
The Deaniums on New Assurances during the

year amount to £21,825 of which £3,815 was disburstion has now been referred to the Hague ed for re-assurances as above, the total Premium tribunal.

Income, after deducting the amount paid for re-assurances, being £246,080. The net Claims paid and outstanding (including Bonuses) amounted to £283,307 of which the sum of £6,340 was in respect of Endowment Assurances matured. Two hundred and thirty-two Annuits Bonds have been issued for a censideration of £130.159, these Bonds granting Annuities amounting to £13.067. One hundred and ninety-one Annuities, amounting to £9.864 have terminated in consequence of the deaths of the Annui-

The Directors have to report that the Life and Endowment business of the "Liverpool and London and Globe" for the Quinquennium which ended on the 31st December last has been valued by the British Offices Life Tables Om and Om (5) and the Annuties by Finlaison's latest Government Tables, both at 3 per cent Interest. The "Globe" business has been valued as formerly, as laid down by the "Liverpool and London and Globe" Amalgamation Act of 1864 Act of 1864.

The result of the valuation after giving to the Policy Holders the large Bonus they are entitled to, with former accumulations shows a surplus of £275,488,

Of this amount, from the same prudent motives of this amount, from the same prudent motives that obtained at the last four Quinquenniums, there is left £188,585 as a surplus in the Life Funds, and the balance of £86,903 is carried to an account styled "Proprietors' Life Profits Account."

"Propretors" Life Profits Account.

The guaranteed Bonus class was closed in 1875, the existing Policy Holders of course preserving their full rights to future Guaranteed Bonuses. It is satisfactory to note that during the Quinquennium, reversionary Bonuses amounting 10£150.764 have been added to the sum assured in that class and also that the sum in hand to meet future Guaranteed Bonuses amounts to £99,305.

Bonuses amounts to £99,305.

As regards the new participating class the surplus thereon amounts to £182,111, and there has also been paid £3,811 for Interim Bonuses during the Quinquennium. This surplus affords the sum required to provide a reversionary Bonus to the Assured at the rate of 35s. per cent per annum on the sum assured under those Policies entitled to participate. The repetition of this large Bonus will no doubt attract considerable new business in the future, which will in itself add to the prosperity of the class. The Directors have provided that Policies in this class which having been in force for at least five complete years, and becoming claims by death, or maturing as endowment assurances, before the end of the current Quinquennium shall be entitled to an intermediate Bonus at the rate of £1 per cent per annum on the original sum assured for each completed year since their inception for Policies effected in 1903, and since the last Division of Profits for older Policies.

The Directors, instead of transferring to Profit and

The Directors, instead of transferring to Profit and Loss, as formerly, have this year as already stated, carried £86,903 to "Proprietors' Life Profits Account" for distribution during the current Quinquennium. After this transfer the Life and Annuity Funds have during the Quinquennium just closed been increased by £307,319 and now amount to £528,020. £5,528,029.

PROFIT AND LOSS ACCOUNT AND DIVIDEND.

The Profit and Loss Account with the addition of the Fire Profits above referred to as having been carried to it, and of the Interest earned on the Funds carried to it, and of the Interest earned on the Funds other than those of the Life Department, after deducting the amounts paid for the Globe 6 per cent. Perpetual Annuities for 1903, leaves a balance of 1994,356. Of this amount \$\int_100,000\$ has been carried to the General Reserve Fund which now amounts to \$\int_1400,000\$. It is proposed, out of the remaining balance of \$\int_804,356\$ to pay on account of the Fire Department a Dividend of 33s, per share, an additional 3s, per share Dividend being derived from the Proprietors' portion of the Life Profits, making in all 36s, per share, free of Income Tax. On the 23rd November last an interim payment of 13s, per share was made on account, and it is proposed to issue warrants for the balance, viz., 22s, per share, payable on the 21st May.

IELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

THE ANGLO FRENCH AGREEMENT. London, June 2.

Mr. Balfour, speaking with reference to the Anglo-French agreement, incidentally referred to the use of the French flag at Muscat. He said that it was quite true that last year a very difficult question arose between France and ourselves, but that ques-

NO CONSCRIPTION FOR BRITAIN.

London, June 3.

Mr. Arnold Foster, speaking in the House of Commons as Secretary for War, said that the Government does not intend to make any proposal in favour of conscription.

KUROPATKIN'S PLANS.

Reuter's correspondent, telegraphing from the Russian headquarters at Mukden, says that it is understood that General Kuropatkin is ready to, take the offensive on an important scale.

LORD CURZON HONOURED.

London, June 4.
The corporation of the City of London has decided to confer the freedom of the City on Lord Curzon of Kedleston, in recognition of the ability and zeal with which he discharged his duties as Viceroy of India.

The London Standard reviews Lord Curzon's administration in the most laudatory terms.

BRITISH ADVANCE ON LHASSA.

The Headquarters of the British Mission to Tibet, with two companies of Royal Fusiliers, has arrived at Chumbi.

THE NANSHAN FIGHTING.

London, June 5

General Stoessel's report of the fighting at Nanshan, hastily pencilled and sent by junk to Yingkow and thence telegraphed, says that the Japanese fire, especially that of the gunboats and torpedo-destroyers, annihilated the batteries at Kinchow. Before evacuating Nanshan he ordered the guns to be blown up but his instructious were only partially carried out, owing to the necessity for a prompt retreat.

RUSSIA AND GERMANY.

Later.

The German semi-official newspapers strongly repudiate the reports of an agreement with Russia concerning the ultimate settlement in the Far East. They also They also strongly deny that any negotiations are proceeding in Germany for a Russian Ioan.

NEWS FROM PORT ARTHUR.

London, June 6.

Russian pigeon messages forwarded to St. Petersburg declare that the news from Port Arthur is very satisfactory.

A COSSACK SKIRMISH.

General Sakaroff reports that Cossacks on the 31st of May encountered the Japanese at Fenchoninling pass and dislodged the latter from a strong position on the heights. Twenty Cossacks were killed and wounded,

RUSSIAN FRONTIER TROUBLES

London, June 7. Increasing anxiety is being felt in St. Petersburg regarding the situation on the Manchurian frontier, owing to the restless-ness of the Chinese troops. It is feared that General Ma will lose control of the forces under his command

RUSSIAN MILITARY MOVEMENTS.

London June 7.

All the correspondents in St. Petersburg unite in affirming that General Kuropatkin has ordered a southward movement to relieve Port Arthur. It is suggested by some critics that this unaminity is deliberate, and intended to conceal the fact of a general retreat northward, which the strong rearguard is now demonstratively covering.

BRITAIN AND GERMANY.

who is anxious to secure the friendship of Germany on the Bismarckian principle of re-insurances, The Times emphatically declares that the visit is dictated solely by considerations of international courtesy and family relationship, and by no political motive. It is believed that in this The Times reflects the official view.

MILITARY OPERATIONS.

London, June 8.

The Tsar has ordered the mobilization of the First Army Corps, in which is included the St. Petersburg district.

General Kuropatkin reports that a five hours' fight took place on June 3rd at Khotsioputse, eighteen miles to the west of Feng-whang-ching. The Japanese, at-tempting to advance from their fortified position, were repelled by Cossacks assisted by field guns. Sixteen Cossacks were wounded.

THE BALTIC SQUADRON.

London, June 9. Naval experts are convinced that the Baltic squadron-the date of departure of which is constantly being deferred-will never reach the Pacific even if it starts.

THE "PLEIADES" IN TROUBLE.

The steamer Pleiades from Yokohama has arrived at Vancouver after having been towed for 800 miles, in consequence of losing her propeller.

(From the "[1]] SHIMPO."] THE BALTIC SQUADRON

London, June 6.
It is said that Russia will abandon her intention to

despatch the Baltic squadron to the Far East if Port Arthur is occupied by the enemy.

RUSSIAN STRATEGY.

According to intelligence from St. Petersburg a council presided over by the Tzar has been held at Head Quarters, as the result of which Russia has decided to take offensive steps.

JAPANESE LOAN BONDS.

All Japanese bonds have generally advanced ten shillings on the average. The quotations are:—4 per cent, £76; 5 per cent, £87; and new bonds are at a premium of £3.

PORT ARTHUR.

According to intelligence from Chefoo and Tao-chow, the sound of heavy firing was heard last night at the entrance of Port Arthur. It continued till this

It is reported from St. Petersburg that the Russian a streported from 5t. Petersburg that the Rossan squadron at Port Arthur has been ordered to make a sortie with the object of breaking the blockade and effecting a junction with the Vladivostock squadron. Probably this intention has been abandoned.

THE BRITISH PREMIER.

Mr. A. J. Balfour, Premier, has delivered as peech Mr. A. J. Ballour, Premier, has delivered as peech in Parliament in which he said that the public interest did not call for the publication of papers regarding the Naval questions which have arisen in connexion with the Russo-Japanese war and which have to be dealt with under international law. He added that the British Government was carefully investigating such questions.
BRITISH WARSHIPS IN THE

MEDITERRANEAN

The British battleship Frince of Wales will leave Gibraliar for Tangiers. One cruiser and seven battle-ships which had been ordered to leave postponed their departure.

A WAR CORRESPONDENT SHOT.

A German war correspondent named Etzel has been shot by Chinese soldiers while ascending the Liao River in a launch. He appears to have been mistaken by them for a pirate.

(From the "Asahi Shimbun,") KUROPATKIN AND RUSSIA.

London, June 6. The foreign military officers following the Russian forces are reported to have informed their In view of the efforts of the German press respective Governments that they are wasting their to represent King Edward's visit to Kiel as a political move on the part of Great Britain an active campaign and that he has lost the confidence of the Russian Court. The attaches further say

that Russia's plan is dependent on the maintenan-ce of Port Arthur, internal complications being apprehended in the event of the capture of the

STANT RELIEF and refreshing sleep for Skin-tortured Babie INSTANT RELIEF and refreshing sleep for Skin-tortured Babies and rest for Tired Mothers in warm baths with CUTICURA SOAP, and gentle anointings with CUTICURA OINTMENT, the great skin cure and purest of emollients, to be followed in severe cases by mild doses of CUTICURA RESOLVENT PHLS, to cool and cleanse the blood. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply humours, eczemas, rashes, irritations, and itchings, with loss of hair, of infants and children, yet compounded.

USE CUTICURA MILLIONS

Assisted by Curroura Otherset, for preserving, purifying, and beautifying the skin, for cleaning the scalp of crusts, scales, and dandrun, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and formany sanative, antiseptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in One Soap at One Price, the BEST toilet and BEST baby soap in the world.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, brated liquid Cuttcura Resolvent, as well as for all other blood purifiers and humour cores. Fat up in screw.cap pocket vials, containing 60 doses.

MR. K. MIDZUMOTO, the Superintendent of the Tochigi police, has been decorated by the Emperor of China with the Double-Dragon and Sacred Crown of the Third Class. He attended Prince Tsai on the occasion of his visit to Japan.

H. Ito and five other coolies were arrested on June 14th by the Harbour police, Yokohama, It is reported that they stole two bales of raw silk on the night of June 2nd from the French mail steamer Australien when employed on board.

THE Sanyo Railway Co. swill commence shortly the branch line, 13 miles, between Atsusa and Omine. The line is specially to be employed in the carriage of coal from the Omine mine belonging to the Naval Department.

COUNT NISHISANJO, who has been ill for some time, died on the evening of June 13th. a Kuge (Court noble) before thm Restoration. In October, 1869, he was appointed Governor of Suibara, and the following year removed to Niigata. In December, 1876, he was appointed a Steward of the Imperial Palace, and in 1884 was promoted to the Peerage with the title of Count. He was raised in 1903 to the Senior Class of the Second Rank. Just before death he was decorated with the Sacred Treasure of the Fifth

A TELEGRAM from the Japanese Minister at Paris has been received at the Foreign Office to the effect that the Chamber of Deputies' Committee for revising the customs duties, have unanimously On June 12th, the members of the Ladies Patriotic Society entertained Prince Kan-in, Commander of the Narashino Cambra highest the state of pure silk woven goods and habutae. This information has been transmitted to the Commercial Bureau and through by the Sakada Maru from the Iront. By the evening train of the same day he left for Tokyo, where,
he arrived on the rath. It is reported that the
Prince has been appointed an attache of the
Imperial Headquarters.

MR. T. Davies (55), the keeper of the "Ame
rican Restaurant," No. 106, Yokohama, has been
attacked by small-pox. He was removed to the
Emperor, has arrived at Kukusan to inspect the
Manji Hospital. The authorities of the Municipal
Texamitted to the Commercial Bureau and through
them to the Yokohama Silk Goods Traders'
Guild. The latter held a meeting on June 10th
and decided to convey a sense of their opposition to the Bill. The following day, the Chamber
of Commerce held a conference to investigate the
attacked by small-pox. He was removed to the effects on the Japanese silk business of such a
revised tax.

ON THE LIAOTUNG

Friday, June 10.

We find in the Nichi Nichi Shimbun an ed, are the best defensive positions between account given by a dock carpenter who left Kinchow and Port Arthur. But if it be true, Port Arthur on the 26th of May, reached as was reported by telegraph on the 9th, that Dalny on the 28th and arrived at Chefoo on the Japanese have reached Pingtu, moving the 31st. He says that five injured Russian along the coast from Dalny, then the above ships are lying in the neighbourhood of the two positions are are turned. dock; that their guns have been landed, and that not more than one-tenth of the battle of Nanshan at 4,000—the Chinese their crews are on board. The remainder refugees speak of 2,000 killed—and alleges of their crews are mainly in the sea-front that the wounded have been carried to forts, those on the land-front being in Shiuishiying where a hospital has been the hands of the regular garrison artillery, creeted under the Red-Cross flag. Shiuishiying is 3½ miles from Port Arthur. The at the dock, especially of timber, and no wages have been paid for the past two Port Arthur. In the event of an assault the mouths to the hands of whom there are foo months to the hands, of whom there are 600 non-combatants will be handed over and the or 700 Russians and 300 Chinese. A troops declare their intention of fighting to certain quantity of coal is stored in the death, but the garrison is so dispirited vicinity of Liautishan, but there is very that many surrenders would probably little near the dock. Provisions are scarcely take place. (We do not believe it). The sufficient for five months, and the Chinese repeated attacks of the Japanese navy have inhabitants especially are distressed, for their harrassed the garrison almost beyond enfood-stuffs have been requisitioned without durance and have rendered the town nearly payment and they are nevertheless forbidden uninhabitable. (All this sounds much exto leave the place. These Chinese inhabitage aggerated). Shanghai telegraphs, under date of the some ten thousand Russian troops in garrison. Two Japanese officers and six blue-jackets who were among those that attacked the forts on the occasion of the Tongchaitsz. Possibly the sound of cannonthird blocking operation are still held priknown of affairs outside. Only when a Russian ship is injured can some disaster be conjectured. The Russians speak in loud positions further north have been either carried terms of Japanese losses but the Chinese or turned. Perhaps before we go to press discount these statements. For the rest, some news will have been published about the movements of Oku's Army, but it is There can be no concealing the fact that the spirits of the garrison are at a very low ebb, and probably if a resolute attack were made there would be more dismeagre statement relating to the conditions position to escape than to resist. In proof of this the Chinaman states that whereas a number of junks collected in the harbour had been deprived of their masts and otherwise disabled to guard against their departure, their owners are now permitted to repair them. Just before leaving Port Arthur, he observed that a number of Russians arrived by the new road from Dalny, among them being many women

and children. ant. He alleges that Soper, having been living in placid confidence that the position long in the employment of the Russians, at Nanshan would defy all Japanese efforts possessed information which, if imparted to to force it, and that they were consequently

Some interesting statements, evidently battle-ships and cruisers.) He adds that the from a Japanese source, appear in the Asahi. armaments of the disabled ships have been glar of the place on the 28th May and returned on the from a Japanese source, appear in the Asahi. armaments of the disabled ships have been glar of the says that on the 29th he have had so and that the learn at Palibora (a pille west of Haiching).

Tuchingtsz is 7 miles from Port three of which frequently go out of harbour and Shwangtaikau is 6 miles further for so brief interval. All the troops and sailors are busy putting the place in a state of defense. The garrison numbers about fifteen thousand. Constant requisitions for supplies are made, the Chinese being promised large returns in the event of Russian The shells fired by the Japanese ships on the 6th did not cause much damage in the town, with the exception of the last few projectiles, but these constant attacks have created something like a panic among the dock hands.

> Sunday, June 12.
>
> A Russian lady who arrived at Chefoo on the evening of the 10th, is represented (Jiji Shimpo's correspondent) as saying that throughout the 8th and 9th perpetual can-nonading took place at Port Arthur on the land and sea sides. Especially on the 8th the Japanese squadron approached and bombarded the place, thereafter retiring, which

> operation it repeated several times. A naval officer who recently returned to Saseho from the base is said (all Tokyo journals) to have asserted that the Russian squadron in Port Arthur is making preparations to escape, and as a necessary preliminary steps are being taken to clear away the obstructions at the harbour's mouth. has been effected to the extent of permitting the exit of gunboats, but there remain the mines strewn by the Russians themselves about the entrance. The exact positions of these have not been recorded and it is therefore essential that they be searched for and

> removed, which work is now affording occupation to the gun-boats. It has been definitely ascertained, accord-

ing to the Chefoo correspondents of the leading Tokyo journals, that a wireless telegraphic apparatus is fitted up within the compound of the Russian Consulate at Chefoo. Accordingly Mr. Mizuno, Japanese Consul at Chefoo, has lodged a protest with the Taotai, in the sense that this use of Chinese territory for the purpose of communicating with a place which the Japanese have declared to be in a state of blocade, is a flagrant breach of neutrality and must be at once stopped. There can be no manner of question about that. If the Russian Consul -which can not be credited for a momentis acting thus without his Government's sanction, he should be removed from office without a moment's delay. If he has his Government's approval and authority-which can not be doubted for a moment-then Russia is deliberately guilty of a gross abuse of China's neutrality, and in the face of such practices no protests she can formulate on the subject of neutrality in other directions deserve any consideration.

Further rumours arrive of some kind of operations near the north-western section of the Liaotung Peninsula. Newchwang reports the sound of cannonading throughout the 8th and the 9th, especially the latter day, and from the direction of the soundsouth of Newchwang-it would appear that this is to be connected with the reported appearance of 9 Japanese transports off Hiunyo-ching, which is a few miles southward

from a Japanese source, appear in the Asam. armaments of the disabled ships have been 9th of June. He says that on the 29th he They read as though they had emanated landed and mounted in the forts, and that the heard at Palihotsu (3 miles west of Haiching) from an officer. It is alleged that the Rus-crews of the other 5 are employed mostly on sians have a strong outpost at Shwangtaikau shore, no attempt having been recently moving southward. Reaching Haiching he with videttes pushed forward as far as made to get the vessels ready for sea. There saw 1,000 infantry of the 2nd Regiment with Vingchingtsz. They have fortified Tuching- are 9 or 10 uninjured torpedo-craft, two or 2,000 cavalry and transport waggons drawn

in the same direction from Haiching 1,000. They say that there is still a foreign non-infantry of the 3rd Regiment with some combatant element in the Port Arthur cavalry and a train of 50 oxen. About one third of this latter force were mounted in Chinese carts. Apparently the troops remaining in Haiching did not exceed 1500 or 1600. Another body of 300 were stationed at Sanlikiau on the road to On the east of Haiching, at Liaoyang. a distance of a mile, entrenchments, measuring about a mile each in length, had just been finished. (We presume that these are to cover the approach from Suiyen but their number and total extent are not stated). Between two places (Kwantienpau and Chiushan), northward of Haiching, he Chiushan), northward or riacong, met, on the 1st instant, a strong body of Russians numbering some 10,000. They were moving south, and they consisted mainly of infantry with a part of a battalion of Zabaikal artillery, some 600 cavalry, a considerable body of land-transport, 16 field guis, 200 ammunition waggons each drawn by 2 horses, 500 waggons of provisions, 200 oxen, and 70 nurses (including 3 women). This man passed 4 days in Liaoyang. On the higher of two eminences 5 miles south of the town the Russians had observatories whence a constant look out was kept. Entrenchments had been dug on the lower eminence but guns were not yet mounted. On the south of Taitszshan at a hill called Minkiashan the ground had been levelled for artillery positions but guns were not yet placed. At a distance of 2 miles from the southern gate there were 16 forts, each separated by about one-third of a mile. In front of them were great number of trenches 10 feet deep and 6 feet wide, with stakes and wire-entanglements. Additional trenches were being dug between this place and the Taitsz River. No one was allowed to pass northward of the Taitsz, but it did not appear that any great preparations had been made in that direction. The forces at the place were 7,000 in the town and 8,000 outside, with small bodies of cavalry and artillery. On the way back it was observed that the number of troops at the various stations along the line had undergone diminution, probably because of the south-

It is difficult to perceive where Kuropat-kin's forces are. The above account shows about 35,000 men of all arms stationed at Liaoyang and Haiching or moving in the Sinyen direction. But the Russian General ought to have at least 80,000 under his inmediate command. The inference is that he has sent out 30,000 or 40,000 to oppose Kuroki's advance. Another inference is that he intended to make a strong stand at Suiyen, which place he ought to hold, if possible, if he be really moving any considerable force down the Liaotung Peninsula. Suiyen, however, was occupied by the Japanese on the 8th without much trouble, and unless the Russians make an effective stand at Tonuching, we may look for an important engagement at Haiching; important because if Haiching were in Japanese possession, the railway and the main road to Liaoyang would be closed to all troops operating southward.

It appears that the total number of Chinese junks which left Port Arthur on the battalions of infantry and 6 guns passed afternoon of the 7th was 28. Of these 19 Tashikiao, going south, on the 30th of May, steered for Chefoo and the route taken by the and that these were to be the van of an remaining 9 is not mentioned. They speak army of two Divisions. Since then there of firing at Port Arthur until the afternoon has been talk—vague it is true but not Nichi stof the 8th, but the statements of such people inconsistent—of other movements pointing bottom. as to such matters are not very trustworthy. to this concentration. A force of two Divi-

by 42 oxen, marching out on the Suiyen The junks that reached Chefoo had 1500 road. On the 30th again, there also moved Chinese on board and 6 Russian women. population, but that its units fear to leave lest they should be captured by the Japanese en route. As for the Chinese some 3000 of them remain in the place. The Russian them remain in the place. The Russian force, counting only troops fit to fight, numbers 20,000. (How can Chinese civilians distinguish between "fit to fight" and " unfit to fight"?). There is scarcity of provisions, of coal and of fodder. More than 2,000 Russians were killed at Nanshan. There are still 18 Japanese naval men alive in Port Arthur. These junks had engaged to devote only 5 days to the voyage either way, and they therefore left Chefoo at once for Port Arthur.

Previously to the arrival of the above party at Chefoo a smaller detachment of refugees, including some Koreans and Russia women had reached the same place from the be-leagured fortress. They were all workmen, not easy to converse with, but they agreed in saying that provisions were very scarce. They added that the Police authorities had charged 5 roubles for a ticket by the junks, but the junk people had received only 21/2

These Chinese stories of short provisions are probably based solely on the condition of the Chinese themselves. They might be in a state of semi-destitution and yet the Russians might be living in plenty.

The Chinese further say that the serviceable squadron is now limited to 2 or 3 war-ships and 12 or 13 torpedo-craft. What has ships and 12 or 13 torpedo-craft. become, then, of all the others?

Junks containing Chinese refugees from

Port Arthur continue to arrive at Chefoo. They report that preparations are being made to send away all the non-combatants.

Thursday, June 16.

London telegraphs that Kuropatkin having been entrusted with the supreme direction of military affairs, has abandoned the idea of succouring Port Arthur, which idea was forced upon him by the politicians of St. Petersburg, and that he will now retire on Mukden, with the object of leisurely completing his military preparations. So various and so conflicting are the published versions of Russian strategical plans that one is altogether perplexed to choose between them. Kuropatkin certainly acted at one time as though he intended to attempt the relief of Port Arthur, or at any rate to make some movement which would delay the Japanese operations against the fortress. Delay has to be procured at all costs, for unless Port Arthur can be preserved the coming of the Baltic fleet to the East ceases to be a conceivable measure. The fleet could accomplish nothing without a base at this end, and apart from the scarcely tenable hypothesis that Russia has secured some ally capable of satisfying her want in this respect, we do not see what hope there is for her at sea. present the interpretation still suggested by the facts of the situation is that Kuropatkin aims at impeding the assault upon Port Arthur and also checking Kuroki's advance by massing a tolerably formidable body in the northern part of the Liaotung Rumour recently said that 4 Peninsula.

sions would be too formidable to be left on the left rear of either the Takushan or the Yalu army, and pending the operation of dealing with it, Kuropatkin might effect a still more considerable concentration at Liaoyang than he already possesses there. It is hard to believe in his alleged retreat to Mukden. That would involve an abandonment so striking that its moral effect must be taken into account

Meanwhile it would appear that the Japanese troops have pushed southward beyond Tuchingtsz, where opposition was expected, as we have more that once explained. The Russians are now reported to be concentrating their advanced defences at Shiuishiying, which is only some 5 miles from Port Arthur. They are said to have dug trenches and constructed parapets of a most formidable nature at that position. There is some difficulty, however, in reconciling this version with Admiral Togo's official report, which stated that on the 10th instant from 11 a.m. until 1 p.m., one of his squadrons bombarded the Russian positions at Tungchingtsz and Shwangtaikau. Perhaps this naval essay was made in combination with a land attack which resulted in the capture of the position and the falling back of the Russians to Shiuishiying. That no news of any such event has been published by the Military Authorities would be consistent with the strict reticence they are now observing, for it must have been observed that ever since the forcing of the Kinchow Isthmus, the public has remained virtually without news of the doings of General Oku's army

The Commissioner of Customs at Chefoo is said to have telegraphed to Shanghai, under date of the 13th, that during the preceding 5 days the sound of violent cannonading had been heard in the direction of Port Arthur, and an anonymous Russian is quoted as saying that if the fortress can hold out for two weeks it will be relieved. Such tales must be received with great caution. They suggest that the bombardment of Port Arthur from the land side commenced as early as the 8th or the 9th, which it certainly did not.

The latest reports from Tientsin do not indicate any idea of the Russian Squadron's emergence. A Chinese who arrived at that place on the 13th is stated (Asala's correspondence) to have alleged that the armaments of most of the Russian ships have been landed and mounted in forts at Shiuishinying and Likiatun, which are the two elevations forming the principal outposts of the fortress. The crews of the vessels are also said to have been put ashore and to be now a part of the garrison. actually fit for the battle line at one iron-clad, one cruiser, three destroyers and 13 or 14 torpedo-boats. These figures are obviously untrustworthy. He adds that the Hwangkinhshan fort has suffered much from the fire of the Japanese squadron; that the exit of the port is impracticable for large ships; and that provisions are getting very scarce.

It is now stated that the two ships sunk by mines outside Port Arthur on the 4th instant were the Giljak (1,300 tons) and the Rasboynik (1,329 tons). Our readers will remember that there was some doubt about the identity of the vessels, and that Japanese naval officers thought they resembled the Gaidamak and the Gremiastchy. The Nichi Nichi suggests that perhaps 4 went to the

The Asahi's Shanhaikwan correspondent

ammunition waggons arrived at Niukiatun in a disorganized condition on the 12th instant at noon. Among the wounded was an officer, apparently a General of Division. They seemed to have left their guns belied. A number of defeated Russians made their way to Tashikiao also, but their force is uncertain. It is said that the Russian casualties were over 1,000.

Friday, June 17. [Received from the Officer commanding the Liao-

tung Army.] I. Sent on the 14th at 10 p.m. and received at the Head Quarters in Tokyo in the forenoon of the 15th:—"The main body of the Army, forming two columns, advanc-ed northward on either side of the railway to attack the enemy at Wafantien. At 5 p.m. the enemy were found in position be-tween Lunwangmiao and Tafangsin. For about 2 hours an artillery duel was fought, when our forces captured the line from Pangkiatun to Yuhotien. Night-iall inter-rupted the fight. We had some losses. Meanwhile another column of our troops had threatened the enemy's right, and in order to protect our flank and rear, had marched eastward of Fuhchow, and captured the Tunkiakou-Nakialin line. The Army will to-morrow advance against the enemy's right wing with one column, while the main body will force his centre and right back to Tehlisz.

2. Despatched on the 14th at midnight and received in Tokyo on the forenoon of the 15th;—" Reports indicate that the enemy's force on the Lunwangmiao and Tafangsin has been gradually increased and that he evidently contemplates a stubborn resistance. Our Army will to-morrow fight a decisive engagement."

3. Despatched at noon on the 15th and received on the afternoon of the 15th:-"Our Army, as previously arranged, opened the attack upon Tehlisz at dawn to-day and the battle is now at its height.

4. Despatched at 10.30 p.m. on the 15th and received on the forenoon of the 16th :-"The enemy's force at the Tehlisz position consisted of two Divisions and held the line from Tafangsin to Chingtszshan. Our Army opened the attack at dawn to-day. Our main body advanced along the railway; one column moved to the attack from Sukiatun; and another column, on our left wing, at 9 a.m., advanced from Tunglung At noon our cavalry joined the from Kukiatun. Then the enemy fight from Kukiatun. was surrounded at Tehlisz and after a fierce fight was driven north. We took Russian colours" (how many stand the report does not say) and a number of quick-firing guns. Our casualties on the two days were about one thousand. The enemy lost very heavily but we have not yet ascertained the number of his killed and wounded.

5. Despatched at 11 p m. on the 15th and received on the afternoon of the 16th :-- I specially call attention to the fact that in to-day's engagement the Russian forces newlight. He makes the Japanese mend abused the national flag of Japan. A patrol for the sake of practising his own art.) under one of our officers actually witnessed some Russian troops marching with Japanese HOSPITALS AND THE TREATMENT OF THE colours flying. They were observed by our artillery also which thereupon ceased firing."

6. Despatched at 10 a.m. on the 16th

reports that on the 11th instant a sharp when the Russians were dispersed. Exact men. The work is to be extended so as to engagement took place at Fuhchow. About reports have not yet been received, but we 7,000 Russian troops with several hundred have taken 14 quick-firers and have capturreports have not yet been received, but we ed about 300 prisoners, including the officer in command of the Third Regiment of

> A Japanese who had resided for a con-siderable time in Port Arthur, whence he recently returned to Chefoo and thence to Japan, is represented as saying that in the middle of April some troops and provisions were sent from Port Arthur to the Yalu position. Subsequently the remaining stock of provisions was carefully stored and guarded. It would suffice for 3 months at the outside, namely, to the middle or end of July. Already, according to this informant, scarcity is felt, and horse flesh is beginning to be eaten. Various estimates of the garrison's strength have been published, but the truth is that, including the marines, there are about 20,000 men available for the defence. The non-combatants, including the Chinese, number about ten thousand.

GENERAL FLOUG.

General Floug telegraphing from Mukden, under date of the 10th, says with regard to the general features of the campaign, that General Kuroki has resumed his advance and that his right wing is moving on Samachi. (These are Floug's exact words, but General Kuroki's report shows that Samachi was actually occupied on the 7th, namely, three days before the date of Floug's document.-ED. J.M.). Further, "a remarkably large body of Japanese troops have been discovered in Suiyen." (Is not this beyond all measure an exquisite touch? "Discovered in Suiyen." The Japanese took Suiyen on the 8th instant, drivtook Suiyen on the 8th instant, driving off a force of some 4,000 Russians. Floug describes this by saying that the Japanese were discovered to be at Suiyen in remarkable strength.—En. J.M.). The Russian cavalry having finished their reconnaissance, have quietly withdrawn to their base. (Kuropatkin telegraphs that they were obliced to withdrawn in the prethat having done what they wanted to do they sauntered home smoking their ciga-rettes.) Skirmishes are daily taking place. The most important of these engagements was on the 7th when the Japanese pressed hard on a small detachment of Russians near Saimachu. Another Japanese army is drawing near Port Arthur. On the 8th and 9th a Japanese squadron attack-ed the coastwise district at Hiungyochin and Kinchow but accomplished noth-According to Japanese reports the force of Russian cavalry which attacked Anju at the beginning of May has partly surrendered and is partly about to surrender. That is untrue. The force merely suffered slight loss. (There have not been any such Japanese reports. Floug is coming out in a newlight. He makes the Japanese mendacious

SICK.

6. Despatched at 10 a.m. on the 10th it may be mentioned that extensive temand injustices merely because the aggressor and received on the afternoon of the 16th:— porary buildings for the accommodation of and the wrong-doer is strong, she would "Our Army yesterday morning attacked wounded men are in process of erection at the deserve to be thrust out of the rank of indefrom three sides a force of the enemy at Red Cross Hospital. There are ten of these pendent states, and Mr. Henry Norman Tehlisz, consisting of about two Divisions buildings and as each measures 360 feet by 24, would be one of the first to assist in passing and a half. The fight lasted until 3 p.m. the whole represent accommodation for 1200 sentence of ostracism.

afford space for 4,000 men.

The Jiji Shimpo, writing about hospitals, says that the killed and wounded in the Japanese Army and Navy since the beginning Rifles. The enemy must have left 500 dead of the war exceed 7,000, and that a very and wounded on the field.

A Japanese who had resided for a conciderable time in Post Asthur means had seiderable time The method hitherto pursued with regard to sick soldiers has been to put into the field hospital those expected to recover quickly and to send the rest back to Japan. The latter, on arrival, are again divided, those that seem likely to be long ill, are being sent to their own houses and released from further service, while those likely to get well quickly are put into hospital. There is obviously a great hardship in this method. Many families are so poor that they find difficulty in procuring the commonest necessaries of life after their bread-winners have gone to the front. What must be the condition of these unhappy folks when they have to support a sick man and pay for his medical treatment? The thing is impossible to them, and it follows that many of these sick men must die for want of proper care and nourishment. The *fiji* suggests that all sick soldiers returned to Japan, should be divided according to their circumstances. and that whether seriously or slightly ill those whose families are well off should be sent home for treatment, all the rest being put into hospital. But our contemporary does not say how the men that have recovered could be again drafted into the ranks. Evidently medical boards would have to be organized all over the country, a troublesome and costly undertaking. without some means of recalling these men to the colours, an invidious discrimination would evidently operate in favour of the well-to-do.

RUSSIA.

The Kolnische Zeitung is of the opinion that one signal result of this war will be the overthrow of military despotism in Russia and the inauguration of constitutional institutheir base. (Kuropatkin telegraphs that they were obliged to withdraw in the presence of a greatly superior Japanese force and that they lost 100 men. Floug has it that having done what they wanted to do the superior su Russia to accept defeat; she must go on until she wins, and consequently Japan was under the influence of suicidal mania when she undertook to dash her head against this undemolishable wall. We recall that the China-Japan war, said of China just what Mr. Henry Norman now says of Russia, though in the former case the tone of the prediction was less confident. Japan was then declared to be about to follow the example of the Biblical madman who placed himself under the rock; she would be ground into powder. However, the believers in China's might limited their esti-mate to Japan. They did not venture to say what Mr. Henry Norman says in effect of Russia, namely, that her ultimate defeat under any circumstances is impossible, and that, consequently, her dictation must be tamely accepted by any Power, the only alternative being destruction. If Japan adopted Mr. Norman's way of thinking, if she cravenly bowed her head to all Muscovite aggressions It may be mentioned that extensive tem- and injustices merely because the aggressor

THE VLADIVOSTOCK FLEET.

Tuesday, June 14.

about the Vladivostock Squadron. If he really brought the three cruisers to within hood of the Tsushima Straits. 30 miles of Port Arthur on the 7th instant, what object has he in proclaiming the fact? The utmost secrecy should be his aim. Again, had he any serious hope of finding Russian ships outside Port Arthur? We fail to see how he can have expected anything of the kind. For he knew well that a state of blockade existed at Liaotung and that the least likely thing in the world was the presence of Russlan vessels in the open At any rate, unless he has now abandoned all hope of effecting a junction, his first business is to keep silence. From no point of view do we find it easy to believe that his squadron has been within 30 miles of Port Arthur. His story may be classed with Kuropatkin's anuouncement of a great southern march to relieve Port Arthur. The Russian weapons just at present are ruses and ruses only.

Wednesday, June 15.

Japanese newspapers ridicule the story that the Vladivostock Squadron made its way to the vicinity of Port Arthur on the 7th inst. Perhaps the ghosts of the dead Russian ships araded in that vicinity then or about then, but that Skrydloff with his cruisers made any such appearance is not to be credited for an instant. If he sighted the Japanese ships, as he claims to have done, the Japanese ships must have sighted him, and then we should have heard more about it. At any rate his tale is comical. What did he expect to find when he reached the vicinity of the fortress? Did he anticipate that the Russian Squadron would be drawn up to receive him off Liautishan Promontory with manned yards and dressed ships, while Admiral Togo's fleet lay politely beyond range? Some Russian officers seem bent upon making their country ridiculous. "Managed to their country ridiculous. steal down unobserved to within 30 miles of Port Arthur; could not see any Russian ships to help me; saw some Japanese ships; made haste to beat a retreat." A fine entry for the official log of the Russian flag-ship!

The Jiji Shimpo thinks it very probable that the Russian squadron in Port Arthur will make a dash from the place, taking advantage of either a fog or of stormy weather. The climatic conditions that prevail in and near the Gulf of Pechili at this time of year are eminently favourable to such an enterprise, and no matter what vigilance Admiral Togo exercises, he may be unable to make his blockade absolutely effective at all times. The Russian ships would not emerge with the intention of fighting, according to the Jiji's view. Their purpose would be to run into Chefoo and there to pursue the tactics followed by the Manjur in Shanghai; namely, weeks devoted to wrangling among diplomats and then, at worst, disarmament, the ships and their crews being saved. Of course the Tokyo journal urges that in such an event Japan must not allow herself to be played with as was the case at Shanghai. She would have to insist on

to us to be a much more practical scheme Hitachi Maru surrounded by the Russian

than the Chefoo programme,

There seems to be no doubt that on the It is difficult to credit Skrydloff's telegram morning of the 15th instant the Vladivostock Squadron was somewhere in the neighbourreport of its presence came from Oki Island, which is off the province of Chikuzen. The report was to the effect that three ships resembling the Vladivostock cruisers had been seen in the neighbourhood. Subsequently without suffering any serious injury, and she intelligence was received from Tsuno Island alsomanaged to effect her escape to Iki. on the north-west of Nagato to the effect All this leaves it uncertain whether the that the sound of cannonading had been heard in the neighbouring sea. Finally the Naval Authorities received a report from Iki Island confirming the fact that a sound of cannonading had been audible. In the face of all these statements it seems plain that Skrydloff has brought down his ships and is engaged in some enterprise. Before leaving St. Petersburg he announced a bold and also a wise programme. It was based on the conviction that, in the circumstances, the first duty of Russian naval officers was to reduce Japan's fighting strength whatever their own ships might suffer in the process. Probably Skrydloff is now putting that theory into practice.

The sound of cannonading should mean one of two things: either that the Russians are attacking the forts in the Tsushima Straits, or that they have fallen in with a Japanese squadron. The former is in the last degree improbable and we shall probably be right in assuming the latter.

The latest account comes-since the above was written-from Katsumoto on Iki Island. It is dated the 15th and says that an engage-

ment was then actually going on.

Moji alsoreports that on the evening of the 14th three three-masted Russian ships were sighted and the forts at Tsushima opened fire on them. It is further stated that three the 15th at a point some 50 nautical miles from Moji in the neighbourhood of Oki Island. The passage of merchant ves-sels was stopped. Sounds of distant firing were heard.

Takeshiki sends word that from 8.15 a.m. on the 15th fighting commenced with Russian ships and was going on at the time 9.24 a.m.—of sending the telegram.

From Oki Island comes a statement that ships were sighted and firing was heard, and from the look-out on Tsuno Island a telegram dated 8.30 a.m. on the 15th announces the sound of cannonading.

There are other similar reports from other places. The most definite is one from Kure which says that the fight was between the cruiser Niitaka (3,423 tons, a coast-defence ship) and two vessels of the Vladivostock Squadron.

Thursday morning.

time there steamed out the Hino Manu, him. If he has sunk the Hitachi and made the departure of the ships within 24 hours.

There is one contingency not considered by our contemporary. If the Russian ships, or some of them, managed to slip through the blockading line, why should they not steer for Saigon, where they could obtain a steer for Saigon, where they could obtain

cruisers and fired upon repeatedly by them. Smoke was observed ascending from the adivostock ship and the presumption is that she was neighbour-the first the Fuyo Maru fell in with the enemy at a point south-west of Tsushima, but that she managed to escape into harbour at Iki. The Ugo Maru, too, had a narrow escape. She was fired on 16 times by the Russians Hitachi was sunk or whether she escaped. Moreover nothing had been heard up to the evening of the 15th of the Sado Maru and the Kanazawa Maru, and it is possible that these vessels also fell in with the Vladivostock Squadron.

The Hitachi and the Sado belong to the Nippon Yusen Kaisha's European service. They are vessels of 6,000 tons each, the finest ships among the Japanese transports. If the situation was such as these various rumours would suggest, we must conclude that all the firing heard at Tsushima and in the neighbouring seas was done by the Russians, and that no Japanese men-of-war were at hand. There are indeed some vague reports that Admiral Kamimura's Squadron subsequently fell in with the Vladivostock ships, but this story receives no confirmation as yet. On the contrary, there is a telegram from Iki that the Russians escaped, steaming eastward at 3.20 p.m. on the 15th. The strange thing is that a number of fine transports should have been allowed to put to sea without any naval escort. That is scarcely credible. Even the Kinshu Maru had an escort from which she was separated by a mere accident. Nevertheless we hear little of Japanese war-ships in connexion with this affair, and had they been present or in the neighbourhood they must have fire on them. It is further stated that three given a good account of themselves. The Russian vessels were seen on the morning of Miyako Shimbun alone publishes an assertion that a Japanese squadron, consisting of the Isumo, the Yakumo, the Azuma, the Tokiwa, the Nisshin and the Niitaka fell in with the Russians and sunk the whole three after a severe engagement. The Miyako gives this information on the strength of a telegram from Moji dated at 8.50 p.m. on the 15th. It also publishes a statement that at 8 a.m. on the 15th some Japanese war-ships encountered the Russians and that a fight took place, but operations were very difficult owing to a heavy wind and boisterous seas. Nevertheless the Japanese shells set one of the Russians on fire. On the other hand, it is notable that the people on board the Hino Maru say nothing whatever about Japanese war-ships being at hand. Thus at this moment of writing (9 a.m. 16th) the situation is full of perplexities. It looks as though Admiral Skrydloff had struck a On Wednesday evening persistent rumours bold and very effective blow, taking heavy circulated in Tokyo to the effect that the risks for the purpose. His avowed policy is transport Hitachi Maru had been sunk or to inflict damage on the Japanese at all cost to himself, and in pursuance of that object captured by the Vladivostock Squadron in to himself, and in pursuance of that object the neighbourhood of Tsushima. She left his plain course would be to place himself in the neighbourhood of Tsushima. She left Moji on the morning of the 15th before news had been received of the appearance of the Russian cruisers. At or about the same Russian cruisers. At or about the Maru, there steeped out the Hino Maru, and bis own escape it will be a very clever

cruisers appeared off Oki-no-shima and opened fire upon three Japanese merchantmen, but the latter all escaped uninjured. At once a Japanese squadron put out and engaged the Russians, and a fortunate issue will probably be learned soon. Saseho, in short, seems quite confident.

A ship which effected her escape wires (Tiji Slumpo) from Moji on the forenoon of the 16th instant that while steaming through the Genkai Nada, she observed a Russian man-of-war approaching in the direction that the *Iburi Maru* would take, and she immediately signalled the danger. Just then the Russians opened fire, and the reporting ship—which was between Chinoshima and Oshima,—signalled that the enemy were in sight. The Kanazawa Maru, observing the signal, steamed at full speed to the same position between the islands. It was now seen that a four-funnelled ship like the Rossia or Gromobon, together with the Rurik, were making some movement at a point about 6 miles away, there being thus three of the enemy's vessels in sight. The transports therefore headed for Kanzaki in Tsushima for a distance of 20 miles, when the fog lifted and Mutsura Island was passed at 8 a.m. At this time the sound of firing was heard in the north and west,

The Master of the Hi-no Maru reports that at 5 a.m. he left Moji but there being a heavy fog he steered for Sirasaki and slowed down there, making signals, which, after some 30 minutes, were answered by the arrival of the *Iburi Maru*. The two ships made for Mutsura Island, and on reaching it at 1.50 p.m. the sound of firing was heard.

(Apparently then the firing went on from 8 a.m. to 1.50 p.m., which fact is difficult to reconcile with any theory of cannonading merchant-steamers only. It would seem that some kind of engagement must have taken place.—Eo. J.M.)

Another telegram sent to the Jiji from Moji on the afternoon of the 15th at 5 o'clock, says that the Russians were seen fring upon the Sado Maru, the Hitachi Maru, and the Kanazawa Maru. Further, the Izumi Maru, which ought to have returned, has not been heard of and anxiety is felt on her account.

From Saseho at 6 p.m. on the 15th a telegram came saying that Iki reports the passing of the Russians eastward at 2 p.m., when the position of the Japanese squadron was unknown. There was a report that a part of the Japanese squadron had encountered the enemy at Tsushima, but had subsequently lost sight of him.

From Ujina at 8 p.m. on the 15th another telegram says that the Hitachi Maru and the Sado Maru were surrounded by the Russians, and that the Izumi Maru pursued by them.

Following are some of the foreigners known to be on board the *Hitachi Maru*; Captain W. Campbell; First Officer M. Svendson; Chief Engineer D. Glass.

THE LATEST.

The latest report comes from the Governor of Fukuoka. He says that a vessel with 300 refugees of the Hiachi Maru has just arrived. The term he uses for "vessel" is dofune, which should mean "earth boat," but in that sense seems inexplicable. If the word be dofune, then the sense is that the Hitachi has returned with 300 of her crew.

the Hitachi Maru and the SadoMaru.

OFFICIAL TELEGRAMS. [Received at the War Department.]

First Paymaster Imagawa, telegraphs from Okino Island, that at 10 a.m. on the 15th inst. the Sado Maru was fired upon by three Russian vessels in Genkai Sca. batants on board were ordered to proceed to the Russian ships; the non-combatants were ordered to leave the Sado Maru. Seventy of the crew have reached this

[From the Headquarters of the 10th Division.] On the 15th inst., the Hitachi Maru and the Nagato Maru were sunk by the enemy near Oku-shima. One of the crew was saved by a fishing-boat and arrived at Abura-mae, Yamaguchi Prefecture.

[Despatched from Kokura.] At 10.20 o'clock on the forenoon of the 15th June, the Sado Maru and the Hitachi Maru sighted four Russian ships in the Genkai Sea. Both were sunk by torpedoes at 3 p.m. The Captain of the Sado Maru was picked-up by a passing fishing boat. About 100 of the crew have reached Kokura.

[Despatched from the Headquarters of the Twelfth Division.]

Seventeen of the crew of the Sado Marie were saved by fishing boats and reached Kokura. About 30 others were saved, being picked up by fishing boats, but it is not known what has become of them. Also 30 of the crew of the Hitachi Maru were saved and reached Wakamatsu.

[Despatched from Moji.] The Tosa Maru has arrived with 37 men from the Hitachi Maru. Search is now being made at the scene of the catastrophe. A sergeant, Tadokoru, from the Hitachi Maru says that at 10 a.m. on the 15th, they sighted three Russian men-of-war, steaming at full speed. The Russians first fired blank cartridge and then opened with their quick-firers. Many of the crew of the *Hitachi*Maru were killed. The boilers burst, which
also caused much consternation, and fire
broke out. The Captain of one of the companies ordered Fujisaki, a 2nd class soldier, to guard the regimental colours, but Lieut.-Col. Tsuchi had already burned them and smashed the staff. He called out to the men that if any of them escaped they were to report this fact, and then, just as he was speaking, he was struck on the shoulder by a piece of shell and killed. Many of the officers killed themselves with their swords or pistols: several jumped into sea. The Superintending Officer was killed; the 2nd Engineer committed suicide. At the third volley from the enemy the vessel sank. The Sado Maru was then seen steaming in a westerly direction. Thirty-seven of the crew were rescued by fishing boats and taken to Mutsura island. Another fishing boat took 30 others, but there whereabouts are not at present known.

WAR TAXES.

We observe that attempts are still made to defend the foreign residents' claim of exemption from war taxes, but as is usually the case in these arguments, the opposing contention is now altogether misstated. It is put into the form that exemption can not be demanded by foreigners in Japan "since Japanese living abroad have not claimed such exemption." That presentation of the case is quite silly. The question is, not whether Japanese abroad have or have not ants to an absurdity nothing was needed explosion.

except what one of their champions has now done, namely, advanced an argument that there are probably no Japanese subjects residing in England who have incomes large enough to be liable to taxation! Sancta simplicitas! Was ever such irrelevance gravely perpetrated? It is quite plain that the advocates of exemption are conscious of the quagmire in which they are floundering. Otherwise they would not resort to obviously contradictory arguments. Just consider the following contentions side by side :-

side by side:

I.—Japanese residing in England escape war taxes because their incomes are not large enough to be taxed. Therefore it is obvious that they would not be taxed if their incomes were large enough!!

2.—Japanese residing in England escape taxes imposed to meet war expenditure because such imposts are not called "extraordinary war taxes." Therefore the Japanese Administration need only change its nomenclature and it can subject foreign residents to any kind of imposts. The treaties furnish no protection whatever except against indiscreet terminology!!

We really doubt whether the framers of such

We really doubt whether the framers of such arguments entertain one scintilla of faith in their own case, or believe for one instant that foreigners residing in an Occidental country would, under any plea whatever, be exempted from war taxes for which the natives generally were liable.

WAR NOTES.

The naval editor of Le Temps, writing on the 11th instant, with reference to the reported despatch of the Baltic Fleet in two squadrons to the East, says that, from every point of view, the enterprise is impossible unless the Fleet have a half-way base.

According to a telegram from St. Petersburg General Kuropatkin has issued a proclamation to the effect that respect is due to a brave enemy. Should wounded Japanese soldiers or the corpses of Japanese killed fall into the hands of the Russians, the latter must be duly interred and the former must be treated just as the Russian wounded are.

His Imperial Highness Prince Kanin, who is a Major-General of Cavalry in the First Division, will set out for the scene of war in a few days. On the 12th he paid a farewell visit to the Red Cross Hospital in his capacity of President of the Red Cross Society. He explained that although the date of his return was uncertain, he saw no reason for appointing any one to take his place during his absence, as all the duties would be performed by the Vice-President, Count Matsu-

M. Davidow, the assistant-manager of the Russo-Chinese Bank in Shanghai, who is about to proceed to Peking, is represented (Jiji Shimpo's correspondence) as saying that Russian strategists divide the war into three periods. The first ends next December; the Second is the winter, and the third is next May. During the first two periods Russia will suffer considerably. But in the third she will have an immense army on the scene and the Japanese will be called beat farally. M. Duridow does not be seen and the Japanese will be rolled back finally. M. Davidow does not think that the Baltic Squadron will come eastward this year.

There was a rumour in circulation in Yokohama on Wednesday night that the two former Northern Pacific boats, *Tacoma* Hitachi has returned with 300 of her crew.

Telegrams received from various sources confirm the news that at least two transports have been sunk by the Russian ships, and possibly three. The two certainly sunk are

OFFICIAL TELEGRAMS.

[Received in the forenoon of the 9th instant at the Headquarters Staff from General Kuroki.]

First Army drove back the enemy in the neighbourhood of Samachi. He retreated in the direction of Szantai and at 3 in the afternoon our troops took Saimachi. The J.M.) force of the enemy posted there was one battalion of infantry with two guns. Our losses were three men killed and 27 wounded. There were 23 killed and wounded on the field and we took 2 officers and 5 men prisoners. According to the statements of the Chinese the enemy carried away 2 officers and 70 men wounded.

A detachment which went in the direction of Tung-yuen-pau, met on the forenoon of the 6th instant 50 or 60 Russian infantry near Lin-kia-tai and drove them off. On the 7th instant from 5 p.m. this detachment fought for two hours with and drove back to Tung-yuen-pau about six companies of the enemy's infantry and about 300 cavalry. This fighting took place in the neighbourhood of Chang-kia-shih. The enemy lost 70 or 80 wounded. Four men were killed and 16 wounded.

[Received on the forenoon of the 10th instant from General Kuroki.]

On the evening of yesterday the 8th, a detachment of our troops attacked the enemy near Taholiang and defeated them, and at 5.20 p.m., effecting a junction with a part of the army that landed at Takushan, they took Siu-yuen. The enemy confronting the two detachments totalled about 4,000 cavalry with 6 guns. They retreated in the direction of Tomu-ching and Kaiping. We had one man killed and one lieutenant and 21 men wounded. All the wounds were slight.

[Received on the 10th instant at Headquarters.]

According to a report from the Takushan army, a detachment of this army, together with a detachment of the First Army, on the afternoon of the 8th attacked the enemy at Siu-yuen and at 5.20 p.m. captured Siu-The enemy there numbered about fifteen or sixteen hundred cavalry with six guns. The artillery and part of the cavalry guns. The artificity and part of retreated to Tomu-ching and the greater part of the cavalry retreated to Kaiping. losses were two men killed; one ensign and seven men wounded.

[Received at the Naval Department at 7 p.m. on the 1th instant from Vice-Admiral Kataoka.]

The clearing squadron discovered and destroyed 16 mines in Talien Bay on the 8th and 9th instant. We had no loss. At Takushan there are four filter-ponds made by the Russians, one covering an area of about 100 tsubo, and the others about 30 tsubo each, and all have a depth of 10 feet, but the conducting pipe is somewhat injured and needs repairing.

(Takushan is on the northern promontory of Talien Bay. Probably these filter-beds are for the purpose of supplying water to ships.—En. J.M.)

With reference to the story that the Russians when retiring had poisoned the water supply at Dalny, the Chinaman who made the report has disappeared, and it would therefore seem that the tale was invented merely to cause apprehensions. curate analyses are now being made.

[Received at the Military Head Quarters in the 12th instant].

The dead left by the enemy on the field at Nanshan after the battle of the 26th of May have all been honorably buried. They numbered 10 officers and 664 rank and file.

the vicinity of our various regiments, but the total number is not actually known.

Headquarters Staff from General Kuroki.]

On the 7th instant one detachment of the fairly be assumed, therefore, that since the Russians must have carried off some of their dead, and since sighbourhood of Samachi. He retreated their wounded must have borne at least the same ratio to their killed as was the case with the Japanese the casualties were about equal on both sides.-ED.

[Received at the Naval Headquarters from Rear-Admiral Togo, commanding the Third Squadron.]

The detached squadron which was engaged in blockading the land side of Port Arthur, sent some vessels to the coast near Kiachow for the purpose of making medemonstration. A railway train wam observed moving south from Taushan, and was fired on by our ships The train then was fired on by our ships The train then steamed north. No other train was subsequently observed during the day. enemy, apparently with the object of op-posing the landing on our part, assembled a force of infantry and cavalry on the Kiachow promontory, where they waited under cover. The gun-boats Akagi and Uji, taking advantage of their shallow draft, steamed in close to the shore and opened fire on the

instant reports that prices have risen sharply in Port Arthur. A bag of flour costs 8 roubles, 15 eggs cost 1 rouble, a millet cake 15 sen. Chinese foot-gear and hats have become very dear, there being a demand for them on the part of people who seek to escape in disguise.

[Received on the afternoon of the 12th inst., at the Naval Headquarters, from Admiral Togo.]

The United Squadron continues blockade Liaotung to assist the Army on the landside, and to send squadrons to shell the enemy on shore. No. 6 squadron, which had been specially detached for the last duty during the past few days, consisted of the Akagi, Uji and No. 6 Torpedo Squadron. On the 7th and 8th they shelled the enemy near Kaiping and inflicted severe loss on them, returning on the morning of the 12th, No. 4 Destroyer Squadron, which has returned to blocking duty, bombarded the enemy at Ying-ching-tsz and Shwan-tai-kau for two hours from 11 a.m. on the 10th line and indicated account. inst. and inflicted severe loss. No. 2 Squadron, which has been patrolling Talien Bay, observed four Russian destroyers on the 12th in the neighbourhood of Shau-pintao and opened fire on them, driving them back as far as Hsienshang Point.

The clearing of Talien Bay of the enemy's mines is going on rapidly. The first section is finished and over 70 mines have been destroyed. We are now beginning to clear the 2nd section. There are still very many of the enemy's mines floating about in the fairway. Our vessels have destroyed about 30 of them They are driven by wind and tide down Pechili Bay. The Fourth Destroyer Squadron sighted one near Tiehtao and destroyed it. Three others were seen in the neighbour-

hood near Tou-kiao-kao.

At present there is one fog every week. A fog started on the 9th inst., and lasted till this morning. Our operations are greatly impeded in consequence, but all are working with great assiduity and happily since the loss of the Yoshino there have been no casualties of any kind.

Besides these some 20 or 30 were buried in in order to prevent any landing by the Japanese near Kaiping, have assembled there a force of 3,000 infantry and cavalry. The people say that look-outs have been stationed all along the shore. These troops retired inland before the fire of the Squadron.

On the 7th, all trains moving southward turned back, in consequence of our fire, and on the 8th no train was seen. On the morning of the 8th, two companies of in-fantry and one squadron of cavalry in the neighbourhood of Kaiping suffered heavy loss from our fire.

The commander of a foreign steamer which left Newchwang on the 7th, says that the Russian troops in Newchwang, numbering 3,000, with 20 guns, left that place and proceeded north, when news of the Japanese attack on Kaiping reached them.

No. 10 Torpedo Squadron captured two Russian soldiers on their way by boat from Fuhchow Bay to Port Arthur. They stated that the troops at Wankialing Wafang-kau and Wanfangtien consisted of two regiments of Infantry and 11/2 regiments of Cavalry under Major-General Sansom. This estimate agrees with the estimate of the natives, who Russians, who seemed to have sustained put the number at 5,000. The same prisoners say that from 3 to 4 trains proceed daily to Wankialing, but few go south of that point, and when they do they move very slowly. These prisoners carried a very slowly. These proquantity of official letters.

[Received at Naval Headquarters from Admiral Togo on the morning of June 14th.]

While the Taihoku Maru, of the mine laying squadron belonging to the Fleet, was laying down mechanical mines last night, a mine suddenly exploded. The casualties were: Sub-Commander Masaki Yasuichi and 18 petty officers and men killed; Chief Paymaster Mori and 4 petty officers and men severely wounded; and Commander Oda Kiyozo and one boy slightly wounded.

[Received from Admiral Togo on the forenoon of the 15th.]

(1) The torpedo-launch squadron commanded by Commander Yamamoto, escorted by the 3rd Destroyer Squadron and the 1st, 14th, and 16th Torpedo Squadrons, performed another reconnaissance in force at Port Arthur on the 13th instant at 11.30 p.m. None of the squadrons was seen by the enemy. They passed through the field of the search-lights and having cleverly laid mines as previously determined, returned

(2) Captain Tsuchiya of the 3rd Destroyer Squadron reports that on the 14th instant, when the Squadron, together with the 1st, 14th and 16th Torpedo Squadron were assisting a reconnaissance in force made by the army at Shaupingtau and were the west of Shaupingtau and were cannonading a position of the enemy's on the west of Shaupingtau, the Novik and ten Russian destroyers emerged from Port Arthur. They were fired on by our Squadrons, which sought to draw them further to sea, but at 3 p.m., they retired. We had no damage whatever. Our Squadron proceeded that night to their appointed duties.

On the same day at 4 p.m. the Chitose reported from Cap Island that sounds of explosions and cannonading were audible at Port Arthur, but the cause is not yet known.

[Received at the Foreign Office.]

The Russian Government is said to be

latter are unfavourable. Strong pressure is being brought to bear on the Berlin banks.

[Received from General Kuroki Commanding the First Army.]

A detachment under Capt. Yoshida, on the 11th inst. attacked a detachment of 100 mounted infantry at Kanchuankau. On the 12th another detachment dispersed 300 of the enemy, who were assisted by 300 mounted bandits, and took possession of Hwaijen. The enemy retired in the direction of Wutanho. His casualties cannot at present be ascertained but he had 3 killed and 3 wounded in the first office. and 3 wounded in the first affair.

THE SITUATION IN MANCHURIA.

Saturday, June 11.

London telegraphs that Kuropatkin is to lead 40,000 men to the relief of Port Arthur, and that General Stalkenberg has arrived at Tashikiao. But in Japan it seems to be still considered uncertain whether these opera-tions are intended to deceive or to be prac-tical. To us the latter appears to be the case. Kuropatkin can not lie idle for ever. If he retreats to Mukden or Harbin, he openly avows inability to help Port Arthur. the remain inactive at Liaoyang, is equally leaves the fortress to its fate, to say nothing of his implied confession of inability to meet the Japanese in the open. He must come out. To the open the wisest strategy for him obvious inference that, as we suggested in a confession of this Takushan Army or the say nothing of his implied confession time when it took the field, nor are the open. But it will not be improper to note the obvious inference that, as we suggested in a confession of this confession of this Takushan Army or the say nothing of his implied confession of this Takushan Army or the say nothing of his implied confession of this Takushan Army or the say nothing of his implied confession time when it took the field, nor are obtained by the say nothing of his implied confession time when it took the field, nor are obtained by the say nothing of his implied confession time when it took the field, nor are obtained by the say nothing of his implied confession time when it took the field, nor are obtained by the say of the his force for an attack upon the First Army under Kuroki. And it is plain from the de-liberation of Kuroki's proceedings that he is preparing for such a contingency. Instead Takushan. of pushing on rapidly or rashly towards Mukden and Liaoyang, the Japanese Gene-ral is moving with the utmost circumspection, adopting at every step such precautions as seem advisable should a stand become necessary in the face of a superior force. There is of course a possibility that all this talk about a southward movement on the part of the Russians is merely designed to cloak some enterprise against the First Army. A Napoleon in Kuropatkin's place would be very apt to adopt that line of strategy, namely, to organise the various forces south of Haicheng into an army for menacing the Liaotung Peninsula, and having thus compelled a counter-move on the part of the Japanese, to throw the whole of his remaining available troops against Kuroki's army and, if possible, force it back to Fenghwang and the Yalu. Before many days have clapsed the situation must develop so as to make these things clear. The present is just the critical moment. We must assume that Kuropatkin has been awaiting the Japanese disposi-tions before finally mapping out his own strategy, and it is very difficult to believe that he can seriously think of leading southward while Kuroki 40,000 men menaces his left flank and his line of commay be able to undertake the two things in a south-westerly direction to watch the simultaneously, namely, to send fifty or sixty thousand men against Kuroki, or sixty thousand men against Kuroki, or from Haiching, and the march of the Takuto leave them guarding his communications, and to march himself with forty or fifty thousand to the relief of Port Arthur. sixty thousand men against Kuroki, or to leave them guarding his communications, and to march himself with forty or fifty thousand to the relief of Port Arthur. It is in that sense that we interpret his strategy, and the thing becomes much more conceivable if we assume—a reasonable assumption—that he has placed the cardinal positions along his line of communi-will be cut off. Simultaneously he must

it is beyond question that this division of his forces and this southward prolongation of were that consummated a still more dishis line of operations constitute the most perilous strategy he could adopt under the circumstances. He will be moving across the front of two Japanese armies, one prepared to strike from the direction of Takushan, the other from the Valley of the

Monday, June 13.

The public have received news of so many petty skirmishes lately that probably very little attention is paid to intelligence of this kind, as no event of importance has hitherto followed the receipt of the news. But Friday's telegrams must not be summarily dismissed, for they convey intelligence of moment. In the first place they show two armies operating in Manchuria in addition to the troops on the Liaotung Peninsula. One of these armies is General Kuroki's; the other is an army spoken of as "the army that landed at Takushan." The name of the officer in command of the latter is not mentioned in the telegrams, but the fact that a report is sent independently from the army proves conclusively that it does not form a part of General Kuroki's force. have been purposely delayed so that they could ultimately synchronise conveniently with those of a force operating westward from

In the second place, we have the two armies simultaneously commencing a forward movement. Kuroki's Army, on the 7th of June, captures Samachi (or Samazi) and also fights an outpost action which places it in possession of Changkiashih. Samachi is an important town lying 40 miles north of Fenghwang. It is 64 miles distant from Liaoyang on the northern route to the latter from Fenghwang. Changkiashih is on the main, or middle ronte, which leads through the mountains across the celebrated Motien Pass The First Army, then, may be said to have performed, on the 7th instant, the opening stages of its advance towards Liaoyang or Mukden, or both. It is not likely that Kuroki contemplates forcing Motien. advance along the northern route through the valley of the Taitsz would effectually turn that position. But he can not leave the Motien route open for the enemy's use, and therefore he sends a containing force along it. As for the Takushan Army, it made the first stage of its advance by the southern route towards Liaoyang, that is to say, the route which, setting out from Takushan, leads via Siuyen to Halching on the railway, and thence up the line to Liaoyang. The Takushan army's first stage was the capture of of places are elided, asterisks only being Siuyen. This it effected on the evening of employed. Even asterisks, however, afford munications. But the degree of that danger the 8th, assisted by a detachment of the must depend largely upon the forces the First Army, which had doubtless been pre-Russian General has at his disposal. He viously thrown out from Kuroki's left wing

cations in a state of thorough defence. Still employ a force at least sufficient to check Kuroki's advance by the Taitsz Valley, for astrous measure of communications-cutting would be achieved.

The above operations did not involve anything more serious than outpost engagements, though the Japanese had altogether 10 killed and 73 wounded. But it is observable that the Russian outposts were almost strong enough to be regarded as occupying forces. At Samachi there was a battalion of infantry with 2 guns. Whether they had entrenched themselves or not the report does not say, but if they really lost the number admitted by Kuropatkin himself, namely, about 100 of all ranks, either their resistance must have been altogether in excess of outpost function or they managed matters very badly. Again at Changkiashih the Russians are said to have had some 6 companies of infantry and 300 cavalry, or over a thousand in all. Here too they lost from 70 to 80, so that they evidently fought to hold their ground. Their largest force, however, was at Siuyen—4,000 cavalry with 6 guns. Their losses in this engagement are not estimated, but it is significant that a part of them retreated towards Tomuching, which is on the road to Haiching, and a part towards Kaiping, which is near the neck of the Liaotung Peninsula. Such movements do not suggest any con-centration of the Russian forces on the line of the Takushan army's advance. It must be confessed that Kuropatkin is a passed master in the art of concealing his designs. Do they fathom him in St. Petersburg we wonder. Evidently St. Petersburg is profoundly perplexed about Port Arthur at all events. The people there must know very well that the Japanese troops did not force the Kinchow Isthmus until night-fall on the 26th of May, and that from Kinchow to Port Arthur the distance is 39 miles. Yet, according to a telegram via Paris, they think it credible that an attack by land and by sea was delivered against the fortress on the 29th. Certainly their credulity implies an immense compliment to the potentialities of a Japanese

London reports the appearance of another small flotilla of Japanese transports off Hiung-yo-ching, near Kaiping. This is confirmed by a Petersburg message which appears in the Asalii. It puts the number of Japanese transports at nine. Our readers will remember that a pretense of landing at this point on the north west of the Liaotung Peninsula was made on the 15th of May, and that it led to the evacuation by the Russians, and to the retreat of all their forces in the direction of Haiching.

There are indications that the Twelfth Division is moving along the main road from Fenghwang towards Liaoyang. This news comes vià Kokura, the head-quarters of the Division, but unfortunately the names some information, and we infer that the Division, if it has not actually passed Motienling, is very close to that formidable defile.

Tuesday, June 14

In the Asalu's correspondence from the front we read that the Twelfth Division

to some distant village as a temporary mea- Haiching and Liaoyang, unless we are ly from committing himself to a definite policy until Where the Twelfth Division was on the 2nd this correspondent carefully avoids nounces be real, it is a retreat before necessaying, but subsequent reports indicate that it was near the main road from Fenghwang to Liaoyang on the 8th instant.

The guns captured at Kiulien were tried by the Japanese in the interval between the a6th of May and the 7th of June. Some of them were found to be effective up to 8,000

Wednesday, June 15.

The Russians are said to be again invading the West Liao district. They retired from it at the close of May but a report now comes that a thousand men with 8 guns have advanced to Sinlipao, their pretext being to drive back the Hunghutsz. Judging from the constantly rumoured enter-prises of these latter, one imagines that the Russians may have valid reason for the above move.

The requisitions of the Russians at Mukden have been so large and so frequent that great scarcity of cereals is now said to be felt. Governor-General Tseng is reported to have appealed for aid to Peking, and the Chinese Government, in response to this varying the occupation by burning houses appeal, has instructed Viceroy Yuan to The whole affair falls worthily into the comminister to the wants of the Mukden folks. text of the doings of the Vladivostock That is a frank manner of whipping the devil round the post. The Russians draw upon the people for supplies and the people draw upon Peking, the net result being that the Chinese Government is supporting the Russian troops in their struggle against Japan. It is inevitable that many anomalies should disfigure a situation like the present, where the territory of a nominally neutral State is under the practical control of a bel-

Kuropatkin is said to have posted notifications in Mukden to the effect that the large Russian Army at Liaoyang is about to retire to Mukden, but that no apprehensions need be felt as the movement is part of a plan to crush the Japanese. Mean-while all ingress and egress to the Russian camps at Liaoyang, Mukden and Taiyuen are strictly interdicted to Chinese subjects. It will be admitted that the Russian General is at all events succeeding in bewildering the public. This is the month, this month of June, when he was to have arrived in Tokyo for the purpose of dictating terms of peace, and now his talk is of retreating to Mukden. days ago, however, he was undoubtedly days ago, however, he was undoubtedly in the last number of the Korea Review:—

sity not a step back for a better spring.

Meanwhile the most urgent business of the Russians seems to be the building of a military road from Mukden to Harbin. thousand men are said to be engaged on it day and night. A three-hundred-mile road is a big undertaking.

KOREA.

Saturday, June 11. There is no change apparently in the situation on the north-east coast of Korea. The Russians have disappeared entirely from Kowon, but a few are still in Hamhenng. They have evidently abandoned, for the moment at all events, their intention of pushing down to Wonsan, and we shall probably hear of them next in the interior, attempting something, perhaps, against the Japanese line of communications on the west coast, though some time must elapse before they get so far. Thus far their operations have represented a purely wanton raid. They are merely robbing the Koreans and varying the occupation by burning houses. Vladivostock squadron and of the Port Arthur fleet's achievement at the Miao Islands.

Tuesday, June 14. Mr. Hayashi left Seoul on the morning of the 12th, and embarked on the Ohayo Maru at Chemulpo. A great number of persons assembled to see him off.

A Japanese who has just returned from Wiju is represented as saying that there are 800,000 logs of timber in the upper waters of the Yalu and 50,000 at Yong Ampho. The Japanese authorities have handed them over to their rightful owners wherever the latter could be found.

Wednesday, June 15.
A traveller who arrived at Wonsan on the 12th instant, having left Songjin on the 3rd, reports that the local officials at Ham-heung and in the neighbourhood made preparations to welcome the Cossacks on the occasion of the latter's recent coming, and are now collecting supplies for them, as well as urging the inhabitants not to fly from the district. In connexion with this it is interesting to read the following which appears in the last number of the Korea Review :

It is difficult to guage the sentiment of Korean Of-

he sees which way things are going to turn out. This again leads to the interesting question of political leadership in Korea, but this would carry us too far afield to be relevant to the present crisis.

Meanwhile it seems doubtful whether any Russian soldiers are on the coast road south of Songjin, though some have probably passed westward into the interior from Puckhhong and Hansheung. They have apparently constructed some kind of defensive works at Kyongsong, which is their advanced base, but their force southward of the Tumen is reported not to exceed 700 or 800 of all arms. There seems to be a nomad body of Cossacks in Pyongyang-do. They were last heard of at Nyongwon whence they were retreating towards Chang-

It now turns out to be untrue that any preparations for flight were advised by the Japanese Consul at Wonsan or made by the inhabitants. Absolute reliance was placed on the ability of the Japanese garrison to hold the place against any Russian assault.

There seems to be a new explanation of the curious lingering of Mr. Li in St. Petersburg. He has been recalled by his Govern-ment, but his Russian creditors do not like to lose sight of him. The story is that he wants 40,000 yen to pay off debts contracted in running his legation. The money was actually sent to him some time ago from the Customs Office, but he continues to ask for it, and there are suspicions that it was diverted into channels which could probably be better indicated by the Russophil Mr. Hyong, now in Shanghai, than by any other

The question of the water-works concession in Seoul is not yet settled. It appears to be very intricate-too intricate to have

any general interest.

There is a story that the Korean Government recently presented Orders to the various Foreign Representatives but that it distinguished the Italian Representative by offering him a star of lesser magnitude. The Italian declined to endorse this discrimination.

Thursday, June 16.

The Russians at Kyongsong are said to be removing all the telegraph apparatus northward. Rumour further credits them with adopting a course of extreme violence towards all travellers. These are stripped towards all travellers. These are stripped completely and subjected to a vigorous examination.

Major-General Haraguchi, who commands the Japanese troops remaining in Korea, reports that the force of Japanese which defended Anju against the Cossack attack on the 10th of May was only 68 men. The Cossacks totalled over 300. It is remark-

Again the Hunghutze are making them-

that they will be fined on the first occasion and that their houses will be burned on the second. These people being unarmed it is plain that they can not prevent the Hunghutze's doings nor can they protect themselves against the latter's vengeance if they give information to the Russians. Alexieff's method is therefore harsh in the last degree and unjust also. It must be a difficult task for China to restrain her soldiery in the face of such cruelties

perpetrated against peaceable folk.

Our readers doubtless remember the report recently received in Tokyo to the effect that Chang Chi-tung, Sheng Ifai, and Wei Kwan-tou after a secret consultation had advised the Throne to denounce China's treaties with Russia. In welf-informed circles on this subject, and now again we hear talk

truth in this rumour.

Monday, June 13. The latest exploit of the Hunghutze said to have been the stealing of a quantity of Russian ammunition at Tashikiao. Japanese journals begin to speak somewhat more accurately than usual of these Hunghutze. They repeat the story told some time ago that the free-booters have leagued themselves into a body called the "Loyal Army"; that they are under the leadership of Li Yuen, and that they have sworn not to rest until the Russians are expelled from the cradle of the Chinese dynasty. They carry a flag closely resembling the Japanese, and it is whispered that not a few Japanese adventurers hold prominent positions in their Their second in command has a name which, read according to the Japanese sound of the ideographs, would be "Tsunesound of the ideographs, would be kichi." He is said to be neither kichi." He is said to be neither a Chinese nor a Japanese, but to have simply "fallen from the sky." He is also said to be a strong and resourceful leader of men.

A talassed to the would be "Isune- ingenuity may introduce.

The Hunghutsz are reported to have made a raid against the railway south of Mukden, and to have destroyed 5,000 kwan (over 40.000lbs.) of fuel stacked for the leasungtives.

A telegram to the Nichi Nichi Shimbun from Chefoo alleges that beyond all question the Russians have succeeded in establishing a system of wireless telegraphy between Port Arthur, Chefoo, Newchwang and Ching-This statement does not command credence. Any connivance at such an organization would be a flagrant breach of neutrality on China's part, and if receiving stations were erected at Chefoo and Chingwantao, she would be bound to have them removed at once. Newchwang is a different matter. Very likely that route of communications has been opened. Meanwhile it appears that carrier pigeons are being largely

On the 11th instant the Japanese Consul-General in Shanghai announced that a plague patient had been found on the French steamer Australien and that the vessel had been duly disinfected.

hospitality, but we should think that 1,500 is nearer the mark.

It is rumoured that Russian agents in Shanghai are endeavouring to purchase the P. & O. steamer Ballarat. They allege the pretext of sending her to Vladivostock, and there does not appear to be any reason why it should not be a true pretext. Just at present one can not see what the Russians in the Far East want with steamers. They of Liaotung.

A certain firm in Shanghai is said to have supplied to the Russian Consulate in Chefoo a quantity of apparatus for wireless telegraphy. Everything goes to show that there in Tokyo it is now denied that there is any of a French station at Chingwan-tao in communication with Port Arthur. Wireless telegraphy is a kittle thing. It needs only the atmosphere for its transmission and the atmosphere is free to all. Possibly the Russian Consul in Chefoo, if called to task for his performances, might plead that his com-pound is extraterritorial from the point of view of Chinese jurisdiction, that he is just as free to have some wireless telegraphic apparatus in operations there as he is to brew vodka, since he does not trespass upon anyone's domain. Of course that would be a mere subterfuge. Wireless telegraphy, owing its the extreme novelty, has not yet been brought within the purview of international law, but that it can not properly be used for the purpose of destroying the efficiency of a lawful blockade is beyond all question. Principles, at all events, survive intact whatever perplexing factors human

The difference between the cost of supporting Russian wounded prisoners and the cost of supporting Japanese, is discussed by the Hochi Shimbun. In the case of Japanese wounded, officers and men get exactly the same food; their rooms alone are different, The allowance per head for everything apart from rice is 6.9 sen daily, and if the price of rice be added, the total is about 15 sen. For each wounded Russian soldier, however, the allowance is 25 sen and for each officer 42 sen. Our contemporary supposes that intelligence of this special treatment having reached Kuropatkin, led to the issue of his recent order that Japanese prisoners should be kindly used. Writing on the same sub-Wednesday, June 15. be kindly used. Writing on the same sub-Shanghai sends sensational telegrams ject the *Jiji Shimpo* observes that the con-suggesting that the British squadron is duct of the Russians throughout this war be about to pay a visit to Wei-hai-wei for imines in the world's fair-ways, the murder the purpose of meeting Admiral Noel, and of wounded men, the mutilation of prisoners the Alacrity will be sent to meet the Minister. The whole thing is so vague that we can not gather any definite idea, unless the burial extended to the Japanese dead at Great Britain contemplates taking some strong action in support of her protest about contraband of war.

The Japanese in Shanghai, especially the Japanese in Shanghai, especially the adverted for the respect paid by Japan to those that perished in the Varyag and the Korietz. If the Russians are now about to adopt different caroous of conduct about to adopt different canons of conduct,

addressed to Russian prisoners to pass through the post free of charge, and farther remit customs duties on articles coming oversea to a similar destination. There is also in Tokyo an office called the Furyo Jöhö Kyoku (prisoners intelligence bureau) which immediately answers all letters, questions or telegrams relating to the prisoners, and which sends, once in every ten days, a detailed report to the Legation of France, showing can scarcely think of running the blockade the names and condition of the officers and men. Various articles and sums of money have already been received from Russia and handed to the prisoners, and special mention is made of a sum of over 500 yen which came through the German Minister to an is reality in the rumours recently circulated officer of German origin who was wounded and taken prisoner near Fenghwang.

THE CASE OF MR. COWEN.

Mr. John Cowen writes again from Tientsin repeating his allegation that a note which appeared in our columns at the time when the acting judge of the British Con-sular Court at Tientsin ordered his deportation contained a suggestion that he had committed some crime other than the writing of the articles in question, and therefore we ought in justice to him to fully and expli-citly withdraw it. We certainly had no intention of making any such suggestion and cannot see that anyone could read it into our words, but if the paragraph did convey any such sinister meaning and thus unintentionally wronged an innocent man we are only too pleased to withdraw it altogether. Sir Hiram Wilkinson, the Chief Justice of the British Supreme Court at Shanghai, has reviewed the whole case at great length and revised the order of the Tientsin Court by quashing it, and we regret that limitations of space prevent us from giving the judgment in our columns. Sir Hiram Wilkinson, who It is stated that China has appointed a Viceroy and Assistant-Viceroy of Liaotung China, pays a compliment to the general high level maintained by British journalism in the Far East, which we think our readers will pardon us for reproducing.

"I am impressed very strongly with what I believe to be a fact, that this the first time since the Order was made in which the provisions of the first part of Article 106 have been applied to the conduct of any journalist in China or Japan in respect of anything written by him as a journalist. My recollection goes back to the making of the Order, and I can remember the Case where proceedings then as the present back to the making of the Order, and I can remember no case where proceedings such as the present have been instituted, and I wish to say, to the credit of British journalism in the Far East, I can remember no case in China or Japan where they were necessary. British journalism here has had the faults as well as the merits of journalism at home, and in its criticism of peoples, institutions and authorities it has sometimes gone beyond what those who are concerned in maintaining friendly relations with the Governments and peoples of these countries and with the authorities and subjects of other Treaty Powers would like to see. But I think it will be conceded that the standard it has maintained is one it may under all the circumstances well be proud of. It has not often condescended to language such as forms the subject of complaint in the present case, and if in rare cases it has done so, the circumstances have not called for drastic action."

SOME ASPECTS OF THE ANGLO-FRENCH TREATY.

Mr. E. Dicey, C.B., in the Fortnightly, considers the new Anglo-French treaty mainly in its bearing on Egypt. At the outset he remarks that all who hold that a war between England and France would be one of the greatest of calamities "will feel grateful for the courage and the foresight of

into armed co-operation with Russia." In means spent its force when the announce-Mr. Dicey's view, the one paramount advantage which England obtains from the always rises to emergencies, came to Paris, settlement is "the acknowledgment on the where he saw, and conquered." part of France that Egypt belongs henceforth to the British sphere of influence." Only those who have followed the history of the question from Ismail Pasha's time can fully understand what this means. Britain's mistakes in Egyptian policy had been such as to render her retention of the country a logical if not a practical impossibility.

logical if not a practical impossibility.

Mr. Gladstone commenced the comedy of errors by going out of his way to pledge our good faith to the assertion that our occupation would only be of a provisional and temporary character, and that our troops would be withdrawn is soon as order was re-established in Egypt. Fairness forces me to add, that this desire to preclude, if possible, the establishment of a British Protectorate over Egypt was not confined to the Liberal Party: it was shared certainly by Lord Iddesleigh, and I believe to a very late period by Lord Salisbury himself. Our Ministers at home clung with a tenacity worthy of a better cause to the delusion that Egypt, under British supervision and control, would rapidly become imbued with Western ideas of honesty, justice, integrity, and constitutional government, so as to render the native government capable, after the withdrawal of our troops, of carrying on the institutions established by Great Britain. On the faith of this misconception of Oriental character our Government committed itself, time after time, to statements declaring that the reorganisation of Event was on the eye of completime after time, to statements declaring that the reorganisation of Egypt was on the eve of completion, and that our occupation was rapidly approaching its end.

An authoritative article on the bearing of the agreement on Morocco is contributed by Mr. Walter B. Harris to the National Review. The interests of France in Morocco, says Mr. Harris, are incomparably greater than our own. "We have a considerable trade with the coast towns of the Atlantic, and the neutrality of the Straits of Gibraltar is of great importance to us; and so long as these are guaranteed, there is no need for more." But Morocco forms for France an extension of her great possession in North Africa, and she has hundreds of miles of frontier to protect. Declining to discuss the question of equivalents for English concessions, Mr. Harris declares that a long residence in Morocco, and a careful study of its political and geographical position, have con-vinced him that the agreement has brought about the only possible solution, and that "our sole interests in the country—the open passage of the Straits of Gibraltar and the protection of our commerce-have been sufficiently and satisfactorily guaranteed." He even foresees an increase in British trade in the near future, just as France's trade in Egypt has increased since our occupation, for in both cases equivalent facilities are secured.

The National Review calls the treaty "The Emancipation of England." It "consum-German yoke, which commenced last year, or two small hills being met with. Several and we venture to say it affords a complete streams, only one of which—the Sainam vindication of those who, in season and when once other Powers saw that England was no longer the satellite of Germany, our two small hills being met with. Several River—being of any great width, are encountered in the course of the journey, and no difficulty was met with in bridging them. The track almost throughout its entire length is above the level of the surrounding country, and running parallel to the track is sequent remarks, the editor of the National mates the emancipation of England from the doing business with them." In some sub-country, and running parallel to the track is sequent remarks, the editor of the *National* a ditch, excavated by the railway contracobserves:—"We have no hesitation in say-tors, for the purpose of securing ballast for ing, as careful students of this question, that Edward in paying his respects to France last which cover the country side, enabling the spring, we should not now be celebrating Chinese farmers to conserve a greater quanan Anglo-French understanding. THE CANTON-SAMSHUL RAILWAY.

The opening of the Fatshan-Samshui section of the Canton-Samshui railway on June 1st was the occasion of some speech-making

He said it had been left to H. E. Governor Chang. He said it had been left to H. E. Governor Chang, representing the Tartar General and the Viceroy, to declare the road formally opened. The men who were responsible for the building of the railway deserved more than a measure of credit for the work they had completed. But although the Americans had come to China to help China, they had also come to benefit themselves. It was unnecessary for him to dilate upon the benefits which would accrue from the building of the railway, but he was sorry to say that it seemed to him that the people of Hongkong were not of the opinion that railways were beneficial. [A Voice—Don't mention Mongkong: It's British!]—The railway just completed by the Americans would be advantageous to every merchant in Hongkong within his rights, and when he said within his rights he did not mean to those men who joined in with the Chinese to defraud the country of its proper revenue, but he meant the men, like himself, who meant business and meant that the country should be thoroughly and properly represented by honest and true men. He was ready, he said, speaking advisedly, to accept the responsibility of building the railway from Canton to Kowloon. If the building of the railway from Macao to Canton was turned over to the Americans, by the eternal thunder, they would build it. A Voice—You bet we will! I Cossul Mec. the railway from Macao to Canton was turned over to the Americans, by the eternal thunder, they would build it. [A Voice—You bet we will!] Consul McWade, continued, that they would build it and turn it over to the people who gave them the contract free of charge. They had shown by this railway what they could do, and if they were judged by past experience, then, as business men, they would be depended upon as men who would and did stand by their word.

Our Hongkong contemporary says that the line just opened does not reach Samshui, but stops short about two miles from the town. The delay in this section was occasioned by the repeated subsidence of the soil, owing to the heavy rains experienced of late in that district. With the return of the dry weather, however, a foundation will be secured on which ballast to maintain the weight of the train will be placed. All along the route of the line the same difficulty was met with, the soft spongy soil of the flat country through which the line passes not lending itself to the formation of a firm track. After repeated sinkings, however, the land settled, and, as far as the line goes, a per-manent way has now been built, from which no danger of subsidence is feared. The total length of the line, when completed, will be 30 miles 950 yards, or roughly speaking 30½ miles, and of this distance almost the whole is level country, but one without the courageous initiative of King forms a valuable adjunct to the paddy-fields

The Asahi says that the steamer Owari Maru

.RAILWAYS IN CHINA.

After experiencing many vicissitudes at After experiencing many vicissitudes at the hands of military administrators of various nationalities, the Imperial railways of North China, says Engineering, reverted to their original owners in the course of 1902; and, having since then repaired damages and been thoroughly reorganised, are paying handsomely. While the lines were still under military control, the Peking terminus was brought up to the main gate at luncheon which followed the ceremony.

Mr. Robert W. McWade, Consul-General for the United States at Canton, seemed to have been in excellent form, if we may judge from the report in the China Mail. We Legation-street. A branch line was built from Debing to Tungchow, Legation away the Peking to Tungchow, 14 miles away, the head of navigation on the Pei-ho, and the former port of Peking, whither in the old days all tribute rice was brought. This rice travels now almost exclusively by rail from the sea direct. The earnings of this branch have not come up to expectation. It may ere long, however, be carried along the base of the triangle to Ku-yeh, and bring the capital into even more direct touch with the coast. On the return of the Court to Peking after the Boxer troubles, a line 251/2 miles long was built from Kao-pei-tien, on the Peking-Hankow line, to the Western Tombs, so that now his Majesty can perform his sacrificial rites there with the minimum of inconvenience and loss of time. The much-discussed extension from Honpangtzu—56 miles west of Newchwang—to Hsimmin T'un is now an accomplished fact, and the traffic thereon is said to be large and remunerative. It is 99½ miles in length, but it is unlikely that it will be carried to the traffic thereon is said to be large and remunerative. It is 99½ miles in length, but it is unlikely that it will be carried to the total the traffic that he it to present outputs. The total farther by its present owners. The total mileage of the Imperial railways of North China is, continues Engineering, thus brought up to 580 miles, and there are projected extensions of the system by building a chord line from Tientsin to Paoting, and from Feng-t'ai, via the Nanku Pass to Kalgan— 100 and 115 miles long respectively. Kalgan is just outside the Great Wall on the confines of Mongolia, the latter would bring Tientsin so much nearer to its sources of wool supply, and in the interests of trade expansion its construction ought not to be deferred. In what direction it may then push forward to join the Trans-Siberian trunk line, whether north-westwards via Urga to Verkneudinsk, or due north via Dolonnor to Khailar, remains to be seen. The results of the present war between Japan and Russia will not only settle many political questions, but also many engineering proposals.

THE 25-KNOI CUNARD ATLANIIC LINERS.

The contract has now been definitely arranged and signed for the construction of the two high speed Atlantic liners, for which provision was made in the agreement be-tween the British Government and the Cunard Company, the Government, to put it briefly, practically guaranteeing interest on the money—about 2½ million sterling— required for building the two vessels, on condition that they will be at the disposal of the British Admiralty and other departof the British Admiralty and other departments for merchant cruisers and other maritime service. Very considerable interest has been taken in the negotiations, principally owing to the fact that speed of 25 knots is to be maintained. This, remarks Engineering, involved great size. The dimensions are now fixed at 760 feet of length and 88 feet of beam, so that the disabsement even although no so that the displacement, even although no cargo be carried, will be between 32,000

tons per day. But not alone in size and speed do the vessels mark a great advance: the adoption of the Parsons steam turbine as the prime mover will invest them with two hours' run at 13.058 knots. The flap great interest. It is not necessary to give general particulars of the turbine machinery, but it may here be stated that there will be four shafts, each with one powerful go-ahead turbine, the high-pressure units being on the side shafts, so as to enable the shaft to be as near the shell of the ship as possible, while the low-pressure units will be on the inside shafts. These latter will extend much further aft than the wing shafts, and the propellers will take the place of the ordinary twin screws, with the deadwood of the ship between them cut away. The lines of the ship aft will be specially fine, so that although the wing propellers are well forward from the stern, the blades will not project beyond the vertical line of the hull. We understand that the turbines are being so proportioned as to enable the revolutions to be 140 per minute, so that the propellers will be of sufficient size to ensure efficiency in a heavy Atlantic seaway. The inner shafts will also be fitted with go-astern turbines. Howden's system of draught will be adopted in con-nection with the cylindrical boilers, which will be divided into three separate units, and thus there will be three funnels. It goes without saying that the Cunard Company, with their great experience and desire to please their patrons, will see to it that the vessels are perfect from the habitable, as well as from the mechanical, and structural standpoints. As has been anticipated for some months now, one vessel will be built by Messrs. John Brown and Co., at their Clydebank works, where so many high-speed vessels have been created, and the other by Messrs. Swan and Hunter, the machinery for the latter being by the Wallsend Slipway and Engineering Company, also on the Tyne.

NOTES ON CURRENT EVENTS.

Some interesting experiments have been carried out at the mouth of the Thames with H.M.S. Widgeon, a shallow-draught twinscrew gunboat, recently built by Messrs. Yarrow and Co. to the order of the Admiralty for use in Chinese waters. The vessel is similar in general design to the *Teal* and Moorhen—two gunboats built by the same firm for the British Admiralty. The Widgeon, however, is fitted with the flap arrangement for tunnel screw-boats, and it was with this device that the principal interest of the trials rested. By the hinged flap provision is made for maintaining the efficiency of screws working in tunnels at various draughts of water. With the ordinary original arrangement the tunnel has to the sum of yen 1,000. be made all round so that its edges will dip below the surface of the water, so as to keep the tunnel full of water and the pro-peller fully immersed in the way explained First, Third and Fourth Divisions which in our former issue. This naturally puts a were engaged at Nanshan. She had also considerable drag on the vessel by reason of the screw-race impinging against the after-part of the tunnel. In the new arrange-The fiji Shimpo's correspondent visited these

of ten hours without a stop. A run of six hours was first made, the speed being 11.030 knots, and was immediately followed by a was then lowered, and a one hour's run was made, all conditions in other respects-such as steam pressure, &c.—remaining the same, and the speed came out at 12.218 knots. It will be seen, therefore, that the flap arrangement gave an increased speed of 0.84 knot, with the vessel at load draught. The Widgeon is 160 ft. long and 24 ft. 6 in. wide, the depth of hull being 6 ft. She carries two 6-pounder quick-firing guns and four machine guns in an armoured battery similar to that of H.M.S. *Teal*.

A small batch of Russian prisoners, 32 in all, have arrived at Moji. This brings the number now in Japan to 580. The same ship brought some guns, waggons and other matters taken at Kiulien.

The trans-Baikal railway had been in use the Russians to remove it. It had cost 250,000 roubles.

The operations for raising the Varyag are said to be proceeding steadily, and it is expected that the vessel will be raised in September. It will have been a long job.

The Japanese speak with much admiration of a Russian officer who had command of the detachment guarding a fort at Deep Bay when the Japanese commenced their mine-clearing operations there-the operations that involved the loss of the Miyako. This officer sat on the rocks carressing the head of a pet dog, and issuing orders to his men with the utmost *sangfroid*. The bursting of a shell in his vicinity did not disturb him in the smallest degree.

The total number of Russian prisoners now in Japan is 546, including 19 officers. Among these 386, including 10 officers, are wounded. Five of the wounded died after being taken into hospital, but there were no officers among them. The rest are all doing well.

Subscriptions to the new domestic loan are coming in rapidly. On the first day the sums offered totalled 93,830,125 p.n. The Imperial Household again figures for 20 millions. If the sums over and above the minimum price (93) be included, the total for the first day is over 99 millions.

We are informed that Messrs. Carl Rohde & Co. have, on behalf of Farbenfabriken vorm. Friedr Bayer & Co., Elberfeld, the well known German factory of Aniline Colours, paid to the Japan Red Cross Society

The Aki Maru arrived at Ujina on the was one Captain and one Sergeant-Major. the earth, where water is constantly present

tons and 33,000 tons when the vessel leaves draught of a ft. 8 in., and on the earlier trials have been very successful. The wounded Liverpool. To get the speed, between the flap was raised. On the third and last trial Russian soldiers seemed to be on the 66,000 and 70,000 horse-power will require to be developed, and a measure of the cost of the engine power is afforded by the fact that the coal consumption will exceed 1,000 the flat altogether extended over a period that the coal consumption will exceed 1,000 the flat altogether extended over a period for the boars without a store. A run of sty write write.

> The construction of ■ railway to the summit of Mont Blanc has for several years been under consideration in France, and a proposal has recently been put forward by M. Duportal, a former General-Inspector of the Ponts et Chaussees, to build a line running mostly in the open, in order to increase its attractiveness. The line, says Traction and Transmission, would start from the neighbourhood of St. Gervais, and would reach the Bosses du Dromadaire, viâ the Col de Voza and the Aiguille du Goûter. From the Col de Voza a view of the Chamonix valley would be obtained. The line would be on the southern slope, from which the snow, as a rule, disappears more rapidly; and its construction would be facilitated by the narrow roadway which now gives access to the Bionnasset hamlet, at an altitude of 4,343ft. Further on, and as far as the Tête Rousse, at an altitude of 10,384ft., there is a pathway which would just 4 weeks, according to l Avenur de Ton- be found very serviceable during construc-quin, when the breaking up of the ice enabled tion. In the first place, a concession is to be obtained for the portion of the line, 11.5 miles in length, to the Aiguille du Goûter, at an altitude of 12,533ft; together with a provisional concession for the extension of the line to the summit; the route to be followed by this extension has not yet been agreed upon.

> > Operations are to be commenced immediately at the site of the new smokeless coal factory, the acquisition of which by the Government was announced some time ago in these columns. The place is Tokuyama, in Nagato. A space of 17½ acres has been presented on the sea coast, free of charge, by the people, but apparently this land has to be still reclaimed. The total cost of the factory is put at 1,1000,000 yeu. The mine cost 250,000 yen, and a railway to connect the place with the Sanyo line—a distance of 10 miles—has to be built.

> > The many friends of Dr. Seymour will be glad to hear that having finished the business which took him to England, he has decided to again take up his residence in this country, and has accepted the post of English teacher at the Fourth High School (Kanazawa), He is expected in Yokohama early in August.

In a paper read before the American Philosophical Society, reported in *Nature*, Mr. Percival Lowell discusses the 375 drawings of the Martian surface made by him during the opposition of 1903. Having plotted the values allotted to the "visibility" of 85 canals, at different periods, with regard to the time of their minima visibilities after the Martian summer solstice, he found that these minima appeared in regular sequence from the North Pole towards the equator. Mr. Lowell believes that the canals are strips of vegetation dependent for their growth—and therefore for their visibility—upon the simultaneous presence of sunlight and water, and he points out that on a planet, such as part of the funnel. In the new arrangement the flap forms the after part of the tunnel, and at deeper draughts than extreme light draught this flap can be raised so as to just touch the water. At the recent trial the versel was brought to her full-load visitor but the effort does not appear to cludes, from his curves, that there is no all over the surface, the appearance of vegeconstant supply of moisture on the surface of Mars, and, therefore, although the sun hama anchorage, may have reached the summer solstice, it is mention, are print not until the snowcap melts and looses the water supply that the vegetation appears. Further, his curves indicate that when loosed the water moves southward at a remarkably steady rate of 53 miles per day, and, as the figure of the planet is shown by its spheroidity to be in a state of fluid equilibrium, he contends that the water must of necessity be conveyed southwards by artificial means.

The Palma Trophy which has been returned to England by the American National Rifle Association owing to the American team last year violating the rules, is a handsome piece of plate offered to teams representing the various armies of the world. The conditions are that the teams shall use in the competition the rifles used by the regular arm of their respective armies. Thus the Americans should have used the Krag-Jorgensen rifle, the weapon with which the national troops of the United States are armed. The Palma Trophy was shot for last July at Bisley at the annual meeting of the British National Rifle Association, the trophy being then in the hands of the English representative team. The shooting was of a very high character, the winning team, the American, making 1570 points, or more than had ever previously been record-The English team came next with 1555. The other teams competing included representatives from the armies of Canada, Australia, Natal, Norway and France.

It is stated that the French Consul at Nagasaki has intimated to the Japanese Authorities that the Russian Government desire to place its naval hospital in Nagasaki at the disposal of the Red Cross Society. Probably this gracious offer will be accepted. Nagasaki would be a good place for the Russian wounded now in Japanese hands. They would probably feel more at home there than in any other part of Japan, and of Co-operating Christian Missions in Japan: it may further be assumed that the Hospital is specially fitted for the accommodation of

General Yamaguchi, who commanded the

The Japanese Consul at Singapore reports, under date of May 21st, that the following places are declared plague-infected : Swatow, Amoy, Hongkong, and Canton.

We have received from Mr. Tanetaro Megata, Director of the Customs Maritime We cannot commend too highly the very praise-lama harbour plan showing the depth of their time and strength, both among the Trustees water below lowest water level of ordinary and its able Faculty, towards making the Tokyo spring tides all over the harbour. The School for Foreign Children the success that it is. spring tides all over the harbour. The chart is an excellent piece of work and

cal men using or frequenting the Yoko-hama anchorage. The soundings, we might mention, are printed in English as well as in Japanese characters and were all taken in the first four months of this year, and since Mr. Megata assumed control of affairs in the port. It speaks well for his well-directed industry.

Up to the evening of the 14th instant the subscriptions to the new domestic loan aggregated 170,371,223 yen. The 16th is the last day, and as there is always a rush at the end it is anticipated that the required amount, 100 million yen, will be covered three times over.

An Imperial Ordinance has been issued authorizing the payment of military rewards and gratuities with bonds instead of coin. This has always been the custom of late years in Japan, and it may be said to have been bequeathed from old times when the approval of the Government took the form of allowances of rice.

From Moji comes news that a steamer called the Taisan has arrived there carrying 150 Chinese students. She reports that the British Squadron is making some kind of demonstration, and that the Japanese residents of Shanghai are looking confidently for news of the fall of Port Arthur.

London sends a rumour that General Stoessel has been wounded and that it has been found necessary to amputate one of his

TOKYO SCHOOL FOR FOREIGN CHILDREN.

At the annual meeting of the Standing Committee of Co-operating Christian Missions held in January last a committee was appointed to visit and report on the school for foreign children now carried on in Tsukiji, Tokyo, under honorary principalship of Mrs. B. C. Haworth. The following is the report of this committee to the Standing Committee

The undersigned, your Committee appointed "to visit the Tokyo School for Foreign Children, examine its course of study and its general work "take pleasure in reporting as follows:

stating that the British Red Cross Society had decided to make a grant of £2,000 to the Japanese sick and wounded; the amount was transmitted the same day by telegraph. After consultation with the Authorities, it has been decided to present half of the above amount to the Juppeibu in the Ministry of War and half to the same section in the Ministry of Marine.

From the 10th instant the new Japanese bonds were placed on the New York market. The opening price was 93½ and the closing.

The chief needs of the school, as we observed them, are a permanent building of its own, increased boarding facilities for children from a distance, and one or two more salaried teachers, who will be able to devote all their time to the work of the institution. We are satisfied that the Trustees fully recognise the urgency of these needs and are glad to know that they are seeking to provide for them.

ing Committee and particularly to the various missions and boards which we individually represent. W. E. Towson. JOHN L. DEARING. A. D. HAIL.

THE BOOKSHELF.

A recent number of Harper's Magazine was made notable by the presence in it of a paper on "Hamlet," from the pen of Mr. Theodore Watts-Dunton. Whatever the subject on which he discourses, Mr. Watts-Dunton always writes freshly, and with a wealth of suggestive generalisation, which is his distinctive "note" as a critic. He has, nistinctive "note" as a critic. He has, moreover, a shrewd common-sense, which refuses to be blinded by the sentimentalities of the ordinary Shakespeare-idolator. Speaking of the attempt to evolve "a spiritual order" for Shakespeare's dramas, he asks— " Does any one really think that such a man wrote plays to bring out his thoughts and emotions as they arose?'

"The more we study any one of his plays with the others the more clearly shall we see that Shake-speare, as soon as the chance came to him, harnessed his genius to business—harnessed it far too thoroughly to dream of producing plays for the purpose of expressing that great inner life of his which circumstances and temperament had been building up. To the really great writer Life is far greater than Litera-ture. As "the Poet" in "Timon of Athens" says most profoundly,

Our poesy is as a gum, which oozes
From whence 'tis nourish'd: The fire i' the flint
Shows not, till it be struck.

When the Globe Theatre demanded it, Shakespeare could throw into the market more of this precious "gum" than all his contemporary dramatists—more than has been produced by the combined efforts of all the poets that have lived since."

Of "Hamlet" itself, Mr. Watts-Dunton remarks:-" Such a favourite was this play with Shakespeare that he seems to have kept a sort of 'Hamlet' note-book, full of 'Hamlet' thoughts, of which 'To be or not to be 'may perhaps be taken as the type. These he seems to have crammed into 'Hamlet' as far as he could, and then to have tossed the others into other plays, tragedies, commedies, and histories, sometimes regardless, apparently, of the character who uttered them." Surely, adds Mr. Watts-Dunton, it was from the "Hamlet" General Yamaguchi, who commanded the Japanese forces in the war of 1900, is dangerously ill.

On the eighth of June the British Minister in Tokyo received a telegram from London stating that the British Red Cross Society had factory work and that it is worthy of the fullest constaining the printed course of study, we are satisfied that the school is meeting a long felt wart, that it is prepared to do substantial and satisfactory work and that it is worthy of the fullest constaining the printed course of study, we are satisfied that the school is meeting a long felt wart, that it is prepared to do substantial and satisfactory work and that it is worthy of the fullest constaining the printed course of study, who never could have had factory work and that it is worthy of the fullest constaining the printed course of study. note-book are most in evidence.'

> From the College of Science of the Imperial University of Tokyo we have received four seperate articles forming parts of Vol. XIX. of the excellent Journal issued from this institution. The first one deals with Notes on Chimæra and describes two Japanese species of this fish of which, despite the largeness of the group, very little is known. The Chi-mæra Phantasma, described by Mr. Bashford Dean, was found in the neighbourhood of Misaki, Sagami, where he had an opportunity of examining living specimens. The second fish of the same family, described in the brochure, is the Chimæra Mitsukuri, also caught at Misaki, and very rare. A capital plate illustrating both fish and their eggcases accompanies the article.

The second article before us, also by Mr. Bashford Dean, describes the long snouted Chimæreco of Japan, the Rhimelnimæra (Harriotia) Pacifica, a very ugly looking inhabitant of the waters outside Tokyo Bay. There are seven specimens of this fish to be chart is an excellent piece of work and should be in great demand among all nauti- the school to the helpful consideration of the Stand- seen in various parts of the world; three are

York, the Funk and Wagnalls Company.

To one who dabbled in the literature of Spiritualism some dozen years, hoping, poor human atom, to find therein some clue to the perplexing mysteries of life—only, alas! to meet with nothing but the Dead Sea apples of vexation and disappointment—to take up this book just issued by the pubrenew acquaintance with old friends. They are all here, the Rev. Stainton Moses, the mediums Home and Slade, Kate Irving John Brown, Mollie Fancher, Mrs. Tuttle; the "spirit controls" of the seances; the "Katie King" of Sir William Crookes with her rich authors. "Katie King" of Sir William Crookes, with her rich auburn tresses, one of which she allowed the Professor to cut from her head, spirit though she was (or is); Mrs. Piper; Dr. Minot Savage, etc., etc.; and so are the well-known phenomena; and all their tales are told in the self-same language of overemphasis and nervous intensity. Like every book on a similar subject, "The Widow's Mite and other Psychic Phenomena" is very prolix and it requires no small amount of will-power to read it through from cover to cover. When will writers on Spiritualism and Psychic Phenomena learn to compress their too abundant flow of words and reduce their statements to more moderate dimensions? Quite half of the present volume could have been left out with advantage and Dr. Funk's case would have undoubtedly gained rather than lost if it had occupied fewer pages in the telling.

The reason for the writing of the book was the extraordinary manner in which an ancient Hebrew coin lent to Dr. Funk many years ago for the purpose of illustrating the well-known Standard Dictionary, was restored to the son of the original owner. Dr. Funk had had an illustration made from the coin and then thought he returned it to the owner, as the coin was both rare and valuable. Instead, the coin was put in an envelope along with another and placed in a safe in the counting house of the Funk and Wagnalls Company. There it lay for years entirely forgotten. One day Dr. Funk, who was investigating spiritual-ism, attended a scance and a "spirit-control" informed him that the spirit of the late Henry Ward Beecher greatly desired that Funk should return the coin-the following :-Widow's Mite—to its proper owners. At a subsequent seance the spirit of Beecher said the coin was lying in the drawer of a safe under t

evidence of the presence of spirit intelligences at work." see how many people may find in them sure

The book concludes with some pages in which are given the peculiar phenomena of spirit-chirography, and some espe-cially interesting spirit photographs, which are here printed for the first time. These are most uncanny and we should not advise a nervous or highly-strung person taking up the book after dark if alone in a silent house, when he or she may have can be little doubt that there is a large and growing class, particularly in the United States, who view Spiritualism as the new gospel of life and to them the arguments advanced by such a commanding intellect as the late Frederic Myers will appeal with telling force. He undoubtedly believed in the psychic phenomena which he saw and investigated. But all the same we think would be better for the cause of the Spiritualists were they to boldly abandon the paraphernalia and mummery of cabinets, boldly on their phenomena. boldly on their phenomena. Then it they have anything to tell the world that will conduce to the world's healing, it will be gratefully received. Those who work in the dark must not expect credence for their tales, be their experiences ever so real and convincing to themselves.

Dr. Funk submitted the case of the Widow's Mite to many eminent scientists and professors in various Universities and he prints their replies in an appendix to his book. Among other letters we find the

explanation.

It seems to me that the only possible explanation of the facts is the hypothesis of spirit communication. My conception of a spirit may differ a little from many others, but I find it not necessary to state it here in full. The existence of spirit forces, not necessarily of spirit individuals, will be enough for the explanation.

With this quotation we leave the "Widow's Mite.'

We beg to acknowledge receipt of the Handbook of Information for Shippers and Passengers by the steamers of the Nippon Yusen Kaisha." The book has been brought right up to date and in addition to a brief history of the big steamship company, contains a vast amount of detail concerning its European, Australian, American, Bombay, Shanghai and coastal services, with in-teresting notes on all the ports called at, famous places in the vicinity of ports of call, the environs of Tokyo, Nikko, etc., and miscellaneous information for passengers. book, which runs to over 300 pages, is freely illustrated and contains several excellent maps. It is altogether a production worthy of the Company.

The Middle Eastern Question, by VALENTINE CHIROL, ; London, John Murray; Price 18/ net.

MR. Chirol's illuminating work about the Far-Eastern Question raised him at once to the position of the leading authority on one important section of Oriental politics and he has now strengthened and confirmed his high reputation by the publication of another exhaustive volume dealing with a not less momentous phase of the same problem. It would be difficult to over-estimate the benefit that publicists like Lord Curzon and Mr. Chirol confer on the British Empire by their writings. The march of great events is very slow. Generally the preliminary stages escape observation altogether, and thus when the crisis comes catastrophes are involved which a little prevision might have averted. Mr. Chirol is among the very few that exercise this prevision. possesses the rarely combined faculties of mastering details and at the same time apprehending broad issues. Lord Curzon is a man of similar gifts, and by the clear, forceful and attractive writings of these two able politicians and *literateurs* England's eyes have been opened to many things which, though they concern her vitally, might otherwise have escaped her attention until the time opportune for noting them had passed irrevocably. Mr. Chirol may be said to have taken for the text of this profoundly interesting work some words used by Lord Curzon in his speech concluding the Budget debate in darkened rooms, sealed slates, table-rapping, in his speech concluding the Budget debate in etc., and allow the light of day to shine boldly on their phenomena. Then if 1900). "Europe," said the Viceroy, "has woke up and is beginning to take a revived interest in Asia. Russia with her vast territories, her great ambitions, and her unarrested advance, has been the pioneer in this movement, and with her or after her have come her competitors, rivals and allies. Thus, as all these foreigners arrive upon the scene and push forward into the vacant spots, we are slowly having a European situation recreated in Asia with the same figures upon the stage. The great European Powers are also becoming the great Asiatic Powers. * * * Europe is so accurately parcelled

a thread, and the slightest disturbance of it at England's expense, as it is most undoubt-would imperil such wide interests, that short edly doing, and will continue to do unless of some serious and unforeseen convulsion, Mr. Chirol's warnings be heeded. "Let which every one would wish to avert, great changes are not to be anticipated there. Africa is rapidly being over-run by the few European Powers who have obtained a foothold upon that continent, and before long its political destinies and territorial grouping will have taken something like definite shape. But in Asia a great deal is still in flux and solution, and there must, and there will, be great changes." This is only another way of saying that in Europe and Africa the civilized nations of the West no longer find any safe arena for the exercise of their elementary passions, that they have consequently turned towards Asia, where the field is large and the opportunities are still many. In the forefront of this field stand to-day Russia, Germany, France and England, with America in the middle distance while in a background growing always more remote are grouped the rightful owners. Nothing can be of more vital interest than to trace the lines along which these great Powers are pursuing their interests, and to determine whether the lines are parallel, divergent or convergent; whether, in other words, the exercise of European activities is to develop peacefully or to produce collisions. Such is the question which Mr. Chirol in this volume undertakes to answer with regard mainly to the Persian section of the field, and in a less elaborate though not less convincing degree peace seemed some years ago to lie in the to Afghanistan, Tibet and India. At the direction of a full adjustment of differences time when he set himself to collect materials for the work, Japan and Russia had Great Britain such as has now been happily not crossed swords. Therefore he makes effected between England and France. But only passing allusion to the rapid rise of to-day Germany is in the arena, and being Japan's power, which he counts a distinct only on the threshold of a career of aggrangain from the British point of view, since disement which she appears determined to the influence of the Far-Eastern State is pursue without many qualms, Germany placed in the conservative end of the scale, might be very hard to draw into any pacific into everything connected with Persia he union. Possibly the terrible war now going makes a close scrutiny, and yet at the same on may throw some light on the situation time his lucid and easy style invests with and as we watch its phases we shall do well interest details which might otherwise be to bear in mind Mr. Chirol's words: wearisome. England's record in Persia is most disheartening. By one device after another British influence and British trade have been supplanted by Russian, and one feels after perusing these chapters of Mr. Chirol's work how true is the old political principle that quiescence means decay. It is very disheartening to read such a story, but to leave it unread, to disregard the lesson it teaches, would be to invite results still more disheartening. Russia and Germany are the growing Powers, and while it is true that the methods they adopt to promote their interests are not always such as we should willingly see our own country adopt, we must remember that precisely the same and even less creditable methods were practised by Great Britain herself at one time, and that human ingenuity has not yet devised any blameless means of self-aggrandisement

Russia be established in Persia by the methods with which she has made us familiar in Manchuria," writes Mr. Chirol in the sequel of an entirely convincing demon-stration, "thus impinging upon the Western frontiers of Afghanistan and Beluchistan, and the flank of the whole position upon which we now rely would be turned and India exposed to attack along a wholly new line of frontier." * * * The development of India is reaching a stage in which, if we have the interests of her people at heart, as we profess to do, we shall have to sanction the application of a larger proportion of her financial resources than has hitherto been the case to the advancement of her agriculture, to the promotion of her industries, to improved methods of education, to administrative reforms, in fact, to all the needs of a community which is rising in the scale of civilization. Is it just at this stage that British statesmen can contemplate with indifference the creation of a new and at least potentially dangerous situation outside her frontiers which would cripple her exchequer and hamper all her progress?" This is the trouble about Russia. Herself a colossal military despotism, her presence imposes upon every neighbour the necessity of choosing between effacement and a crushing burden of armaments. The route to permanent and a complete entente between Russia and

Russian policy in Asia was still professedly govern-Russian policy in Asia was sim professedly govern-ed by the principal solermly laid down in a famous despatch from Count Nesselrode, elicited by the firm-ness of Lord Palmerston in 1838: "Both Great Britain and Russia," wrote Count Nesselrode to the Tsar's Ambassador in London, "must have the same interests at heart—the maintenance of peace in the centre of Asia and the avoidance of anything that might cause a general configuration, in those wast that might cause a general conflagration in those vast regions. To prevent such misfortune the tran-quillity of the intermediate territories which separate the Russian and British possessions must be sedulthe Russian and British possessions must be seculously preserved. To consolidate order in those
countries, to avoid fomenting their jealousies, to
confine rivalry to commercial competition, not to
become involved is a stringgle for political influence,
and above all to respect the independence of the
countries which separate us; that is, in our opinion,
the system which both Governments are equally interested in pursuing in order to avert the possibility of a conflict between two great Powers who, to remain friends, must avoid friction or collision in the heart of Asia,

of thousands of square miles which have been brought under direct subjection to her rule. She bolds the Shah and the Central Government of Persia in the hollow of her hand by the twofold power of the sword and of the purse. In the northern provinces she is supreme in all but name and she makes no secret of her intention to carry her ascendency down to the Persian Gulf and the Indian Ocean. Her frontier marches with that of Afghanistan where the latter is most vulnerable. Further east, in Chinese Turkestan and Mongolia, her power waxes in proportion as that of Peking wanes, and all these outlying dependencies of the Chinese Empire are going the way that Manchuria has already gone. Even Tibet, the Forbidden Land of Buddhiam, shows signs of yielding to her insistence. At her present Even Tibet, the Forbidden Land of Buddhism, shows signs of yielding to her insistence. At her present rate of expansion not many years are likely to elapse before she is in a position to join hands with France, who is pushing up steadily into the interior from her base on the Pacific, not merely up the valley of the Mekong, where she is already conterminous with Upper Burmah, but through Yun-nan into Sze-chuan and on to the puper waters of the Vangities. and on to the upper waters of the Yang-tsze. Ger-many is firmly established in the Shantung peninsula in the Far East, and if she is not actually casting about for another Kiao-chau in the Persian Gulf, she clearly intends to push her influence down to its waters along the track of the Baghdad Railway.

KAMAKURA.

- "A tourist show, a legend told;
 "A rusting bulk of bronze and gold,
 "So much, and scarce so much, ye hold "The meaning of Kamakura?"

Slumberous eyes, yet eyes that know not sleep;

Sensuous lips that know not sensuousness, And sloping shoulders, bent as though to keep

The weight of wrongs-of wrongs without redress.

Time-wearied eyes, yet eyes that may not weep.

Oh thou, so godlike, yet so like to man, Who, with impassive gaze dost ever scan This shady grove, that strip of shadeless deep;

Thou calm onlooker at thy creed's decay: If thou should'st speak is it that thou should'st sav

The men who planned me were a nobler race.

For making me they sought to testify,

By moulding human passions in my face, Weakness controlled is true Divinity.

FUNERAL OF MR. A. B. GLOVER.

The mortal remains of Mr. Alfred B. Glover ere brought back to Japan by the Empress of China. Our Nagasaki contemporary says that on the arrival of the steamer from Hongkong, the body was at once conveyed to the English Church, Higashi-yamate, and there the first portion of the burial service was carried out at 3 p.m., on Tuesday. At the time the services commenced the church was filled with friends, both foreigners and Japanese, among them being the foreign Consuls, Governor Arakawa, and the chief offitised by Great Britain herself at one time, and that human ingenuity has not yet devised any blameless means of self-aggrandisement at the expense of others and in the face of unscrupulous rivalry. It is possible, however, to check aggression and to disappoint unlawful ambition by the use of perfectly legitimate weapons, and Mr. Chirol's book shows that the apathy displayed by the British hone Government is happily not reflected by the Viceregal Administration in India, though, at the same time, so ubiquitous, so resourceful and so untring are the efforts of Russia that to protect British rights and vested whole store that to protect British rights and vested object to Russia's development, but we are object to Russia's development, but we are entitled to wish that it should not take place must be made to Asia."

I main friends, must avoid friction or collision in the least of Asia.

Most excellent principles indeed, but how has librated, but how has carried them out in practice? How can they have accelled with the chages which have already so profoundly altered the whole situation in Asia and rest if proceeding with ever-increasing rapidity? Russia has not only advanced right across the Consults. Musta avoid the wer-increasing rapidity? Russia has not only advanced right across the Consults of England. This over, the coffinent of Asia to the Pacific, and consolidated her dominions by the construction of the gratest trunk railroad in world, but she has moved southward all along the line with gigantic strides. In the west the like the viceregal Administration in India, though, at the same time, so ubiquitous, so resourceful and so untring are the efforts of Russia that to protect British rights and vested of Chi-li. The Central Asian Khanates and the interment took place. At the graveside like the best of the Church of England. This over, and members of the firm of Messrs. Holme, Russia trunking the construction of the gravest trunk railroad in world, but she has moved southward all along the line with gigantic cials of Nagasaki, all desirous of paying the last

MONTHLY SUMMARY OF JAPANESE CUR-RENT LITERATURE.

The June number of the Taiyō contains a rather important article on the views of Mr. Kurino, Japan's Minister at St. Petersburg up to the outbreak of the war. By what is said in this article we judge that the Government deems it expedient for Mr. Kurino not to be ventilating his views too freely just at the present moment, for fear of their damping the ardour of the nation in the prosecution of the war. But Mr. Kurino has already stated to newspaper correspondents and others his opinions on the actual state of Russia, and her prepared-The June number of the Taiyo contains a on the actual state of Russia, and her preparedon the actual state of the war now going on. These opinions are epitomized in the Taiyō pretty much as follows:—Mr. Kurino is represented in some quarters as being pro-Russian, as advocating Russia's cause and so on, because he has made us acquainted with facts which tend to neutralize our optimistic views on the course that events will take in this war. Mr. Kurino says events will take in this war. In Ratino asysthat in Japan the importance of certain disaffection in Poland, Finland and elsewhere is greatly exaggerated. There is no probability that any rising against the Government will assume uncontrollable dimensious. Without arms, without arms, or constitution and with no great of the property assume uncontrollable dimensious. Without arms, without means of organization, and with no great leaders, disaffected subjects scattered over a wide area can do little harm. Russia's financial position is supposed by Japan to be very insecure. But this is the reverse of the truth, says Mr. Kurino. With her large specie reserve kept in London, Paris, Berlin and elsewhere, and as a result of numerous financial precautions taken by Sergius de Witte, Russian stocks do not fall to-day as we might expect them to do, and it is quite safe to say might expect them to do, and it is quite safe to say that Russia can continue this war for two years at least without the necessity of borrowing from another country. We omit the figures bearing on the Russian reserve supplied by Mr. Kurino. the Russian reserve supplied by Mr. Rurino. Thus financially, says Mr. Kurino, Russia is more happily situated than Japan. Just at the present moment it may be wise not to lay much stress on the above-facts, observes the Taiyō. Had Mr. Kurino's comments on the present situation stopped here, the public generally would have attacked little importance to them. But it is alleged that Mr. Kurino has made far more serious statements than those referred to above. He is reported to than those referred to above. He is reported to have said that during the progress of the negotia-tions Russia never intended to go to war; that Witte and Lamsdorff and Alexieff were all in favour of compromise and peace. Such assertions, if they were actually made, are in direct opposition, says the *Taiyo*, to Baron Komura's statement bearing on the course of the negotiations; to the published correspondence between the two countries, and to the definition of the casus belli contained in Japan's Declaration of War. If Mr. Kurino, as is quite possible, has been misinterpreted by newspaper interviewers, then he should at once take steps to rectify the mistake. For as the matter now stands we have the anomaly of one of our public servants championing a view of the cause of the war that is repudiated by the Government and the nation alike. * * *

The Taiyō publishes a long but very instructive article on "The Future of China," written by Mr. Nakahashi Tokugorō. We shall confine ourselves to briefly recording the salient facts marshalled by this writer. The principle maintained throughout the whole essay is that Japan for her own sake, for China's sake, and for various political reasons, must in the future establish the of China under proper guidance the essayist has implicit confidence. Neither physically, intellectually nor morally are the Chinese in a moribund

Power to save China from disintegration, from falling as a victim to the greed of certain Western Powers. Korea has been rescued from the same fate by our interference with her affairs. As our interests in that country are still greater than they are in China, it is necessary that we should establish a Protectorate over the peninsula and take steps to effect a thorough reform of the administration of government. China, having now obtained a protector and a teacher, having been saved from both disintegration and destruction, will certainly address herself to the task of reform. The changes that are needed to task of reform. The changes that are needed to make the country strong and rich may all be included under three headings. (1) Military and Naval Reform. (2) Reform of her Finances. (3) Reform of her Civil Service. (1), In reference to the necessity of China's possessing a thoroughly well equipped and well trained army, since the Chino-Japanese war there has been no difference of opinion among the various viceroys, and at the present time Langese military officers are emissions. the present time Japanese military officers are employed in all the principal provinces of the em-pire. Russia's aggressiveness during the past few years has immensely deepened the desire of the Chinese to qualify themselves to hurl back the Muscovites whenever they may venture to appear on Chinese soil, without direct foreign aid. This supreme object of the Chinese will undoubtedly be The enthusiasm realized through Japan's help. on the subject among young men in China is too great to die out. (2), If China is bent on improving her armaments she will need large sums all praise, according to our notions (Teki ni of money for this purpose. This money can only be alama we sagete kudaru yori wa, mushire jibun obtained by a thorough change in her financial system. In effecting this she cannot do better ga yoi, yukwai de aru to iu kisho de aru kara, than consult us. We have transformed our yohodo kore wa shosubeki koto de aro to omou). than consult us. We have transformed our finances and placed them on a stable basis. With a rich, thickly inhabited country like. China there ought to be no difficulty in finding abundant sources of revenue. (3), But no reform of any kind can take place as long as the administration of Government is left in the hands of a number of corrupt officials. If the weak could conquer the strong by means the money collected in the provinces never finds its way to Peking, no fundamental changes can be made. Government must be centralized to be safe, and if China is to possess big armaments they must be under the control of the throne. To allow the viceroys to institute reforms and carry them through independently would be a dangerous experiment. Mr. Nakabani next considers the changes which this war reforms and carry them through mucperson, would be a dangerous experiment. Mr. Nakathey can't discover adequate causes for mean bashi next considers the changes which this war the causes exist all the same. (4) Knowledge and mind. In the present war the knowledge possessed by the Russians are about bashi next considers the changes which this war will bring about. He does not anticipate that Russia will finally abandon her present Far Eastern policy. Having lost Manchuria and the railway that runs through it; she will connect the Siberian railway with some other line and work her way to the sea by another route. Her eyes will be turned to Mongolia, Turkestan, Persia and Thibet. But in attempting this new enterprise she will certainly run the risk of clashing with England point or other. Our policy in future must be to point or other. Our policy in future must be to at some induce China to throw open her water-ways and her railways to the world as much as possible. This will effectually stop aggressive designs on the part of certain European Powers. What will her own sake, for China's sake, and for various happen after the present war is over will be the political reasons, must in the future establish the closest relations possible with the Chinese nation for tradal and industrial purposes. For some and the Chinese Government. In the potentialities of China under proper guidance the essayist has will each constitute an imperium in imperio. Extra-territoriality may eventually be abolished; but till that time comes there is tually nor morally are the Chinese in a moribund ished; but till that time comes there is state, says this writer. Among the political forecasts which subsequent events falsified, was that settlements will not contribute in the same oft-repeated one referring to the world's dominant degree or in the same way to the safety, consoliraces. There are only three great races in the dation and prosperity of the Chinese Empire. modern world, said the wiseacres of the last The task of bringing such a vast region under one century, the Anglo-Saxons, the Slavs and the control in such an effectual manner as to insure century, the Anglo-Saxons, the Slavs and the control in such an effectual manner as to insure tanonu tokoro a uniformity of local government in every province no showithat (1) But first the China-Japan war and recently the Russo-Japan war have tended to show it is not in order to govern effectually it may be necessary of Summary.)

always numbers that tell in the establishment of some years hence for China to give up attempting always numbers that tell in the establishment of national power. The Anglo-Saxon alliance so much talked of shows no signs of coming off; the control such a wide area as that over which she now claims jurisdiction. She may find it to her interest to consolidate her strength in the warmest friend and her guide and Slav predominance is receiving at the present moment a severe check. One fact to which it is important to call attention is this: Japan has during the past 7 or 8 years certainly done more than any other as the beginning of the Twentieth Century shows Power to save China from disintegration, from her interest to consolidate her strength in the centre of the empire, where the population is thickest, and relax her hold somewhat on distant provinces; allowing local autonomy there as far as possible. But one thing is certain, namely, that just as the beginning of the Twentieth Century shows Japan establishing an entirely new relationship to Korea, so the end of this century will see Japan connected with China by many indissoluble ties. The essayist we are quoting concludes his article by treating under separate headings the connection of Russia, Germany, England, France, America and Japan with China and reaches the conclusion that if Japan plays her cards well no other Power stands a chance of her cards well no other Power stands a chance of ousting her from the position of chief adviser to the Peking Government and of figuring as the stoutest defender of the integrity of the Chinese

> Under the title Jikyoku Zakkan Sūsoku Dr. Katō Hiroyuki comments on five or six phases of the present crisis. He takes up the following subjects (1) Prayer for Victory. This is practised by the Russian nation at present and has been a common practice in Christian countries for a very long time. It was practised in Japan down to the beginning of the Meiji era. But now it may be said to have been entirely abandoned by the Court, the Government and by the nation as a whole. A few uneducated people are to be found who think that they can protect their rela-tions and friends from the dangers of the battlefield by soliciting the aid of a god or a divinity.
>
> (2) Suicide. In Christian countries suicide is condemned as bad. But in Japan not only is it not condemned, but under certain circumstances it is highly commended. For men to commit suicide rather than yield to the foe is worthy of equal, but when we come to the minds of the troops engaged in fighting, we are in every way superior to the Russians. Their troops have neither the will nor the intelligence of our men. Admiral Makaroff is reported to have said that the issue of this war depends more on the personality of the two armies than on tactics or weapons, and the truth is being proved every day. Because of this Russia can't eventually conquer us. The rest of the essay we reserve for another occasion.

* * * Last month we extracted from the Jitsugyō no

* The Jiji Shimpo in its issue of May 27th had a * The Jiji Shimbō in its issue of May 27th had a very sensible leading article on this subject, condemning the practice as an anachronism and as calculated to encourage silly supersition. The success of the Japanese army is easily traceable to certain definite causes, and to drag in the word "Heaven", whatever that may mean to explain this success is unscholarly and unphilosophical, says the Jiji. Here are the concluding words of the article: Karisome ni mo gakumon, chishiki aru hilohito ni arite var, Tenyu, Tenyu, un un no gotoki danjile kore wo haiseki shi, mizukara shinzuru tokoro wo shinji, Japanum tahoro wa tanyui, ku (E. P.) nochwen tanomu tokoro wo tanomi, ku-ku (島 4) mokuzen no shoscihai (小 成 收) wo ini kai (介) sezu shite, ōini kokoro wo tsuyō subeki mono nari.—(WRITER

Nihon (Business Japan) some remarks bearing on an account at some future time, concludes the Masatarō and Mr. Kuroda Teiji on the principles the prosperity of Fusan and of the success scored Jitsugyō no Nihon. They are those of Oike which should be observed in instructing pupils in the prosperity of Fusan and of the success scored fitsugyo no Nilon. They by Mr. Hasama Fusataro, the Chief Manager of Chusuke and Fukuda Zöhei. the loi mercantile business in Korea. We cull from the same source a few more interesting facts bearing on the career of this remarkable man. When he began business in Fusan he exercised the strictest economy and his yearly savings were carefully laid by. His Japanese friends thought him stingy and miserly and said there was little use in living if money earned was not to be spent in pleasure, and so on. But his frugality was part of a big scheme. He plainly foresaw that if he could purchase land when it could be had at a ridiculously low figure,* he would eventually be able to wield immense power in the town. By degrees he bought up about a third of the whole settlement. This land is worth to-day some 500,000 yen, and in another 50 years it will certainly be worth quite double that amount. Directly the railway is finished all property in Fusan will go up. The port undoubtedly has a great future before it. One of the principal reasons of Mr. Hasama's great success is the practical knowledge which he ses of every branch of the large export and import business carried on by the firm which he represents. Having given his whole life to examining commodities of various kinds, he is regarded by all good judges as a thorough expert in every line of business to which he has turned his attention. He is throughly up in rice, beans, gold dust, hides and marine products—the chief exports of the firm—and in calicoes, silk, raw cotton, filatures, copper, and porcelain-the chief imports. Though he is a man of little education, his knowledge of business is so accurate and thorough that every specialist who comes to Fusan in search of information applies to him. "But an search of information applies to him. "Our even a monkey falls from the tree now and again." And Mr. Hasama among his many successes had one rather amusing failure. In order to improve if possible the Korean methods of tilling the land, he introduced a number of small farmers from his native province of Kishū. At first they worked well, but feeling they are to be infinitely supposed. well, but feeling themselves to be infinitely superior to the Koreans and affected by the manners of certain low-clars swaggering Japanese in Fusan, they gradually began to put on airs and, instead of sticking to their country farms, were to be seen swelling about Fusan in frock coats' and the like, and so Mr. Hasama's scheme failed. There are two principal reasons for Mr. Hasama's success as a merchant. (1) Unlike so many Japanese who go abroad, from the first he deter-mined to make Korea his home.† The reason have failed is because they have been mere sojourners rather than permanent colonists. It is nearly 30 years since Mr. Hasama settled in Korea. (a) Another reason for his success is his succession. antipathy to all forms of speculation. Koreans are great speculators and hundreds of Japanese who have gone over to that country have been led by the nose by the sharp-witted Koreans and have started all sorts of ill-advised lines of business, ending in many cases in bankruptcy. So great is Mr. Hasama's fear of encouraging speculation that he has always opposed the establishment of a mercantile exchange in Fusan, maintaining that the effect of the adoption of such a measure would be the derangement of the business habits and the injury of the characters of the staid merchants. Another reason for Mr-Hasama's success is his thorough straightforward. ness and reliableness as a business man. He never goes back on his word, but, on the other hand, never makes a promise without deliberation. He is not more than about 45 years of age; tall in stature, much sunburnt, with extremely sharp-looking eyes. By his subordinates he is bighly respected and loved. Though there is no Japanese in Korea to be compared to Hasama, there are two rich houses of which we propose to give

* The expression used to describe the cheapness of land in Fusan is 二東三文, two soku for 3 cash, lii, "two bundles (of sandals) for 3 cash,"—a figure of speech for extreme cheapness.—(Writer OF Summary.)

* * * Under the title "Effects of the War" the Kyōikukai (Educational World) says that while every trade and every industry is affected by the war the educational world suffers in a special manner. The Report of the Education Departmanner. ment for the 30th year of Meiji showed that the total number of Primary School teachers was over 109,000. But now it is stated that over 36,000 teachers have had to relinquish their work on account of the war. All along there has been a complaint that the Primary Schools were poorly manned; so that the state of things now that no less than a third of the total number of men have been taken away may be easily con-jectured. Now that the schools are so poorly manned a system has been devised whereby double work can be got out of the teachers. Afternoon and evening as well as morning classes are held. The technical term applied to this system is Nibu Kyūju (二部數投), Bisection Teaching. In poor districts at the present time resort to this method of economy is said to be impera-tive. The day is divided into two halves and different pupils attend in the morning and afternoon. But the Kyōikukai protests against its being considered anything more than a temporary experiment. The plan has many disadvantages. With the teachers and pupils alike the first hours of the teachers and pupils alike the first hours of the day are certainly usually the best hours, and the result of teaching double time in the case of ordinary Primary School instructors is likely to be slovenly work. The general educational situation at the present time is described by the Kyòikukai as sufficiently unsatisfactory to demand some special action on the part of the Education Department. This organ wishes to know what the Mombusho is going to do. It asks: (x) Is the Department going to content itself with looking. Department going to content itself with looking on while education in numerous towns and villages suffers to a tremendous extent by the exigencies of shelve its responsibility by issuing orders to local officials to take the necessary steps for remedying existing evils? or (3) Is it going to step into the breach itself and do all that it step into the breach itself and do all that it is possible to do to relieve the situation? If the Mombushō adopts the course of letting things go as they will, since there are places where local assemblies because talking of abolishing Normal Schools because they involve an outlay the country cannot afford just at present, the consequences will be serious. By throwing responsibility on the local authorities at the present time the Department can save itself trouble. But this is not a course to be recommended to a Department of

The Kyōikukai next takes up the question of the proposed reform of the Literary College of the Imperial University. Exactly what has been effected we do not gather from the note published on the subject. But this information

will be found in a later part of this Summary.

Under the title Jiji Ōgo (证 新) "Words for the Times" the Kyōikukai publishes from month to the Times "the Kyöikukai publishes from month to month short comments on current events or gives counsel to educationists. Vol III. No. 8, contains a number of these. No. 1, advocates earnestness and serious-mindedness in the performance of duties. No. 2, denounces what we call "putting on side," the assumption of airs. In all things, be natural, appear to be what you are, says the Kyöikukai. No. 3, contains words of comfort for the low rank in society occupied by Primary school teachers, reminding them that straightenschool teachers, reminding them that straighten-ed means shield them from many temptations and save them much boredom from the society of fools. No. 4. asserts that we are about to enter on a stage of educational competition, in which those teachers who have real character and personal force will occupy the first rank.

The Kyōikukai announces the publication of a book entitled Nibu Kyōju. This work contains a number of valuable articles written by such men as The Kyōikukai announces the publication of a book entitled Nibu Kyōju. This work contains a number of valuable articles written by such men as Baron Kikuchi, Mr. Izawa Shūji, Mr. Sawayanagi MARY.)

sections during the fore part and after part of the day. Such subjects as the methods of dividing the hours, the number of hours to be given to the first and second section of scholars are treated in this book. Thismethod of economising educational torce is quite new in this country. The only ques-tion is whether the strength of the Primary School teachers can stand the strain of so many hours work. We presume that their salaries are raised when they take extra work of this kind. The price of the volume explaining the system is 30

sen a copy—for sale at the Kinködö.

In various newspapers and magazines it is maintained that the practice of insisting on school girls being medically examined in a state of nudity is quite unnecessary and ought no longer to be allowed. Some little time ago there was a good deal of excitement over an incident that took place at the Okayama Higher Girls' School. One of the girls asserted that she had been robbed of money in the school, throwing suspicion on her classmates. Whereupon the master in charge ordered the girls to strip before him in order to see whether anybody had the money. This proceeding was denounced by the Jiji Shimpō and other papers as highly improper. It was subsequently discovered that the girl who had caused the commotion had left the missing money at her house. The Kyöiku-kai discusses the whole question of the rights of women and condemns the liberties taken with school girls referred to above.

The Kyōiku Kai criticizes unfavourably the new Text-books issued by the Education Depart-ment in a series of articles; making quotations and calling attention to defects. It is stated that the Department is still continuing the work of compilation and has appointed a Committee to examine and report on the work already accom-

The Teikoku Bungaku has followed the fashion of the rest of the literary world and begun to issue extra numbers. The one that appeared or May 15th contains three prize novelettes. Last October a notice was issued by the Imperial University to the effect that prizes would be given for the three best stories that were written. Some 20 stories were sent in. The first prize was 50 yen, the second, 30 yen and the third 20 yen. The titles and names affixed to the successful novelettes were No. I Kokorotsukushi, by Kaiga Hentetsu.* Hoshi no yo no Koi, by Arai Reisen, and Hakumei (豫 命), by Yoshida Tekishū. Mr. Yoshida is a literary graduate, but the others have no degree. The first of these literary productions covers 70 pages of the Teikokus Bungaku, Kana has been supplied throughout and State. But judging by present indications, says it may be recommended to students of the langthe Kyōikukai, there is not much prospect of the Department's making its power felt at this The second story is called a Romance and is 43 pages in length, while the third covers 51 pages.

> Dr. Inoue Tetsujiro is no longer the head of the Imperial University Literary College. Before he resigned his post he was the means of bringing about a radical change in the system of teaching followed in that college. A statement of the rules now in force will be found in the Official Gazette of March and last. For the sake of indicating the direction which the reform has taken, we make a few extracts from the new regulations issued by the Department of Education bearing issued by the Department of Education bearing on that subject. (t) The subjects studied in this College shall be (a) Philosophy. (b) History. (c) Literature. (2) Subjects will be divided into voluntary subjects and compulsory subjects. The following is a list of the compulsory subjects: General Philosophy. Logic, and Psychology bearing on Cognition. Absolute (III E., Junsei) Philosophy. History of Oriental Philosophy. Chinese Philosophy. Indian Philosophy. Mental Philosophy. Ethics. The Science of Religion. Aesthetics. Education. Sociology. History of

[†] The Japanese for this is "he makes Korea his burial place." Uji ga Chosen wo motte fumbo no chi to shile oru.—(WRITER OF SUMMARY).

Religion. History of Art. History of Education. National History (general). Japanese History. Chinese History. Occidental History. Modern History. Methods of Studying History. The Science of Chronology (Nendaigaku). Archaic Records. Geographical Science. Languages. Literature (Outlines). The Japanese Language. Japanese Literature. Chinese. The following are the chief changes that have been made in the rules of the college. Hitherto students have been divided off into year Hitherto students have been divided off into year classes, and have been required to pass annual examinations in order to join higher classes. The annual examinations have been abolished. The student need only pass one examination prior to graduation and he may go up for that just when he pleases after 3 years' residence, and is allowed to try to pass the graduation examination as many times as he likes within 8 years. Hitherto students have not been free to attend what lectures they please. Their hours of attendance have all been mapped out for them, consisting of 24 hours in the week. According to the new rules students may within certain limits attend what lectures they like. Hitherto students have had to decide on the subjects which they will take up on entering the University and keep to them to the end of the course, graduating in those subjects. But now they are allowed to select any subjects they like in which to graduate any time they place to during their course. duate any subjects they like in which to graduate any time they please during their connection with the College of Literature, and a student may if he wishes graduate in several subjects and thus win a name for himself in various branches of knowledge. According to the new rules students med only attend lectures for 12 hours in the week, the rest of the time is their own to use as they please. It will thus be seen that the principle of the new reform is to leave the student to himself as much as possible. University students are grown up men and it is felt that higher than the bear weeked. that hitherto they have been treated too much as though they were mere boys. In recent years a number of new subjects of investigation have come up, which are treated from time to time by well known lecturers at the Universities. Hitherto very few students have been able to spare time to attend these lectures. The change which has been made will affect lecturers as well as students. Popular lecturers will command large audiences, but their less gifted confrères will often find themselves lecturing to practically empty benches So will the fittest survive and learning be thrown open to competition in the same way as it is now being increasingly thrown open in the most ad-vanced countries of the world. It remains to be seen whether other Colleges connected with the University will adopt a similar course to that now followed by the College of Literature.

In an article on "Education and the War" the Jiji Shimpo maintains that there is a tendency in many quarters to carry economy and retrenchment too far in the matter of education at the present time. The Jiji says that there is no denying that the State at the present moment is unable to do all that it desires to do to supply the educational needs of the country. must be seen through whatever it may cost, and expenditure that can be postponed must be postexpenditure that can be postponed must be post-poned. This is interpreted by some to mean that in the view of the State education is of secondary importance when compared to war. But that is not the view held by intelligent men. So im-portant in their opinion is education that Japan's success in this war has been largely owing to it. The explosive she is using is the invention of one of her scholars. The efficiency of her sailors and soldiers is largely due to the fact that their intelli-gence has been developed by the school instruction gence has been developed by the school instruction they have received. There is no tendency among they have received. There is no tendency among those in power to underrate the importance of education, but in a comparatively poor country like Japan when the country's resources are subjected to a severe strain all manner of shifts and expedients have to be temporarily adopted. One of the proofs of the value attached to education by the State even in time of war is the large sum granted to education out of the indemnity paid by China nine years ago.

The Kinkodo has issued a pamphlet covering about 200 pages entitled Gunkoku no Kyöiku as an extra to the Kyoikukai. Among the writers we observe the names of Dr. Inoue Tetsujirō, Mr. Kano Jigoro and Mr. Izawa Shuji. There are some 20 contributors to this work. It is illustrated throughout, containing about 100 pictures. The title it seems to us is open to objection and the compilers of the work appear to be conscious of this, as in the introduction they have found it necessary to say a great deal in explanation of the sense in which it is to be understood. It may usually be taken for granted that titles which need lengthy explanations are defective. Gunkoku no Kyoiku to most people would mean "Education suitable for a Military Country." But for Japan to figure as such a country before the world permanently would be most damaging to her reputation. So the compiler explains that he only means by the title Senji ni okeru kyōiku no ikanarubeki ka to iu koto nari, that is, the changes in the school system necessitated by the war. But even so, most of the writers, we observe, fail to see the relevance of the title to the actual facts of the present situation, and most of them maintain that nothing could be more undesirable than that a system of education which has been found to work well hitherto should be radically changed on account of the present war. As the book contains some valuable matter we propose to furnish a fuller notice of it in our next Summary. "The Connection of Education with the Present War" would better describe the contents of the volume than "Education for a Military

YOKOHAMA JUNIOR ATHLETIC CLUB.

The Yokohama Junior Athletic Club held their first meeting on the Cricket Ground on Friday afternoon amid ideal conditions: bright sunshine, tempered with a cooling breeze; a large atten-dance of ladies in the brightest of summer raiment; while a keen spirit of sport prevailed throughout. The officers of the day were: Judges, Rev. W. Weston and C. E. Bruce Mitford; Starter, P. B. Clarke; Clerk of the Course, S. W. Argent; Handicappers, H. W. Kilby and C. E. Libeaud; Timekeepers, Rev. W. P. G. Field and J. F. Drummond. Of the sports generally it may be said that they were characterized by all the be said that they were characterized by at the zest that boys can throw into their play; that Drummond's High Jump was a magnificent performance, while the pretty running of Neville mi, was an outstanding feature of the afternoon.

Ober Drummond, jumping from scratch, cleared 5ft. 2in., a phenomenal jump for a lad of his age, 14 years; Bishop cleared 5ft. QUARTER MILE.—1st and 2nd Prizes presented by H. A. Poole, Esq. D. Drummond, scratch
A. Bishop, scratch
C. E. Correa, 10 yards
G. A. Neville, 15 yards
W. Bagnalt, 20 yards...
J. da Costa, 20 yards

The winner did the distance in 58# secs.

SACK RACE.—Prize presented by Messrs. Arthur and Bond. N. FearonV. Worden

[June 18, 1904.
220 YARDS.—1st and 2nd Prizes presented by J. Hamilton, Esq.
A. Bishop, scratch
soon worked through their opponents. Time, 263secs.
THREE LEGGED RACE.—Prizes presented by Jas Walter, Esq.
S. A. Vincent and Gorman
The pairs raced down the track in good style, very little separating the first and second. HALF MILE—1st Prize "Subscription" Cup per J. E.
Drummond, Esq.
D. A. Neville, 50 yards
D. Drummond, scratch
F. Stone, 25 yards
B. Cahusac, 75 yards
This was a capital race and was won by about eight yards. Time 2m. 214s.
LONG JUMP 1st Prize presented by H. J. Sharp, Esq.
D. Drummond, scratch
A. Bishop, scratch
J. P. Mollison, 2 feet
G. H. da Costa, scratch
V. Worden, 2 feet
Drummond's second jump, 17 ft. 7 in., was the best; Bishop covered 16 ft. 3½ in.; and Mollison came third with 12 ft. 6 in.
Com Marco Tolan I by Marco Tana

ONE MILE.—1st Frize presented by Messrs. Lane, Crawford & Co.

F. Stone, 40 yards
P. A. Neville, 75 yards
G. A. Neville, 25 yards
W. Worden, scratch
D. Drummond, scratch

Of the seven starters only three dropped out in the course of the race. The struggle for second place between the Neville brothers was a very game affair, and resulted in favour of the younger by a few feet. Time, 5 m. 23½ seconds.

GIRL'S RACE.

Some twenty gentle madens of tiny stature started over a 75 yards course, and Miss Whil. Correa came in first; closely followed by Miss Doris Fearon; Miss Flossie Eagling, being third. Time, 105 sec.
Tug of War.—Medals presented by V. A. Caesar Hawkins, Esq.

A. Team:—W. Worden, W. Grey, F. Stone, A. Gorman, J. P. Mollison, B. Cahusac, B. Team:—A, Bishop, D. Drummond, S. Vincent, W. Scott, N. Brockhurst and I. Isaacs, C. Team:—G, Upton, G. A. Neville, W. Begnall, V. Worden, D. A. Neville, N. Fearon.

Upton's team won after m good hard pull.

Boy's Race.	
E. Esdale	1
P. Field	2
H. Esdale	3
Obstacle Race. — 1st Prize presented by J. W son Jones, Esq.	
C. Oberlin	I
W. Worden	2
W. Bagnall	3

The winners came in a dirty, be-draggled lot, after the two plunges through the water, the scramble under the net, etc.

The Championship prize, presented by the ladies of Yokohama, was won by Oberlein with 16 points. He received the trophy from the hands of Miss Kenderdine; Mrs. W. P. G. Field presented the other prizes and both ladies received handsome bouquets from the lads.

A short session of the Yokohama Christian Blind School is to be held in the Chapel of the Bible Training School, 221 Bluff, on Saturday, June 18, beginning at two o'clock. The purpose is to show the work done by the students, and their methods, to those who may be interested. Refreshments will be served at the close; and a few articles offered for sale, the proceeds to go to the blind and poor. the blind and poor.

reading rooms, and the dining saloon with ample accommodation for the company on board. The saloon companion-way leads to the cabins on the lower deck which, like the sections mentioned, are plainly but comfortably fitted up. The Japanese while laid up at Nagasaki for repairs)

Manshu is under the control of Captain Takara.

Turnoicaki as we came absem of the strip to the shores where she had been intended by her former masters to play a very much different part. The weather look-ed anything but satisfying to some of the passengers as the ship swung past Kannonaski and began to curtisely to the swells that ran in from the ocean, and even the message signalled from Turnoicaki as we came absem of the station. reading rooms, and the dining saloon with ample stage of her notable cruise with her arrival in Kobe at 7 p.m. on June 13th, having occupied Matsumura, Surgeon Yabe, and Paymaster Utsuno-of this as the least interesting part of the voyage because it is over a course, which, being marely and Color of the Imperial Navy, with whom are associat. The navigation of the station, wishing us "a pleasant voyage and all good health," though cheering enough hardly went the length of being assuring for that particular evening. But though squalls swept up at intervals are because it is over a course, which, being marely and Color of the Imperial Navy, with whom are associat. The navigation of the station, wishing us "a pleasant voyage and all good health," though cheering enough hardly went the length of being assuring for that particular evening. But though squalls swept up at intervals are

As has been said, Marquis Kuroda is a

The various members of the company arrived at out to view the scenes of a great war invests the trip with an interest distinctively its own. I desire to avoid reference as much as possible to once on board the steamer, many persons accompanying them to give them a good "send-off," official matters, but it seems to me that I should not entirely omit inclusion in this chronicle of the fact that it is understood Marquis Kuroda, Vice-President of the Upper House, is entrusted with a mission which may be taken as the chief reason for the despatch of the Manshu Maru to the Western seas.

It is already known to your readers that the Manshu Maru to Manshu Maru to the

farewell, were gradually dropped astern and the Manshu was off on her trip to the shores where she pearance of a most beautiful rainbow, the lower arc of which seemed almost to be completed a to-day and I am assured by some of the experts and travellers on board that the ship is remarkably steady.

The trip thus far has therefore been uneventful, with better weather the time would have passed very pleasantly. As we brought the northern land of the straits closer to our course the weather cleared up; the sea became smooth and everything wore a delightful appearance. It is arranged that we leave Kobe at 4 o'clock in the morning, so that the beauties of the Inland Sea will be unfolded to us on our way to Kure.

LITERARY GOSSIP.

"The Marriage of William Ashe" is the title of Mrs. Humphry Ward's new novel, which will first run as a serial in Harper's Magazine.

A suggestive indication of the trend towards specialisation in all things is offered by the latest announcement of Messrs, Jack, of Edinburgh. They have projected a series of elaborate monographs on the prominent personages who have made English history. These, it is intended, will be at once works of beauty, and the last word from

vessel and her adaptation to her present mission. She is a ship of 2,981 tons, with triple expansion engines and twin screws which drive her at a speed of 15 knots; built at Trieste her at a speed of 15 knots; built at Trieste him 1907; flush fore and aft with a boat deck on which are the captain's and officers' cabins (these being designed for use as a social cocasions launch and band, the latter cheering a to England about their experiences in Den-

so enabled him to give local colour to his play of "Hamlet" a few years later. In those days it was a very rare thing for actors to perform abroad, and no doubt the travellers were never tired of relating their experiences. This will amply account for Shakespeare's placing the tragedy of "Hamlet" in Zeeland, of which he

A deeply interesting volume could get a full description, rather than in Jutland, of which he and his companions knew nothing.

A valuable and important sale of illuminated MSS. and relics of Robert Burns took place at Sotheby's in May, and more than £2,200 was at Sotheby's in May, and more than £2,200 was realised. For the original honorary Burgess ticket presented by the Burgh of Dumfries to Robert Burns, June 4, 1787, Mr. Thomson gave £55; while £7 5s. was paid by Mr. Bevan for a walking-stick formerly belonging to Burns; and £155, the purcheser being Mr. Sabin, for Burns' autograph MS. of "The Whistle: A Ballad." The top price, £720, for a MS., fell to Mr. Quaritch—an early sixteenth century "Horæ" on pure vellum with 17 full-page miniatures.

It would seem that in Ireland there is still some value attached to the survivals of literary history as there is in most parts of England. Only lately there has been sold, together with the demesne, in the Irish Land Judge's Court, Quilla House, county Cavan. It will be remembered that it was here that the greater part of "Gulliver's Travels" was written. Swift's connection with the place made a considerable difference in the price paid, which was £111 as opposed to £57, the ordinary estimate of the rental.

The world is the poorer by the disappearance of a real genius, for that Maurus Jokai deserved the epithet no reader of his extraordinary works will deny. The medium in which his novels were given to the world must, it is to be feared, always prevent them from being known in all their true power to any but a select few. Magyar is never likely to be a language generally understood, and unfortunately, no translation could possibly reproduce the full effect of the style of such a writer as Maurus Jokai. Yet even in its English form, "The Lady with Eyes like the Sea" and two or three others of the astonishing number he produced, remain among the really great novels of the closing decades of the nineteenth century.

The early parish register of West Kirby, on the Wirral Peninsula, which has been missing from the church safe for over 100 years, has been restored through a reader of the Wigan Free Library, who brought the important document to the librarian. The register covers the period between 1561 and 1610, contains from 5,000 to 6,000 entries, and is written throughout on vellum. Curious entries include a complete list of all the victims of the plague which decimated the Wirral Peninsula in 1604.

Kilkenny College, which King Edward visited on his recent trip in Ireland, is one of the living links which connect the "Marble City" to-day with its historic past. It was there that Swift and Congreve were schoolfellows together, while in our own day the ancient College gave the late Archbishop Magee to the English Church. Listone Congreve as a native, but while more claims Congreve as a native; but while Congreve certainly spent his youthful days around Lismore Castle, his birthplace was in Yorkshire.

became m cobbler. His father had followed the occupation before him, and he knew something about it, so, having found literature unprofitable, he opened his shop in the Rue du Sommerard and advertised it in verses of his own composition. He also wrote letters to the papers, in which he Cup; with No. 1, second. compared himself with Spinoza, who mude spectacles for a living while he elaborated his contrithough M. mark, described Elsinore to the dramatist, and Customers used to read the poems which he Yokohamawas represented by Messrs. H. A. Poole pasted up in his shop window, but did not enter to buy. Instead of sticking to his last, therefore, he became a schoolmaster; and it was while fol-lowing that calling that he wrote the drama which

> A deeply interesting volume has just been published in Rome on the glories of the Capitol. Its lished in Rome on the glories of the Capitol. Its history, its relation to the genius of the Roman people, its traditions and even its legends are dealt with. In mediaval Italy, the Capitol had shrunk to being merely the scene where poets received their laurel wreath, and it, was here that Petrarch himself went to be crowned, conferring the life presence of greater honour than ferring by his presence, a greater honour than that received. Twelve gentlemen, clothed in red, and six members of the high Roman pobility, clad in green, and all bearing crowns of flowers, formed his escort, and to the sound of fife and dram, the procession marched to the hall where the immortal and sweet singer of Laura received his crown.

> Commendatore Boni, the famous archæologist of the Roman Forum, in a conversation with an interviewer, has given an interesting clue to his impressions of that treasure-house of Latin antiimpressions of that freasure-house of Latin anti-quity. According to him, it was a cemetery long before it was a Forum, and the tombs were packed so close together that no trace of a path-way, however narrow, could be found. The Via Sacra was probably made over the tombs. Romulus, Signor Boni thinks, was born on a soil peopled with the dead for a thousand years before his birth, and the wolf only existed in the legends left by his ancestors.

> Sir Archibald Geikie in his "Old Glasgow Memories," recently published, tells the follow-ing story which we have not before seen in print. ing story which we have not before seen in print.
> "At a funeral in Glasgow, a stranger who had taken his seat in one of the mourning coaches excited the curiosity of the other three occupants, one of whom at last addressed him. 'Ye'll be a brither o' the corp?' 'No, I'm no a brither of the corp,' was the prompt reply. 'Weel, then, ye'll be his cousin?' 'No, I'm no that.' 'No! then ye'll at least be a frien' o' the corp?' 'No that either. To tell the truth I've no been that weel mysel' and as my truth, I've no been that weel mysel' and as my doctor has ordered me some carriage exercise, I thouht this wad be cheapest way to tak' it.'"

> Dr. Karl Schmidt, of Heidelberg University, Dr. Karl Schmidt, of Heidelberg University, has just published a volume which, he claims, adds greatly to our present knowledge of the writings of St. Paul. He has been occupied for seven years in compiling the work from 2,000 papyri covered with Coptic characters, and preserved in the University. Dr. Schmidt thinks that the work will solve many problems connectionally and the control of the c ed with early Christianity, and proves that there formerly existed a great work entitled the "Acta Pauli," divided into three parts, of which only fragments have survived. It was the work of one Anzian, who wrote 180 years after Christ.

SAILING RACES.

Saturday was an unsatisfactory kind of a day in many ways, as the opening of the Nyubai often is. The wind came light from the south at times, M. Jacques Le Lorrain, whose tragedy "Don all increased to a heavy downpour. The 21-Quichotte" has recently been produced in Paris, raters handicap around the Tsurumi mark-boat, is interesting from the fact that after making his lightship and Mandarin Bluff, brought out nine debut in letters he withdrew from the calling and starters—Sunbeam, Winsome, Pelee, Valkyrien, became m cobbler. His father had followed the occupation before him, and he knew something the company of the compa Beatrice, Pima. Chocho, Patsy and the new boat Witch. The Valkyrien won, with Pelee second. Nine started for the Lark race, and the usual mishaps happened ere the contest closed. No. 11, lead all the way round and won the Winsome

THE INTERPORT RACES.

and N. B. Morton; Kobe's skippers being Messrs. L. A. Summerhays and J. D. Abell. In the first match the Kobe boat led at the start, being 18 seconds to the good when Yokohama crossed the line. The heavy wind raised a lumpy sea, and rain squalls were frequent. Still leading Kobe were within sight of home, when, rounding the last mark, their boat capsized. Fortunately Summerhays and Abell managed to scramble on to the mark-boat, but it was found impossible to right their craft and it was eventually towed in. Yokohama finished at 11h. 24m. 33s. The second race started at 3 p.m. and was won by Yokohama with the margin of 10m. 48secs.

The events in the Spring regatta of the K.R.C., already once postponed, had again to be put off owing to the bad weather.

The keen interest shown by owners of the "Lark" class of the Yokohama Yacht Club is to be highly commended. A new departure was inaugurated by them this week in the shape of Wednesday afternoon races. These races have been arranged entirely among themselves. The first boat across the finishing line receives 3 points, the second 2, and the third 1. At the close of the season the boat with the largest number of marks will secure first prize, second and third prizes being awarded on the same principle. The first prize is presented by Lark No. 10, the second and third prizes being subscribed for. A special prize, presented by Lark No. 1, is also to be given to the boat that has started and finished the most number of times without getting "placed."

The first race of the series was sailed on Wednesday afternoon, there being 9 starters. Nos. 12 and 11 led crossing the starting line, closely followed by the rest of the squadron in a bunch. At the first inner buoy No. 20 was leading, No. 5 being close astern, and at the conical buoy the boats were all close together. After rounding this mark, however, they spread out, going on different tacks. There was a very good finish, scarcely two minutes separating the first and last boats. They came in the following order:— No. 12, 13, 8, 5, 10, 11, 1, 6. 4. The latter, by an error, did not cross the finishing line.

THE LAW COURTS.

HAIM v. BRETSCHNEIDER.

This case came up again in the Yokohama District Court before Judge Danno on June 11th when judgment was delivered dismissing the claim of plaintiff with costs

ALLEGED FRAUD.

The preliminary examination of Mr. Y. Matsumura, ex-director of the Naigai Fire Insurance Company, Tokyo, who has been charged with fraud, having been completed in the Tokyo Dis-trict Court, he was committed for trial on June

It appears that the accused embezzled yen 18,000 belonging to the office while in the service of the firm and made false entries in the books in order to conceal his offence.

A CHARGE OF MANSLAUGHTER.

In the Yokohama Local Court, on Tuesday afternoon, before Judge Nagatsuka, the hearing took place of a charge of manslaughter preferred against Capt. Seabury, of the P. M. steamer Korea. On March 21st it will be remembered a sampau On March 21st it will be remembered a sampan got between the Korea and her mooring buoy as she was swinging, and a boatman named Aoki Hosaku was crushed to death. Captain Seabury stated that he was ashore at the time of the incident. The sampan ought not to have been anchored near the buoy as the steamer was not at anchor at the time. The corpse of the boat man was found floating near the sampan forty-five minutes after the vessel began to move.

The Court fully exonerated the accused.

The Court fully exonerated the accused.

DEATH OF MR. MEIKLEJOHN.

The death occurred on Thursday morning, from apoplexy, of Mr. Robert Meiklejohn, for many years proprietor of the Japan Daily Advertiser. Mr. Meiklejohn was a Daily Advertiser. Mr. Meiklejohn was a citizen of the United States and an expert master-printer. On first coming to Japan he worked in the office of the Japan Mail and when he left us in 1873 he entered the late Mr. Brooke's employ on the Japan Herald. Soon after he bought the printing office of a Mr. Franklin at No. 108, and transferred it to No. 408 hours he half was a heart of the No. ferred it to No. 16, where he built up a big connection, dominating the job-printing trade of the town, among other ventures printing the Tokyo Times for Mr. House. In 1890 he began to issue the Daily Advertiser from No. 26 as an advertising sheet pure and simple, but in 1891 he advertising sheet pure and simple, but in 1891 he was joined by Mr. Robert Hay and the paper soon took a leading place in local journalistic circles. On the Advertiser being sold a few years ago to Mr. A. M. Knapp, Mr. Meiklejohn retired entirely into private life, being seen by only his closest intimates. Death has come at the age of 58. He was a member of the Masonic body, but had taken no active part in its work for quite a dozen years past. The funeral is arranged for Sunday.

NEWS OF THE WEEK.

Japanese gold coins amounting to half a million yen were exported on June 15th by the steamer Gaelie to San Francisco.

Nine houses were burnt down at Mandai-cho Yokohama, early on Thursday, the fire breaking out in the house of a painter.

During a period from the outbreak of the war to May 31st, the amount donated to the Japan Red Cross Society aggregated yen 23,814,509

Three Russian officers undergoing treatment in the Matsuyama hospital have donated \$5 to the Japan Red Cross Society, through the Governor

A telegram from Chefoo to the Kokumin states that the Russian refugees from Port Arthur arrived at Tun-chon and left there overland for

Mr. Noma, the Japanese Consul at Hongkong, reports that, during the week ended May 28th, twenty-seven cases of plague appeared there, twenty-five proving fatal.

Mr. Hayashi, Japanese Minister at Seoul, arrived on the morning of June 15th at Moji by At 2 p.m. or the steamer Ohio from Chemulpo. the same day he left for Kobe, and Tokyo.

Since the outbreak of war to May 20th, the amount donated towards the funds of the Red Cross, hospitals, etc. by Japanese and foreigners in Hawai aggregated to yen 109,243.41.

Fifteen Russians, including a student of the military college and three merchants captured at Kinchow were to arrive on June 10th at Ujina by a transport. One of the soldiers is wounded.

Mr. W. T. Stead, editor of the Review of Reviews, who, says the Jiji, is said to be pro-Russian in his views, has sent a telegram of congratulation to Marquis Oyama, Chief of the Staff.

Some Koreans intend to establish a bank with the joint capital of Koreans and Japanese. The promoters, says I Tokyo paper, have requested Viscount Aoki to control the institution as pre-

S. Kamoi, a lithographer, and two others have been arrested at Tokushima. The fije's Kobe correspondent reports that they forged three thousand yen' to notes and circulated about a hundred of them.

Among recent departures from Yokohama were Mrs. Davies, lately Matron of the General

generally appreciated. We are given to under-stand that Miss Gray, late of the Peak Hospital, Hongkong, assumes some part of Mrs. Davies'

A telegram from Matsuyama reports that M. Kurita, a farmer, in the village of Kaino, Arai, and six of his family were found murdered on the morning of June 9th. The murderer is still at large. The cause of the crime is not yet known.

Prince Yamashina, who recently returned from the front, paid a visit to the Naval Staff Office on June 13th. He had been transferred from the cruiser Yakumo to the Staff Office. It is reported that he was to commence service on the 14th as an attaché.

Mr. Max Nössler, the Japanese Honorary Consul at Bremen, has remitted to the Gunjin Kyngo Kwai, (Association to Relieve the Families of the Men at the Front) marks 12,015.55, which amount has been donated by citizens in

According to investigations made by the Finance Department, the banks throughout the Empire at the end of May numbered 2,310, the total capital being yen 531,143,549. This shows a decrease of one bank compared with the figures of the previous month, but an increase in capital of yen

The Captain of the Norwegian steamer Solveg, News that the vessels were sent out entirely as a speculation, and the cargoes are for sale. The statement that the steamers are awaiting orders to proceed to Port Arthur is incorrect,

The Nippon Tea Manufacturing Company, has received a telegram from its branch in New York that the tea market is extraordinarily dull and leaf over 12 cents per pound can not find buyers. The Asahi states that the most inferior tea exported to America costs cents 14, c.i.f., per pound in Yokohama so that the tea trade is now involved in a serious cloud.

Z. Okada, a gardener employed at the well-known tea-house Kotaka-in, Horikiri, Tokyo, who had been sentenced to death in the Tokyo District Court on a charge of having murdered bis employer and destroyed the building by setting it on fire, and who had appealed to the Appeal Court against the decision, was acquitted on June 14th on the ground that the evidence against him was insufficient.

The Clerk of the Weather has evidently a "down" on the cricketting members of the Y.C. and A.C. Here we are at the middle of June and no matches have yet been possible, the two arranged by the Captain of Cricket being inter-fered with by downpours of rain. In self-defence the cricketers will have to organize an evening match, commencing say at 5 p.m., and lasting over three evenings. This would not interfere too greatly with the baseball practises or the tennis.

The most striking fact, remarks the L. & C. Express, about the recent sittings of the House of Commons is the collapse of the Opposition. A few weeks ago Sir H. Campbell-Bannerman and his colleagues were confidently expecting a Hospital, and Miss Scruton, whose faithful and Government is obtaining huge majorities, except quite ignorant that efficient services on behalf of the Hospital were in an occasional snap division in an empty House, arrived at Shanghai.

As for the Liberal leaders, they have silently vanished away, and the duty of fighting the Go-vernment is left to men whose names the country

Recreation Club of Hongkong it was proposed that Mr. Frank Lammert be elected Hon. Secretary of the Club, whereupon a counter proposal was at once made that Mr. Harold Austen, son of the Rev. W. T. Austen, of Yokohama, be asked to carry on as Hon. Secretary, having filled the post to the satisfaction of the members during the year just closed. A ballot was taken and Mr. Austen was elected by a large majority.

Sone (17) daughter of a merchant, S. Sato by name, of Akashi-cho, Tsukiji, Tokyo, attempted to commit suicide on the evening of June 10th by drowning herself in the sea at Sanno-machi, Oiso, but was rescued by three farmers who were passing. She was immediately removed to the police station. It appears that she has developed religious mania, and believing that "death means a return to our original place," and besides being reary of life, she sought to pass through the dividing gate.

An audacious robbery is reported on a train of the Nippon Railway. It appears that I. Koyama, a merchant living in Koishikawa, Tokyo, took the 5. p.m. train on June 9th at Uyeno. He was the sole occupant of a first class car, but at Tabatastation two menentered the compartment and shortly after the train started they menaced one of three which have been lying off Gutzlaff the merchant and robbed him of his hand bag with cargoes of coal, assures the N.-C. Daily containing yen 161 and several documents. The Daily containing yen 161 and several documents. The when approaching the next station.

> A Parliamentary paper just issued shows that Great Britain has 445 warships, while 104 are being built. Torpedo-boat destroyers number 214 and submarines eight. Twenty-one of the latter are building. The ill-fated A1 "will probably be reinstated in the Navy," says a footnote in the return. Japan's warships of all classes numbr 148, Russia's 280. at the time the teturn was made up. The Japanese have 82 torpedo boats; Russia has 167. France's whole fleet numbers 399, Germany's 213, Italy's 204, and the United States' 111.

On Wednesday afternoon, the Kawasaki Dock-yard Company launched from their slips the yard Company launched from their slips the light-house tender Kwang chei, built for the Imperial Korean Customs. Her principal dimensions are:—Length over all, 232'-6"; depth moulded to main deck, 13'-6"; engines, 2 sets, triple expansion; length between p.p., 220'-0"; height of deck erections, 7'-6"; number of boilers, 2; breadth moulded, 30'-"; draught loaded, 14'-6"; 10 k. dynamo; depth moulded to upper deck, 21'-0": displacement, 1620; 18" searchlight: guaranteed speed, 14 knots; armament, 2 Maxim guns, 32-pounder Nordenfelt of g. 2 Maxim guns, 32-pounder Nordenfelt q.f g.

It is reported by the Kagacho police that a Chinaman about 32 years of age bought a bottle of whiskey, costing yen 1.45, on June 10th at No. 52, Yokohama, and stole an amount of yen 3.55. He also gave a Chinese a forged yen 5 note. The same day, a similar theft was committed at No. 128. A Chinaman employed by the British steamer Bengloe informed the cho police that he received two Japanese forged notes of yen 5 each from the Chinese exchange speedy dissolution, which was to place them in notes of yen 5 each from the Chinese exchange power with a huge majority at their backs. The shop, No. 151, while changing British money on whole situation has now changed. All talk of an immediate dissolution has died down, and the Government bottaining huge majorities, except quite ignorant that it was false money until he

CORRESPONDENCE.

OKAYAMA ORPHANAGE ENTERTAINMENT

(To THE EDITOR OF THE "JAPAN MAIL"

(To THE EDITOR OF THE "JAVAN MALL")

SIR.—In Tokyo the sign Kashiya—House to Let—
is becoming a common one, for families whose breadwinners are at the front and who are moving to the
country or going into smaller houses. From the provinces we hear of business being dull because people
are reducing expenses and cutting off luxuries. Money
is given freely for patriotic purposes, and it is no wonder
that contributions for charities not connected with that contributions for charities not connected with the war are falling off. There is danger of rice-tubs being empty as well as dwelling houses.

The Okayama Orphanage, an institution of 17 years' standing, which has now 270 children under its care, has received but little in the way of contributions from Japanese sources since the war began. Heretofore much more than half of the contributions have come from home sources. The living expenses alone averaged yen 750 a month last year—less than yen 3 a child. The sustaining members, who contribute one yen a year supplied on an average yen 280 a month, and the Prefectural Government contribute one yen a year supplied on an average yen also a month, and the Prefectural Government contributed yen 400 for the year. Contributions from Japaneses sources averaged some yen 200 a month, and these supplies have almost ceased, while the demands of the 270 children have not in any wise ceased. They bave not luxuries that they can cut off, as the writer can well testify. A year ago I stood in the large shed that serves for a dining hall. The large family—all of whom call Mr. Ishii "father"—was waiting for grace to be said, and for the bugle to sound "Fall to." One little fellow of about four sat with his mouth just at a tempting distance from the dish of barley and rice and pickles. The little hands kept straying to the food, but one of the older girls kept reproving him until grace was said. I watched to see what he would do with a large piece of scorched barley and rice on top of his dish. Without hesitating a moment the chop-sticks attacked that first of all, and it was disposed of as m savory morsel.

They have no luxuries, indeed; but healthy

They have no luxuries, indeed; but healthy appetites they have. For the benefit of the institution some of the children, formed into a band, gave a concert with kinetoscope views on the 14th inst. at the Peers' Club, under the patronage of Countess Kabayama, Viscountess Aoyama, Viscountess Okabe, Analysma, Viscountess Aroyanta, Viscountess Aroyanta, viscountess Aroyanta, viscountess Aroyanta, viscountess Aroyanta, viscountess Arabe given on the 16th, 17th, and 18th, beginning at 6 p.m in the Hall of the Y.M.C.A., Mitoshiro-cho. Tickets at one yen each may be obtained at the Mitoshiro Kwan, Mitoshiro-cho, 2 chome.

Thanking you for many kindnesses to the Orphandria the set and in a tritical for insenting the set.

age in the past; and in anticipation, for inserting this letter about its needs. iter about its needs. I am, Sir, faithfully yours, FRANK MÜLLER.

THE TANSAN CASE AT SINGAPORE.

WILKINSON V. McALISTER & Co.

JUDGMENT OF MR. JUSTICE HYNDMAN JONES.

The law with regard to cases of this sort has been so clearly enunciated in the cases to which we have been referred that it does not present much difficulty, I agree with Mr. Fort that the true principle is that I agree with Mr. Fort that the true principle is that "no man can have a right to represent his goods as the goods of another man;" that principle was I believe first laid down by Tinner L. J. in Burgess v, Rurgess 3 De Gex M. & G. 806 some 50 years ago and the principle has met with the general approval of the Courts ever since, including the House of Lords. Another important point to bear in mind is the distinction that should be drawn between the adoption of a factor name and the adoption of adoption of a fancy name and the adoption of a descriptive name: if a man adopts a fancy name and applies it to his own goods then if some other person uses that name in connection with the goods which he is selling the presumption will almost necessarily be that the latter is attempting to pass off his goods as those of the former. On the other hand when a as those of the former. On the other hand when a man uses merely a descriptive name he is seeking as it were to appropriate for himself a name which it is obviously open to all the world to use as descriptive of articles which they may wish to sell: there is no presumption in his favour from the mere fact that some one else has commenced to use the name; and accordingly the man who under such circumstances seeks to greatly a problem from the reference and accordingly the man who under such circumstances seeks to restrain another from using the name would have to prove that it had acquired in connection with

232). Such being the law as laid down by the most eminent authorities the question is now to apply it to the facts before us. Now so far as Japan is concern-ed I am not prepared to say that the word "Tansan" by itself as applied to mineral water is a purely dested 1 am not prepared to say that the word "Tansan" by itself as applied to mineral water is a purely descriptive name: the meaning of the word is simply carbonic acid and the word "Tansansui" would be the proper equivalent in Japanese for carbonic acid water; that is agreed on both sides, but some of the witness said that the word "Tansan "was an abbreviation of the word "Tansansui" and had been used in connection with mineral water for many years before the respondents first adopted it—see for example the evidence of Mr. Ohga the Japanese Consul at page 45 line 33: on the other hand Mr. Y. Sato who had been head-master of the commercial school in Kobe gave evidence diametrically opposed to this; see his evidence at page to lines 20 to 25 and Mr. Yeisuke another Japanese witness was to the same effect page 30 line 44 there is also the evidence of Mr. Chamberlain at page 23 lines 7 and 14 and Capt. Brinkley at pages 28 and 29: the manager of Hasegawa and Co. who are the appellants principals admitted that "lemonade" was the colloquial for aerated water and said that "Teppo Mitzu" was not the expression generally used page 44 line 63: while there was other evidence that "Teppo Mitsu" was not the expression generally used page 44 line 63: while there was other evidence that colloquial for aerated water and said that "Teppo Mitzu" was not the expression generally used page 44 line 63; while there was other evidence that "Teppo Mitzu" was the ordinary term. I do not propose to go into the evidence at length because it was put before us in great detail by counsel on both sides but I may point out that some of the appellants witnesses were obviously interested witnesses being either agents for or dealers in rival mineral waters for example Fukami Shukichi who sold the Eagle Tansan and the Ishimichi Tansan, Sasatani Kojiro who sold the Hitano Tansan, Mohara Kobei who sold the Lion Tansan and Myaji Masaaki who sold the Nukobiki Tansan; all these people had the strongest reasons for resisting the claim; on the whole I think the weight of the oral evidence is distinctly on the side bixi Tansan; all these people had the strongest reasons for resisting the claim; on the whole I hink the weight of the oral evidence is distinctly on the side of the respondent. Further there was a complete absence of documentary evidence in support of the appellants contention. It might reasonably be expected that they would produce labels proved to be in use before 1892 bearing the word "Tansan" upon them; they were unable to produce any evidence to that effect; they did indeed call two witnesses Kawaguchi Toyokichi page 38 and Yamada Ryosuke page 39 who swore that there was a monument erected near the Arima Spring in November 1877 on which the word "Tansan" was inscribed, but the respondent secured a photograph of this monument which disclosed that the inscription was "Tansan sui" and not "Tansan"; Tansan therefore even in Japan cannot be said to be a purely descriptive name. On the other hand it may be said that if it be not purely descriptive it is at all events not purely a fancy name in as much as it does relate to some extent to the quality of the water which the respondent is selling. In that case the evidence in my opinion establishes. In that case the evidence in my opinion establishes that it had acquired in the raspondent's favour that secondary meaning to which I have already alluded secondary meaning to which I have already alluded, It was in 1893 that the respondent first adopted the name in connection with the mineral water he was selling; the name was suggested to him by the British Consul, Mr. Enslie, himself a Japanese scholar, and the respondent said that he himself did not know the meaning of the word till four or five years after be had adopted it: the respondent's labels and other labels were produced and it appears fairly clear that up to 1899 when Fukumi first initated the label although other mineral waters were being sold in Japan no mineral water had been sold with labels bearing Itat name. I agree with the learned Chief label although other mineral waters were being sold in Japan no mineral water had been sold with labels bearing that name. I agree with the learned Chief Justice that "the labels produced by the defendants really came into use long after Wilkinson had adopted the word "Tansan," therefore had come to be the mane by which the public would crill for the particular mineral water which they had begun to appreciate: the public might not know the respondent's name in connection with "Tansan" they might not know the name of Reynell and Co. in connection with "Hirano" but they would call for Tansan when they wanted Tansan just as they would call for Hirano when they wanted Hirano or Appolinaris when they wanted Appolinaris; on this branch of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence the evidence of the case apart from the other evidence of the evidence of the case apart from the other evidence of the evidence of the case apart from the other evidence of the evidence of the case have to prove that it had acquired in connection with his own goods a secondary meaning which has displaced in his favour the ordinary meaning to be attached to it; in other words he would have to prove that the use of the name in this secondary meaning has become so general as to give him the right to restrain others from using it in such a manner as would be calculated to put off their goods as his (The Cellular Clothing Co. Ltd. v. Maxton and Murray 1899 Ap Ca 336, Reddaway v. Banham 1896 Ap Ca 199, Parsons v. Gillespie 1898 Ap Ca of the case as to Japan be correct a fortiori it seems of the case as to Japan be correct a fortiori it seems has been brought in Singapore in which the respondent under the name of which the word water importing here mineral or other water not being water imported by the respondent under the name of which the word water importing here mineral or other water not being water importance the respondent under the name of which the word water importing here mineral or other water not being water importance on either side could easily be sealed.

Cean to the Sea of Japan are controlled by the Japanese Empire. In other words, access to the Pacific from Korea's eastern coast and access to the Pacific from Russia's Maritime Provinces depend upon Japan's good will. So far as Korea is concerned, this question matters little. It is her fate to death the view I have taken of the case as to Japan be correct a fortiori it seems.

to me it is correct as to this Colony. It was in 1804 that the respondent first introduced his water here under the name of "Tansan" and no other water was imported under that name fill 1901 when the appellants did so under the name of "Funagoya Tansan." It is true that during these seven years the sales having regard to the population of the Colony were not extensive, but such people as drank the water probably appreciated it and would expect to get it when they asked for "Tansan"; to them or to the great majority of them the word "Tansan" would convey no meaning, it would not even mean carbonic acid and they would simply regard it as a word the uttering of which would bring them the water they wished to drink. If under these circumstances another mineral water is thrown upon the market very similar in quality put up in very similar bottles and bearing a label which although distinctive in some respects, yet has as its prominent feature the word "Tansan," it is difficult to see how the ordinary purchaser would not be in danger of getting some other sort of mineral water than the "Tansan" to which he had been accustomed. At his club or his restaurant he would call for "Tansan" as he might have been in the habit of doing for years and unless he were at the pains on each occasion to examine the label he might easily be supplied with a mineral water which, however excellent it might be was not the mineral water he wanted to drink and so injury would be done both to the owner of the water and to the purchaser. It therefore seems to me that the Court below came to a right decision. With regard to the form of the form of the lnjunction I am not prepared to say that under the circumstances of the case, it is too full. I do not see how anything short of an Injunction in the form in which it is would afford adequate protection. The question of costs to be argued later.

(Signed) W. H. HYNDMAN JONES, J.

THE CAUSES OF THE RUSSO-JAPANESE WAR.

BY CAPTAIN BRINKLEY.

It had been in the minds of a great many people for a great many years that a war between Russia and Japan must come sooner or later, yet a clear statement of the reasons for such a conviction was not easy to obtain from its exponents. They had, in truth, no very definite reasons over and above the broad facts that, Russian aggression being insatiable, Japan could not hope to remain permanently beyond its sphere, and that she would be quite certain to resist to the death any attempt to bring her within it. resist to the death any attempt to bring her within it. On the other hand, to superficial observers, it seemed easily conceivable that a little forbearance on either side might remove all points of serious collision. Japan had lived many centuries of a tolerably prosperous and moderately happy existence in almost total segregation from the neighbouring continent. Russia had never betrayed any disposition to extend her territorial aggression beyond the Asiatic continent. With the solitary exception of the island of Saghalien, she had not made any insular addition to her vast empire. Need there, then, be any clash of interests? Was it not possible that each empire might leave the other severely alone, the one confining itself within the limits of its islands, the other not trespassing beyond the bounds of its continents? not trespassing beyond the bounds of its continents? The answer to that question involves some reference to geography and history.

The answer to that question involves some reference to geography and history.

Japan along its western shore, Korea along its eastern, and Russia along the eastern coast of its Maritime Provinces, are washed by the Sea of Japan. The communications between this sea and the Pacific Ocean are practically two only. One is on the northeast, namely, Tsugaru Strait; the other is on the south, namely, the channel between the extremity of the Korean peninsula and the Japanese Island of the Nine Provinces. Tsugaru Strait is entirely under Japan's control. It is between her main island and her island of Yezo, and in case of need she can close it with mines. It is actually so closed at present. The channel between the southern extremity of Korea and Japan has a width of one hundred and two mites, and would therefore be a fine open seaway were it free from islands. But almost midway in this channel lies the twin island of Tsushima, and the space of fifty-six miles that separates it from Japan is narrowed by another island, kit. Tsushima and kit belong to the Japanese Empire. The former has some exceptionally good harbours, constituting a naval base from which the channel on either side could easily be sealed.

It appears, then, that the avenues from the Pacific Ocean to the Sea of Japan are oontrolled by the Japanese Empire. In other words, access to the

is different. Vladivostock, which until recent times was her principal port in the Far East, lies at southern extremity of the Maritime Provinces southern extremity of the Maritime Provinces—that is to say, on the north-western shore of the Japan Sea. It is therefore necessary for Russia that freedom of passage by the Tsushima Channel should be secured; and to secure it one of two things is essential—namely, either that she herself should possess a fortified port on the Korean side, or that Japan should be bound neither to acquire such a vest year to improve any restriction treen the navi-Japan should be bound neither to acquire such a port nor to impose any restriction upon the navigation of the strait. To put the malter briefly, Russia must either acquire a strong foothold for herself in southern Korea, or contrive that Japan shall not acquire one. In short, there is here a strong inducement for Russian aggression in Korea.

Russia's enstward movement through Asia has been strikingly illustative of her strong caving for

Russia's eastward movement through Asia has been strikingly illustrative of her strong craving for free access to southern seas and of the impediments she has experienced in gratifying the wish. An irresistible impulse has driven her oceanward. Checked again and again in her attempts to reach the Mediterranean, she set out on a five-thousand-miles march of conquest right across the vast Asiatic continent towards the Pacific. Eastward of Lake Baikal she found her line of least resistance along the Amur, and when, owing to the restless perseverance of Muraviev, she reached the mouth of that great river the acquisition of Nikolaiefsk for a severance of Muraviev, she reached the mouth of that great river the acquisition of Nikolaiefsk for a naval basis was her immediate reward. But Nikolaiefsk could not possibly satisfy her. Situated in an inhospitable region far away from all the main routes of the world's commerce, it offered itself only as stepping-stone to further acquisitions. To push southward from this new port became an immediate object to the pioneers of Russia's Far Eastern fortunes. There lay an obstacle in the way, however: the long strip of seacoast from the mouth of the Amur to the Korean frontier—an area then called the Ussuri Region because the Ussuri forms its western boundary—belonged to China, and she, having conceded much to Russia in the matter of the Amur, showed no disposition to make further con-Amur, showed no disposition to make further con-cessions in the matter of the Ussuri. In the presence of menaces, however, she agreed that the region should be regarded as common property pending a convenient opportunity for clear delimitation. That convenient opportunity for clear delimitation. That opportunity came very soon, so far as Russia was concerned. Seizing the moment when China had been beaten to her knees by England and France, the great aggressor secured final cession of the Ussuri region, which now became the "Maritime Provinces of Siberia." Then Russia shifted her naval basis on the Pacific from Nikolaiefsk to Vladivostock. She gained ten degrees in a souther-

Russians in this matter was unerring. They saw that Vladivostock, acquired at the cost of so much toil, would be comparatively useless unless from the sea on whose shore it was situated an avenue to the Pacific could be opened, and they therefore tried to obtain command of the Tsushima Channel. Immediately after reaching the mouth of the Amur the same instinct had led them to begin the colonization of Saghalien. The axis of this long, narrow island is inclined at a very acute angle to the Ussuri region, which its northern extremity almost touches, while its southern is separated from Yezo by the Strait of La Perouse. There is no doubt that from Saghalien the Russians, had they encountered no serious resistance, would have crossed to Yezo and thence to the main island of Japan. But in Saghalien they found Japanese Empire. Resorting, however, to the Ussuri fiction of joint occupation, they succeeded ultimately in transferring the whole of Saghalien to Russia's dominion. That was in 1875. Further encroachments upon Japanese territory could not be lightly essayed, and the Russians held their hands. They had been trebly checked: checked in trying to

sor. Her people were unprogressive, her resources undeveloped, her self-defensive capacities insignifi-cant, her government corrupt. But she was a tribu-tary of China, and China had begun to show some tenacity in protecting the integrity of her buffer States. Besides, Japan was understood to have pretensions with regard to Korea. On the whole, therefore, the wan regard to Korea. On the whole, therefore, the problem of carrying to full fruition the work of Muraviev and his lieutenants demanded strength greater than Russia could exercise without some line of communications supplementing the Amur waterway and the long ocean route. Therefore she planned and set about the construction of a railway across Asia.

It is not intended to suggest that tagging a construction of the constr

It is not intended to suggest that territorial aggres It is not intended to suggest that territorial aggression was the direct motive of this grand enterprise. Governments seldom propose to themselves such aims. They merely prepare to utilize opportunities, should any haply be found. Preparation, however, if in its course it does not reate opportunities, seldom fails, when complete, to inspire their creation. Russia's agents need only the means to advance; the impulse is always with them.

The Amur being the boundary of Russia's East Asian territory, this railway had to be carried along its northern bank, where many engineering and eco-

its northern bank, where many engineering and eco-nomical obstacles presented themselves. Besides, the river, from an early stage in its course, makes a buge semicircular sweep northward, and a railway following its bank to Vladivostock must make the same detour. If, on the contrary, the road could be carried over the diameter of the semicircle, it would be straight and therefore very much shorter line, technically easier and economically better. The diameter, however, passes through Chinese territory—her "Three Eastern Provinces," in a word, Man-Three Eastern Provinces," in a word, Manchuria—and an excuse for soliciting —extorting China's permission was not in sight. Russia therefore proceeded to build either end of the road, deferring the construction of the Amur section for the moment. She had not waited long when in 1894, war broke out between China and Japan, and the latter, completely victorious, demanded as the price of peace the southern littoral of Manchuria from the Korean boundary to the Liaotung Peninsula at the entrance to the Gulf of Pechiii. This was a crisis in Russia's career. She saw her whole programme of East Asian expansion menaced with failure; saw that her maritime extension could never get nearer than Vladivostock to the Pacific were this claim of Japan's established. For the proposed concerned. Seizing the moment when China had been beaten to her knees by England and France, the great aggressor secured final cession of the Ussuri region, which now became the "Maritime Provinces of Siberia." Then Russia shifted her naval basis on the Pacific from Nikolaiefsk to Vladivostock. She gained ten degrees in a souther ly direction.

From the mouth of the Amur, where Nikolaiefsk is situated, to the southern shore of Korea, there rests on the coast of eastern Asia an arch of islands having at its northern point Saghalien and at its southern Tsushima, the keystone of the arch being the main island of Japan. This arch embraces the Sea of Japan and is washed on its convex side by the Pacific Ocean. Immediately following the transfer of Russia's naval base from Nikolaiefsk to Vladivostock, an attempt was made to obtain possession of the southern point of the arch, namely, Tsushima. A Russian man-of-war proceeded thither and quietly began to establish a settlement which would soon have constituted a title of ownership had not Great Britain interfered. The imperial instinct of the Russians in this matter was unerring. They saw that Vladivostock, acquired at the cost of so much toil, would be comparatively useless unless from the son howe shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sace on whose shore it was situated an avenue to the sac

Japan's possession or under her domination.

Then Russia took an extraordinary step. She persuaded Germany and France to force Japan out of Manchuria. What argument she employed to win the co-operation of these two Powers she and they alone know. It is not to be supposed that she frankly exposed her own aggressive designs and asked for assistance to prosecute them. Neither is it to be supposed that France and Germany were so curiously deficient in perspicacity as to overlook her designs. At all events, these three great Powers served on Japan a notice to quit, and Japan, exhausted by her struggle with China, had no choice but to obey.

The notice was accompanied by an exhausted.

The notice was accompanied by an expose of easons. Its signatories said that Japan's tenure of the Manchurian littoral would menace the security of the Chinese capital, would render the independence of Korea illusory, and would constitute an obstacle to the peace of the Orient.

By way of saving the situation in some slight degree, Japan sought from China a guarantee that no portion of Manchuria should thereafter be leased or ceded to a foreign State. But France warmed Japan that to press such a demand would offend Russia,

of indemnity for the murder of two missionaries by a of indemnity for the murder of two missionaries by a mob. Germany seized, and afterwards compelled China to lease to her, a portion of the province of Shantung. Immediately, on the principle that two wrongs make a right, Russia demanded and obtained lease of the Liaotung peninsula, from which she had driven Japan in 1895. This act she followed by extorting from China, necessarily complaisant, permission to construct a branch of the Trans-Asia Railway through Manchuria from north to south, that is say, through Harbin and Mukden to Port Arthur.

明拍计式学三月背日第三種郵便物課可

Ill say, through Harbin and Mukden to Port Arthur. Russia's maritime aspirations had now assumed a radically altered phase. Instead of pushing southward from Vladivostock and Possiet Bay along the coast of Korea, she had suddenly leaped the Korean peninsula and found access to the Pacific in Liaotung. Nothing was wanting to establish her as practical mistress of Manchuria except a plausible excuse for garrisoning the place. Such an excuse was furnished by the Boxer emeute in 1900. Its conclusion saw her in military occupation of the whole region, and she might easily have made her occupation permanent by prolonging it until peace and order should have been fully restored. But here she fell into an error of judgment. Imagining that the Chinese could be persuaded or intimidated to any course whatever, she proposed a convention virtually recognizing her title proposed a convention virtually recognizing her title to Manchuria.

to Manchuria.

Japan watched all these things with profound anxiety. If there were any reality in the dangers which Russia, Germany, and France had declared to be incidental to Japanese occupation of part of Manchuria, the same dangers must be doubly incidental to Russian occupation of the whole of Manchuria; the independence of Korea would become illusory; the security of the Chinese capital would be threatened; an obstacle would be created to the permanent peace of the East. to the permanent peace of the East.

to the permanent peace of the East.

The independence of Korea is an object of supreme solicitude to Japan. Historically she holds towards the little State a relation closely resembling that of suzerain, and though of her ancient conquests nothing remains except a settlement at Fusan on the southern coast, her national sentiment would be deeply wounded by any foreign aggression in the peninsula. It was to establish Korean independence that she fought with China in 1894, and her annexation of the Manchurian littoral adjacent to Korea's porthern frontier after the way was designed to tion of the Manchurian littoral adjacent to Korea's northern frontier after the war was designed to secure that independence, not to menace it as the Triple Alliance pretended to think. But if Russia came into possession of all Manchuria, her subsequent absorption of Korea would be almost inevitable. For the considerations set forth above as to Vladivostock's maritime avenues would then acquire absolute cogency. Manchuria is larger than France and the United Kingdom lumped treether. The addition of stock's maritime avenues would then acquire absolute cogency. Manchuria is larger than France and the United Kingdom lumped together. The addition of such an immense area to Russia's East Asiatic dominions, together with its litteral on the Gulf of Pechili and the Yellow Sea, would necessitate a corresponding expansion of her naval forces in the Far Fast. With the one exception of Port Arthur, however, the Manchurian coast does not offer any par rast. With the one exception of Port Arthur, however, the Manchurian coast does not offer any convenient naval base. It is in the splendid harbours of southern Korea that such a base, several such bases, can alone be found. Even though she were limited to Port Arthur and Vladivostock, the obligation to secure their maritime intercommunication by way of the Tsushima Channel would become doubly imperative for Russia. By only one method could that end be effectively attained—by establishing a strong place of arms on the Korean shore of the channel. But in the event of the territorial and consequent naval expansion here considered, Port Arthur and Vladivostock would at once cease to be adequate naval bases; they would have to be supplemented by Korean harbours. Moreover, there would be an even stronger, an immensely stronger, motive impelling Russia towards Korea. Neither the Ussuit region or the Manchurian littoral possesses so inuch as one port qualified to satisfy her perennal much as one port qualified to satisfy her perennial longing for free access to the ocean in a temperate zone. Korea, which divides the Manchurian linoral zone. Korea, which divides the Manchurian littoral from the Ussuri coast, alone possesses such ports. Without Korea, then, all Russia's East-Asian expansion, though it added huge blocks of territory to her dominions, would be commercially incomplete and strategically defective.

the Ussuri fiction of joint occupation, they succeeded ultimately in transferring the whole of Saghalien to Russia's dominion. That was in 1875. Further encroachments upon Japanese territory could not be lightly essayed, and the Russians held their hands. They had been trebly checked: checked in trying to push southward along the coast of the mainland; checked in trying to secure an avenue from Vladiovatock to the Pacific; and checked in their search for an ice-free port, which definition Vladivostock did not fulfill. Enterprise to the direction of Korea seemed to be the only hope of saying from abortion the maritime results of the great trans-Asian march. Was Korea within safe range of such enterprises? Everything seemed to answer in the affirmative. Korea had'ali the qualifications desired by an aggres-

Pechili her ultimate absorption of North China would be as certain as sunrise; and, fifthly, that such domination and such absorption would involve the practical closure of all that immense region to Japanese commerce and industry, as well as to the commerce and industry, as well as to the commerce and industry of every Western nation except the Russian. This last proposition does not rest solely on the fact that to oppose artificial barriers to free competition is Russia's sole hope of utilizing to her own benefit any tradal opportunities brought within her reach. Rests also on the fact that Russia has objected to foreign seulements at the marts recently opened by treaty with China to American and Japanese subjects. This last proposition does not rest solely on the fact that to oppose artificial barriers to free competition is Russia's sole hope of utilizing to her own benefit any tradal opportunities brought within her reach. It rests also on the fact that Russia has objected to foreign settlements at the marts recently opened by treaty with China to American and Japanese subjects. Without settlements trade at those marts would be impossible; and thus Russia has constructively announced that there shall be no trade but Russian, if she can prevent it.

Against such dangers Japan would have been justified in adopting any measure of self-protection.

Against such tangers Japan would have been justified in adopting any measure of self-protection. She had foreseen them in outline for six years, and had been strengthening herself to avert them. But she wanted peace. She wanted to develop her material resources and to accumulate some measure of the wealth without which she must remain insignificant protect. The peace of the second protects of the second peace of the second material resources and to accumulate some measure of the wealth without which she must remain insignificant among the nations. Two pacific devices offered, and she adopted them both. Russia, instead of trusting time to consolidate her tenure of Manchuria, had made the mistake of pragmatically importuning China for a conventional title. If, then, Peking could be strengthened to resist this demand, some arrangement of a distinctly terminable nature might be made. The United States, Great Britain, and Japan, joining hands for that purpose, did succeed in so far stiffening China's usually limp vertebrae that her show of resolution finally induced Russia to sign a treaty pledging herself to withdraw her troops from Manchuria in three installments, each step of evacuation to be accomplished by a fixed date. That was one of the pacific devices. The other suggested itself in connection with the new commercial treaties which China had promised to negotiate in the sequel of the Boxer troubles. In these documents clauses were inserted providing for the opening of three places in Manchuria to foreign trade. It seemed a reasonable hope that, having commercial access to Manchuria by convenant with its sovereign, China, the Powers would not allow Russia arbitrarily to restrict their privileges. And it seemed a reasonable hope that Russia, having solemnly promised to evacuate Manchuria at fixed dates, would fulfill her engagement.

The latter hope was signally disappointed. When the time came for evacuation, Russia behaved as though no promise had ever been given. She proposed wholly new conditions, which would have strengthened her grasp of Manchuria instead of loosening it.

loosening it.

strengthened her grasp of Manchuria instead of loosening it.

This incident stupefied Japan. She herself had had some bitter experience of the Occident's tendency to put a unilateral construction on treaties textually bitateral. But the spectacle of a great Western Power deliberately and unblushingly violating its solemn engagements was new to her.

China being powerless to offer any practical protest, and Japan's interests ranking next in order of importance, the Tokyo Government approached Russia. They did not ask for any thing that could hurt her pride or injure her position. Appreciating fully the economical status she had acquired in Manchuria by large onlays of capital, they offered to recognize that status provided that Russia would extend similar recognition to Japan's status in Korea, would promise, in common with Japan, to respect the sovereignty and the territorial integrity of China and Korea, and would be a party to a mutual engagement that all nations should have equal industrial and cummercial opportunities in Manchuria and the Korean peninsula. In a word, they invited Russia to subscribe to the policy enunciated by the the Korean peninsula. In a word, they invited Russia to subscribe to the policy enunciated by the United States and by Great Briain, the policy of the open door and of the integrity of the Chinese and

United States and by Great Britain, the policy of the chinese and topen door and of the integrity of the Chinese and Korean Empires.

Thus commenced a negotiation which lasted five and a half months. Japan from the outset reduced her demands to a minimum. Russia never made the smallest appreciable concession. She refused to listen to Japan for one moment about Manchuria, and Russia, with the saisstance of Germany and France, had expelled her for reasons which concerned Japan incomparably more than they concerned any of the three Powers—the security of the Chinese capital, the independence of Korea, the peace of the East. Now Russia had none of these things concerned Japan in comparably the splendid assurance to declare by implication that none of these things concerned Japan is the subject of the Core and the subject the other Powers—that legislators a lawyer's fee of six and eightpence a day, more than they concerned Japan in comparably the septendid assurance to declare by implication that none of these things concerned Japan as partial right to be heard about Korea. And at the same time she herself commenced in northern Korea a series of aggressions, partly, perhaps, to show her potentialities, partly by way of counter-ciritant. That was not all. Simultaneously with deferring her answers to Japan's proposals and protracting the negotiations to an extent that was actually contumelious, she

tatorship, against a programme of ruthless territorial aggrandizement, and against a policy of selfish restrictions

It seems that the Russian Goliath never thought to be confronted in the lists by this Japanese David St. Petersburg imagined that the terror of its armaments would command submission. But the Japanese are not compact of ordinary Oriental stuff.— The Outlook.

PAY FOR THE SOLONS.

It says much for the unselfish patriotism of the Briton that he is the only man in the world who is willing to put his hand into his pocket and pay on willing to put his hand into his pocket and pay on an average something like £500 a year, counting his election expenses, for the privilege of giving his time and labour to the making of his country's laws: and one cannot wonder that now and then a member of Parliament, when he sees how differently things are arranged in other countries, is anxious to have matters put on a different footing.

The American law-maker, so far from allowing his The American law-maker, so far from allowing his patriotism to deplete his purse, thinks that he has well earned the £1,000 a year which Congress pays him for his legislative services; and when this little income is supplemented by many convenient perquisites, such as an allowance of £2 odd for stationery and a dollar for every five miles of travelling, he pockets his pride and accepts them as only his fair due. The French Deputy does not fare quite so well; but at any rate he can always rely on drawing his 525 francs a month for his Parliamentary services, and he never thinks of paying his own travelling expenses to and from Paris.

The colonies are so far from following the maternal example of making their legislators pay for the privilege of working, that in Victoria and New South Wales each member of the Legislature receives an income of £300 a year. South Australia pays her M.P.'s a hundred a year less, and Queensland an annual £150, to which is added a right to travel anywhere in the whole continent of Australia free of cost. The Canadian Senate and House of Commons alike pay their members a salary of £200 a year. patriotism to deplete his purse, thinks that he has

anywhere in the whole continent of Australia free of cost. The Canadian Senate and House of Commons alike pay their members a salary of £200 a year, and 5d. for every mile they travel to and from Ottawa. The members of the Legislative Assembly of Quebec receive £200 a year each, of Ontario £120. Nova Scotia £100. Manitoba £110. British Columbia £80, and New Brunswick as little as £60. It cannot be said that such payments erron the side of extravagance, but they are at any rate some recognition of good services ungrudgingly rendered. In the Legislative Assembly of Cape Colony a sliding scale is observed, the average remuneration of members being about a guinea for each day of attendance, with an extra allowance for travelling to members who live some distance from Cape Town.

Norway looks after her legislators with almost maternal solicitude. If they fall ill she provides a doctor to attend to them; she keeps them in health by providing baths and even retains a dentist to stop or extract a troublesome molar. In addition to all these small attentions she pays them a little more than the equivalent of 11 shillings a day for every day they devote to her service, and not only pays their railway fares, but allows them a daily 11 shillings for travelling and subsistence. It is fittle wonder that legislation is popular in the land of the Norsemen. Sweden, however, is not nearly as considerate a mother, for she does not insult her "House derate a mother, for she does not insult her "House derate a mother, for she does not insult her "House mented to the state of the she was not insult her "House mented to the state of the she was not insult her "House mented to the state of the she was not insult her "House mented to the state of the she was not insult her "House mented the state of the she was not insult her "House mented to the state and the she mented to the she was not insult her "House mented to the state and the she mented to the she was not insult her "House the she was not a she was not insult her "House the she

must be added free travelling in Baden, and second-class fares and three shillings a day for "sundries" in Saxe-Coburg and Gotha. The Bavarian M.P. who does not live in Munich receives to shillings a day for his attendance, with, as nearly as possible, tenpence a mile for his travelling. Hungary looks after her legislators of the lower house, who number 453, to the extent of paying them £200 a year and allowing them to travel at cheap rates, while, as a crowning consideration, she allows each member nearly £70 a year for house rent.—The Honeylass.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

THE MOROCCO BANDITS.

London, June 9.

The Sultan of Morocco has appointed a new local governor, thus complying with one of Raisuli's demands and is reported to be granting all the other demands in order to expedite the release of the captives.

Two more battleships, the *Illinois* and

Missouri, have been ordered to proceed to Tangiers from the United States.

THE MOROCCO BANDITS.

London, June 10.

American marines have been landed at Tangiers to guard the Belgian Legation.

It transpires that only two marines were detailed as a guard to the American wife of the Belgian Minister, who is living in an isolated house.

GREAT BRITAIN AND AUSTRIA.

Archduke Frederick, heir presumptive to the Austrian throne, now on a visit to England, has, on behalf of Emperor Francis Joseph, presented King Edward with the baton of a Field Marshal in the Austrian The Archduke, who to-morrow reviews the first army corps at Aldershot, is being everywhere received most cordially.

THE SAIMATZE FIGHT.

General Kuropatkin reports that I Japanese brigade attacked Saimatze, north of Feng-huang-cheng, on the 7th inst. In view of the enemy's numbers, the Russians retired, losing a hundred killed and wounded

THE CONGO FREE STATE.

London, June 11.

During the discussion in the House of Commons on a vote for supplies for the Foreign Office, Sir Charles Dilke impeached, in a lengthy speed, the Belgian Government's administration of the Congo Free State, and several members also demanded the summoning of an international conference to enquire into the same.

Earl Percy, Under Secretary for Foreign Affairs, in reply, said that while Italy, the United States, and Turkey had stated they were earnestly considering Britain's representation on the subject the other Powers

food stuffs are contraband of war.

TRUCULENT TIBET.

The Tibetans are making night attacks on the Sikh and Ghoorka outposts at The reinforcements have nearly all reached Chumbi,

THE PALMA SHOOTING TROPHY.

London, June 13.
The American winners of the Palma Trophy of 1903 violated the rules by using special pattern rifles which were not identical with the Government rifle, the result of which is that the Executive Committee of the American National/Rifle Association has

decided to return the trophy to England. JAPANESE STRATEGY.

London, June 14 The critics of the war consider that the advance of General Kuroki's forces along a

A QUEER STORY.

The Standard's St. Petersburg correspondent wires that Admiral Skrydloff telegraphs that the Vladivostock Squadron encountered a Japanese squadron thirty miles off Port Arthur on the 7th instant, but retired as none of the Port Arthur ships appeared. The squadron returned to Vladivostock on the 10th June.

REVOLUTION BREWING IN MOROCCO.

The Times correspondent at Tangiers says that a well-organized plot exists in Morocco to depose the Sultan. It originated among the religious and educated classes and derives importance by being supported even by members of the Government This revolution was arranged before the Anglo-French agreement, but the latter only added fuel to the flames, as the Sultan is now accused of selling his country to France.

AN AMERICAN SUBMARINE.

London, June 15.

It is telegraphed from New York that the submarine vessel Protector has been privately sold to Japan and is now proceeding thither on board a Norwegian ship, along with two American instructors.

DAILY OUTPOST SKIRMISHES Reuter's Agent with Gen. Kuroki's headquarters, telegraphing via Fusan, says that the only hostilities at present proceeding are daily outpost skirmishes, wherein the Japanese are always victors.

MORE RUSSIAN RESERVES CALLED OUT.

A new Ukase calls out the reserves in 61 districts in various Russian provinces.

ADEN PLAGUE INFECTED

Aden has been officially declared plagueinfected.

THE LEASE OF WEI-HAI-WEI.

In the British House of Commons, Mr. Henry Norman asked the Under Secretary of State for Foreign Affairs whether the British lease of Wei-hai-wei would terminate

upon the Japanese occupation of Port Arthur. Earl Percy, in reply, said that by the Convention of 1898 Great Britain leased Wei-hai-wei for as long as Russia occupied Port Arthur.

THE RUSSIAN VERSION'S

London, June 16 London, June 12. Despatches from General Kuropatkin, Great Britain has protested against the General Kharkevitch and General Stackel-Russian declaration that rice and other berg received in St. Petersburg, confirm the reports of severe fighting to the north of Port Adams. The reports appear to indicate an advance by the Japanese north-wards from Kwantung.

> General Stackelberg reports that in the battle on the 14th June, the Japanese re-peatedly assaulted the position south of Arafadgtau (?). He claims that the Russians retained the position, but admits that the losses were severe. A regimental commander was killed and General Gerngrass wounded.

TERRIBLE CATASTROPHE IN NEW YORK.

Later.

The steamer General Slocum, with 1,000 German Sunday School excursionists, mostly women and children, on board, has been burnt at Hell-gate, New York harbour. broad front toward Liaoyang and Mukden The fire was so rapid that no boats could be corresponds with the near approach of launched. The tugs finally beached the General Oku's assault on Port Arthur.

The loss of life is placed at 500, at least.

LORD DUNDONALD DISGRACED.

A telegram from Ottawa says that an Orderin-Council has been promulgated dismissing General Lord Dundonald from the service for grave indiscretion. The Order deeply regrets that an officer of his rank should have so regrettably failed to appreciate the principles of constitutional government.

(RECEIVED IN TOKYO.)

REFUGEES FROM PORT ARTHUR.

According to a report received from Chefoo, 19 junks containing about 1,500 Chinese subjects arrived at that place on the 8th and 9th from Port Arthur. They had presented to the Russian Authorities a petition asking for permission to leave as they had neither work nor food. Outside the port they fell in with Japanese war-ships which, finding them without provisions, gave them a quantity of rice, to their great gratitude. These Chinese had heard the sound of land-fort guns for the first time on the morning of the 7th, and had thus acquired knowledge of the approach of the Japanese Army.

THE "MANSHU-MARU."

(From our Correspondent.)

Kure, June 15.

The Manshu Marn's party inspected Kure docks and arsenal to-day and to-night they dine with the Admiral-Superintendent.

Etajima, June 16.
The proposed departure of the Navy's excursion steamer Manshu Maru for Saseho, which was to have taken place to-day, is given up. She will return to Miyajima and leave there on the 17th for Mitsugahama.

(FROM THE "JIJI SHIMPO.") RUSSIA'S LATEST MOBILIZATION.

London, June 14.

It is reported from St. Petersburg that the Tzar has called out the reserves from sixty-four districts.

GENERAL STOESSEL

A sumour is current that General Stoessel has 505tained a severe wound, while in the neighbourhood of Port Arthur, with the result that one of his feet has been amoutated.

MOUNTAIN GUNS.

Four detachments with mountain guns have been despatched from Sevastopol,

THE tea guild in Shidzuoka prefecture has held a meeting and decided to spend thirty thousand yen this year for the purpose of developing business abroad. The Committee applied on June 20th to the Governor and Council to help their enterprise by means of a subsidy.

ACCORDING to official investigations, the survivors from the transports Hitachi Maru and Sado Maru totalled on June 20th 1,139. Of these, 292 persons were from the Hitachi Maru. Many of them are now in Shimonoseki, Moji and

In connexion with the house tax question, Mr. was to be paid out as an interim dividend at the record of the percent.

Thus new steamers of the Osaka Shosen Kaisha and Osaka Shipbuilding yards will be completed which are under construction at the Kawasaki and Osaka Shipbuilding yards will be completed which are a careful Metals.

DOINGS OF THE VLADIVOSTOCK SQUADRON.

明治计五年三月計劃第三種郵便輸票可

Sunday, June 19. On the morning of the 18th the Vladivostock Squadron stopped a steamer called the Shinminato Maru in the neighbourhood of Matsumaye in Hokkaido. happened at 4.30 a.m., and the Russian squadron consisted of 3 cruisers and 2 torpedo-boats. Just when this little vessel (99 tons register) was about to be examined, the Russians sighting a bigger ship steaming along in the distance abandoned the Shinminato, which thus escaped from the jaws of death. The larger vessel proved to be the Hako Maru (149 tons register.) Her master was summoned to the Russian flagship, but apparently even the Vladivostock heroes have grown a little ashamed of employing the naval forces of the Great story reads at any rate. Colonel Suchi White Tsar to destroy the property of unoffending fishermen and traders. They let the Hako Maru go free, and moreover pre-sented to her a member of the crew of the Sado Maru whom they had on board, one Buto Genkichi. The master of the Hako Maru further reports that the Russians hold as prisoner a native of Hakodate whom they utilize as an interpreter. Buto Genkichi, is reported to have said that the Russians had captured in the vicinity of Maizuru a British steamer laden with coal and had despatched her north-ward. At 3 p.m. the squadron was observed from Awomori steering in a

It is perhaps reasonable to infer from the release of the man Buto Genkichi that the Russian Squadron did not carry away more than this one non-combatant from the *Hitachi* or the *Sado*. There was a rumour in Tokyo on the night of the 18th that the man released was one of the British subjects serving on board the Sado, but apparently this version has no truth. Further, some people were disposed to think that the capture of a coal-laden steamer-which fact, we may mention, is not officially confirmed as yet—indicated an intention on the part of the cruisers not to return immediately to Vladivostock but to remain cruising in the Sea of Japan, making their base somewhere in Saghalien. That, however, would not, we think, be probable. It is essential that the cruisers should remain in constant telegraphic communication with Vladivostock.
Of course within certain limits communication could be maintained by wireless telegraphy, but on the whole the strong pro-bability is that the Squadron will endeavour to make its way back to Vladivostock.

north-westerly direction.

Later reports tend to show that the procedure followed by the Russians in the case of the Sado at all events was as correct as possible under the circumstances. The vessel having obeyed the order to stop, was boarded by an officer who took away some 14 or 15 responsible persons evidently for purposes of consultation. Shortly after these had reached the Russian flag-ship, the latter signalled that the combatants on board the Sado must come to the cruisers and that 40 minutes would be allowed for the noncombatants to effect their escape. Thereupon a large number of the Sado's people took to their boats, but as many were ly overhauled must perforce have stopped still on board when the 40 minutes had her engines, and the accounts given by her expired, the Sado signalled for a brief extension of time. To this the Russians Russians nevertheless continued to fire on replied that as they were far within the

stance of a report compiled by Lieut.-Colonel Russians could not conveniently receive Takenouchi.

But there is nothing to mitigate the story of the treatment extended to the Hitachi Marn. Possibly the Russians were enraged by her original contumacy in refusing to stop her engines, but whatever the reason they seem to have made a target of her, and to have directed their attention mainly to slaughtering her defenseless people. Her survivors say that the Russians finally came within 100 metres and poured shrapnel into her. She was virtually riddled. powder-magazine had been already (11 a.m.) exploded, and at that time the Russians left her for the purpose of dealing with the Sado. Subsequently they returned to the Hitachi and deliberately set about butchering every living thing on board. That is how the committed suicide in his own cabin, after having caused the records to be burned. Lieut. Yoshikawa also committed suicide, and Second-Leutenant Okubo, who had charge of the regimental colours, is said to have wrapped them round his body, and then, having disembowelled himself, he put his dirk between his teeth and leaped into according to previous accounts the regimental colours were burned by order of the colonel, and this version seems to have most confirmation. Nearly all the officers committed suicide. Major Yamagata was one of the last to die, and before falling he called on any that might survive to carry home the news of what had happened. It is said that the Hitachi did not sink readily, and that the Russians returned to her a second time, pouring in a hail of balls and shooting even the men in the water.

As to the loss of life in this affair, the Jiji gives the following figures :-

On board the Hitachi Maru, Horses..... 320

Of these our contemporary says that 370 were saved and have reached Moji. If that be correct, the total loss of life was 895 in the case of the Hitachi. With regard to the Sado Maru 1,146 have thus far reached various places in safety, and it would appear that not more than 3 or 4 are missing. Altogether, then, the loss may be put at

The official accounts received on the evening of the 17th instant indicate that in all probability the casualties on board the that three corpses were found in the ship; another speaks of one only, and adds that a man died of his wounds after entering hospital. It would appear that the Russians devoted their attention at first chiefly to the Hitachi Maru. Among the mass of confused statements the actual facts as to the methods pursued by the Vladivostock ships can scarcely be deciphered. Apparently the Russians opened fire on the Hitachi because, refusing to lie to, she attempted to escape. In that the Russians were undoubtedly justified. But there came a moment when the steamer being completeher. They do not seem to have given any

prisoners. They would have found it embarrassing to encumber themselves with a couple of thousand desperate men, who, in the event of an attack by the Japanese Squadron, might have proved something worse than a mere impediment. But if the element of prisoners is to be excluded, what course should the victor adopt? So far as the non-combatants are concerned, there can be no manner of question. They ought at least to be given ample time to leave the ship, and if the state of the weather were such as to imperit navigation in open boats, the men should be taken on board the enemy's vessels. That is plain enough, and it is equally plain that the Russians did nothing of the kind. Their aim was to kill as many Japanese as possible, whether combatants or non-combatants, and they succeeded thoroughly in the case of the Hitachi. The problem of the combatants involves other considerations. If they refuse to surrender, then nothing remains but to sink them with their ship. To discuss the process of sinking seems superfluous. The Russians, according to such accounts as we possess, adopted the least merciful method. It had the sea. But it will be remembered that not even the merit of being the quickest. But according to previous accounts the registered vidence is needed before a definite judgment can be formed.

Tune 25, 1904.

The clearest account yet published comes from one of the Hitachi's survivors. says that the Hitachi and the Sado were steaming out, the former leading, when the Russians were sighted. Immediately both ships put about and steamed back at full speed, the Russians following. At a range of about a thousand metres the Russians opened fire but failed to hit the Hitachi. When the distance was shortened to 500 metres, however, 10 heavy shells from the Rossia came on board, and the ship, being disabled, lost her way, losing also many lives. Then she had a minute's respite while the Russians gave chase to the Sado Maru, and during that interval a part of the non-combatants took to the boats. But when the Sado Maru also had been disabled, which was speedily effected by torpedoes, the Russians returned at full speed to the Hitachi, and now opened on her at a distance of only 200 metres, using shrapnel. Two hundred of the *Hitachi's* people dropped almost at the first discharge. Up to this time the soldiers had been quietly waiting below, but they now came on deck, and some jumped overboard while some committed suicide. Lt.-Colonel Suchi burned Sado Maru were very few. One report says the records and then calmly committed that three corpses were found in the ship; suicide. Captain Hashimoto shot himself and Lieut. Nagao fell on his sword. followed these examples. About a hundred not having any weapon at hand, threw themselves into the sea. Among these was Captain Mishima. Some thirty got into a boat, and it is claimed that the Russians fired even on this boat, but such a point can never be clearly ascertained. At all events the boat reached the Sado Maru. Looking back, the inmates of the boat saw the Hitachi torpedoed at about 3 p.m. She went down stern foremost. With her seem to have perished three British subjects, Captain Campbell, Chief-officer Samuel Joseph Bishop and Chief-engineer James Glass. Captain Campbell had been in the service of the Nippon Yusen Kaisha since 1891. He was a most able and highly esteemed officer, and the enemy's lines it was impossible for them to delay, and thereafter they discharged torpedoes at the steamer, leaving her to her fate so soon as it seemed impossible that she should remain affoat. This is the sub-ial features to be taken into account. The is known to have been taken prisoner by three we have no definite information.

As for the Sado Maru, when she was disabled her people seem to have been of two minds. About 600 of them took to the boats at once and over 400 decided to remain on board, and go down with the steamer. They doubtless saw what was happening to the *Hitachi* and concluded that their own fate would be the same. But the Russians do not appear to have had time to complete their work of destruction in the case of the Sado. They hurried off, leaving her disabled, and did not practise their gunnery on her as they had done on the Hitachi. The result was that virtually the whole of her people were saved, not more than three perishing. The ship also is expected to survive. She drifted for about 30 hours before her people were taken off. It is stated that those remaining on board were shouting "banzai" and getting their weapons ready to commit suicide when they observed the Russians steaming away, and the possibility of saving their lives then presented itself to them.

The fishermen who saved 37 of the Hitachi Maru's people say that, in spite of the bad weather, they put to sea on the 15th from Tsuruye-ura. After some time they heard voices calling for help, and proceeding in the direction of the sound they reached a place where the sea was thick with corpses and with men who sustained themselves on life-buoys, wooden saddles and other objects. Some were covered with wounds. The fishermen took 37 into their boat, but owing to the heavy seas that were running the boat could not be loaded deeply. Another boat was soon afterwards sent to the scene, but whether it succeeded in saving any more lives we can not tell.

On board the Hitachi Maru when she was sunk by the Russians were the following British subjects:-

The commander and first officer are both married, their wives being in England. married, their wives being in England. On Kinshu Maru was left in port there, and no board the Sado Maru were 4 British sub-idea of using her for the transport of troops jects :-

Commander Captain George Anderson.
First Officer Mr. John Wm. Dring.
Chief Engineer Mr. William Kerr.
First Engineer Mr. Angus Carmichael.

said to be insignificant craft. One—the Ansei—, the property of Mr. Nakamura, a native of Fukui, was sent to the bottom on the 16th at a point 110 nautical miles from Okujiri-jima which lies westward of Fuku-Okujiri-jima which lies westward of Fukuyama; the other, belonging to Mr. Ukon Gonyemon, met her tate at 6 p.m. on the same day, the 16th, in the same seas but at a distance of only 53 miles from Okujiri-jima. These vessels were destroyed by three Russian torpedobats. The crew of the Yawata Mara, 31 Admiral Kamimura, and the obvious way of in all, were saved by the Hotoku Maru and carried to Esashi, but with regard to the crew of the Ansei it is stated that only two are known to have been saved, the fate of the remainder not having been yet as certained. According to the statement of 9.25 a.m. the Squadron left its base and processed and same transports at the hands of a fleet in being transports at the hands of a fl

be found, quelling by a display of fire-arms all resistance offered by the crew. then set fire to the little steamers, having previously compelled their crew to take to the boats. The master of the Yawato is said to have been entrusted by the Russians with a document addressed to the officials of Hakodate. It is not stated how the Hotoku Maru chanced to be able to save the crew of the Yawata, but it is alleged that she also was plundered of all the valuables she had on board.

The Russians, if the above accounts be true, have now adopted the role of pirate. They are roaming the high seas, plundering private individuals, destroying private property and slaughtering combatants and non-combatants alike. Fuller particulars must be awaited before passing final judgment, but at present the record looks as black as it could possibly be.

The Japanese press writes in a most sympathetic strain about Captain Campbell, of the Hitachi Maru, who perished with the combatants and non-combatants on board the ill-fated vessel. The British subjects on the Sado Maru seem to have been saved.

Up to the 18th instant the total number of survivors of the Hitachi and the Sado were known to be 1060, of whom not more than 60 or 70 belonged to the *Hitachi*. The loss of life on board the Sado did not exceed 10 per cent.

There are some reasons to suppose that the Vladivostock Squadron is still in the Sea of Japan. The Hakodate Authorities telegraphed on the morning of the 19th that the cruisers had been sighted near Esashi in Ezo.

In reply to a deputation of Progressist Politicians, the Minister of State for the Navy has made an interesting statement. In the first place he explained the case of the Kinshu Maru. She was not serving as a regular military transport at the time of her destruction. Her duty was to act as a tender to Admiral Kamimura's Squadron, supplying it with coal and water. When the Squadron put to sea from Wonsan, the was entertained. But in the absence of the squadron the military authorities applied for her in order to effect a reconnaissance which could be carried out more conveniently by Monday, June 20.

The Vladivostock squadron has a taller craft being torpedo-boats configuration of the weather through which the Kinshu planes which the sank two small Japanese vessels off Fuku-ultimately steamed. In this matter, there are the Yawata fore, no responsibility rested on the Navy. Maru and the Ansei Maru. Their tomage if might appear to the public in general, however, that the catastrophe to the Kinshu should have served as warning and that the calamity ought to the public in general, however, that the catastrophe to the Kinshu should have served as warning and that the catastrophe is the calamity ought to the public in general, however, that the catastrophe to the Kinshu should have served as warning and that have occurred. As to that, the whole situation must be considered. It was precisely because of the serious danger menacing

the Russians, but as to the fate of the other rob them of everything valuable that could Russians but the fog was then so dense that not even could the units of the Squadron keep sight of one another. They had to preserve their relative distances by unceasing use of wireless telegraphy, and it was out of the question to find the Vladivostock cruisers. In these circumstances Admiral Kamimura had no course but to steer for Vladivostock, choosing one of the two routes likely to be taken by the Russians. Unfortunately the Russians took the other route. The public should under-stand that the force at the disposal of the Navy does not suffice for attaching convoys to every transport passing between Japan and the seat of war. Any large batch of transports was always carefully escorted, but that was out of the question where only one or two ships were concerned. The Minister added, however, that the Authorities had decided to adopt in future thana route safer that hitherto followed.

It appears that there were great local differences of climatic conditions on the 15th instant. The Russian cruisers were operat-ing in comparatively calm seas and under clear skies, whereas Kamimura's Squad-ron when it left its base to go to the rescue, had to face heavy waves and a dense fog. It was a genuine case of ill luck. Unreflecting people are apt to suppose that every transport which sails the seas should have an escort of war-ships, but if they will quietly reflect on the dimensions of a fleet capable of discharging such duties they will recognise the unreasonableness of their views. When all is said and done, however, it remains difficult to deny that a risk was taken, and the fundamental rule of successful strategy is that all needless risks should be avoided.

REPORTS ISSUED BY THE NAVAL DEPART-MIENT

Fukuyama telegraphed at 5.20 a.m. on the 18th that 3 Russian cruisers were pass-

ing Kojima. Hakodate reported, by a telegram received at 6.45 a.m. on the 18th, that three vessels like Russian cruisers were off Fukuyama

and were firing.

Tappizaki, in Mutsu, telegraphed, in a message received at 8.40 a.m. on the 18th, that the enemy's vessels had proceeded southward and were no longer visible.

Henashizaki, in Awomori, reported, by a message received at 1 p.m. on the 18th, that the enemy's ships had steered north-west and were out of sight.

Admiral Kamimura reports in a message received on the afternoon of the 19th:—
At 8 a.m. a.m. on the 15th the scout-ship Isushima reported that the enemy's squadron was off Okino-shima steering south. At once I sent the torpedo squadron to patrol between Tsushima and Iki, and warned all vessels coming from the west to avoid Takeshiki. I also telegraphed to the har-bour-master's office at Moji to suspend the departure of any ships going westward, and the remainder not having been yet as Russian cruisers in the Sea of Japan. At Meanwine the pariot-sinp 13 issuand was in certained. According to the statement of 9.25 a.m. the Squadron left its base and proconstant touch with the enemy and was the survivors, the Russians came on board ceeded at full speed in the direction indicated. At the steamers and deliberately proceeded to The Squadron got within 40 miles of the noon, this vessel telegraphed that the enemy's squadron was southward of Okinoshima, and had headed to the north-west. Shortly afterwards she reported that owing to the heavy fog she had lost sight of the enemy. At 1.30 p.m., she again sighted the enemy at a point 5 nautical miles south of Okinoshima, but she telegraphed that once more the fog had closed down and concealed Therefore, changing our course, I proceeded at full speed towards the south of Okinoshima. But at this time the fog grew steadily denser and the range of vision smaller. Foreseeing therefore that if we sighted the enemy it would be at short fighting distance, I warned al! the ships and we advanced ready for action. failed, however, to sight the Russians. The scout-ship Tsushina now joined our ranks. I concluded that the enemy had taken advantage of the dense fog to steer north, and I therefore changed our course so as to follow him. The rain, however, steadily increased, rendering everything invisible, and we had almost to the abandon hope of getting within sight. Accordingly we steered so as to cut off, if possible, the enemy's line of retreat and bring him into action at dawn on the 16th, steaming for that purpose at full speed, It was very satisfactory to find that the vessels of my squadron pushed at full speed through the thick fog in these unwonted conditions without accident of any kind. That night torpedo-boats were sent out to search but they effected nothing. At dawn on the 16th we reached the point for which we had steered. The weather was now fine and we could see to a distance, but there was not a sign of the enemy. Therefore we again, changed our course and resumed the search but without result. On the 17th, as it appeared that the enemy were still off the coast of Japan, our cruiser squadron was extended into a wide line, and we proceeded south. The weather was beautiful, and we had great hopes of finding the enemy. We were disappointed, however. On the afternoon of the 17th we reached a point 100 nautical miles north-east of Tsushima, and were informed by wireless telegraphy that the enemy was off the Hokkaido coast. Therefore we abandoned the search and re-turned to port on the 19th. It is a source of profound regret to me that after all this effort we have failed of our purpose. I wish to express my deepest sense of pain and sorrow for the sufferers by the calamity in the Genkai Sea.'

Tuesday, June 21. Admiral Bezobrazoff has at least the satisfaction of a varied experience. Not many months ago he was a leading figure in the Russian metropolis, and enjoyed the reputation of holding the Great White Tsar in the hollow of his hand. To-day he is employing the naval forces of the magnificent Northern Empire for the brilliant purpose of sinking little Japanese sailing vessels loaded with fish manure. It is a grand and inspiriting occupation. The Ansei Maru had a capacity of 1,488 koku. She did not even enjoy the honour of being measured by tons. She was a poor little hybrid craft with a crew of 15 hands all told, and she was ploughing her lowly path through the sea polluting the summer air with that most abominable of all stenches, the stench of shimekasu, when the Russian warships bore down on her, trained the cannon of the mighty empire on her defenceless sides, and sunk her, punctuating the glorious deed by sinking two of her manure-men to keep her company. The Yawata Maru was another of these

hold 1,830 koku of decayed herrings and she had a crew of 16 hands. The Russians opened fire on her at once. They did not stop to pariey. But happily her 16 sailors escaped by boat to Esashi. Admiral Bezobrazofi should add to his escutcheon a putrid sardine and a rotten herring. He

merits the picturesque distinction.

It is now stated that 292 men of the Hitachi Maru have been saved. But the accounts do not seem to have been accurately compiled as yet. At any rate we may assume that the disaster is not so serious as was supposed.

Wednesday, June 22.
Of course it does not at all follow that because an account of the Vladivostock Squadron's raid has been telegraphed by the Russians to St. Petersburg and because Admiral Bezobrazoff is represented as having returned to his base, the Russian cruisers are really lying once more in Vladivostock. Their raid can scarcely have had for the sole motive the destruction of one or two transports. Even supposing that such a feat satisfied them for the moment, it would have to be repeated at short notice in order to achieve what must be regarded as their true purpose, namely, to relieve the pressure on Port Arthur. There can be little doubt that their intention in coming south was to They affirm that the garrison numbers some draw after them a considerable part thirty thousand, and that the railway is of the Japanese fleet, thus rendering the still open to a distance of some 12 miles. Liaotung blockade temporarily ineffective The Japanese, they add, are within 18 and perhaps furnishing opportunities for the miles of the fortress. Several mines were and perhaps turnishing opportunities for the Port Arthur destroyers and gunboats to essay something formidable against the Japanese line of communications which has Dalny for terminal point. They have failed, so far as that large aim is concerned, and may we assume that they will rest content with failure? Apparently the Japanese do not think so, for it seems that vessels in Port Arthur are keeping up steam. ese do not think so, for it seems that vessels have been warned not to go westward from Bakan, which plainly sug-gests that they look for renewed essays on the part of the Russians, and that this time the essays are expected to be pushed tishan Promontory, and also detected and still further south. It is incumbent on the destroyed a number of temporary mines. Vladivostock Squadron to take almost any risks rather than to lie idle at such a junc ture as the present, and Admiral Skrydloff appears to recognise the obligation.

The Seiyu-kai and the Progressists have both considered it expedient to formulate resolutions with reference to the transport the resolutions. The Seign-kai confine themselves to expressing the pain caused by the incident—following as it did upon the help their employers. disaster to the Kinslin Maru—and to de Stoessel is said to claring their conviction that the responsibility will ultimately be fixed. The Progression sists, however, affirm distinctly that, in their face of such a shocking event as the sinking combatants into so cruel a dilemma; placing of the *Hitachi Maru*, but in our opinion the them, in short, between the devil and the Progressists would have been better advised deep blue sea. But happily there is no had they refrained from comments which ex-danger of their being sent back by the perts are not likely to endorse, and which Japanese. may have very unfortunate effects.

PORT ARTHUR.

bearers of malodorous stuff. She had in her longer than the 22nd of June.

From the same source we learn that Kuropatkin originally proposed to move to the relief with 40,000 men, but the capture of Sulyen by the Japanese exposed his left flank so much that he reduced the relieving force to 15,000.

Monday, June 20. Four Chinese junks which left Lungwangtao on the 14th instant report that on that day 300 Russians retired to Lungwang-tao from Shaupingtau. Among them were 25 wounded men, including one officer.

This news tallies exactly with a report previously received from Admiral Togo to the effect that a squadron of his ships had assisted a reconnaisance in force made by the military at Shaupingtao on the 14th. It was then that the Novik and 10 destroyers emerged from Port Arthur and were driven back by the Japanese. Shauping is a promontory 13 miles from Port Arthur.

On the 17th inst. 13 junks reached Chefoo from Port Arthur, carrying 1,300 Chinese labourers, who had been sent away owing to the necessity of economizing provisions. When these junks first attempted to leave Port Arthur they found an action going on, and they had to defer their departure until the 15th. They were overhauled by Japanese destroyers but were allowed to proceed.

vessels in Port Arthur are keeping up steam. Admiral Togo reports that on the 16th instant at 1 p.m. No 4 Torpedo-boat Squadron observed and exploded 3 mechanical mines at a point 10 nautical miles from Liau-

Tuesday, June 21.
A telegram to Jiji from Shanghai says that the Russians have mounted 140 naval guns in the new forts at Port Arthur. Among them are 6 inch guns, 47 m.m. pieces and quick-firers. There are at least 200 guns (in addition?) mounted for the There is a difference in the tone of descense. A corps of some 4,000 Chinese lutions. Wednesday, June 22.
The Jiji Shumpo receives from Chesoo intelligence which it ascribes to a trustworthy source. The gist of it is that all the Saturday, June 18. attempts made by the Russians to clear the Kinchow (Shanhaikwan) sends a sensa-entrance to Port Arthur have proved tional telegram through the medium of the virtually abortive. Torpedo destroyers Nichi Nichi's correspondent to the effect that alone can emerge, and these devote them-Stoessel has telegraphed to Kuropatkin that selves chiefly to searching for and clearing unless relief be sent he can not hold out away the mines laid by the Japanese. The recent exit of the Novik must not be taken

as showing that she emerged freely. The fact is that she had to be towed out, and that the operation presented no little difficulty. The Russians now know well that much time and labour are necessary to restore the practicability of the entrance. Meanwhile no resolute attempts are being made to repair the wounded are being made to repair the wounded war-ships, nor are there any signs of preparations for a sortic on the part of the remaining vessels. The indications at present are that in the event of the land defences proving inadequate, the remnant of the Squadron will be blown up where it lies. Since the blocking of the harbour's mouth and the forcing of the Kinchow Isthmus, the spirits of the garrison have Isthmus, the spirits of the garrison have fallen to a low ebb, but the senior officers still proclaim their determination to fight to the death. No less than 30 temporary forts have been built on the surrounding hills to cooperate with the permanent fortifications, and the parts of the whole system are in efficient communication. Canet guns and quick-firers have been added to the armaments of the Huangkin-Shan and Pehtoushan forts in order to frustrate an attack from the Liautishan side. (This seems to be a mistake. These forts do not command the approaches from Liautishan). Chinese accounts as to the supply of provisions vary greatly, and it is impossible to distinguish the true from the false, but the stock of available coal, at all events, seems to be sufficient.

A Japanese woman who has just returned from Port Arthur to Cheloo, after long confinement at the former place, says that there are 50 Japanese prisoners at Port Arthur, most of them having arrived after the battle of Kinchow. The prisoners are well treated. A sum of 25 sen daily is allowed for the support of each, whereas the allowance for a Chinaman is only 8 sen. Beds are provided for the women. The Russians believe that

Western civilisation.

Let us remember also that the bacillos of the "yellow peril" has been chiefly cultivated in Berlin, for reasons which I need hardly dilate upon in your columns. That alone should place us on our guard against Port Arthur. Apparently the idea is that Tuchintsz will not be attacked before the close of this month. Its fall would be followed quickly by the bombardment of the fortress, which, however, can not be

anticipated before the middle of July. Such are the views set forth by our Tokyo contemporaries.

From reports carried by Chinese junks, it would appear that the Novik, assisted by one or two gunboats and several destroyers makes occasional attempts to harrass the Japanese troops on the Pingtou promontory Such an essay is said to have taken place on the 18th instant. Pingtou is only 18 miles eastward of Port Arthur, and it is always possible for the Russians to make dashes of this kind so long as they have the forts to cover them.

Friday, June 24

In the Asalii Shimbun we find a Cheloo sent by Alexieff to St. Petersburg on the 7th and 8th instant. The Viceroy reports that 3 torpedo-destroyers were sent to Talien Bay to cover the right wing of the Russian army defending the Kinchow Isthmus, and that 10 were despatched to Kinchow Bay to perform a similar service for the wing. The former squadron returned safely to Port Arthur, but of the latter one destroyer ran aground in Kinchow Bay and had to be abandoned, though her crew were saved. This tallies with the story sent by a newspaper reporter from Chefoo to Kure as to the finding of a grounded destroyer by a Japanese Squadron on the 10th instant in Kinchow Bay and her removal to the Japanese base. It may be added that the fleet of 10 destroyers do not appear to have effected anything or attempted to effect anything. They left the place before the battle.

"THE SPECTATOR" AND JAPANESE VICTORIES.

In the Spectator of May 14 appears the following letter from "Far East":-

Support of each, whereas the allowance for a Chinaman is only 8 sen. Beds are provided for the women. The Russians believe that their prisoners are badly treated by the Japanese, and they make a boast of following a more humane course themselves.

Thursday, June 23.

All the Tokyo journals publish a statement that the Russians are omitting no precaution to strengthen the defenses of Port Arthur. They have mounted 15-cent. guns in the batteries on the land side, and they pieces hitherto doing duty in the sea-front forts. They are also said to have established an advanced place of arms at Tuchintsz, which is spoken of as 4½ miles from Port Arthur, whereas the distance is really 14 miles. At this place also heavy artillery is said to have been placed in position, and as the configuration of the ground lends itself to

for fording a way southward is expected to be very great. Our readers may remember that Shwantaikou and Tuchintsz have always been spoken of as likely to prove serious obstacles, but the map suggests that the latter position is capable of being turned from Shoupingtou. Tuchintsz is within range of ship's guns on the west. To protect it against bombardment from that direction batteries have been erected and are said to be manned by marines. One third of the whole garrison of Port Arthur are believed to be massed at Tuchintsz and it is affirmed that the rome and the children in the supplier of the ground lends itself to the content of the ground lends itself to make the configuration of the ground lends itself to make the defense, the difficulty of forcing a way southward is expected to be very great. Our readers may remember that Shwantaikou and Tuchintsz have always been spoken of as likely to prove serious obstacles, but the map suggests that the latter position is capable of being turned from that direction that the consequences of Japan's victorious from the struggle—will depend very much batteries have been erected and are said to be manned by marines. One third of the whole garrison of Port Art

THE BATTLE OF TEHLISZ.

Monday, June 20.

OFFICIAL REPORTS.

[Received at the Head Quarter Staff from General Oku on the afternoon of the 18th inst.]

On the 13th instant the army moved from the Pulantien-Tashaho line, the right wing advancing by Tashaho, the centre along the railway, and the left by three roads, namely, the Foochow high-road via Wukiatun, the Szchuankou road and the Tahoai road. The cavalry took the route from Pitzewo to Hiung-yachin. Each of these columns met and dispersed small detachments of the enemy en route. On the 14th the left column reached Nakialin; the centre and right keeping touch with each other, arrived at the Chiaokiatun Tapingkow line, which is about 21 kilometres south of Tehlisz. Our reconnaissances now showed the enemy holding a line from Tafangshin to Lungwangmiao, and we therefore advanced as far as the Wangkiatun-Lungkiatun-Wukiatun line, where we posted our artillery and bom-barded the enemy's positions from 3 p.m. to 5 p.m. On the 15th dispositions were made for attacking Tehlisz. The right wing re-ceived orders to firmly hold the heights along the Sungkiatun and Wenkiatun line. During the night of the 14th-15th the centre column moved from the vicinity of Wukia-tun to the heights on the west of Taiyangkou. This morning (15th) there was a thick fog. At 5.30 a.m. we opened artillery fire, gradually increasing its vehemence. The portion of the central column that was on the north of the Foochow river was now fiercely engaged but it ad-vanced steadily, and at 9.30 a.m. it received material assistance from the left-wing column which, both infantry and artillery, reached the heights on the west of Wangkiatun. These two columns, the centre and the left working in cooperation, drove the enemy from Tafangshin by I p.m. But the enemy's artillery posted on the heights of Lungtanshan, Shanchi and Lungwangmiao kept up heavy fire on our troops. In the face of this fire the centre and left columns pushed on resolutely and ascended the precipitous sides of the hills. Meanwhile the enemy confronting the extreme right of our right column held his ground firmly and showed a disposition from time to time to assume the offensive. Therefore the infantry of the whole reserves was pushed forward, in two bodies, to re-inforce this part Previously to this word of the position. had come that the right of the right column was hard-pressed, and the cavalry had been pushed up and had threatened the rear of the enemy's left. Thus the enemy was virtually enveloped by our forces but he nevertheless held out resolutely. Moreover, it appeared that his re-inforcements had come up, for he made repeated attempts to assume the offensive and restore the situation. Finally, however, it proved impossible for him to withstand the onset of our troops, and at 3 p.m. he began to retire. fire poured on him by our troops, ultimately converted his flight into a rout, but the nature of the ground made it impossible for our men to push home the pursuit effectively. Our army bivouacked on the field.

Turning now to our left column, on the morning of the 15th it took up a position to the north of Kaukiatun to cooperate in the advance. But at 9.50 p.m. seven or eight hundred of the enemy were observed retreating from Makiafansing via Lungkau to Wukiatun, Accordingly two companies of infantry and one battery of artillery were

despatched to the hills on the east of Kiangkiatun with orders to lie in wait. At I p.m. the enemy's retreat actually brought them to the west of Lungkau, and they suffered severely at the hands of this am-

The troops that the enemy had in position at the commencement of the engagement were as follows: 25 battalions of infantry; 17 squadrons of cavalry; and 98 guns. But during the fight he received re-inforcements of unknown strength. His losses are not yet ascertained, but on the field in front of our right wing he lest about 600 dead. We took regimental colours and 14 quick-firers, and our prisoners were 7 officers, including the colonel of the Fourth Regiment, and 300 rank and file. According to a statement made by the officers taken prisoner, the commander-in-chief of the army corps was slightly wounded, the officer commanding the First Division was severely wounded, the Colonel of the First Division was killed, and the Colonels commanding the Second and Third Regiments were wounded. Our casualties are not yet quite accurately known but they do not exceed

In this fight the enemy had two and a half Divisions and was posted in a very strong position. That he was driven from it in confusion is a result of Our Emperor's

Up to the 17th instant our losses have been ascertained to be 8 officers killed—of whom the highest in rank was a captain—; 14 officers wounded, from a captain down-wards; 4 sergeant-majors wounded; rank and file killed and wounded, about 900.

A part of Stackelberg's routed army is said to have fled to Yinkow, where it is intrenching itself. The other sections have reached Haiching, where they are said to be committing all kinds of excesses. But we fail to see how troops which fought at Tehlisz on the 15th of June could be at Yinkow and Haiching within less than 48 hours. Perhaps no greater credit attaches to a story that the Chinese in Haiching and its neighbourhood have organized bands and had fights with the Russians, inflicting but it is certainly not an exaggeration to on them a loss of some 200.

whatever they were—that Kuropatkin made about events on the 15th, the day of the real battle. At the beginning of the war there was some display of frankness on the Russian side. Alexieff made no palpable concealment about the results of the torpedo attack on the night of the 8th of February. But as defeat succeeded defeat the expediency of con-

battalions of the 11th Regiment and another did not hold throughout the penning position to make an accurate report. of the document. In the middle he suddenly introduced the 9th and 10th Regiments, of which nothing had been previously said, and at the end he declared that the 11th Regiment—which was supposed to be re-presented by two battalions only—lost its colonel, 40 officers and 2,000 rank and file. Thus the two regiments and two batteries put in the forefront of the report, became finally 4 regiments together with a fifth of such unexampled dimensions that two battalions of it could afford to lose over 2,000 men. Even if we suppose that each of these five regiments numbered only 2,000 men the Russians had 10,000 men in position independently of artillery. But that, of course, is far below the truth.

The Emperor has addressed a warm message of approval and congratulation to ported as 14 must be changed to 29.

General Oku and his troops on account of the victory at Tehlisz.

be found to aggregate over 2,000. Oku's army buried 1,516 during the 16th and 17th, and the work goes on. There will be a and the work goes on. total of at least 1,800 laid to rest on the field, and we may assume that 300 or 400 were carried off by train. Hence the St. Petersburg estimate which puts the aggregate casualties at ten thousand is more likely to conclude that they lost in all six thousand.

battle. Sassulitch prefaced his report by signal addition will have to be made to this by the Takushan Army, which combined saying that "the troops engaged were the figure. According to statements made by force will probably be found equal to histard and 22nd Regiments and two batteries the Chinese, the enemy placed a number of own numerically. Assuming, then, that he

of artillery." By and bye he included two his dead and wounded in railway cars and sent them to the rear during the fight. Just General Kashtalinsky, adopting before his final retreat he buried or burned the same historical tactics, confined himself a number of corpses at Hwafungkou. The for a time to the 12th and 22nd Regiments prisoners taken and the guns captured by with two battalions of the 11th and 3 us will be more numerous than my original batteries of artillery. But his memory statement showed, but I am not yet in a

[Received at the Imperial Headquarters on the 20th June.]

The Takushan army reports that infantry and cavalry reconnaisances encountered several outposts of the enemy in the vicinity of Tsihhanling, and in other places, from the night of the 18th. One officer and 2 men of the enemy were taken prisoner. The enemy had 50 killed and wounded. Many rifles and lances also were captured. We lost one killed and had 5 wounded.

[Note—The place mentioned above is about 25 miles west of Suiying and about 23 miles east of Kaiping.]

General Oku reports that the number of Japanese officers killed at Tehlisz, previously reported as 2, must be changed to 10; the number of wounded officers previously re-

Thursday, June 23.

The retreat of the First Army Corps from Tehlisz is said to be covered by Tuesday, June 21. from Tehlisz is said to be covered by Probably the Russian killed at Tehlisz will the Third Division under General Kronderachinko (?). If that be correct-and it is so stated by St. Petersburg via Londonthe inference is that the force of the Russians in the northern part of the Liaotung Peninsula is large; or was large before the last battle. The Third Division belongs to the Third Army Corps of which General Stoessel would be in command were he not be under than over the mark. This is the shut up in Port Arthur. Stackelberg combloodiest battle yet fought. It is also the first mands the First Army Corps, and in view battle that has taken place in the open. At of the fact that he had at the battle of the Yalu and at Nanshan, the Japanese had Tehlisz more than the twelve batteries conto attack a foe entrenched in exceedingly stituting the whole park of the Corps, it may phonomy nave been comparatively small had and cavalry also, namely, 48 battalions they retreated quickly from the Kuilien of infantry and 3 regiments of cavalry heights. But being caught at Hohmutang they suffered heavily. What their full casulaties were they have managed to capacitate that he had all the infantry and cavalry also, namely, 48 battalions they retreated quickly from the Kuilien of infantry and 3 regiments of cavalry. The Third Division must have been in they suffered heavily. What their full casulations were they have managed to capacitate that he had all the infantry also, namely, 48 battalions they retreated quickly from the Kuilien of infantry also, namely, 48 battalions and cavalry also, namely, 48 battalions they retreated quickly from the Kuilien of infantry also, namely, 48 battalions and 3 regiments of cavalry. fantry with an uncertain force of cavalry and artillery. There can be little doubt that Russian Official Reports.

The first Russian official statement about the battle of Wafantien is not the statement sent in by Kuropatkin. Of that we can be sure. Kuropatkin must have told what lappened on the 15th. The official report tells alone are referred to. Butthefighton the 14th was little more than an artillery duel. From 5 p.m. to 7 p.m. the Japanese guns played upon the Russian positions and the Japanese and its right to a point whence a direct adand its right to a point whence a direct advance on Tehlisz could be made. These were preliminaries, and to these preliminaries, the Russian report limits itself. St. Petersburg deliterately elided the statements—burg deliterately elided the statements—whatever they were—that Kuropatkin made to the very limits itself. St. Petersburg deliterately elided the statements—whatever they were—that Kuropatkin made to the very limits itself. St. Petersburg deliterately elided the statements—burg deliterately elided the statements—burg deliterately elided the statements—tainly it is time for Kuropatkin himself to spoken of as covering Stackelberg's retreat, is one of the five which Kuropatkin has put its time for Kuropatkin has put it situation, we do not believe. The Russians in motion from Liaoyang. In that case the are beaten. They have been tried and found total Russian force massed southward of wanting, and it will fare with them at Hai- Haiching will soon be 8 Divisions; namely, ching, at Liaoyang, and at Mukden as it has 96 battalions of infantry, 8 regiments of fared at Kiulien, at Nanshan and at Tehlisz cavalry and 256 guns. These are very night of the 8th of February. But as defeat succeeded defeat the expediency of coning of the 17th, the number of Russians like the truth they indicate that decisive cealment became imperative. It received buried by his troops reached 1,516. The fighting is likely to take place soon. Kuroformidable figures, and if they be anything

ploying of large bodies of troops.

Floug alleges that the regimental colours taken by the Japanese at Hunghwakan—he in short, which was really of no special con-sequence, and which naturally no one on the Russian side took the trouble to pick up after the soldier that carried it happened to get shot. It does not at all signify whether or not colonels of Russian regiments have ensigns of their own flaunting in the battle. Chinese colonels have, at all events. We have never heard of anything of the kind in an English army, but it may be the custom in a Russian army for all that, and truly even the immortal Floug can scarcely be supposed to have invented such a tale. There is one little difficulty, however; namely, that the Japanese know and can distinguish Russian regimental standard just as clearly as the Russians themselves can, and Floug presumes a little too much on the ignorance of General Oku when he charges him by implication with being unable to discriminate between the colours of a regiment and the private flag of a Colonel.

The Asahi Shimbun has a telegram from

telegram from Chefoo saying that Major-General Gern-grass, who was wounded in the battle of Tehlisz, has since died.

Friday, June 24. According to reports received prior to the arrival of General Oku's last telegram, the Russian troops engaged at Tehlisz retreated for the most part to Tashikiao, leaving detachments at Shwantaitsz and Hiunyoching to cover their rear. Further, at Kaukiatung, which is on the north of Kaiping, there was a body of 2,000 Russians, who were not in the battle. General Oku's telegram shows that these detachments did not make any attempt to check the Japanese, for Hiunyoching was occupied without resistance on the 21st instant, and the evacuation of Hiunyoching would involve that of Shwantaitsz. But the troops at Kaukiatung are another matter. They cover the road to Newchwang and it is possible that an attempt will be made to hold the latter place. Possible but not probable. In fact, the whole situation southward of Haiching has become exceedingly perilous for the Russians. The Japanese at Hiunyoching are about 30 miles from Kaiping and the latter is about 28 miles from Newchwang. The junction of the Newchwang and the main railway is at Tashikiao, which lies 19 miles south of Haiching. Finally, from Kaiping to Tashikiao the distance is 15 miles. By considering these mileages the reader will perceive that on the 21st instant General Oku's van was within 45 miles of Tashikiao, and that if Tashikiao were occupied by the Japanese, all Russian troops in Newchwang and its immediate vicinity would be deprived of railway communication. Then again, if the Takushan army pushes on with any alacrity, we may hear of it at any moment at Haiching. It entered Suiyen on the 8th instant. From thence working roads lead westward. One is a mountpied by the Japanese, all Russian troops in two roads lead westward. One is a mountain road to Kaiping; the other is a
road to Kaiping; the other is a report that Kuropatkin reached Kaiping the Russians. Ultimately the Isumi's people
comparatively level road direct to Haiching. Presumably the army is marching by both of these routes, but we and it was on receipt of news of the latter thus accounted for. Were all the rest killed have as yet no news of its progress along that Kuropatkin, according to the most or wounded?

is really adopting the course attributed to him, a great battle is imminent in the neighbourhood of Kaiping; or perhaps at a point further north, the Kaiping district being too mountainous to permit the deploying of large bodies of troops. being too mountainous to permit the deploying of large bodies of troops.

Floug alleges that the regimental colours
taken by the Japanese at Hunghwakan—he
chooses this place as the designation of the
from the east, on the 19th instant, and that battle-were not the regimental colours at on the 21st the van of the Liaotung army all but were the colours of the officer commanding a regiment; a kind of personal flag it from the south. At the same time, in short, which was really of no special consince the distance from Suiyen to Haiching is only 50 miles, it may be assumed that the main body of the Takushan corps is now within striking distance of reaching. London, indeed, telegraphs that a battle has been fought there, but there is reason to day, noon) that three boats and the corpse think the statement premature. If Haiching of a sailor have been found drifting in the window of the boats were marked Izunni Maru. at Kaiping, Newchwang and Tashikiao had and the body was dressed in the uniform of effected their withdrawal northward, a very the Nippon Yusen Kaisha. These things interesting and perilous situation would be these columns. Chefoo sends word that a evidence it is impossible to believe that her detachment of Japanese troops has reached Hushan, which is only 7 miles east of Kaiping. If so, these troops belong to the Takushan bottom with her. Should such prove to be Corps. We do not trust Chefoo news, the case, Russia will stand arraigned for especially in a matter of such importance, another crime not less he for although it may not appear of much moment whether the Japanese are at Tsihhanling or at Hushan, the latter place being only 16 miles in advance of the former; the point is really vital, for if the Russians contemplated any determined resistance at Maru arrived at that port. Apparently 40 or Kaiping they would never have allowed the 50 of the crew were killed or wounded by the Takushan Corps to push unresisted to within 7 miles of their left. The Chinese made a vehement stand at Kaiping. They adopted a device not previously mentioned in history, wehement stand at Kaiping. They adopted a device not previously mentioned in history, so far as we know; namely, the repeated flooding of the approaches, so that the water froze in layers and the avenues to the place became inclines of ice. The Japanese experitanced immense difficulty in negotiating the coperation. Appearances do not indicate that the Russians intend to make a stand at Kaiping, yet if they allow themselves to be driven from that place as well as from Tashikiao and Haiching, Kuropatkin's allegdright and the standard to the signals her people took to the boats and rowed towards the Russians. But, according to one account, the latter fired on them as they approached, killing 8 and wounding Tashikiao and Haiching, Kuropatkin's allegdright and the signals her people took to the boats and some to one account, the latter fired on them as they approached, killing 8 and wounding Tashikiao and Haiching, Kuropatkin's allegdright and the survivors were thrust into the hold, but were presently summoned on deck again, just in time to see the last scenes of

uncertain) whose wound was in the head. The Russian cruiser which manage uncertain whose wound was in the head. The Russian Generals Another account says that the Russian Generals Another account says that the Russian Generals at Tehlisz were entirely misinformed as to having first fired a blank cartridge at the the magnitude of the Japanese Army marching to attack them. They did not suppose which struck the steamer below the water it possible that they could be outflanked, and she at once began to sink by and they therefore took no effective measures the stern. Several of the crew jumped overto guard against that fatal contingency. The consequence was that the men, when retreating, had to run the gauntlet through ravines every part of which was searched by the enemy's fire. It speaks well for their rowed they saw the Isumi begin to sink dogged courage that they maintained any Thereupon the Gromoboi lowered boats to

KUROPATKIN.

Peking reports that General Kuropatkin has decided to assume the offensive. Leaving 3 battalions to hold Liaotung, he will march south at the head of 5 Divisions of the East Siberian troops with 60 guns and a large body of cavalry. Since the 18th these forces have been rapidly passing through Tashikiao and Kuropatkin himself has reached Haiching. A similar report comes from other quarters, and combining these rumours with the latest telegrams from St. Petersburg, it seems fair to conclude that Kuropatkin really intends to abandon his defensive tactics and to follow the course so disastrously inaugurated at Tehlisz. Five Divisions would mean 20 regiments or 60 battalions; would mean 20 regiments or 00 battalions; an army of some 45,000 infantry, and if artillery and cavalry be added, the total would be some 55,000. Evidently that signifies a supreme effort; probably the biggest effort of which the Russian commander is now capable. What will be accounter on the Japanese side? he encounter on the Japanese side? So far as we can see he will encounter the army under Oku that fought at Tehlisz and he will also encounter the Takushan army. Concerning the latter point it will have been observed that the Takushan force is moving direct towards Taiping. Tsichauling, whence the Russian outposts were driven on the 18th or 19th instant, is only 23 miles from Kaiping, and Kaiping itself lies at the north-west of the Liaotung Peninsula. Thus Kuropatkin with his fifty or sixty thousand men, has a Japanese army operating immediately on his left flank, and the question is, will he be able to strike at them independently. Further, he will have Kuroki on his rear. If it be true that he has left only a few battalions in Liaoyang then there offers to the Japanese Army of the Yalu an opportunity which it is not at all likely to neglect. The war not at all likely to neglect. The war rounds in Korea seems to be a crafty document, which, under the guise of criticising cal, but from a strategical point of view Kuropatkin's situation is extremely Korean, is really and obviously intended to itself; namely, that the Fourth Army Corps which was at Lake Baikal in May, may now be fully organized at Mukden, and that Kuropatkin may have reason to rely on its arrival at Liaoyang in time to hold Kuroki's Japanese officials with assisting their naforce in check. There is an element of great uncertainty in the details of the position, and we find it scarcely credible that Kuropatkin should take the risk involved in uncertainty in the details of the position, and we find it scarcely credible that Kuropatkin should take the risk involved in abandoning the defence of his base to a small force while a hostile army is within 3 or 4 days' march of it. The next fortnight should be pregnant with great events.

KOREA.

Wednesday, June 22.

The anti-Japanese circular now going the round in Korea is said to be favoured by Li Yong-tai and four other more or less prominent politicians, and to be actively supported by the chief local officials of Anju and other places. The signatories profess to think that if Japan wins in the war Korean independence will be jeopardized. They would therefore have the Japanese expelled, but they do not apparently look so far ahead as to say what should be done and what would be likely to happen there after. It is scarcely conceivable that their after. It is scarcely conceivable that their carried the proposal, it was reported that the after

mental claims of the Bench, has applied for convert it into a parade-ground for foreign a fifty-years lease of all such forests, rivers, war-ships would be a wanton offense, marsh-lands and unreclaimed districts as A telegram from Shanghai dated the 19th five years to effect works of reclamation, after which he promises to pay taxes. Probably it is a good scheme. Korea wants some enterprising people to develop her. At any rate the application has been duly presented and is under consideration.

Thursday, June 23

It will have been observed that nothing has been heard for some time from the scene of the recent Russian raid on the north-eastern coast of Korea. The enterprise of the Cossacks seemed to have "petered out" from the moment they encountered opposition at Wonsan. News now comes from the latter place to the effect that according to intelligence just received, 250 Cossacks rode into Songpin on the 15th, and thereafter took the road westward towards Pyongyang. It is a long journey from Songpin to Pyongyang; quite long enough for these Cossacks to inflict a great deal of suffering on non-combatants en route. On the other hand, the Jiji Shimpo's news

is that the Cossacks are making their way to the north-west in the direction of Kangke, which would suggest that their object is to cross the Yalu, and rejoin the Mukden army. It is impossible to divine the motives or objects of such nomads, nor does it much matter.

Friday, June 24.
The anti-Japanese circular now going the Korean, is really and obviously intended to excite hatred against Japan. Twenty-six Japanese journals allege that this kind of feeling has considerable vogue among the masses, but that the circulation of such a

document is merely one move in the game of struggling for administrative power.

It is rumoured that in view of the impossibility of effecting any real reforms in Korea by persuasion and advice, Japan will now resort to more drastic methods.

CHINA.

Tuesday, June 21.

There really appears to be some truth in the extraordinary report that the German Admiral recently asked for the use of the

The Germans themselves is their sole aim.

Mr. Nagamori Tokichiro, once Chief, waters as to find the sea too small for Public Procurator of the Tokyo Local Court, in which office he distinguished himself by asserting somewhat vehemently the emolutions, and besides their proposal in which office he distinguished himself by a sacred in Chinese eyes. A telegram from Shanghai dated the 19th instant says that according to a report are not owned by private individuals or instant says that according to a report officialdom—undeveloped State properties, in brought by the torpedo-destroyer Fame on fact. He wishes to be allowed a term of the previous evening, the destroyer Sparrowhawk had gone ashore on an uncharted rock on the north of Ma-an. It did not appear that her injuries were very serious, and she went alongside of the Glory. But while her armament and ammunition was being taken out, she gradually filled and finally sank.

Wednesday, June 22.

As we conjectured, the story of the Ger-mans and the Chinese lakes assumes a very different complexion on fuller investigation. There has not been any application for a lease of the lakes as a naval manœuvreground. What has happened is simply this:—Hitherto foreign gunboats have entered the lakes freely. But in view of the excitement caused by the war, the Taotai of Shanghai recently addressed to the Consuls a suggestion that it would be better to precede such visits by notice to the authorities in whose districts the lakes are situated. The Germans were the first to act on this suggestion. They gave notice to the Taotai in Shanghai and to the Authorities in Hankow. Thereupon Viceroy Chang Chih-tung put down his foot and would not consent." reply of the German Consul was in effect:—
"Oh, very well. Then we'll simply go back to
the old time when neither notice nor consent
was needed." Of course that is a different story from the original bizarre version, but the German methods of dealing with China remain noticeable.

Thursday, June 23. It is alleged that a Russian officer, Lieut.-Colonel Matariroff (?), who was recently

Peking sends a telegram to the Nichi Nichi saying that the killed in the battle of Tehlisz on the Russian side numbered 2,500 and the wounded 3,500. Our con-temporary justly remarks that while the former figure may be a tolerable approximation, and is indeed consistent with the facts hitherto reported, the latter is obvious-ly incredible. Three thousand five hundred wounded to two thousand five hundred killed is a plainly false ratio. At the least we must assume three times as many wounded as killed, which would give 7,500 wounded and 2,500 killed; the total originally men-tioned in St. Petersburg. But the Russians now speak of fifteen thousand casualties.

agression than in Japan's professions. The matter is said to have generator is heard perpetually. The Consultation aggression than in Japan's professions. The men-of-war. The matter is said to have generator is heard perpetually. The Consultation and the noise of the men-of-war and to be now later than the machinery is merely for the hand. Of patriotism they have just enough under discussion there, but is it credible? Lighting of the buildings, but considering that

the Consulate has not more than ten inmates such a plea is ridiculous. The Japanese Consul has brought the matter to the notice of the Taotai.

In the same correspondence we read of a Russian agent who lies perdu in the house of a naturalized American, and carries on the business of purchasing beef and other supplies for Port Arthur.

SIR JOHN FISHER.

The news that Admiral John Arbuthnot Fisher, G.C.B., has been appointed Senior Naval Lord of the British Admiralty will be received with pleasure in all naval circles. this a fitting reward for a long life spent in the service of his country. Entering the Navy in 1854, he served next year in the Baltic and as a Lieutenant, took part in the capture of Canton and later of the Peiho Forts, serving on the Highflyer, Chesapeake, and Furions. This was in 1859-60. He did not smell powder again till 1882, when, as Captain of H.M.S. Inflexible, he took part in the bombardment of Alexandria, later landing with the Naval Brigade and taking com-mand of the "Ironclad Train." This he led into action and fought several skirmishes from it. In the meantime he had made a name as a naval writer and was appointed President of the Committee for revising "The Gunnery Manual of the Fleet" (1879) After the Egyptian war he was appointed Admiral Superintendent of Portsmouth Dock-yard, holding the appointment from May, 1891 to January 1892. Whitehall then required his services and he became a Lord Commisioner of the Admiralty and Comptroller of troops, South Natal Field force, at Colenso, the Navy, holding the appointment from 1st February, 1892 to August, 1897. He was made a K.C.B. on Her Majesty's birthday, 1894, and became Commander-in-Chief of the North America and West Indies Squadron 24th August, 1897; acted as naval expert at the Hague Peace Conference, 1899; becoming Connander-in-Chief of the Mediterranean Squadron, 1st July, 1899. It was at this time that he had the honour of receiving from the Emperor of Austria a photograph of His Majesty, bearing the Imperial autograph enclosed in an artistic frame of gold. When the Guisenau was lost, he despatched assistance and telegraphed to the German Emperor, through the consul at Malta, the sympathy of himself and the whole of his squadron at such a lamentable event. His Imperial Majesty re-plied, "I hasten to thank you sincerely. Your action shows once more that sailors are comrades all over the world, and that blood is thicker than water." In 1902 he hauled down his flag in the Mediterranean naured down his hag in the Mediterranean slove, queerer than its predecessors. In the and reaching England was made Second preface the author tells his readers that the Naval Lord, from which post he has stories are taken from old Japanese books now been promoted to the position and he gives his authorities, but many of announced by Reuter. Sir John is known as them to our knowledge are current upon the an authority on gunnery and torpedo-work and has done much to raise the standard

LORD DUNDONALD'S DISGRACE.

Reuter's telegram to the effect that an Order-in-Council has been promulgated dismissing General Lord Dundonald from the service for grave indiscretion, left us altogether in the dark as to the grounds for the public disgrace of so distinguished an officer, farther than that he has" regrettably failed to appreciate the principles of constitutional govern-ment," but a telegram in the *China Mail* says Canadian Militia since 1902, comes of a race of and scientific services, and has himself a brilliant military record. Douglas Mackinnon Baillie Hamilton Cochrane, twelfth Earl
Water receptacles where the mosquitoes Oct. 1852, and succeeded his father, the eleventh Earl in 1885. the Consulate has not more than ten inmates such a plea is ridiculous. The Japanese Consul has brought the matter to the notice of the Taotai,

In the same correspondence we read of a Russian agent who lies perdu in the house of a naturalized American, and carries on the business of purchasing beef and other supplies for Port Arthur.

SIR JOHN FISHER.

The news that Admiral John Arbuthnot Fisher, G.C.B., has been appointed Senior Naval Lord of the British Admiralty will be received with pleasure in all naval circles. It is a fitting reward for a long life spent in the service of his country. Entering the Navy in 1854, he served next year in the Baltic and as a Lieutenant, took part in the capture of Canton and later of the Peiho Forts, serving on the Highflyer, Chesapeake, and Furious. This was in 1850-60. He did not smell powder again till 1882, when, as Captain of H.M.S. Inflexible, he took part in the bombardment of Alexandria, later landing with the Naval Brigade and taking com-mand of the "Ironclad Train." This he led into action and fought several skirmishes from it. In the meantime he had made a name as a naval writer and was appointed President of the Committee for revising "The Gunnery Manual of the Fleet" (1879). After the Egyptian war he was appointed Admiral Superintendent of Portsmouth Dockyard, holding the appointment from May, 1891 to January 1892. Whitehall then required his services and he became a Lord Commisioner of the Admiralty and Comptroller of the Navy, holding the appointment from 1st February, 1892 to August, 1897. He was made a K.C.B. on Her Majesty's birthday, 1894, and became Commander-in-Chief of the 1894, and became Commander-in-Chief of the 1900. Commanded 3rd Mounted and Naval North America and West Indies Squadron Volunteer Brigades in the fighting in the North America and West Indies Squadron 24th August, 1897; acted as naval expert at the Hague Peace Conference, 1899; becoming Commander-in-Chief of the Mediterranean Squadron, 1st July, 1899. It was at this time that he had the honour of receiving Major-General for distinguished service, from the Emperor of Austria a photograph of His Majesty, bearing the Imperial autograph enclosed in an artistic frame of gold. When the Guisenau was lost, he despatched assistance and telegraphed to the German Emperor, through the consul at Malta, the sympathy of himself and the whole of his squadron at such a lamentable event. His Imperial Majesty replied, "I hasten to thank you sincerely. Your action shows once more that sailors are commades all over the world, and that blood is thicker than water." In 1902 he hauled down his flag in the Mediterranean and reaching England was made Second Naval Lord, from which near the haulest stories are taken from old Lord from belief and Kyushu. We Naval Lord, from which post he has now been promoted to the position announced by Reuter. Sir John is known as an authority on gunnery and torpedo-work and has done much to raise the standard of firing in the British Navy. His many decorations include the Baltic medal, the China medal, with Canton and Taku clasps, the Egyptian medal, with Alexandria clasp, Khedive's bronze Star, the Osmanieh Order, and the G.C.B.

The Yokohama Specie Bank received a telegram on June 16th from its branch in London to the effect that the Japanese loan bonds still continued advancing in the market. 4 per cent. bonds were quoted at £77:5; and 5 per cent. bonds and war bonds at £90:1:9 each; but the new war bonds fell slightly. The Russian loan bonds in London and Paris are stationary.

LORD DUNDONALD'S DISGRACE.

Reuter's telegram to the effect that an Order-in-Council has been promulgated dismissing General Lord Dundonald from the tween Oiso and Hiratsuka service for grave indiscretion, left us altogether in the dark as to the grounds for the public disgrace of so distinguished an officer, farther than that he has " regrettably failed to appreciate the principles of constitutional govern-ment," but a telegram in the *China Mail* says that his Lordship, in the course of a public address, accused a Canadian Minister of striking out of the promotion list, for political reasons, the name of a Militia Officer whom his Lordship had promoted. Lord Dundonald, who has been in command of the Canadian Militia since 1902, comes of a race of brilliant military record. Douglas Mackin-non Baillie Hamilton Cochrane, twelfth Earl of Dundonald, C.B., C.V.O., was born 29th Oct. 1852, and succeeded his father, the eleventh Earl in 1885. He was educated at Eton and entering the 2nd Life Guards in 1870, served in the Nile expedition 1884-5 and in Stewart's desert march for the relief of Khartoum, taking part in the battles of Abu Klea and Goubat; commanded the transport on march to Metemneh; acted as guide to front; volunteered to ride with dispatches across the desert from the front announcagain, announcing the death of Gordon and the fall of Khartoum. He was promoted Lieut.-Col., commanding the 2nd Life Guards. He commanded mounted troops, South Natal Field force, at Colenso, etc., 1899; 2nd Cavalry Brigade, with which he took part in the Tugela fighting in advance of the Natal army, 28 Feb.

A rumour was in circulation in Yokohama on Saturday evening that Mr. Hector Fuller, correspondent of the Indianapolis Times has been shot by the Russians as a spy. Mr. Fuller passed through Yokohama some three months ago, intending to go to the front with the Japanese army, but grew tired of waiting for his passports and went over to China to view the war from the Russian side.

There is talk of a serious accident to transports which recently left Nagasaki. On the 15th instant they encountered a heavy gale and several of them were driven towards the Korean Coast, where they grounded. One is said to have been in imminent peril of losing all on board, but a sailor managed to carry a rope ashore and the crew were thus saved. The whole story is very vague. How many transports were involved and what loss resulted there is no clear indication. own information is that one only went ashore, and that it was in the service of the Navy carrying supplies.

The military critic of *The Times* says this the "news" in the following clippings from about the last blocking expedition at Port English papers:—

Arthur:—

The heroism of the officers and crews of the doomed ships was as fine as anything recorded in the (annals of naval war, and, even if it stood alone, would stamp the Japanese navy as a service worthy to take rank with the best. Out of 159 men on board the steamers, only eight officers and 36 men returned unhurt, the whole of the remainder, including 20 officers, being killed, wounded, or missing. The very success of the operation made escape difficult, while the heavy weather prevented the attendant torpedo craft from taking mf all the crews when the ships went down. However much we may regret this heavy loss, we can only feel the deepest admiration for a navy which has been able to perform such a gallant act and for a nation which boasts such splendid sons. Happy indeed is the country where bravery and intelligence are combined in so just a measure! measure!

The Times, writing editorially about the blocking enterprise and its immediate results,

Japan has lost sons where my country in any age might be mounted with pride, but it is their death which has enabled her to develop a fresh stage in what bids fair to be the most momentous of modern campaigns fought on the soil of Asia.

It is stated that a Norwegian steamer carrying contraband of war to Port Arthur has been captured by Admiral Togo's scouts and sent to Nasagaki under escort.

The Official Gazette publishes pictures of the new gold notes of Formosa. They are very pretty objects, identical in design, so far as we can judge, with the bank notes that circulated in Japan a few years ago. Perhaps this reproduction of an old pattern was suggested by the presence of dragons in the picture. The Chinaman loves dragons. It is a pity, however, that if dragons were to be introduced the imperial reptile with five talons was not preferred to the vulgar monster with only three claws.

the following romantic story to beat. Its inventor must be a genius of figures for 1902; the first order. We hope Capt. Troubridge, Rate Port entire P the first order. now at home in England, will read the story for it will cause him, we imagine, a hearty

for it will cause him, we imagine, a hearty laugh.

New York, May 29.

An officer in the service of the United States, who had special opportunities for observation of the preparations for war by Japan and her conduct of the struggle up to about a month ago, returned recently to this country. He was asked the other day what he regarded as the most important feature of the war up to date. He promptly replied — of the strange disappearance of Captain Ernest 10 Charles Thomas Troubridge, the British Naval Attaché at Tokio. Not the slightest effort has been made to find the Captain, and the British Government has never so much as made inquiry as to his whereabouts, so far as the representatives of other nations in the Far East have been able to learn. Troubridge is 42 years old, and one of the brightest officers in the British navy. He is a master of naval tactics, and is particularly keeninthe handling of naval guns. He disappeared from the capital a few days be before Admiral Togo's squadron sailed from Sasebo. We haven't any definite knowledge that he sailed away with Togo, and we don't know that he's on you have the manceuving of Togo's ships and in the general conduct of his campaign that have led foreign ynaval sharps to become as certain as they want to be that Troubridge is on the flagship in the capacity of general advisory counsel. At any rate, the never came back from Sasebo and nobody at the British Legation at Tokio appears at all worried over the Captain's continued absence."

The reporters may be partly to blame for

DR. PENTECOST ON JAPAN.

"On the other hand, there is no prejudice against Christianity. Young men who have received a Christian education are eagerly sought after for Government employment. Girls who have been trained at the Christian colleges are in great request for wives. Head-teachers have told me that on the closing day of the session the doorsteps of the colleges are besieged by Japanese men who want to get Christian wives. Thus we find dotted all over Japan hundreds of wives and mothers who have received a Christian training. Amongst a certain political section it is even felt that Japan must before long adopt Christianity, and the reason for this is not hard to discover. All are agreed in admiring and adopting European civilisation, but it is felt that this can never be truly grafted on to the ancient Pagan faiths. Christianity is indeed the hope and the promise of the future. Buddhism and Shintoism, and especially Confucianism, look back to the past, and cannot therefore meet the aspirations of an eager and rising people."

MISS E. P. HUGHES ON JAPAN.

has formed a very high opinion of the Japanese. The lecturer dealt chiefly with the social and industrial higher of Japan. Referring to its religion she said that she was considered to be a most religious person, because of her zeal in mountain climbing, and her liking for dramatic performances; these two rites entering largely into their worship of the great sun-goddess. Miss Hughes was in Tokyo when the Anglo-Japanesa alliance was proclaimed, and being the only English lady there she was greatly honoured as the representative of the "Land of the West," of which the Japanese think so much. Japanese think so much.

The following statement, compiled by the United States Bureau of Commerce and Labour, may be accepted as showing the (coastwise trade not included) tonnage entered at the principal ports of the worldports having a tonnage of over 1,000,000 tons—during the year 1902, with the exception of the United States ports, the figures of which are for the fiscal year ended June 30, 1903. The figures for the United States 30, 1903. and Great Britain are taken from the official the American papers during war-time, but the following romantic story will be difficult to beat. Its inventor must be a continued to be the countries of the remainder are taken from the annual reports of the United States to beat. Engineering illustrates and describes the details of the Yerkes telescope, which has an aperture of 40 in., and weighs no less than 70 tons, while the parts which have to be put in motion to set the telescope on a star weigh 22 tons. One of the chief advantages of these large telescopes is not the greater size of images which they are able to give, but their greater resolving power, or their power of showing details which in a small telescope would be entirely lost. This power is illustrated, for instance, by the effect when observing the fixed stars. These bodies are at such enormous distances from us that even in the most powerful telescopes they behave as simple points of light, and present no area which can be increased by magnification. It is quite true that when a star is observed in a good telescope, a defined disc is seen; but thisthe spurious disc, as it is called by astronomers—is a diffraction effect; and it follows from All of these movements, as our Tokio Correspondent points out, are the first fruits of the act of at the New Chesterton Institute, Cambridge, on Frich the wave theory of light that the dimensions of this disc, expressed in angular measures, day evening last, by Miss Hughes, the well-known of their gallant comrades were not sacrificed in vain.

MISS E. P. Hughes on Japan.

Most opportune and interesting was a lecture give the wave theory of light that the dimensions of this disc, expressed in angular measures, will decrease in direct proportion to the increase in the diameter of the object-glass of the telescope used. In a good 5-in, telescope of their gallant comrades were not sacrificed in vain. the seventh magnitude—or a star having a brightness a little less than half that of the faintest star which can be seen with the naked eye-will have a diameter of rather less than I second of arc; and it thus follows that to be seen as independent objects in such a telescope, two stars must be not less than about one second of arc apart from centre to centre. But in the Yerkes telescope of 40 in. diameter, the diameter of such star discs would be under one-eighth of a second of arc; and thus two such stars, which are but one-eighth of a second of arc apart from centre to centre, can be seen as clearly separate objects, and their relative positions measured. In the Yerkes telescope the star images, having an angular measure of rather less than one-eighth of a second of arc, will have a lineal measure at the focal plane of about $\frac{1}{2 \cdot 0 \cdot 0 \cdot 0}$ in. in diameter. Now this focal plane is situated at a distance of about 32 ft. from the polar axis on which the telescope rotates; while the spiderwebs-or so-called " wires of the micrometer used for star measurements will have a diameter of from about $\frac{50000}{6000}$ in. to $\frac{1}{1000}$ in., or say, a mean of about yen, $\frac{1}{10000}$ in. The problem thus is to move this 22-ton mass with such steadiness, in opposition tion to the motion of the earth, that a star disc $2\frac{1}{5000}$ in. in diameter can be kept threaded, as it were, upon a spider web $\frac{1}{6000}$ in. in diameter, carried at a radius of 32 ft. from the centre of motion. This is a problem in mechanical engineering demanding no slight skill to solve; but it has been solved, and with the most satisfactory results.

fact that may have considerable significance is connection with the divorce problem has just been brought to light in the English official record of judicial statistics for 1902, namely, that out of 1050 suits in that year for dissolution of the marriage tie 415, or nearly half, were cases where there had been no children by the marriage. That children form a strong tie to bind parents together is a fact of common knowledge, but that childless marriages in themselves tend to the divorce court seems a fair inference from these statistics.

Another brave young Japanese has fallen into the hands of the Russians and been executed. He was a native of Kumamoto, Nakayama Kumakichi by name, and after graduating at one of the Middle Schools in 1901, he proceeded to China. When the rupture of diplomatic relations between his country and Russia took place, he went to Manchuria, announcing the fact in a letter to his parents, which he said would probably be the last they should ever receive from him. It is not precisely known what immediate object he had in view, but the supposition is that he applied his energies to railway wrecking. A telegram has just been received announcing his execution. He was only 25.

about to be supplied with a long-felt want— of a hospital on Mount Kellett, Hong-kong, to quote from the will, "for the glory of God and the good of men, in loving Imperial Academy of Music Tolyno Control of the glory of God and the good of men, in loving Imperial Academy of Music, Tokyo, assisted memory of my sainted wife, Matilda Lincolne classes in piano, harmony, counterpoint, The va'ue of the estate was proved as under composition, and singing, special attention being devoted to juvenile or elementary pupils. reward will be commensurate with the be applied further to charity or to inure to ability and capacity of the teachers.

Viceroy Alexieff is said to be on his way back to St. Petersburg, where he is expected to receive a disagreeable welcome. Indeed Shanghai, which sends this news, predicts that if he be not fusilladed, he will at all events be disgraced. Such predictions are scarcely worth discussing. Alexieff has made mistakes, undoubtedly, but he has done what to his short-sighted eyes seemed best adapted to promote his country's interests, and men are not shot in this twentieth century for errors of judgment.

The Furvan is said to have observed on the 20th instant a mine floating about in the direct route of ships to Newchwang. This kind of cruiser will not really attract public attention until some catastrophe occurs to neutral shipping, and even then the question will depend largely on the flag flown by the

Corrected returns show that the subscriptions to the new loan totalled 322,199,800 yen, the amount above par being 7,091,475

Correspondence from the Liaotung army shows that the Japanese cavalry rode to the heights overlooking Dalny on the 27th ult. at 10 a.m., the battle of Nanshan having taken place on the 26th. The town was not effectively occupied, however, until the 28th. Some skirmishing took place on the 27th, but there was nothing like organized resistance on the part of the Russians.

Owing to the State's use of many of the steamers on regular coastwise routes in Japan, the chief shipping companies have been obliged, we read, to charter vessels in order to carry on their most pressing work. The following list is published:-

Септрапу.	Number of Ships chartered.	Townage.
Yusen Kaisha	21	60,525
Osaka Shosen Kaisha	19	33,911
Mitsui Bussan Kaisha		15,708
Hokkaido Tanko Tetsudo Ka	isha. 4	13,195
Others	24	43,125
Total	77	166,464

It is stated that the average rate paid per ton is 4 yen, and accounts are published to show that at such a price the companies are suffering heavy loss. On the other hand, they would suffer worse were all their ship's suddenly returned to them by the Government, for owing to the war there is comparatively little demand for maritime carrying facilities.

Judgment was given on June 2nd by His Honour the Chief Justice of Hongkong (Sir Wm. Goodman) in what is locally known as the Granville Sharp Will Case. The late Mr. Granville Sharp, after giving certain legacies amounting to some £1,600 to various triends and relations, and certain life annuities amounting in all to some £300 per annum to other relations, bequeathed the re We are glad to notice that Yokohama is sidue of his estate in trust for the erection Miss Marie Kayser, will commence the same to be called Matilda Hospital. need emphasizing in our columns, but we and the executors applied for directions cannot conclude our notice without wishing as to whether this scheme was a full comsuccess to the undertaking. It has a splen-did field to exploit and we feel sure that the unexhausted portion of the estate was to

the benefit of the next of kin, and, if so, who were such next of kin. The Chief Justice, after ching the authorities, delivered judgment that the surplus of the devoted to charity and the cy-pres doctrine. be applied, and that there was no resulting trust for the next of kin as regards such surplus. He therefore ordered that the residuary bequest in the will and codicil is. good charitable bequest, that an inquiry be made by the Registrar as to the nature, scope and size of the hospital with a view to the future expansion, if necessary, of such hospital, and that a scheme for the erection, endowment and management of such hospital be prepared by the executors and trustees, and settled by the Registrar, subject to the approval of the Court. Also that the Registrar make inquiry as to the charitable purposes to which any surplus of the residuary estate ought to be ap-plied and that a scheme for the purpose be prepared and settled subject to the approval of the Court for the appropriation of such surplus. The costs of all parties to be taxed and to be paid out of the residuary estate. This decision, if maintained, says. the correspondent of the North China Daily News, will exclude the next of kin from any participation in the appreciation of the property, already amounting to nearly a million and a-quarter dollars.

In consequence of the convention concluded at the International Telegraphic Conference last year in London, the following changes of telegraphic rates are announced, to go into operation from July 1st :-

A CHANCE FOR A FUTURE SULLIVAN.

Seated one day at the organ, I was anxious and ill at ease; For I found upon inspection There were several missing keys. I knew not what I was playing, (Tho' 'twas hymn two hundred and ten), But it made a row like a starving cow, When it came to the grand Amen!

I sought to discover the meaning Of a sound so wild and weird; I crept inside on hands and knees Aud found just what I feared. The Flute and Vox Humana Were mute and declined to sing; The reeds, alack! showed many a crack. And I tied them up with a string.

The bellows I neatly mended With the blower's trouser brace; I managed well to secure the swell With a stamp and an old bootlace. But I'd made my efforts vainly, I lost my temper then, And said a word which the parson heard, It did'nt sound like - Amen.

Liverpool Porcupine.

THE BATTLE OF TEHLISZ.,

THE position chosen by the Russians Tehlisz was dictated apparently by the was not a good position for desence because retreat presented difficulties, and doubtless our readers will observe that they moved out 30 miles and crushed him General STACKELBERG, in his report of the fight, speaks of retiring by three roads, the We are not at liberty to speak of the cominclusion of which item in an outline despatch is significant.

On the other hand, the very hilly character All we can say is that he had his men exactly The Russian General will be greatly blamed. The Japanese

THE WAR AND AFTER

IN an interesting article suggested by the Battle of the Yalu the Spectator makes the following remarks:-

The Japanese as fighters, in fact, have proved themselves the equals, if not the superiors, of troops considered equal to any in Europe. General Kuroki himself speaks of the "stout resistance" of the Russian soldiery, and what the "stout resistance" of Russians means military historians know from the record of twenty battles. There are no troops, whether British, German, or French, who advance on Russian divisions with light hearts.

This fact, when once clearly apprehended, must have two consequences, one distinctly bad, the other.

have two consequences, one distinctly bad, the other, and larger, at the best but doubtful. The war must be a protracted one. The Russians cannot accept peace unless completely exhausted, or admit of European intervention, or slacken their efforts even through fear of internal discontent. To be beaten at sea, though an extreme annoyance, and even humiliation was of no equivalent significance to a defeat sea, though an extreme annoyance, and even humi-liation, was of no equivalent significance to a defeat by land. The Russian people are not maritime,—the majority have never seen the sea or a fleet upon its waters. They do not comprehend sea-power, which even the common English find it difficult to realise, and they might easily be persuaded that their failure was due to some socident some stunidity or some uperyected use of persuaded that their failure was due to some accident, some stupidity, or some unexpected use of unknown explosives. A defeat on land will, however, dismay as well as amaze every Russian—as is proved by the obvious effort at St. Petersburg to minimise or confuse the character of the battles on the Valu—and will create a universal demand for a "glorious vengeance" as a neccessary consequence. To the average Russian there is something of insult to his Emperor and to himself in a defeat in the field. Russia must put forth her whole strength and display her whole power of endurance before she consents to her whole power of endurance before she consents to listen to any terms whatever, and this implies a war of years and continuous campaigns. So long as they can avoid the internal commotions of which we spoke last week, the Russian resources in men are limitless; we doubt their total inability to accumulate a new fleet—money goes so very far nowadays—and though feet—money goes so very far nowadays—and though their pecuniary resources are not inexhaustible, they include the willingness of the people to accept inconvertible paper in payment for wages and for food. The war, unless stopped from within, must, we feel sure, go on until at least stalemate is reached; and if even stalemate is reached, look at the change in the position of the world. A new Empire will have risen in a grand geographical position which must dominate the North Pache, and which, unless defeated at sea, can despatch to any coast in Asia an army of sixty thousand men so good that to resist it with anything except an equal force of European soldiers would be pronounced by experts the height of folly. That changes the position, and, if we are to speak the full truth, diminishes the safety of every white Power—including America, whose great colony of the Philippines would be less defensible—which has grave interests or broad territories on the Asiatic grave interests or broad territories on the Asiatic Continent. Imagine France, which is a very great Power, desiring to acquire Hainan—a most natural object of ambition for the masters of Indo-China and informed from Tokio that Hainan must remain dependency of China. Or imagine a hint, conveyed to William II. as General Grant conveyed a hint to is an immense change in the situation of the world, even if Japan desires to keep up, as she probably will, her links of friendship with the two great Anglowill, her links of triendship with the two great Anglo-Saxon States. We understand as yet, remember, little of the deeper springs of Japanese policy, knowing only this for certain, that the Japanese, with all their virtues and capacities, are an ambitious people; that they are terribly pressed by the inadequacy of their landed estate to their growing population; and that their people have shown themselves in Korea, in Formosa—indeed, in China itself -a people with the capacity of unhesitating rule.

What a curious strain of morality pervades sober Spectator showing itself nearly as much dazzled by Russia's might as is Mr. HENRY NORMAN, and confessing that anything a singular resemblance to that of Mr.

Both are fully persuaded that no difficulty in conceiving a treaty of Mukden imposed on the Russians by the Japanese in 1904 just on the treaty of Nertchinsk was imposed on them by the Chinese in 1689. Russian annals do not create the impression of a nation physiologically incapable of accepting defeat. In Europe the Muscovite has never been a conqueror in the sense that the Spaniards have been conquerers, the French conquerors, the German conquerors and the English conquerors. Yet each of these nations has passed through the fire of discomfiture, has yielded to the inevitable, and has survived without any abiding sense of insult or any absorbing thirst for vengeance. It sounds very like emotional romance to claim for Russia over and above all States in the world an unconquerable rebe either old or learned to recall facts which prove the extravagance of such a theory. The Russians have shown themselves quite more sensitive about defeat than any other people. There will come a time in this war when both sides must pause to consider the cost of further effort, and when Russia will have to estimate whether to purchase the privilege of forswearing herself is worth an outlay of blood and treasure such as never yet confronted any Power. Suppose the Japanese posted at Mukden, suppose Port Arthur and Vladivostock in their hands, and suppose the lower reaches of the Amur and the whole of the Sugari patrolled by their squa--, what kind of sacrifices would be required occupied half a year ago? It is not con- them.

But the probability of an endlessly pro-Russia can not possibly accept defeat. "A tracted fight is not the Spectator's only session of the Thomas defeat on land," we are told, "will dismay trouble. That respectable weekly suggests as well as amaze every Russian and will with bated breath the stupendous contingencreate universal demand for a glorious cy that France may be deprived of freedom vengeance as a necessary consequence." to gratify her "most natural ambition" by And we are further told that "to the robbing China of Hainan, and that average Russian there is something of Germany may be recommended to find be an article of public faith and on what to Germans of the best class. In other a not very distant past shows us a situation which England has pledged herself to assist ambition, a wholly unproved quantity, and swayed any nation.

THE SITUATION.

THE past few days have been days of great excitement-a veritable hour of crowded life. The disaster of the transports took place on the same day as the battle of Tehlisz, and between the two events the public were almost bewildered. It proved to be another illustration of the old experience that objects in the foreground overshadow those in the background. The loss of the pugnance to be conquered. One need not Hitachi Maru, involving as it did the swift and terrible death of about a thousand men who, less than a week previously, had marched through the streets of the Japanese capicapable of resignation and not one whit tal through cheering crowds, was a cruel and appalling catastophe. But its influence on the fate of the war could not be counted worthy of notice. Had the country lost these men in fair fight, had their death taken place in the sequel of defeat, the case would have been very different. Butchered as they were, however, in cold blood without any possibility of resistance and without any trial of strength, struck down by a mere chance which belonged to the chapter of always possible accidents, their fate may have filled many eyes with tears but its drons-suppositions not at all extravagant wider effect was to stir the heart of the nation to a fierce desire for vengeance. It of Russia in order to recover the position she has stiffened the Japanese, not weakened On the other hand, happening ceivable either that she would lightly make in the field of immediate vision, it bulked so such sacrifices, or that they could be weigh- largely as to hide the incomparably greater ed for an instant against the conditions of event which occurred on the same day peace proposed by Japan. Never in this at Tehlisz. The fact is that the Tehlisz context should we forget that Japan declared battle is much the most important of the her willingness to accept complete efface- three hitherto fought. 'at Tehlisz merely beat back a relieving

which, even though it had gained posnever have passed the Nanshan Isthmus was the bays of Kinchow and Dalny both in Japanese possession. The importance of Tehlisz lay in the fact that it represented what must be regarded as the strongest insult to his EMPEROR and to himself a plausible pretext for clearing out of capable to restore the situation. He delibering a defeat in the field." When did this Kiaochow, which she obtained by an act ately moved down this relieving force, effort of which KUROPATKIN is immediately magnificent invincibility of Russia begin to of international piracy perpetually distasteful organizing it with all the forces he could spare from the defences of Liaoyang, Mukhistorical facts is it based? Retrospect into words, the integrity of the Chinese Empire, den and Haiching, and he invited the Japanese to try conclusions with him in a position analogous in some very marked respects to in protecting, ceases altogether to be a desir- from which all naval participation was exthat now existing. If we replace the name able object when Japan becomes its principal cluded. In short he offered battle under of Stepanoff by Alexieff, Albazin by Liao- protector. The Spectator is enslaved by circumstances which deprived him of any yang and the Amur by Manchuria, there is racial prejudice to an extent quite unsightly. of the excuses invented to palliate the It fails even to recognise the extreme extra-defeats at Kiulien and Nanshan. The vagance of apprehensively citing Japan's Tehlisz army consisted of two Divisions and a half; namely, 10 regiments of infantry, or ignoring Russia's ambition, than which no 30 battalions. Assuming that each battalion passion more practically imperious has ever numbered only 800 men, there is here a force of 24,000. He had also 98 guns. The artillery of an army corps which comprises 3 Divisions, is only 96 guns, and we are therefore disposed to think that STACKELBERG'S army consisted of the whole of the First Army Corps, that is to say 36 battalions of infantry, with twelve batteries of artillery and 3 regiments of cavalry. At all events, the most moderate estimate shows it to have totalled 30,000 men. Against this formidable force the Japanese General can not have marshalled a greatly more numerous force. As to this the usual secrecy is observed, but we do not see how General Oku can have had more than two Divisions in the fighting line on the 15th instant. The result was an overwhelming defeat for the Russians, a defeat which appears to have cost them enormous loss, no less than some 30 per cent. of their total force. What was the cause of this signal failure? It is perhaps impertinent to pass any criticism at this early hour, but the broad outlines of the fight seem to show that the Russian tactics were radically defective; they were the tactics of 50 years ago. Japanese fighting front extended over a distance of some 20 miles; the Russian front did not cover a third of that distance. It is scarcely too much to say that; other things being equal, fighting potentiality with modern weapons is in the direct ratio of the fighting line's extension. This battle's importance, then, lies in the fact that it shows Russian methods to be fundamentally faulty. In fact the Russians are beaten. That is the inference. They may change their methods during the course of the struggle, as the British changed theirs in South Africa, but that is a very big order. It were a pity that these things should be obscured by a comparatively trivial incident such as the sinking of a transport, however shocking the circumstances under which the

LETTERS FROM THE " MANSHU MARU."

(To the Form (MAIL.") to-day by the reading of an official report from the front that it can hardly with absolute accuracy be described as an excursion, still less as a picnic -has been favoured with the very finest weather through great part of the Inland Sea. It is true that at the moment I begin this letter we have only got as far as the Mihara Strait; from the saloon windows I look out to right and left on scenes which I cannot hope to describe. We are at the entrance to this piece of intricate navigation and the land each moment recedes and advances as bay and headland open, are seen for a few minutes and then are closed out. We are still as I say, some distance from Kure, and after Kure there is still some Inland Sea, so that the bright sunshine and glassy waters through which we now drive our way may in a few hours be changed for mist or rain or storm. I am no prophet-at any rate I am not licensed for the Inland Sea-so perhaps I should refrain from weather forecasts, but it is not conceivable that present conditions will change within the next few hours. I presume therefore that we shall carry these conditions with us to the end of our second stage, which is Kure.

According to arrangement we duly left Kobe at four o'clock in the morning, the idea, I believe, being to reach Kure before dark. It was not a promising dawn that one looked forth upon as the Manshu Maru swung out of the harbour and laid her course for Awaji Strait. There was a slight rain; there was even an appearance of threatened bluster; but ere we reached the east end of Awaji the danger had disappeared and as we brought the little lighthouse abeam the sun broke out gaily and from that auspicious moment all went well.

The Inland Sea has been portrayed so often in colours which are not at my command,successive artists have used their pens to describe its beauties in such skilful and glowing terms, that I will not say anything which may even incur risk of comparison. From half past seven, till which point of time I regret to say, most of our passengers stayed away from the deck, our day was practically assured. We were then far past the Awaji Strait; the land on our port hand-the eastern shores of Awaji were receding-and the country on the other side was quite invisible in the haze that lay deep on the face of the sea. So I do not blame the laggards. But we soon closed up on land to the right, Shödőjima; by breakfast time we were passing it, and thence we entered upon a run during none is possible. A great deal of the land which one had time and scope to admire not less that one passes in traversing the Inland Sca the beauties of Nature than the coolness, the confidence and the skill with which man threads his way among the obstructions with which she has bedged them round. Unfortunately under the we have arrived at Itsukushima and are now, 5.30 conditions which have been imposed in this ship, p.m., anchored off the Sacred Island on which forbidding the presence of any passenger on the bridge (a regulation which of course is absolutely bridge (a regulation which of course is absolutely along them, now near enough to see boats drawn necessary) it was impossible to view the surround-up on beautiful strands, now far enough distant ings comprehensively. At one moment an island to give the eye relief till a fresh series of pictures would be seen close at hand, but while we scanned it, half a dozen with, ten chances to one, it lighthouse—cocked jauntily on a knoll or nest-lighthouse and the control of the ling humbly at the foot of a scarred bluff - simultaneous performance of twenty bands), and the other side of the ship. However, it was with something of a sense of relief that one at length emerged from this bewildering succession of peaks and pools and ran in open water. It to the fall of Port Arthur, The first pro-

side and see the side rips and over falls that date of fall shall be understood to be such marked the not remote presence of otherwise date as is published in the official report of Headquarters." Having recorded the probable hard dark that swang into being under the beams and dark that sprang into being under the beams of the sun. At other points the course may very whole pool. The votes must be made before we near the islands on both sides, but it was not till whole pool. The votes must be made before we have the moment of the moment of became really intricate.

A little before noon we were called together to listen to several official reports that had been received from Tokyo the previous evening. These were read by Mr. K. Nabeshima, of the Foreign Office, in excellent English, and as most of us had only seen summaries in the Kobe paper they were highly interesting and were listened to with great attention, Capt. Takarabe assisting Mr. Nabeshima in pointing out on charts the Nabeshima in pointing out on charts the various points mentioned. I will not waste time by repeating information which I have no doubt has already been placed before your readers. One report which, as may be understood, has not failed to receive our stanting refers to the second of failed to receive our attention refers to the sweep-ing of Talien Bay for mines. The first stage of these operations has been concluded and 70 mines have already been blown up. These, it was explained, seem now to be floating into the Gulf of Pechili, carried thither by wind and tide. The 4th torpedo flotilla had found one north of the Iron Islands (which lie off Cape Collison and are actually in the Gulf of Pechili) and some thirty are believed to be still off Louisa Bay. Though no one supposes that the authorities are going to expedition with anything but the most tender and protecting solicitude yet the presence of these little objects just supplies the spice of adventure without which this trip might to some have appeared very insipid.

At noon we were placed 10 miles from Mihara Straits (90 miles from Kobe since 4 a.m.) and an hour later the ship, at reduced speed, was threading her way between the various members of this truly picturesque archipelago. I have said that I do not intend to attempt an adequate description or indeed any description of the scenery of the Inland Sea. I will leave that to the gentlemen whose pictures will doubtless be highly appreciated by the illustrated papers abroad and to the other gentlemen who, I am confident, will do it justice so far as the English, the French, the German, the Japanese and the other languages represented on board this ship can be drawn

upon for that purpose. But I will say this: that I think it is possible to go a bit too far in praise of the Inland Sea. I have seen very little lake scenery in the course of my life but I have gazed upon such scenery in the West of Scotland though not, to my lasting regret, upon the finest portion of the Trossachs—and 1 do not think there is any comparison possible. I say so because I have heard and read attempts to make comparisons, and I repeat that I think is disfigured by scars and denudations which suggest that the hills are carrying last winters's yellow snow, and there are too many small islands tree-cutting is forbidden, and freely confess that it is an exception. But it is delightful to pass

was a control sensation to look over the ship's vision to regulate this pool states that "the vote in a box and the successful guesser or he original votes may do so up to the moment of anchoring in Saseho on payment of yen 2 addi-tional. The ballot box is to be opened on the tional. day of the ship's departure from Saseho.

(TO THE EDITOR OF THE " JAPAN MAIL.")

SIR,-As your readers are already aware, we reached Miyajima at 5.30 p.m. on June 14th after a remarkably fine passage through the Inland Sea. The verdure-clad hills of Itsukushima and its striking general outlines had for some time been visible to us before we found ourselves passing its eastern side, and opening out the ever-varying contours that present themselves when approaching it in this direction. The evening was have been destroyed; the second stage has now splendid, the Sacred Isle could not have been begin. It was added that there are still shown in a finer setting, and when our ship mines to be found in the Yellow Sea, where 30 rounded to the westward under starboard helm and, passing along the shores of the island, gradually disclosed those features which have for centuries been familiar to the minds of the Japanese people,-and when at length the well-known torii, at that moment considerably distant from sea, came fully into view and one could count the ascending peaks and note the islet's characteristic aspect, the passengers were invited to the lower bridge to view from this commanding situation their truly picturesque surroundings. On their left a short quarter of a mile away lay Miyajima; on the right the eye ranged along the shores of the mainland almost from Ujina (invisible on the starboard quarter) past low promontories and remote mountains, by the beach where runs the railway line, westward to a point at which mainland and island seemed to meet. The air was benignly calm; the encircled sheet bore the finest ruffle upon its surface; the declining sun diffused a generous light upon islet, hill and sea and showed a scene of rarest beauty.

When the roar of our cable jarred the peaceful stillness our ship lay alone in the bay, but gra-dually what had been a speck in the distance grew into a launch, then another hove in sight and the passengers were all agog to get ashore. Before six o'clock most of us were being landed and after the purchase of some picture postal cards and a visit to the Post Office I deemed it expedient to see some of the sights of this famous locality—and that at once, because darkness was not far off and we were to leave for Kure at eight o'clock the following morning. I am sure now it would have been much better if I had returned straight to the ship. As I approached the confines of the temple I was pestered to take a guide. I engaged one who proved to be particularly loud voiced, and it was with difficulty that I could even make the acquaintance of a deer which, however, at length consented to feed from my hand. I will not abuse the confidence of your readers by reciting the information which they, as well as I, can obtain from guide-books. But I saw the great Torii which stands 600 feet to seaward of the shrine and which at the time of my visit was being surrounded by the rising tide; I can believe that it is 50 feet high, but I am quite unable to understand what is meant by the statement that its "circumference" is 33 feet. I saw the Shrine dedicated to I'enten and walked along its galleries (said to be 900 feet in length, spreading on both sides along the shore with the sea at high water flowing underneath); I saw the dancing stage and oratory; I saw the deer; I saw the pigeonsparently unfavourable character-I came away. met by the roadside a very handsome deer and I saw a very unhappy stork which growled doubt-fully at me when I accosted it. I was glad to fully at me when I accosted it. I was glad to get into a sampan and interested to learn that its crew was 62 years of age; that he came of a family of fishers, and that with the exception of a brief visit to an adjoining province he had never left Miyajima.

We left Mayajima, according to schedule, at 8 o'clock the following morning and arrived at Kure after an hour and a half's steaming among islands, passing Ujina on the way. Before the anchor was down launches were alongside and we were at once sent on shore and landed. The day was cloudy, moist and warm, and we had been advised to wear our lightest clothing. It was well for those who adopted this advice.

The naval port dockvard and arsenal of Kure lie on a practically land locked neck of water. Entering from the north-west one has on his left the town, consisting chiefly of the houses of the workpeople and their families and the shops of the merchants who supply their wants, next along the land to the south-east come the port barracks, the submarine mine sheds, and storehouses, then the docks, then the various shops and slips connected with the shipbuilding department and then the arseral proper. Reckoning the distance from the north-west gate of the works and including the foundry in course of erection at the east end the frontage cannot be less than three miles, and is probably m good deal more. A second town lies along the lower slopes of the high hills that rise behind the works and the extent of the latter in a landward direction is revealed by the great yellow slices that have been cut out of the descending

We were received on disembarking by members of the staff of Rear-Admiral Uchida. We passed of the staff of Rear-Admiral Uchida. We passed through several sheds in which we saw spherical contact mines, some to carry charges of 600 lbs. of gun-cotton. Passing out into a broad well-made road fringed with acacia and other trees we went to the barracks and drill grounds, having as we went a view of field gun drill by parties of the interest and the staff of the blue jackets. This was taking place on a com-mon very unevenly covered with tussocks of grass. The drill that was going on inside the barrack grounds was of the most interest-ing kind. The men that we saw had been under training only since the first of this month, yet they presented a very smart appearance. There were, it is true, small squads still struggling with the first motions, but the great majority were well advanced and going through the different exercises with alertness and precision. The practical character of the training which is given to the men of the Japanese navy was exemplified to us with force and conviction. We saw a model marine engine with its accessories—on a practical, not a toy scale — at which stokers are instructed in their work by actual demonstration. More, proceeding to a shed from which issued sounds suggesting the shifting of many with the first motions, but the great majority were issued sounds suggesting the shifting of many tons of coal, we saw a squad undergoing training in the art of feeding furnaces. It was a sight well worth witnessing. Each man stood before an oblong wooden hopper with a furnace like door way. By him lay a load of stones, averaging the size of a hen's egg; and at a signal each sprang at his heap with a shovel and fed the sufficient his hear. That have head heap well. rapidly into his box. That the men had been well taught how to make their muscles do the most in the least time was evident from the vigour and confidence with which they kept the imitation fuel going through the apertures, and that their hearts were in their work could easily be inferred from the spring and alertness of their movements. Blacksmiths were also seen at the same kind of part of the immense blocks composing which drill, and in short all the operations in which men may be engaged on board ship were reproduced here. It was impossible to avoid the reflection that such a course of training must vastly enhance the value of men when drafted on service. They rate not merely told how to do a thing, or shown to do it, but they are made to perform the capacity, so that the contents of one were sufficient varieus ext compressing it and so the thing is imvarious acts comprising it, and so the thing is imprinted on their memory. But we were to have

(TO THE EDITOR OF THE " JAPAN ALL

the profound impression made upon us by witness- of a travelling challe bucket started in the grasp word may seem the more appropriate, of the common naval rank and file carried on with such thorough-going concentration of practical as distinct from theoretical methods. We have seen so much of the deepest interest during the past two days (I am writing this on the evening of June 16th at Miyajima, whither we have been ordered to return in consequence, as we underordered to return in consequence, as we understand, of the presence of the Vladivostock cruisers off the neighbouring coast) and have had so little retain. It is on the interrupted screw principle, time between whiles to "write up" what has but more than this it was impossible to make out as been shown to us that I cannot, though I could the group round the Admiral when he gave his excertainly dwell at much greater length upon it, give more space to this matter. I have said enough, I hope, to show that no one need fear that Japanese bluejackets after undergoing such moulding into shape for a few months, even a few weeks, will prove deficient in those qualities that have distinguished their brothers in that arm of the service since the war broke out.

It was a long walk back along the hard road, past the point where we had landed to the shipbuilding section where we saw the two docks, the larger one some 480 feet in length and capable of taking in the largest battle-ship or cruiser now in the Japanese navy. A third dock of even larger dimensions is projected and may be commenced in the present year. Considerable attention was given to a torpedo boat on the stocks. The construction of this, a first class craft 150 feet in length, is progressing at such craft 150 feet in length, is progressing at such a rate that it is well to remember how large battered by huge hammers the shocks of which draft of hands have been set to work on her, other construction jobs having now been fanished. under screw threaded shafts till we found them They started on her frames little over a month ago; her keel was laid the day before we saw her, yet two-thirds of her frames seemed to be already both. in position. The officials were sanguine of having her completed three months from date. After looking at the machine shops for the torpedo boat yard, we embarked in launches and went to to to pedo testing station, and assembled on the arsenal landing close to the 100 ton crane the used in shipping and dismounting guns and other heavy material. There we had tiffin, after the members of the party had signed their names in a book and after a repast for which much walking about in the open and through shops where the pedo could be seen as it flashed out into the blue was fired at 2,000 yards. From above the torpatour in the open and through shops where the pedo could be seen as it flashed out into the blue days in a white track which at once rose

it the long range of Babcock and Wilcox boilers which are to supply steam to the engines intended passed under the nearer pontoons. Yet it reached to drive the electric motors for the armour finish, ed its mark (50 metre long to represent a section to drive the electric motors for the armour finishing plant. Here also were seen the foundations being prepared for the armour rolling mill,were already in position, while close by two pile drivers with over 50 men tailed on to the ropes of each were establishing a firm substructure. to form the charge. The company watched this

Sir,—I have written in my previous letter of him and out little could be seen up to the the profound impression made upon us by witnessing the process of transforming the raw material at Kure into sailors, stokers and so forth for His Imperial Majesty's navy. There were among the visitors men who are entitled by reason of their how many of the visitors had any idea before experience to speak with some authority on the subject, and they declared that in no country of the visitors and specific processing the process of transforming the process of a travelling case bucket started in the grasp to receive it and to transform into perpared perhaps the most interesting of all the operations which we witnessed were those that now followed.—I mean the construction of guns. I wonder the process of transforming the raw material at to receive it and to transform into perhaps the most interesting of all the operations which we witnessed were those that now followed.—I mean the construction of guns. I wonder the process of the process of transforming the raw material at the receive it and to transform into perhaps the most interesting of all the operations which we witnessed were those that now followed the process of the process of the process of the process of transforming the raw material at the receive it and to transform into perhaps the most interesting of all the operations which we witnessed were those that now followed the process of the pr subject, and they declared that in no country of tions, and how many guns and what quantity of the world is the education, or training, whichever shells there are in stock. The first object that we saw on entering the great shops was a hundred ton steel ingot which is to form the bed-plate of the new armour rolling mill. We saw guns in all stages of manufacture, much interest being taken by the naval attachés in a new 8-in, piece as well

breech mechanism which, so far as I could gather, eliminated one motion that the other systems all planation was large. Moreover the programme provided for the visitors was very much too long. I found it impossible to make a note during the whole time we were ashore except about tiffin time when one had a few moments leisure to arrange in the mind what one had seen. Also, the correspondents had not been told that they could take notes freely and there was some natural hesitation about displaying notebooks under the noses of the offi-cials. It is not, I know, the custom when Govern-ment establishments of this kind are visited to indulge in ostentatious note-taking, but I had hoped to be able to write in terms a little less general than those I am now employing. It would be ridiculous, of course, to describe at any length the very interesting processes of shell manufacture, the production of cartridge cases for fixed ammunition; suffice it to say that the experts seemed to be surprised at the completeness of the plant and the efficiency of the staff. We stood by while a 25 ton ingot to be used in the building of a large gun was squeezed into the desired shape by the hydraulic 8,000 ton press; we followed shells finished projectiles; we saw plates turned out into cartridge cases ready for filling, and we passed through buildings in which were great stores of both. The processes of torpedo manufacture were also with much courtesy exposed to us, and after threading our way among, I should say bundreds of partially and wholly completed engines of this kind we were taken to the torpedo testing station, and assembled on heat was most distressing, had amply prepared us.

After tiffin the party were conducted past the uncompleted building in which is to be placed the armour-plate finishing machinery and opposite. The missile went almost straight, a slight deflection to the left, however, becoming apparent as it of a warship) with a considerable margin to spare. A second shot was made immediately, the torpedo in this case travelling at a higher speed and for a shorter distance—1,000 yards. The direction was almost perfectly correct and the passage of the assailant was signalled at the centre of the target. The torpedoes are, we believe, tested up to 2,500 yards at low and 3,000 yards at high water.

So ended our visit to the Kure Arsenal. As a concession to the wishes of those who love figures I may say that 15,000 men are employed in conmore evidence of Japanese thoroughness before operation as closely as was possible, but in consethe day was done.

H. company watched this nection with this gigantic establishment—2,500 in the engineering department, 3,500 in the contact of the blinding glare from the molten metal. I cannot leave the subject without expressing my no Arsenal; Commo General Arisaka, the inventor of the field gun called after him) whose breech block has been adopted in the Navy, and to the best of my judgment presents distinct features of effi-ciency, Mr. Matsumi, Chief Ordnance Engineer, We left Miyaiima at 1 p.m. on the and other officers whose names I do not know but who in the most obliging way answered the many questions addressed to them by the foreign visitors.

In the evening Captain Takarabe, the officers and the passengers on the Manshu Maru landed, and in medownpour of rain, which unfortunately lasted all night, proceeded to the Naval Club and were entertained by Vice-Admiral Y. Shibayama, Commander-in-Chief of the Station. After a capital dinner the company (the officers of the Kure establishments being present in large numbers to meet the Admiral's guesis) listened to the music of the Naval Band, one of the best in Japan, and returned to the ship rather late after having spent an interesting day and an enjoyable

(TO THE EDITOR OF THE " JAPAN MAIL") SIR,--My last letter* which I posted at this place (Mitsugahama) this afternoon (June 18th) described at some length the Naval College at Edajima and reported our arrival at Miyajima in accordance with instructions from Tokyo. Though it was exceedingly annoying to have our voyage interrupted in this fashion we were all greatly pleased to find ourselves once more off the Sacred Isle, particularly as the hour of our departure for Mitsugahama had been fixed for 1 p.m. on the following day (the 17th), which arrangement permitted of some sight-seeing. Having, in consequence of the long programmes prepared for us at Kure and Edajima, fallen behind with these letters, I found it impossible to go ashore except in the evening of our arrival, but a member of the party who had landed overnight and had climbed to the highest point of the island assures me that the view is most enchanting. Starting after breakfast he got up in about an hour and a half. Though I did not ascend Mizen I had a treat that I am sure was not inferior to his-I rose early enough to see the sun get up. None but myself stirred on board the ship. The waters of the bay were as smooth as glass; Itsukushima towered above us a black mass in the fast dissolving darkness that had begun to reveal its serrated outlines; along the shore above the houses of Miyajima village there lay thickening lines of faint blue smoke, which gradually crept round the base of the island in both directions; a white object inshore revealed itself against the shadow of the hills as the sail of a silent junk; a cock crew in his wicker prison aft; the yellow clouds away to the eastward were diffused with a soft golden glow; m point of red appeared; and while I looked at my watch the sun was If my life depended upon my stating the exact time at which I examined my watch these letters would come to a close now. I could mention what I suppose to have been the time but I might be proved in the wrong and that would be disconcerting. As I looked, on the that they are not allowed to go out without surface of the sea between me and the quickening guard and that they have nothing to do. Of sky there appeared a pathway consisting of course no relaxation can be made in the first case stepping stones of patches of light and in the middle of one of them, away off the north east point of Itsukushima, a solitary black rock the labour of the prisoners in connection with projected itself into the shimmering light; sounds proposed improvements on the neighbouring harcame from the town, from a launch that made bour of Takashima, paying the men a small came from the town, from a launch that made its appearance to the westward; the junk, which

I cannot leave the subject without expressing my hour thanks to Mr. Y. Mizutani, Chief Engine thanks to Mr. Y. Mizutani, Chief Engine the way, man in a solitary boat; her one sail suddenly became transfigured as it came out of the shadow the blue smoke spread and rose; and when I looked again the sun was shining on the white

We left Miyajima at 1 p.m. on the 17th for Mitsugahama. We had already learned of the at-tack upon the *Hitachi* and *Sado Maru* and it was rumoured that the Tosa Maru had also been in danger. You may therefore judge of the sensa-tion on board when about half an hour after starting, steamer hove in sight ahead and, as she came nearer, her signal flags showed her to be the Tosa Maru. We cheered her and waved our handkerchiefs as she passed us on her way to Ujina. The fine weather which we had enjoyed hitherto car-ried us across the Inland Sea and we dropped anchor off Mitsugahama about 4 p.m. Some of our people went off to the hot springs of Dogo the same evening, but it had plenty of hotels and few other attractions. These met a party from the ship at Matsuyama the following morning, when it was raining cats and dogs. Jinrikishas had been provided for them and they were taken at once to the Army Club where, after a cup of tea, they started out to see the Russian prisoners now confined in various parts of the city. The sick and wounded various parts of the city. The sick and wounded were found in a hospital in the Castle grounds, where there are 8 officers, 2 non-commissioned officers, and 35 soldiers. They were attended by Japanese Red Cross nurses; the men lay on the muts and the officers (one of whom was passing his time in water colour sketching) had camp-beds but were nearly all sitting up or walking about. One is a colonel, a veteran of Plevna. All looked very comfortable, had papers to read and tobacco to smoke. The officers were a fine looking set of men, but of the rank and file here and in the other quarters it must be said that they displayed marks of a very low order of intelligence. At the Kanjensha temple hospital there are 8 non-commissioned officers and 17 men wounded; at the Rempei-ba (parade ground) 11 non-commissioned officers and 113 soldiers, these being the wounded in the city. The healthy prisoners consist of 15 officers, 11 non-commissioned officers, and 153 soldiers quarnon-commissioned officers, and 153 soluters quartered in the city hall; I non-commissioned officer and 45 men in the Dairinji temple; and 9 non-commissioned officers, 100 men and 4 non-combatant. in the Horinji; the grand total being 23 officers, 42 non-commissioned officers, 523 soldiers and 4 non-combatants.

These prisoners were mostly ceptured at the Yalu and Nanshan. The officers are permitted to procure their food from outside or to employ Russian cooks; the soldiers are well fed but said they missed greatly the black bread to which they missed greatly the black bread to which they were accustomed. Questioned in French and Russian they declared that they entertained no animosity towards the Japanese; in fighting they had simply obeyed orders. One officer asked how long they would be likely to remain there, and fervently expressed the hope that the war would be over soon. This gentleman spoke in the highest terms of the Japanese army. He said the Japanese successes were due to the fact that the Japanese successes were due to the fact that they always had overwhelming numbers where they wanted them, that they were able to con-centrate great strength rapidly upon a particular point. The prisoners wore the uniforms of several different regiments, nearly all Siberian. They seemed very well contented with the treatment they were receiving.

The only complaints, if indeed complaints they can be called, which the men have to make is because the authorities have to protect both the populace and the prisoners. As to the second I am informed that it is in contemplation to utilize

It would doubtless have been interesting to * The letter referred to by our correspondent has obtain access to the Castle of Matsuyama, which failed to reach the office of the Japan Mail.—EDITOR, was built by Hideyoshi's General, Kato Yoshi-

to be a schooner, moved slowly out akira, and after the latter's removal to Aidzu passed into the possession of the Hisamatsu family, where it remained till the general surrender of feudal fiels to the Government. But per-mission to see its interior could not be obtained. We left Mitsugahama at 9 p.m. on Saturday, June 18th, for Moji.

CRICKET.

Y. C. AND A. C. V. TOKYO.

The opening cricket match of the Yokohama season—the other two being abandoned owing to rain—proved an especially interesting game. It took place on Thursday afternoon between the Y. C. and A. C. and an eleven from Tokyo, the Captain of the latter being Mr. Geo. Barclay, of the British Legation.

It may be of interest to note that the first match between the local Club and Tokyo was played in 1883, when Mr. C. M. Duff arranged the match and captained the visiting eleven. Among those playing for Tokyo were: A. McMillan (of the N.Y.K.), the Rev. J. M. Knox, R. de B. Layard (of the British Legation), E. A. Griffiths (now Vice-Consul at Kobe), and F. H. Trevithick. McMillan was a splendid bowler, and in this first match brought off two magnificent catches at short slip. The game was won by the Tokyo eleven by 11 runs, the victory being mainly due to excellent fielding. Duff alone of the original Eleven is still playing in Yokohama, the rest are widely scattered, and some have

joined the great majority.

In the match on Thursday the Tokyo team In the match on Thursday the Tokyo team went first to the wickets and played a very good game. Their batting certainly was in many instances a splendid display of good, sound cricket, and judging from the style shown it would appear that most of the players have had the benefit of Public School training. One member of the team, Mr. F. Thomas, has played for his county at home, and his off play was especially good; indeed, the bat-ting generally was decidedly high-class. When we consider that there is no ground in Tokyo, and consequently no chance of practice, the form shown was really most creditable. It must be form shown was rearly most determanded. It must be said, however, that the local team was, as usual, weak in bowling. Argent, however, did exceedingly well, capituring six wickets for 18 runs.

The Yokohama batsmen did not show up very

well, only two of them getting into double figures. Piggott brought off three splendid catches in the Piggott brought off three splendid catches in the slips, and Hutchison also distinguished himself with the ball. The local team were finally dismissed for a total of 96, Tokyo thus gaining a well deserved victory by 35. We would like to suggest that in future arrangements might be made by the Captain of Cricket whereby a complete bowling analysis could be kept. It is a distinct disappointment not to be able to record the trividling feats of the visiting eleven, beyond the trundling feats of the visiting eleven, beyond the meagre statement given below. Scores:—

VOLUNTARY CONTRIBUTIONS TO THE WAR CHEST.

Although the Government has not encouraged, has indeed actively discouraged, voluntary contributions to the war chest by individuals, we read in Tokyo journals that the sums offered in this way aggregate 1,581,848 yeu, out of which total 1,223,362 yeu have been accepted. The donors are 243,994 persons.

SATURDAY'S YACHT RACES.

Up to noon on Saturday the wind was very light, and at times hardly perceptible, but by the time for the 39 Raters to start on their 20½ mile course it had increased to a fresh blow from a southerly direction, and later on during the afternoon it had worked up to a gale, which caused a lot of grief in the various classes. When caused a lot of grief in the various classes. When the five minutes gun was fired for the first race, the three big yachts were all carrying full sail. Mary was first over the line, close on gunfire, then Kingfisher with Maid Marion on her lee quarter. Shortly after getting outside the breakwater, the Maid started part of her rigging, and had to return. Kingfisher kept on after Mary, gaining a little when the latter's top sail was handed, and main halliards carried away. At this point it looked as if Kingfisher would win, but she too had trouble coming, her jib split, At this point it looked as if Kinghisher would win, but she too had trouble coming, her jib split, and blew to pieces. This spoiled her chances, and she left Mary to complete the course alone. After passing the Widow buoy, the hook of Mary's throat halliard block broke, letting the mainsail down on deck with a crash. Mary

mainsail down on deck with a crash. Mary a finished at 5: 18: 35, the return journey from Nakane buoy being covered in 40 minutes.

The Cruising Class started at 2 p.m. Asagao and Kathileen with a reef, and the others under full lower sail. Nina was first over the line, with Asagao and Spray a few seconds later, Daimyo, Kathileen and Wanderer last. Asagao set a small spinnaker and took the lead in the set asid, by Mrs. Draper, and carried on as a private enterprise by that good lady as long as private enterprise by that good lady as long as set a small spinnaker and took the lead in the run out of the harbour, but was passed on the reach to Tsurumi mark-boat, rounding which the order was Spray, with Niua close up, some distance ahead of Daimy, Asagao close to the latter, and Kaihleen bringing up the rear, Wanderer having given up. In the beat to the Lightship, Spray kept the lead, with Nina sticking to her persistently, Asagao making a good race with Daimyo, and passing her eventually before the light ship. As soon as she was clear of Honmoku, Nina held inshore past the cliffs. Spray kept on starboard tack and her jib halliard block carrying away she gave up. Nina was first round the Widow buoy, and started for the run back to the Lightship with the race well in hand bar accidents, but when off the race well in hand bar accidents, but when off Honmoku her tiller broke off short in the rudder head, and the yacht was driven on to the shoal extending from the beach. Asagao was now the only boat left in the race, and rounding the Widow buoy stood on the starboard tack well out into the Bay, to avoid running dead before the wind in such a nasty sea, which is very trying work. Her skipper therefore did not see that Nina was ashore, and thought that he had secured second place only instead of being the only yacht in the class to finish, as Daimyo and Kathleen had retired from the contest. On the run to the Lightship Asagao's mainsail was lowered, and proceeding under jih alone, her skipper took in two more reefs in the mainsail, eventually beating up the harbour to the finishing line under close reefed mainsail only. Asagao takes first prize and two record points in the Cruising Class race, and Mary the same in the 39 Raters' race.

When the news of *Nina's* predicament reached town Messis. Olsen and Martin interested themselves in getting assistance sent, and the Harbour authorities kindly despatched a tilg boat, on which Mr. Laffin went to superintend the rescue. Meanwhile, Nina, after bumping heavily for about two hours, had got off, and was coming in under staysail. The tug-boat met her off Cook's yard, and towed her in from there.

Lightship course, and Pete some which she retained to the finish, crossing the reflection while the guests patronized the refreshment and about 4 minutes ahead of Sunbeam. Winsome is not kilds so well, that, though the exact amount was a close third, Vixen fourth and Yugao last, was surely provided for. Indeed in the result should be refreshment and was surely provided for. Indeed in the refreshment and about 4 minutes along the refreshment and is not kilds so well, that, though the exact amount was surely provided for. Indeed in the refreshment and about 4 minutes along the refreshment and is not kilds so well, that, though the exact amount was a close third, Vixen fourth and Yugao last.

The first prize for this race, the Pele Cup, goes to minute along the refreshment and while the guests patronized the refreshment and about 4 minutes along the refreshment and while the guests patronized the refreshment and the refreshment a

Sunbeam, the second boat.

Larks Nos. 5, 6, 8, 11, 12, 13 and 15 started at 2.45 to race over Course No. 1, inside the harbour. Even there the wind was to much for such small craft and two only got round the course. No. 11 finished at 4: 7: 45, taking first prize and two record points. No. 12 finished at 4: 17: 58 and took second prize and one point.

The second race of the series recently inaugurated by the owners of the "Lark" class of the Yokohama Yacht Club was started on Wednesday afternoon, but owing to lack of wind the contest resolved itself into a drifting match and was not resolved itself into a drifting match and was not finished. The race was, therefore, re-sailed on Thursday afternoon. There was a moderate breeze, and ten boats stated. No. 10 got the lead and was first round the inner buoy, being closely followed by No. 1. At the Conical Buoy No. 10 still had the lead, No. 1 being close up and the remainder of the squadron in 10 bunch near by. On the beat home, however, No. 5 drew ahead and finally won by a short distance from No. 13. The order of the boats at the finishing line was:—Nos. 5, 13, 2, 1, 11, 10, 15, 8, 4, 6.

THE YOKOHAMA CHRISIIAN BLIND SCHOOL.

A pleasant afternoon was spent by the pupils and friends of the Blind School in the chapel at 221 Bluff, on Saturday, June 18th. The very

she said, by Mrs. Draper, and carried on as a private enterprise by that good lady as long as she lived. At her death, she left it to her son, the Rev. G. F. Draper, under whose care it prospered more and more; this year it enrolls twenty-three pupils. It is a day school, not an asylum; the small boarding department connected with it, is for the few who come from outside. The school receives no assistance, except with regard to rent. As most of the blind make their living by practising massage that important branch was added to the usual one of reading and writing. Mr. Draper has been financially responsible for the enterprise, though kind friends have contributed from time to time; the cost is about thirty yen per pupil per annum, which amount is spent for rent, teachers, and apparatus. Mr. Draper went to America in April, not expecting to return to Yokohama, leaving the school in the care of Miss Slate, of 221, Bluff, M. E. Mission, and providing State, of 221, Blutt, M. E. Mission, and providing funds to continue it until this end of this year; after that time he cannot promise more than half the sum which the school with its present number of pupils demands, so the future of the institution, which has made life so much happier for so many by teaching them to "see" with their fingers, is uncertain. It is proposed to ask help from the city, as there is no other work done here for this afflicted class, but experience with the charity hospital shows that frequent asking and long charity hospital shows that frequent asking and long waiting must precede any possible help from that quarter. The missionary society will also be asked for a grant, but their answer can not be predicted. In the meantime, if any person, school, society, or club should feel inclined to take the support of a scholarship at thirty yen per year, that would be a most welcome assistance at a most critical time. Certainly the school will not be closed, unless it absolutely must be. After these remarks, Miss Moulton sang with

wen more then her usual sweetness and power the grand old hymn, "Jesu, lover of my soul." The tug-boat met her off Cook's yard, a towed her in from there.

The Mosquito Vacht Club had a race over the composition of the sum of the s

mired, while they, on their part, were much encouraged by the attention shown them. We certainly hope this worthy enterprise may find all the financial support needed to make it a permanent institution.

BASERALL.

The match game between the Keio University The match game between the Keio University and the Y.C. & A.C. teams was played on Saturday, but owing to a severe injury received by Dannaher, the Y.C. & A.C. pitcher, which retired him, both Captains agreed to call it a practice game. The first three innings, while Dannaher and Thompson were doing the honours for the locals, no better game could be witnessed, the score ending 2 to 1 in favour of the home team. Several times the Keio team succeeded in getting men on hases but the effective work of the men on bases but the effective work of the battery supported by the in-field prevented any score. Dr. Garton secured first base on a hit, Jenks was presented with a base on balls, and with two men out Mollison by a timely hit over second base brought the men in, scoring two runs. Score at end of third inning, 2 to o. After this the game was a comedy of errors but was good practice in batting for the local team, which has improved since their last game. The V.C. and A.C. will play two games on the 4th July, one in the morning with the U.S. Naval Hospital team, and one in the afternoon with the Keio University.

The baseball match between the U.S. Hospital team and a team from the U.S.S. Annapolis, played at Honmoku on Sunday resulted in a win for the visitors by 11 runs to 6. It was a good game, but the Hospitallers had more than a fair share of hard luck.

THE RIGHT AND WRONG OF THINGS.

[What the Wise Man Said to His Boy.] He cuts his barber when they meet Each other in the crowded street, But when he's in the barber's chair The barber does the cutting. There Are things that we may do when we Don bathing suits beside the sea That would be followed by disgrace If done in any other place. My lady's ball dress, cut so low Would be most shocking, as we know, If in the morning she should wear It in the market place. With bare, Unlovely legs the sprinter runs Before the eager, gentle ones, Who gather at the track to cheer; We'd run him in should he appear We'd run him in should he appear
At church in such a rig as that—
It all depends on "where you're at,"
What's wrong in one place may be right
Some otherwhere, by day or night;
In Newport it may be no sin
To hug another's wife; men win,
Unblemished, on the Board of Trade The money other men have made. But if at cards they got the same We'd look upon it as a shame: The right or wrong of things, my son, Depends upon where they are done.

— Chicago Record-Herald.

THE LAW COURTS.

CLAIM ON SHARES.

The hearing of this case, in which Mr. R. J. Ward claims yen 8,515,60 against B. Sho, a share-broker, was resumed on June 21st in the Yokohama District Court, before Judge Danno.

Mr. Takizawa, the manager of the Tokyo branch of the Sumitomo Bank, Osaka, was examined as a witness. He stated that Mr. B.

Having produced a paper phint, the witness ame and samp was to be used on cheques name and a samp was to be used on cheques drawn by the depositor at the bank, but the witness did not know whether it was used by B. Sho on his promissory notes.

Plaintiff's counsel asked the Court to compare the stamp produced by the witness with that affixed on the Exhibit No. A-2 and 3. The Court decided to summon an expert to examine the different documents.

Counsel then presented to the Court further documents as evidence, after which defendant's Counsel asked the Court to examine K. Shoji and M. Muramatsu, who participated in the share business of Mr. Ward, as witnesses, and to investigate the statement given by B. Sho and M. Muramatsu at the office of the Public Procurator, when they were examined there on suspicion of fraud, which charge had been lodged by Mr. Ward.

Plaintiff's coursel opposed the calling of these witnesses, saying that they were employees of defendant, but defendant's counsel held that they

were carrying on business independently.

The court decided to examine Shoji and Muramatsa on June 28th at 10 a.m.

A ROBBER SENTENCED.

M. Kurosawa (27) who had been sentenced in the Urawa District Court to 13 years' penal servitude on a charge of robbery and murder, and who appealed in the Tokyo Appeal Court against the decision, was sentenced on June 20th in the latter Court to penal servitude for life. It appears that the man entered on the night of June 18th last the dwelling of a farmer, in Sugito, Saitama prefecture, and stole sen 30 and silver watch and was about to run away when the ac-cupant attempted to seize him. The thief having inflicted severe injuries on the farmer with a knife, escaped, but was later arrested by the Urawa police. The farmer subsequently died.

THE CAPTURED SHIP "ROSSIA."

The petition lodged by Mr. W. H. Gill, No. 74, Kobe, in the Saseho Prize Court against the 74, Robel in the Sacaine Anna Contingation the Captured steamer Rossia was dismissed on May 26th. The purport of the complaint, according to the Official Gazette of June 22nd, was that by request of the ship's owner, the petitioner sup-plied necessaries to the vessel during a period from Nov. 14th to Dec. 31st, 1903, when she was in Kole, which stores and commission amounted to yen 18,116.91. Previous to her departure for Vladivostock, the petitioner received yen 3,043.51 from the shippers as the freight of their cargo. The freight was due to the ship's owner, so that it was reduced from the amount which the petitioner had paid on behalf of the owner, leaving a balance of yen 15,073.40. The petitioner contended that the preferential right to seize the ship should be his. She was, however, captured on Feb. 6th by the Japanese before the outbreak of war, so that she should be delivered to him; or otherwise the Japanese should compensate him for the damage he had suffered.

THE CAPTURED STEAMER "MUKDEN."

The same day, in the Saseho Prize Court, ■ decision was rendered in an action lodged by Mr. C. E. Boedinghaus, Nagasaki, petitioning for the release of sixty cases of glass-ware, etc., on the captured steamer *Mukden*, as well as compensation for the freight and marine insurance incurred captured steamer Musuen, as to the freight and marine insurance incurred on the foregoing cargo. The petitioner, it is reported by the Official Gazette, contended that the steamer was captured by the Heisyan, on Feb. case of cargo containing Government documents, 6th off the Korean coast near Fusan, which is a case of cargo containing perfumery, on board the mentral sea, so that the capture was illegal. The Russian steamer Mukden, captured by the Japan-allowing and the ground case fleet. The petition as to the Government documents was allowed, but the perfumery was transferred to the consignee of the enemy's country, that is to say, to be recognized as being the property of the enemy unless there is any evidence to stand against this decision.

CHARGE OF BIGAMY.

r Court on a charge name being written by himself and a stamp duly prosecuted in the reported that he married Oktaaffixed.

yama Kaoe (26) four years ago and that he mirried of the witness i recently married another woman. The first wife is still living.

CLAIM FOR ADVERTISING.

The hearing of this case, in which the Taikoku News Agency claims yen 313,23 against the Japan Super-Aeration Co., was resumed on June 22nd in the Yokohama District Court before Judge Nakanishi.

Defendants' Counsel gave an explanation as to Exhibit No. A-1 and 2 produced by plaintiff, and contended that defendants' firm did not identify the two letters as they are written in Japanese. But counsel admitted that the foreign firm had ordered its Japanese employee to send the letters to the News Agency. The contents of those to the News Agency. T letters are not remembered.

The hearing having been concluded, the Court declared that judgment would be delivered on

CLAIM ON THE H. & S. BANK.

In the Yokohama District Court, the hearing of the case in which Dhanamaal Chillaram, an Indian merchant, claims yen 300 from the Hongkong and Shanghai Bank, was resumed on June 23rd before Judge Danno. Defendant's Counsel submitted to the Court four

documents as evidence and gave a brief explana-tion as to the difference between D-h-u and D-h-a in the spelling of the name of plaintiff.

Counsel further held that the contract for reconnect further field that the contract for remitting three thousand yen by telegraph had been concluded in Hongkong, in which transaction the sender of the money described the name of the receiver in the application form as D-h-u, instead of D-h-a. The branch in Hongkong sent a telegram to its Yokohama office according to telegram to its Vokohama office according to the form written by the money sender, and the Vokohama office was unable to find a gentleman with the spelling of D-le-u commencing his name. Though the remitting telegram was received here on Dec. 14th it was thus delryed till the 29th of the same month to find the proper receiver. The Yokohama office of the Bank accepted no responsibility for such a mistake as was made by the applicant at the original place. Even if it were supposed that the Bank is liable for such responsibility, the claim could not be lodged in the Yokohama Court as the contract had been made in Hongkong. In such case the Bank seems to be liable to pay interest to plaintiff for the period of delay in notifying him of the arrival of the telegraphic remittance. In order to make clear the nature of the banking business in case of the foregoing question being raised Counsel asked the Court for leave to ex-amine Mr. K. Ishii, the vice-manager of the Yokohama branch of the First Bank, as an expert

Plaintift's counsel, having refused to admit the documents produced by the defendant Bank as evidence, asked the Court to examine Mr. Hoondamal, an Indian merchant, as a witness as to the business in silk goods.

The Court rejected the request of both partie to call the witnesses applied for, after which Counsel briefly addressed the Court.

The hearing having been concluded, the Court decided to give judgment on June 25th at 9 a.m.

PETITION OF THE FRENCH CONSUL.

In the Saseho Prize Court, two decisions confiscated. It appears, according to the Official Gazette of June 23rd, that the ten cases of perfume had been transhipped from the S.S. Cambodia and the *Ernest Simons*, to the *Mukden* to be forwarded to Vladivostock, having been consigned

petitioner in connection with the goods, is not regarded as the proper person to protect the interests of his countryman, in accordance with Art. 16 of the Prize Law, and further the consignor is not residing in Japan. Consequently the petition as regarded the perfumery was dismissed.

PETITION OF MR. F. RINGER.

The same day, in the Saseho Prize Court, a decision was also delivered on an application lodged by Mr. F. Ringer, representing the East Asiatic Company, Shanghai, petitioning for the release of five cases containing paper and sundry goods on board the Russian steamer Mukden, dismissed on the ground that the petitioner was not represented by a Japanese lawyer according to clause No. 11 of Art. 17 of the Prize Court Law.

RIFLE SHOOTING.

SOME AMERICAN TOPICS.

A bill has just been passed by the New York Legislature making it a misdemeanor for any one occupying the end seat on the entrance side of an open car who refuses to give way and take the inner seat, when requested.

The names decided upon for the war ships authorized at the last session of the United States Congress are announced at the Navy Department as follows: The battleship New Hampshire, armoured cruisers North Carolina and Montana: scout ships Chester, Birmingham and Salem; colliers Erie and Ontario.

The transportation of the mails in Chicago will be conducted next fall through the subways built by the Illinois Tunnel Company under many of the streets of the city. These subways are to be specially equipped for the purpose, and it is said their use will result in m great saving in cost as compared with the present wagon delivery system. system.

Rev. Dr. Robert Collyer, the eminent New Rev. Dr. Robert Collyer, the eminent New York divine, recently celebrated his eighthieth birthday, when he declared he had never been sick a day in his life and gave the following sensible recipe for longevity: "Live a natural life; eat what you want and walk on the sunny side of the street." The man or woman who habitually seeks the shady side of the street may safely be set down as a chronic divending. set down as a chronic dyspeptic.

Nance O'Neil, the actress, has just purchased the famous old Brinley estate in Tyngsboro, on the Merrimac river, and will make it her summer home. Alterations are now being made in the colonial mansion for her occupancy. The pro-Mr. K. Tamaoki, the third son of Mr. H. dispute had not belonged to any person of either Tamaoki, a wealthy merchant in Tokyo, has been of the belligerent countries. The Consul, the all the territory northwest of the Merrimac river to beyond what is now known as Nanshua, in New Hampshire.

The most up-to-date elopement and pursuit has st been reported from New Jersey. The young just been reported from New Jersey. The young couple took flight in a trolley car and the irate father gave chase in an automobile. The story is incomplete because it does not state which triumphed.

Dr. Anna E. Park, said to have been the first woman admitted to medical practice in New York, is dead at the age of 74. Three weeks before, when in perfect health, devoting herself to the care of a number of charity patients whom she had attended ever since her practical retirement had attended ever since her practical retirement several years ago, she visited an undertaking establishment and told the manager she wished to arrange for her tuneral. The undertaker, who knew her, was startled. "You are perfectly well, doctor," he said, in protest over her hurry to select a coffin. "I am well now, but fear the end of my labour is near," replied the aged woman. She chose a casket and robe with care, and arranged the details for her funeral before leaving the shop.

Recently the medical journals of America were discussing a report that from one-third to one-fifth of the men employed in the New York Street Cleaning Department are suffering from tuberculosis, the inference being drawn that the occupation was exceedingly unhealthy. The report seems to have been founded on a misleading and expropers have been founded on a misleading and erroncous basis. The metropolitan health officer now says that less than 2 per cent. of the men employed in the department are afflicted with consumption, and most of these had affected lungs before becoming street sweepers. Increased sickness among the street sweepers. Increased sickness among the street sweepers of late is attributed entirely to the unusual severity of the winter weather, and not to any peculiarity connected with their occupation.

Colonel Matthew Quay, the well-known Republican Senator of Pennsylvania, died at Beaver, Pa., on the afternoon of May 28th. Born in 1833, he entered political life in 1865 and soon became a most skilful party manager. Socially "Matt" Quay, as he was generally known, was an agreeable, unpretentious gentleman. As a politician he was said to be a sort of Talleyrand -strong in a certain finesse of party management. He was always a direct and silent worker, following the shortest course to attain the desired end and despising all claptrap and noise. It has been said that during his half-century of office-holding Quay, except in two cases, resigned each office only to take one higher in the scale.

A French locomotive which is being tested by the Pennsylvania Railroad was used on May 30 the Pennsylvania Railroad was used on May 30-to draw the morning express of twelve cars from Camden to Atlantic City. It made the run on schedule time, seventy-five minutes, and in the afternoon repeated the run. It is expected that in a few days the locomotive will be tested on the sixty-minute train to Atlantic City, this being the sixty-minute train to Atlantic City, this being the fastest regular train in the country. Engineer Richard F. Doughty is in charge of the tests, and will make an exhaustive report upon the engine, especially upon the amount of fuel used, which is said to be less than the amount used by American engines. The locomotive has two sets of cylinders and two throttles. It has two driving wheels on each side, and small trucks run in front and aft of each driving wheel aft of each driving wheel.

Wall-street is having a period of severe business depression and one result of it is that hundreds of clerks have been dismissed within two weeks. Men who have not known a day of idleness in a score of years now find themselves without employment and with no prospect of anything to do until the dawn of another day of prosperity. Retrenchment has been made throughout the Wall Retrenchment has been made throughout the Wall of Appeals in the case of McPike vs the People. while street district. Among the big brokerage concerns and banking houses the depression has been so pronounced that nearly all of them have found it the Court of Appeals set aside the conviction. In has necessary to reduce their working force. One of the largest operators on the stock exchange said on May 26 that on a conservative estimate he as well to articles manufactured and in existence, has the court of the court of the largest operators on the stock exchange said on May 26 that on a conservative estimate he as well to articles manufactured and in existence, has believes no fewer than 2,500 clerks and other when it was lawful to manufacture them and have Democratic members of the City Council in

employes had been distinct two brokerage and them in possession, as to those thereafter manu-operator called attention to the fact that only factored or acquired. It attempted, therefore, to about 100,000 shares were traded in that day and said there was no prospect of any improvement in business at present.

The report of the registry assessors for Mont-gomery county, Pa., for the last year shows that there has not been a birth in the district of Narbeth, or the lower district of Merion township, during the last twelve months. These two districts, suburban to Philadelphia and on the main line of the Pennsylvania Railtoad, are the wealthiest rural districts in the United States. The population

he did not have \$25 in his pocket with which to pay a fine for exceeding the speed-limit, recalls the experience of Senator Chauncey M. Depew a year or two ago. He went over to New York from Washington, and when he stepped off the from Washington, and when he stepped on the ferry he discovered that he had not a cent in his pocket. He walked five or six blocks without meeting anybody he knew. At last he came to the office of J. Pierpont Morgan and entered. A few minutes later he emerged and met an intimate friend on the sidewalk. "I've just been in the touch was fixed Morgan for a pickel to new. mate friend on the sidewalk. "I've just been in to touch my friend Morgan for a nickel to pay my car-fare uptown," he explained. "Did you get it?" his friend asked. "Oh, yes. He said he'd lend me half a dollar if I wanted it. But I didn't like to inconvenience him, so I just took

A good hay farm in the Yukon Valley is a better paying proposition than an ordinary gold mine. This fact has been demonstrated by a Dawson freighter, who is farming a large tract of native hay at Gravel Lake, on the trail between Dawson and the Duncan district, Stewart river. Last Fall this man put in an immense quantity of fine hay, enabling him to bale more than 600 tons this Winter. Besides wintering his own large herd of stock, he has considerable feed for to collect the bales and carry them to market. His entire crop was cut with scythes and handled in a primitive manner. Next season he will unconscious to the end replace these methods with modern farming implements, greatly reducing the cost of handling

Last year the legislature of New York passed a law which provided that any person or persons who should publicly mutilate, defile, trample upon or by words or act cast contempt upon the American flag should be guilty of a misdemeanor.

Another provision of the act prohibited the use of the flag or of any representation of it for advertis-ing purposes. The latter provision has just been declared unconstitutional by the New York Court of Appeals in the case of McPike vs the People.

actured or acquired. It attempted, therefore, to thereof was mucroserty, and, whether the value powerless to effectuate such a result; sidenite was of the statute as aimed to bring it about was voice.

According to an article in the World's Work, there was an excess of gold exports over gold imports into the United States in 1860, 1864, 1868, 1872, 1876, 1884, 1892, 1896 and 1900; in other words, in every year of a presidential election, but two, since the beginning of the civil war. Since 1896 there has been only one year in which more gold left the country than came into it, and that was the year of districts in the United States, and population includes scores of millionaires, as the community is made up almost entirely of rich Philadelphia the last presidential election. In three election years since 1860 there was a falling off in the circulation of money. Three other election Henry Marr, a farmer, who lives near Columbus, Bartholomew County, Ind., is the centre man of the population of the whole United States. The census bureau has found that the exact centre of population at the census of 1900 was in latitude 39 degrees 9 minutes and 36 seconds north, longitude 85 degrees 48 minutes and 54 seconds west. If a person is desirous of visiting the spot a better idea of its location can be got by asking most any resident of Columbus. Almost invariably in the United States declined in 1872 and 1880, there was a sight gain 1892. Bank clearings and 1900. They increased in 1872 and 1880 and 1900. They increased in 1872 and 1880 and 1900, the answer to such a question will be: "Five most of the indicate a record." the answer to such a question will be: "Five and the sains in 1892 and 1896 were so small as miles southwest of Columbus in Hen Marr's barn lot." The centre was recently marked by a monument.

The trouble that young Robert Goelet recently encountered while driving his automobile, because the did not have \$\frac{2}{85}\$; in his pocket with which to of American prosperity, though its records have since been exceeded. In 1896 the per capita exports were \$12.29, against \$11.51 in 1895, but expanded to \$14.42 the year after the election. Pig iron production declined in 1876, 1884 and 1896, and practically stood still in 1888 and 1900. All this indicates a decided disturbance of business in presidential years.

A very remarkable case of automatic whistling following brain injury occurred some time ago in Buffalo. The case was that of a Polish labourer employed in the East Buffalo stock yards. He was found one morning lying unconscious beside the railroad tracks, having evidently been struck by a passing train. He was considerably cut up, but the chief injury was a depressed fracture of the skull, situated three inches above and one inch behind the left ear. The skull was immediately trephined, the depressed bone removed, and he was put to bed, and seemed to be doing well, although he remained unconscious. About 10 o'clock that night he suddenly began to whistle calls he was accustomed to use in handling the cattle in the yards. He would continue whistling for about a minute, and then stop for five or ten minutes. He kept this up at regular intervals until he died four days later. The whistling was piched always in the same key, and sale, receiving \$400 a ton. At this price his regular intervals until he died four days later. The crop was worth \$84,000. He clears a profit of at least 100 per cent. Winter weather has not yet prevented continuous work. A crew of ten It was audible over the whole hospital yard, and men has been employed and two six-mule teams attracted the attention of every one about. It was impossible to arouse the man at any time after the accident, and he remained entirely unconscious to the end and whistled until a few

> Mr. Robert M. McLane, Mayor of Baltimore, shot himself in his residence there on the after-noon of May 30. Mayor McLane was 36 years of age, the youngest chief executive Baltimore ever had. He was the son of James T. McLane, president of the First National Bank, and nephew of Robert M. McLane, former Governor of Maryland and United States Minister to France during President Cleveland's first administration. Previous to his election as Mayor he had for four years filled the office of State's Attorney, in which he had distinguished himself by a zealous and intelligent discharge of his duties. During his brief administration of the mayoralty he had brought upon himself the antagonism of the Democrats by the appointment of inde-pendent numbers of the party. Recently there has been marked opposition to him among

matters relating to the rebuilding of Baltimore, matters retaining to the reputiting of batteriole, and this is ascribed by many as a contributory cause of suicide. Mayor McLane was married two weeks before to Mrs. Mary Van Di battimore, known and popular the is prostrated by the and magedy. The dead Mayor was very ropular among the people gangerally, irrespectively. popular among the people generally, irrespective of party, and the whole community has been pro-foundly shocked by his tragic end.

The Pacific Mail Steamship Co. has issued its annual report for the fiscal year ended April 30. In spite of the low rates prevailing during the year the company shows an increase in both gross and net earnings. Gross earnings amounted to earnings. net earnings. Gross earnings amounted to \$3,601,000, an increase of \$774,260. Operating expenses increased \$535,000. Net earnings amounted to \$561,719, an increase of \$238,616. Commenting on the year's results, President E. H. Harriman in his preliminary report, says: "The rates on all over-sea carryings have been unusually low during the entire year everywhere. The company had also to meet severe competition to the ports served by its steamers, and a further shrinkage in its revenue resulted in the regulations of the Government of the United States of America \$314,823 has, as customary, been charged to the year's expenses for general and extraordinary repairs of steamers. After charging this account with expenses payable therefrom, there remained \$1,027,855 to the credit of this fund at the close of the year. The insurance on the company's steamers was renewed and the premium charged against this year's operations (\$145.019) charged to the year's expenses. The increase in this expense results from a full year's charge for insurance on the steamships Korea and Siberia. The money borrowed to meet payments on the new steamers was reduced by \$501,245 during the year. With the exception of this indebtedthe year. With the exception of this indebted ness, amounting on April 30, 1904, to \$1,326,163, the company is free from floating debt, other than current expenses. The cash on hand in New York, San Francisco and London April 30, 1904, amounted to \$48,638." All of the retiring directors of the company were re-elected at the meeting of the stockholders. The income account of the company compares as follow:—

Gross earnings	Increase, \$774,260 535,644

LITERARY GOSSIP.

embarrassing pected destinations in a mor Mr. Garland who was to the owner author's difficulty, at once suggest-ed the following title for his next book:—" The Lost Trunk; or, Doing Mexico Without a Collar.'

Many will remember the picturesque Old London Street in the Health Exhibition at South Kensington, but few are aware that the designer of it was Mr. G. H. Birch, whose death is an-nounced in *The Times* at the age of 62. Mr. Birch, who took a deep interest in the antiquities of London and formed # fine collection of London Soane's Museum in Lincoln's Inn-fields for the past ten years. As long ago as 1875 he became president of the Architectural Association of London, and subsequently he acted as hon. secretary of the London and Middlesex Archælogical Society. He was Cantor Lecturer to the Society of Arts in 1883, and vice-president of St. Paul's Ecclesiological Society.

Mr. W. S. Gilbert, most legal of dramatists, has created another judge. But Mr. Justice Whortle, in "The Fairy's Dilemma,"—now playing at the Garrick Theatre, London,—is not likely to rival in fame the "highly susceptible Chanchellor" in "Iolanthe," or the "learned judge" in "Trial by Jury." Gilbertian judges Judge in "Trial by Jury." Gilbertian judges are more numerous than Gilbertian barristers. Almost the only member of the Bar in the Savoy operas Sir Bailey Barre, Q.C., M.P., who figures in "Utopia" as—

A great Arithmetician who can demonstrate with

That two and two are three, or five, or anything you please

An eminent Logician who can make it clear to

That black is white—when looked at from the proper point of view.

A marvellous Philologist who'll undertake to

That "Yes" is but another and a neater form of " No."

Solicitors are justly proud of the fact that Sir Henry Fowler was the first member of their branch of the legal profession to become a Cabi-net Minister. There is, however, a Gilbertian solicitor who gained the distinction before him. Sir Joseph Porter, who

Wore clean collars and a brand new suit For the pass examination at the Institute," was an attorney before he became "the Ruler of the Queen's Navee."

By the death of Professor F. York Powell, the Regius Professor of Modern History, Oxford University has lost a man of brilliant attainments and of remarkable influence. His sympathies were wide and far-reaching, and, apart from his historical labours, he concerned himself in many historical labours, he concerned himself in many movements. His knowledge of Scandinavian literature was unique, and with Russian affairs he had an intimate acquaintance. He was the close friend of such exiles as Stepniak and Volkhovsky. After taking his B.A., with a first-class in Law and Modern History, in 1872, Professor Powell was successively law lecturer, tutor, and student at Christ Church. He acted as deputy to Professor Freeman, when he filled the chair of to Professor Freeman, when he filled the chair of Modern History, and on the death of J. A. Froude he was appointed to the post.

Mr. Gladstone, it is well known, was much bothered by young, unknown authors, who sent him their published works for his judgment. So his private secretary was instructed to use this ingenious if rather Jesuitical formula of acknow-

wonderful contrasts of civilization. gives his impression of the spirit and attitude of the Japanese people in war time.

An example worthy of imitation has been set in connexion with the erection of a Strand front-age for the Savoy Hotel. There has been placed at one of the entrances a tablet which sets forth for the information of every intelligent passer-by that "In this Court in the Eighteenth Century that "In this Court in the Eighteenth Century stood the Fountain Tavern, where the Political Opponents of Sir Robert Walpole met, using the title of the Fountain Club; also the Coal Hole, the meeting-place of the Wolf Club, of which, about 1826, Edmund Kean was a leading member." As to the former, it may be added that it was at meeting of the Opposition at the Eugharian Tayern in 1826 that the resolution was that it was at meeting of the Opposition at the Fountain Tavern in 1742 that the resolution was taken which finally brought Walpole to the ground. But concerning the latter it is to be noted that a hostelry more favoured by Kean was the old O.P. and P.S. Tavern in Russell-court, Covent Garden, not far from the Plazza, where the O.P. Club of to-day, by a coincidence, has its home. It was at the O.P. and P.S. that, according to Pierce Egan, of "Tom and Jerry" fame, "young aspiring heroes, anxious to obtain an engagement, used to be prevailed upon to mount the table and to give recitations from 'Romeo' and 'Hamlet,' amidst the shouts of pretended applause from country actors, wags of pretended applause from country actors, wags of all sorts, and men of the world, who nightly resorted thither to pick up anecdotes and spend a pleasant hour." And these might have echoed the query put into the mouth of William Cobbett as "a Hampshire Farmer" in "Rejected Addresses": "Is not a man who cries O.P. a man of letters, too?"

Sir Francis Brady, Bart., the author of a special version of "Come Back to Erin," written or the recent departure of King Edward and Queen Alexandra their Majesties from Ireland, as a poet who will be eighty in a month or two. He was one of the founders of the Royal Irish Academy of Music, and, learned also in the law, he is the last of the Irish County Court Judges who is till privilegat to practice at the Bar. who is still privileged to practice at the Bar.

A lady correspondent of the New York Evening Post who lived in Honolulu in Stevenson's time reports that in polite society there his name might scarcely be mentioned aloud. He was ostracised on account of his Bohemianism, was ostracised on account of his Bohemianism, displayed chiefly in his fondness for walking about in the warm sands with bare feet. His offence was augmented by his wife's preference for the native dress, which is described as "a Mother Hubbard wrapper, quite decently long and voluminous." To make things worse still, there was grave reason to believe that Stevenson even smoked in bed. Accordingly the local elite omitted his name in sending out invitations to important functions, and he was reduced to consorting with natives and the officers of visiting warships. Surely only an essay by "R. L. S." could do justice to such a situation.

Miss May Hezlet, the well-known golf champion, has written a book entitled "Ladies' Golf" for Messrs. Hutchinson. A feature of it will be a for Messis, Hutchinson. A reature of it will be a series of jastantaneous photographs, representing well-known lady players at their best strokes, including Miss Rhona Adair, Miss Dod, the author, Miss Glover, Miss Whigham, and many crack American players. There will be also group photographs of the English and Irish teams of last

Mr. Hamlin Garland and his trunk, it seems, took different routes to Mexico the other day, the author arriving first and the trunk still dallying along the way and coquetting with entirely unex-

While they have mostly returned to their homes. While they do not find English books so popular in the States as they were a few years age; they think that matters may take a turn, and have been doing their best to secure the chief books of the autumn. Mr. Dodd, of Messrs Dodd, Mead, & Co., has arranged for the publication of new novels by Miss Cholmondeley and Miss Marie Corelli. Colonel Harvey, of Messrs. Harper & Brothers, will issue Mrs. Humphry Ward's next book, and the Harpers are to publish a future work by Maurice Hewlett. Mr. Dodd will also publish Mr. A Mr. A have mostly returned to their homes. Miss Beatrice Harraden's next novel.

CONSULAR REPORTS.

A telegram from the Japanese Consul at Lyons received at the Foreign Office says that embroiderers and other silk dealers are agreed in opposing the proposed tax on habutae and pure silk woven goods. They intend to present a statement to the authorities petitioning for the abandonment of the Bill. Another report under date of June 18th says that quotations for new cocoons in France range from francs 2.25 to francs 2.85 in accordance with quality. This

rate shows an upward tendency.

Mr. Uchida, Japanese Consul-General at
New York, sent a telegram on June 18th
that raw silk is very quiet as the harvest
of new cocoons has not yet been definitely
ascertained. The demand for habutae has fallen off.

Owing to favourable weather, the cotton crop is expected to be prolific. Conditions in the market are weak. Closing price on the 18th was cent. 11.70 and for August delivery, cent.

was cent. 11.70 and for August delivery, cent. 10.51. The stock was 345,916 bales.

Information dated June 18th from Bombay says that the cotton market has seen no change since the previous report and is very quiet. "Bengal fine" was quoted at 250 rupees. The estimate of stock was 493,487 bales. Since the commencement of the month the weather has been favourable.

NEWS OF THE WEEK.

Thirty-four cases of new raw silk was put on the Yokohama market on June 16th.

Price of new rawsilk from Kono, Iyo province, was on June 20th yen 1,010 per bale on the Yokohama market.

The U.S. transport Thomas arrived on June 20th at Nagasaki on her way home with 793 soldiers from Manila.

The price of the new cocoon at Yamagata is reported to be yen 35 per Koku (about 5 bushels). The rate is yen 5 lower than last year.

The Asahi says that a telegram has been received in Yokohama that the crop of cocoons in Italy is expected to be 35 per cent, better than

Dr. Morrison and Mr. James, correspondents of the London Times, paid a visit on June 20th to Count Katsura, the Premier, at his official

Mr. Hayashi, Japanese Minister at Seoul, who recently returned to Tokyo, was received by the Emperor in audience on June 21st and was entertained at noon in the Palace.

Advances to the Government by the Bank of Japan, recently calculated at seventy-four million en, were reduced at the end of the week ended June 18th to sixty-six million yen.

The London Times' correspondent ship Haimun left Kobe on June 19th for Wei-hai-wei. Major Wood, the Military Attaché of the U.S. Legation at Tokyo, arrived on June 20th at Nagasaki from

The final of the Mixed Doubles Handicap was played at the Bluff Gardens on Friday afternoon between Mrs. F. J. Abbott and Captain W. A. Harrison, and Miss A. Page and Mr. E. W. Maitland. Captain W. A. Harrison and Mrs. They will endeavour be almost enough to justify the Japanese in their

Miss McCaul and party left Ujina on the night of June 21st by train for Tokyo.

The British gun-boat Algorine arrived at Hakodate on June 22nd. She is expected to leave on

Mr. Akidzuki, who was recently appointed Minister to Sweden and Norway, was received in audience on June 23rd by the Emperor. He will shortly leave for his post.

Pollard's Lilliputian Comic Opera Company will leave Melbourne next month for a two years' tour of the Far East, at the conclusion of which they will visit San Francisco

Mr. S. Saito, former Vice-Minister of Agriculture and Commerce, returned on June 22nd from Manila. According to him, Japanese workmen seem to be in demand there.

The fund raised in Hongkong for the relief of the wounded in the present war between Russia and Japan has been closed, and the sum of \$30,488 remitted to the British Minister at Tokyo

Tokyo papers report that the Toyo Kisen Kaisha is negotiating with the White Star Steam-ship Company to purchase two Atlantic steamers from the latter. The Company intends to employ them on the Pacific run

The Messageries Maritimes will declare a dividend of f.10 per share for 1903. The report mentions that the company continues to augment its fleet, and has recently acquired four cargo boats of the East Asiatic Company,

Mr. T. Matsumoto, the president of the Sanyo Railway Co., has tendered his resignation. It may be remembered that he is also the president of the 130th Bank, Osaka, which recently suspend-

Mr. T. Komuchi, a Progressist, who is now in Seoul, proceeded to the Korean Palace on June 20th accompanied by Mr. Hagiwara, acting Japanese Minister there, and was received by the Emperor in audience.

The total amount of subscriptions for the second issue of the Treasury Loan—one hundred million yen—was yen 322,199,800. The Bank of Japan reported the amount subscribed to the Finance Department on June 21st.

The funeral service of the late Mr. Robert Meiklejohn took place at his residence, No. 19, Bluff, on Sunday morning, the Rev. E. S. Booth officiating. The pall-bearers were Messrs. H. J. Sharp, N. F. Smith, Capt. Olsen, E. Andreis, P. Helm, and Capt. Carst.

Miss McCaul, who had been to the front Inspecting field hospitals, arrived on June 17th at Takeshiki on her way to Tokyo. She was to leave there the following day for Matsuyama to pay a visit to the hospitals and the accommoda-tion provided for Russians.

A telegram from Seoul reports that the Korean Court is now making preparations to welcome the passengers of the Manshu Maru, which are expected to arrive shortly at Chemulpo. The Emperor will entertain them at his palace when they arrive at the capital from Chemulpo.

The directors of the Peninsular and Orienta Steam Navigation Company announce a dividend at the rate of 5 per cent. per annum on the Pre-ference Stock and an interim dividend at the rate of 7 per cent. per annum on the Deferred Stock of the company for the half-year ended 31st March.

to see the Russian Minister with a view to obtaining, if possible, permission to proceed to England Fiberia.—P. & T. Times, that the steamer A.

on June 17th with the steamer reports the entrance of Shimonoseki Strait and sunk, a believed to have been re-floated. He adds that almost all of the cargo of the Sado Maru has been transhipped to other vessels.

On the night of June 21st a crowd made a dis-turbance at the shop of Hondaya, curio dealers, Honkago-do, Nagasaki, breaking the windows and furniture. They were dispersed by gendarmes and police. The cause is attributed to a rumour that the proprietors were spies employed by Russia, many of their customers having been Russians. The Jiji's correspondent adds that the damage done was great but no person was injured.

A telegram from Hakodate says that the American sailing vessel James Johnson was ordered to stop on June 19th off Fukuyama and subsequently she was examined by Russian officers. As she had no cargo on board she was not detained. The ship arrived the following day at Hakodate.

The ceiling of the tunnel on the Kyushu railway, near Kanoki station fell in on June 20th while some employees were inspecting the place. It is near the spot were some obstruction had been laid in order to interrupt trains. The men were severely injured. The Asahi says that this is a suspicious accident.

The Glasgow steamer Kirkdale, which has been sold to Japan, was built by Messrs. Bartram, Haswell and Co., of Sunderland in 1894. Her tonnage is 2,873 gross and 1,853 net, and she is classed 100 A1 at Lloyds. Her length is 310 ft., breadth 41 ft., depth 18 ft., and she has triple expansion engines of 253 nominal horse

A London Yorkshireman having made enquiry A London Yorkshireman naving made enquiry whether he should wear a white or a red rose on St. George's Day, the Honorary Secretary of the Royal Society of St. George (Howard Ruff) wrote that the white Yorkist and the red Lancastrian rose should be worn on St. George's Day conjointly—the latter in preference to the former when worn singly—red training of courses and when worn singly-red, typical of courage, and the red cross of St. George being more distinctively English than white.

Nagasaki was entertained last week to some amateur theatricals, and we gather from the Naga-saki Press that the performance was highly sucsast Press that the performance was nignly successful. The first piece put on was a dialogue in one act, entitled "The Secret," translated from the French by Constance Beerbohm. The characters were personified by Miss S. E. Officer, as Lady Bessie Montague, and Miss W. E. Stone, as Gladys Frence (her niece). Both ladies sustained their parts well; there was never any health the press well. their parts well; there was never any hesitation shown and the dialogue was free from the appearance of mere repetition, the actions and delivery being most natural, and the audience showed their evident appreciation in no uncertain manner. The second piece was a cornedictia in one act, entitled "The Head of Romulus," founded on the French of Eugene Scribe by Sydney Grundy. The characterswere as follows:—Sir Barnes Barn-The characters were as follows:-The characterswere as follows:—Sir Barnes Barnstaple, Bart., Mr. S. Clark; Harold Barnstaple (his son), Mr. A. E. Baker; Joshua Turnbull (a rich chandler), Mr. J. H. Wallace; Mrs. Turnbull, Mrs. Inman; Dolly Turnbull, Mrs. Measor; and Jane (a housemaid), Mrs. Wallace. This was a very good performance, and evoked much laughter from beginning to end from beginning to end.

NOTES AND COMMENTS ON WAR NEWS.

The following note, signed "C. B.," from the Daily Graphic of May 3rd, is of special interest at the present time :-

The following note, signed: "C. B.," iron the July for the July Corphic of May 3 grid, is of special interest at the present time:—

Nothing more has been heard of the Russian Nothing more has been heard of the Russian crubers. Supposing this sort of thing lyladivostok squadron since the misstely stence of Vladivostok and the commerce destroyers have of the squadron since the misstely stence of Vladivostok and the commerce destroyers have of the squadron since the misstely stence of Vladivostok and the commerce destroyers have of the squadron before them, they far it has interfered with their plan of campaign. There have been some adverse criticisms of the Japanese for permitting three Russian crusters to escape from Vladivostok. It is a repetition of Sir George Tryon's feat from Banury Bay in the managements of Vladivostok. It is a repetition of Sir George Tryon's feat from Banury Bay in the managements of Vladivostok. It is a repetition of Sir George Tryon's feat from Banury Bay in the management of the purpose of watching the two great Russian ports, nor do they show the imaginative misght which would add up weather conditions, in which it is due to be conditioned and the state of the squadron before two entrances to Vladivostok. Sir Edmand Freman the conditions of a supreme fleet, or more signally control to the complete of the purpose of watching the two great Russian ports, nor do they show the imaginative misght which would add up weather conditions, in which it is due to be conceal his bases for coaling and overhauling engines and bases for coaling and overhauling engines and bases for coaling and overhauling engines in the first weather the purpose of watching the two great Russian ports, nor do they show the imaginative misght will be a wholesome balance of risk. There is no sample the conditions of the spanness for the purpose of the purpose of the purpose of the purpose of the purpose of the purpose of the purpose of the purpose of the purpose of the purpose of the purpose of the purpose of the purp

whole of his attention to Vladivostock.

But award the word of the life of the have been exposed to the attack of thirty-four battleships. Now, if Port Arthur is successfully blocked, there could be no hesitation in the mind of Togo. The Russian Baltic reinforcements would have to make for Vladivostok, and that would be the one certain place where he could meet them. The junction with four Russian cruisers would leave him quite cool, for the simple reason that they are not fit to lie in the line of battle against the six British-built battleships of his fleet. He would therefore tighten his hold on Vladivostok instead of imitating the tactics of 1805. The state of affairs has, however, to be specially provided for, inasmuch as for a brief period of a week or ten days the communications of the Japanese armies by sea will be threatened, and therefore reserve supply depoits should be established. The difficulty is not great in the case of the rice-eating Japanese so far as feeding is concerned. It is chiefly a matter of equipment and ammunition. If such foresight had not been displayed, it would become imperative for Togo to meet the Russian battleships immediately on their approach to the scene of conflict. There is no way he could do so with certainty other than by dogging them, with faster vessels which could not be driven off by the Russian fast cruisers, from Aden to the scene of conflict. There is no way he conflict.

The following appeared on May 5th:—
What strikes one person as of the greatest significance is often a trifling detail to another. There has been no more significant detail of the naval war to my mind than the sinking of the Japanese transport by the Vladivostok squadron. I have always contended that the dangers to British shipping in war are greatly exaggerated, and that the delays incidental to the operation of taking or sinking a single merchant vessel enable one to protect the others and preclude extensive captures or destruction. In this particular case, being away from the track of neutral vessels, the Russians had no doubt as to the identity of the transport when she sailed into their squadron at 10 p.m. From that moment they spent about five hours before they were finished with their exploit. Yet in British naval manoconvres the absurd farce has again and again been played of "capturing" vessels at intervals of a few minutes. For the sinking of the Japanese transport guns and torpedoes vessels at intervals of a few minutes. For the sinking of the Japanese transport guns and torpedoes were fired and about five hours were spent by three Russian cruisers. Supposing this sort of thing were to occur on the short nine hundred mile stretch from Gibraltar to Malta or Malta to Port Said, what chance would the commerce destroyers have of prolonging their existence in face of a strong British fleet? None. And yet we have responsible men constantly making appeals to us to abandon the Mediterranean route in war, and underwriters of Lloyd's saying they would refuse to insure for the Mediterranean route in war. It is probably the easiest route to defend on the whole surface of the sea.

water school " would ave learned caution by now. I have by me a copy

The following extract from a letter reveals in part who "C.B." is :-

part who "C.B." is:—

In a humble way I have served as a lecturer under Admiral May, and I feel the sense of personal loss both of a friend and one whose ideas were always instructive to those who came in contact with him. In another capacity much of his anonymous writing came under my hands, and the incisive and acute criticisms will long be deeply missed by many who may never know to whom they were indebted for these brilliant articles. Some time ago he was engaged upon a naval war code for the British Navy, similar to the one the present American Naval Attaché, Captain Stockton, drew up for the United States navy. Admiral May was a keen adherent to Walter Bagshot's theories in "Physics and Politics" of the advantages of discussion, and had he lived I feel sure that he would have persuaded the Admiralty to establish a companion magazine to the "Army Journal."—Yours faithfully, C. B.

ancestral acres, a patch of garden clinging to the edge of a cliff. The cliff overlooks Yokohama, the generous harbour, the great bay, and, when the fogs allow, the Pacific Ocean. Fire against the face of the

allow, the Pacific Ocean. Flet fagainst the face of the diff, like a sea-ladder on the side of a ship, rise the hundred and one seeps. After twenty days at sea their ascent made the climbing of Pike's Peak seem less of an effort than stepping into a cab.

It is a tradition of the house that O Kin San never forgets the face of a guest, his rank, or the name of his ship but as six years had passed since the Sailor Man had touched at Yokohama, he was afraid O Kin San might not live up to her reputation. But she did not forget him. When we stooped to enter the low veranda, we found her kneeling prostrate before the Commander clapping her hands softly and touching the floor with her forehead. Around her little nearns in dove-coloured kimono fluttered excitedly, rubbing their knees with their open palms, giggling a pair of chopsticks, I was conscious of the little nezans in dove-coloured kimono fluttered excited-ly, rubbing their knees with their open palms, giggling and gurgling and uttering soft, cooing cines of welcome. When they saw the American ladies, they in torn dropped upon their knees, and beat the mats with their hands. Had the Commander been a long-lost son and we those who had returned him from a watery grave, we could not have been received with more apparent confusion and delight. They made it seem that that house had been kept open only in the hope that he might revisit it. We tied soft slippers over our heathen boots, slid across the slippery matting, and squatted upon cushions in a little cigarbox of a room. Our coming was as though some one had, flung a handful of corn into a dovecote. From each corner of the tiny house the patter of feet echoed like room. Our coming was as though some one had flung a handful of corn into a dovecote. From each corner of the tiny house the patter of feet echoed like the scamper of mice behind wainscot, giggles sounded from kitchen to garden, and on every side the paper screens that formed the room slid apart in unexpected places, admitted a tottering, tripping nezan with a tray, and shut again into what looked like modified the solid wall. They brought us tea and sake, and tiny pipes in boxes of hot ashes, strange sweet cakes, and stranger salt fish, and they served us as though never before had such a service been rendered. It was a delicious, stupendous joke, in which we all were equally guilty. That we should light a pipe and puff at it was an act the humour and novelty of which threw them into an ecstasy of laughter, that we approved of the sake shook them with shivers of delight, that we drank the tea and asked for more set them violently rocking at our condescension. When they were not beseething us to eat and drink and clapping their hands, they were passing on their knees from one to the other of the American women, exclaiming in apparent awe and wonder over the unusual beauty of their boots. It was a pretty comedy extremely well played, and while it deceived no one, it hut no one. It reminded you of the acting at Paquin's, when the head woman, surrounded by a sympathetic chorus of vendeuses, tells Madame that the new gown is "chamant, ravissant." At such a sympathetic chorus of vendeuses, tells Madame that the new gown is "chamant, ravissant." At such a at Paquin's, when the head woman, surrounded by a sympathetic chorus of vendeuses, tells Madame that the new gown is "chamant, ravissant." At such a time the mere man feels sorry for them. He hopes that when closing bour comes they will fold away the smiles with the frocks, cease flattering and exclaiming and become as slovenly-looking and as cross and disagreeable as they please. And so it is with the nezans; you hope when your back is turned that O Kin San and the little waitresses get off their knees and yawn and stretch their tiny bodies, and say, "Well, thank goodness, they've gone!" and sit down to a real meal. For you can not believe that they eat seaweed and live fish, and use chopsticks, and drink tea from thimbles, and sit on the floor, for any other reason than that the tourist exsticks, and drink tea from thimbles, and sit on the floor, for any other reason than-that the tourist expects them to do so. You feel they are trying to live up to the idea of the Japanese tea house, which has acquired from "The Geisha Girl" and "Madame Chrysantheme." I had the same feeling that it wasn't quite genuine when, in Edinburgh, I first saw a man in kilts. I was sure he wore them to the cause they were comprisible but because it. not because they were comfortable but because it was expected of him.

was expected of him.

But no matter how much you may doubt its sincerity whenever you visit the tea house on the cliff you will receive the same fluttered, excited welcome. There will be the same chorus of "Please, please," the same delight when you approve, the same anxiety over your lack of appetite, and the same rare appreciation of your rare wit. Also, in time you will find that O Kin San will take the cue you give her. And if you prefer to sit overlooking the city "where the paper lanterns glow," and watch the lights along the Bund and the lamps of the ships at anchor on the berth, and talk of things Japanese, and not to joke and laugh, you will find O Kin San a simple, direct, and rarely intelligent hostess. She is a truly remarkable woman, a woman who speaks five languages, who can call off all the names in our navy register, relate the history of the Ronins, explain the complexities of the Shinto and Buddhist religions, or relate with true humour the story of the middy who relate with true humour the story of the middy who climbed the steps on horseback.

The one 1 received the nezans gave us one of hers. tried to recollect where "Miss O Yuchi San." I before and then I remembered mad the name

when the glee club would sally forth to serenade the townspeople, and we freshmen abandoned our books and followed in its wake. And, instead of the tea house of the Hundred and One Steps and O Yuchi San kneeling beside me, profering a pair of chopsticks. I was conscious of the sleeping American town, the students grouped under the close the colour of their bries wires the cheeks. the elms, the odour of their brier pipes, the beetles buzzing around the electric light globes in the street, and the black shadows across the professor's front

"When I was at college," I said, "I used to sing a song about a girl called O Yuchi San."

The Commander looked up in hurt surprise, and O Yuchi San bent low in embarrassment.

But you know that this is the girl!" he said, I protested that it could not be. I gallantly re-frained from explaining why.

frained from explaining why.

"Not at all," said the Commander. "F. M. Bostwick, who was a lieutenant then, wrote that song about O Yuchl San when she was five years old. I remember her very well. She was just a little doll of a thing. She was only big enough to carry around the pipe boxes, and after she had filled the pipes she'd crawl into the lap of the officers and sleep curled up there until we went back to the ship. But now she's a young lady, and there is a book about her with her picture in colours on the cover."

So I told O Yuchi San that over all the States young men were announcing to the world that they were in love only with her, and that in every college town the name and fame of O Yuchi San was intimate and familiar.

O Yuchi San covered her blushes with two small hands, and bowed her thanks to her admirers across

hands, and bowed her thanks to her admirers across

On other days we returned to the tea house, and one soon grew to understand why to the wandering naval officer and the globe-trotter it becomes a house of call, a club, and a home. There are many tea houses in Japan more rich, larger, set in elaborate, beautiful gardens, with golden geishas to dance and jugglers to confuse, but in none will you find a more friendly welcome or a kindlier hostess. To sit at the feet of O Kin San is to learn wisdom and courtesy, and to look out from her tea house is to bring yourself in touch with all the world. For, when the paper screens are pushed aside you see on one hand the gardens and trees of the Foreign Settlement; on the other, below you, the tile-roofed city, with its temples, parks of cherry trees, distant hills of pine, and fujiyama, the illusive, the mysterious, the beautiful, raising now white shoulders out of a robe of green; one soon grew to understand why to the wandering parks of cherry trees, distant nils of pine, and fujiyama, the illusive, the mysterious, the beautiful, raising now white shoulders out of a robe of green; while at your feet lies the roadstead of Yokohama Harbour choked with ships of war, with great liners, monster tramps, gondola-like sampans, and high-peaked square-sailed junks. The murmurs of a city float up to you mixed with all the noises of the sea; the impatient signals of the darting launches, the puffing donkey engines answering the boatswain's whistle with creak of winch, chains, and cordage; the songs of the coolies knee-deep in the lighters, the ship's bells ringing brokenly across the water, and the melancholy piping of the harbour gulls.

Against the curtain of blue you watch the steamers come and go, carrying your heart with them to Hongkong and Shanghai, Rangoon and Singapore, to Colombo and Bombay, to Sydney and Melbourne, around Cape Horn, through the islands of the South Pacific, or straight away to that Golden Gate that waits to welcome the wanderer Home.—bollier's Weekly.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

THE NEW YORK HORROR.

London, June 17

There were 1,600 people on board the General Slocum when she was burnt off Hellgate, New York, and of these 447 bodies have been recovered and 1,000 are reported as dead or missing. The fire Among the things they laid before us during our first hour in Japan were the cards of all the officers, of their sweethearts and wives, and of the tourists who had visited the tea house. They asked for our hundreds into a fiery furnace below, already

choked with burning women and children. Hundreds leaped into the sea and were drowned. The steamer burned down to the "ter's edge in half an hour.

11 2 2 1 OCUM" DISASTER.

An official investigation shows that approximately 1,000 persons perished on the General Slocum, when she was burned off Hellgate, New York.

RUSSIAN GOVERNOR OF FINLAND SHOT.

General Bobrikoff, Governor of Finland, was shot and dangerously wounded while entering the Senate at Helsingfors. His assailant, who is the son of Senator Schaumann, immediately committed suicide. Schaumann had been attending mass meetings in various parts of Finland to protest against Bobrikoft's oppressive dictatorship.

SLAUGHTER OF ARMENIANS.

It is reported at Constantinople that 3,000 Armenians have been killed and fifty villages destroyed since April 25.

HEAVY RUSSIAN LOSSES.

dispatch from General Stackelburg, dated the morning of the 16th inst., in des-cribing the battle at Wasengtien, says that a superior force of Japanese on the 15th inst. turned his right flank and compelled him to retreat northwards by three routes. The Russian losses were heavy. The Japanese fire wiped out two batteries, 13 out of 16 guns being destroyed and abandoned.

BOBRIKOFF DIES.

London, June 18. General Bobrikoff is dead.

A Frenchman named Thierry has won the Gordon-Bennett motor car race at Hamburg, Jenatzy, a German, being second, and the Englishman unplaced. Nobody was There was a huge assembly, the German Emperor and Empress and many royalties being present.

BRITISH CABINET DISSENSIONS.

It is understood that there are marked dissensions in the British Cabinet regarding the Army reforms.

STEAMER SOLD.

London, June 19. The Glasgow steamer Kirkdale has been sold to Japan.

ITALIAN MINISTER PROMOTED.

Count G. Gallina, Envoy Extraordinary and Minister Plenipotentiary for Italy at Peking has been appointed to St. Petersburg. He is replaced by M. Carol.

EFFECT OF BOBRIKOFF MURDER.

General Hertkoff, Governor of Warsaw, was seized with a paralytic stroke upon receiving news of the murder of General Bobrikoff in Finland.

General Bobrikoff's murder belonged to the pro-Swedish party in Finland, composed chiefly of the higher classes.

WRECK OF P. & O. "AUSTRALIA"

London, June 20.

Reuter's correspondent at Melbourne states that the P. & O. steamer Australia, inward bound, while entering the Heads, struck the rocks off Point Nepean, and is expected to become a total loss. The passengers and crew were safely landed.

[The Australia was built in 1884 and is classed 100 A 1 at Lloyds. Her tonnage is 3,662 gross, and her length is 361 ft., breadth 44 ft., and depth 21 ft. She has triple expansion engines of 355 nominal horse power; and a speed of 17 knots.]

SERIOUS RIOTS IN FINLAND.

rom St. Petersburg, reporting that serious determined for the delegates assembled, disturbances are taking place at Helsing. The rioters have sacked the serious and the Governor control office there and have laked 18 officials.

The Tear the Tear

BRITISH DESTROYER LOST.

Whilst the British Squadron was manœuvring during the night between Sardinia and Corsica, the destroyer Bat was sunk by collision. It is stated that the crew were saved.

CHINESE AT DURBAN.

The steamer Tweeddale, from Hongkong, has arrived at Durban, Natal, with Chinese coolies, who are in good spirits. There were three deaths from beri-beri during the voyage, but otherwise the Chinese are well.

THE VLADIVOSTOCK RAIDERS.

Reuter's St. Petersburg correspondent that the fighting continued over money, telegraphs that Admiral Bezobrasoff was in and that Liaoyang was taken on the afternoon of the 21st June (Tuesday). London, June 21. of their raid in Tsushima Straits. Admiral

Skrydloff remained at Vladivostock. THE BRITISH NAVAL COLLISION.

The British destroyer Bat collided with the destroyer Stag off Sardinia. Both have arrived at Malta damaged.

THE "AUSTRALIA" DISASTER.

The P. & O. steamer Anstralia was in charge of a pilot when she struck. She was going full speed and the shock of the impact was fremendous. The inrush of water immediately put out the fires. There was no panic.

NEW SENIOR NAVAL LORD.

Admiral Sir John Fisher has been appointed Senior Naval Lord of the British

THE CHINESE COOLIES AT DURBAN.

London, June 22. There were forty cases of beri-beri among the Chinese coolies on the Tweeddale, which after an enjoyable voyage.

SIEVIER ARRESTED.

has arrived at Durban from Hongkong.

Mr. Robert Sievier—[owner of the famous race-horse Sceptre, and whose unsuccessful action against Sir James Duke for libel recently occupied such a large space in the public press]—has been arrested on a charge of perjury in connection with his bankruptcy in 1902.

THE TIBET MISSION.

The British expeditionary mission proceeds to Lhassa on the 27th of June.

EAST AFRICA.

Commissioner and Commander-in-chief of the British East Africa Protectorate.

[Note,—Sir Donald Stewart replaces Sir C. N. E. Eliot, K.C.M.G., C.B., who held the post as H. M. Commissioner and Consul-General. Sir Donald commissioner and Consul-General. Sir Donald has been British Resident at Kumasi since 1902. He has seen much African service as a fighting man in the Gordon Highlanders, in the Trausval, in the Soudan, and also in Afghanistan. He was political officer to the Ashanti expedition of 1896. He has a wealth of medals and clasps.]

TEA DITTY

TEA DUTY.

The House of Commons has rejected by a vote of 217 to 165 a motion to reduce the tea-duty to sixpence per pound.

THE REPUBLICAN NOMINATIONS.

at Chicago on the 21st June. The nomina- was obliged to call up his reserves. On the Petersburg intelligence a great battle was tion of President Roosevelt for President morning of the 15th the Japanese were fought on the 20th inst. at Haiching and that

being absolutely assured and

The Tsar, the Tsarevitch and all the Grand Dukes attended General Bobrikoff's funeral.

THE ARMY OF THE LIAOTUNG

General Stackelburg reports that the Japanese have not advanced beyond Wafengkau, their lines extending along a front between Wasengkau and Fuchau.

ALLEGED CAPTURE OF LIAO-VANG.

Later.

Reuter's Newchwang correspondent reports that the Japanese cavalry attacked Liaoyang late on Saturday. A missionary received information from native sources

THE TEA TAX.

An amendment moved in the House of Commons by Mr. E. J. Soares, Liberal member for Barnstaple, providing that the eightpenny tax on tea remain in force till the 1st of July instead of 1st of August, 1905, was agreed to. A proposal to make the tea-duty ad valorem was rejected by a vote of 194 to 128.

THE "MANSHU MARU."

(FROM OUR CORRESPONDENT.)

Mitsuhama, June 17 We arrive here to-day and leave on the evening of the 18th for Moji.

Saseho, June 19, 9 p.m. After leaving Moji, we sighted the Sado Maru opposite Mutsurejima. She appeared to be sinking.

Chemulpho, June 22. The Manshu Maru left Saseho yesterday at noon and arrived here to-day at 5.30 p.m.

SERIOUS DISTURBANCES IN FINLAND.

[Received at the Foreign Office.]

cials on the 16th inst. shot and severely wounded the Russian Governor-General and then committed suicide.

freedom of speech and public meeting. Meetings have been held in the principal EAST AFRICA.

Sir Donald Stewart has been appointed of the Russian Minister of the Interior and the Governor-General of The paper further stated that in view of the present state of affairs and Russia's troubles elsewhere, the Czar will be

THE FIGHT AT WAFANTIEN. [Received at the Foreign Office.]

It is telegraphed from St. Petersburg that in the fight on the 14th inst. the Russians lost 23 officers and 311 rank and file. later telegram from General Kuropatkin to the Czar with reference to the fight at Wafantien says that the battle began at dawn on the 14th inst. At half-past six General Stackelberg was attacked by the London, June 23. Japanese right wing. At 10 o'clock the The Republican National Convention met Japanese cavalry charged and Stackelberg

largely re-inforced. [Here occurs a remarkable hiatus, for the report goes on to say, "on the Russian side Col. Gerngrass and a General were wounded," and then repeats the total casualties on the 14th inst.] Another St. Petersburg telegram, however, says that Stackelberg found himself cut off from his base and had to retreat hastily. The Russians say that the Japanese had 35,000 men in position, including 6,000

[Received at the Foreign Office.] JAPANESE MATCHES IN THE PHILIPPINES.

The Philippine Administration being about to impose a tax of 200 per cent on Japanese matches imported into the Philippines, the Japanese Consul at Manila is trying to prevent the passing of this measure.

ADMIRAL SKRYDLOFF'S REPORT. [Received at the Foreign Office.]

According to a Reuter's telegram, Admiral Skrydloff's report says that the Vladivostock cruisers met the *Idaumi Maru* on the 15th inst. within sight of the shore of Japan. She had soldiers on board and when sighted was steaming from the south. A certain time was allowed her to place her crew in boats. Part of the soldiers on board took advantage of this to escape. At the end of the time she

was sunk by the Russian cruisers.

Thereafter the Squadron met the Sado Maru and the Hitachi Maru; one having soldiers on board, the other labourers, horses, and railway material. They refused to surrender, were allowed a certain time, after which they were sunk by torpedoes and guns. These three steamers aggregated 15,000 tons and the soldiers were about guns. On the 16th inst. the Squadron .000.1 met the British steamer Aratoon, laden with coal, from Muroran. Her papers and logbook not being satisfactory she was sent to Vladivostock, where she will go before the Prize Court.

TWO RUSSIAN DESTROYERS BLOWN UP.

Admiral Togo reports that at 8 a.m. on 21st inst., the 5th Destroyer Squadron when engaged on blockading duty at Port Arthur, stopped a Chinese junk which had just left In the Senate of Finland, one of the offi-ils on the 16th inst. shot and severely board. On being questioned these men bounded the Russian Governor-General and said that three or four days previously two Russian torpedo-destroyers, when engaged in some work four miles outside the harbour, The Kolnische Zietung, previous to this in some work four miles outside the harbour, incident, had stated that there was much struck some Japanese mines and sank: 140 agitation in Finland, the people demanding men were lost. The Chinamen further stated that a steamer named the Shintading had met with a similar fate some days previously when engaged in the same work

The Jiji Shimpo prints a message from Chefoo which confirms the above.

The Asahi, late last evening, published as an extra a telegram received from Kure which said that the Fourth Destroyer Squadron on the 10th inst., bombarded the Russian forts at Yinchintzu and Shaumtaikou from Kinchow Bay during two hours from 10 to noon. Previous to this, when cruising in the Bay, they found a Russian destroyer on the rocks. They pulled it off and towed it to the Naval base,

[Note.—It seems very improbable that this information can be true, in the absence of any official news concerning it.—ED. /.Af.]

RUMOURS OF ANOTHER BIG RUSSIAN DEFEAT.

The Jiji Shimpo has a telegram from London which says that according to St.

5.000 Russians were killed and wounded. The Russians had to retreat.

June 25, 1904.]

[Note.—This also, in the absence of official information, is.incredible.—Ed. J. M.]

ANOTHER JAPANESE ADVANCE. [Received at the Head-quarters Staff on the after-noon of the 22nd.]

On the afternoon of the 21st inst., the Liaotung Army occupied Hiunyoching.

[Note.—This place is 30 miles north of Tel·lisz, where the big battle was fought on the 15th June. We may mention here that according to information received in Tokyo, the Russians now admit that their losses in the battle on the 15th aggregated 15,000.—ED. J. M.]

(FROM THE " N.-C. DAILY NEWS.") FRANCO-SIAMESE TREATY.

London, June 16.
The period for the ratification of the Franco-Siamese Treaty has been extended to the 2nd of July. THE RESULT OF THE ASCOT GOLD CUP.

London, June 17.
The following is the result of the race for the Ascot Gold op, run on the 36th inst.:—

Sceptre	3

THE MARCH TO LHASSA.

The Spectator takes anything but a hopeful view of the British Tibetan expedition. In an article on May 14 we find it writing as follows:-

Difficulties seem to be thickening round the Tibe tan Expedition. Colonel Younghusband is in the position of a climber in the Andes or the Himalayas who as he masters one great acclivity, finds another still higher, of which he had scarcely suspected the existence, rearing itself before him. It is now an-nounced that the Expedition must go on to Lhassa. The British and the Indian Governments had hoped that the ruling powers in the "inysterious city," when once aware that their giant neighbour was in earnest, and that they could not resist the advance of the Enand that they bound not resist the availate of the En-voy, would eagerly ask for terms, would sign any treaty put before them which did not contain clauses interfering with their position in Tibet, and even if they broke it the week after, would retain a salutary conviction that "India" was too strong for them. interfering with their position in Tibet, and even if they broke it the week after, would retain a salutary conviction that "India" was too strong for them, and that they must in future evade rather than defy her commands. Power, however, in the Tibetan capital has passed into unexpectedly strong hands. It was known that the Lamas, actuated by motives impenetrable by Western minds, had recently abandoned their custom of poisoning the Incarnation of Buddha before he had quite cased to be a child, and that the present Dulai Lama was a grown man nearly thirty years old. It now appears that aided, perhaps, by some festering discontents within the great lamaseries or monasteries themselves, his Holiness has taken the reins in his own hands, has removed his four principal Ministers, and—probably under the advice of Dorjieff, the Buriat Lama whom St. Petersburg employs as its agent—has determined to resist the advance of the expedition, which he probably underates because it includes so few white men. His means seem to Englishmen ludicrously disproportionate to his object; but Lhassa knows nothing of the sea, little of the force at the disposal of the great transmerine Powers, and still less of the service agreed the production of the great transmerine Powers, and still less knows nothing of the sea, little of the force at the disposal of the great transmarine Powers, and still less of the terrible armour with which modern science has supplied them. So the Grand Lama picks from among the peasantry who reverence him very tall men, the "giants" of the bulletin-makers, who, his advisers doubtless think, will produce a great impression on their inferiors in size, arms them with the best weapons be has—big swords, big shields, a proportion of rifles, and a few jingalls, or big bell-mouthed muskets—and orders them to bar the road. His officers execute his plans as well as they can, building thick stone walls and loop-holed pounds, and fighting in defence of them will a sulten Mongolian courage which it is pitful to read of, it is so useless. They could, we imagine, stop the invaders if the lactuer were armed like the Tibetans—at least, the account of the skirmish in which Captain Bethune fell read very like it—but the moment the Western Artillery gets into play their chance is over. Even Mahommedan ghazis cannot stand up to a shower of shells; and the Tibetans, though they die well and are evidently brave men, have not the rushing courage of the ghazi when he is seeking death. The attack of the 5th inst. on the Mission at Gyangtse, which was dexterously planned, was defeated in this way; and the small advance guard

which carried the "wall with wings" which they found across their path at Karo owed their victory to found across their path at Karo owed their victory to the European guns as much as to their own daving. Still, though he never succeeds, there is no sign that the Grand Lama, who, we must remember, has been reverenced as a god all his life, feels himself defeated, or intends to send Envoys of rank, or to permit the Chinese Amban, whom he probably regards as a dignified spy, to act as his intermediary. The Mission is still far off, he is possibly assured that it will never have the audacity to threaten Lhassa, and he may have resources still unused in which he has hope. There must be many riding tribes who acknowledge, if not his direct authority, at least his sancity, and who may be persuaded or bribed to come to his relief. At all events, he sits, like any other Buddha, motionless. other Buddha, motionless.

other Buddha, motionless. It is, therefore, necessary to advance to Lhassa. It is a most annoying necessity, for reasons we shall explain, but there is hardly an alternative open to us. The Mission cannot stay at Gyangtse for ever, though the surrounding peasantry, who are receiving undreamed-of prices for their supplies, cordially wish it would: of prices for their supplies, cordially wish it would; and to retreat with nothing accomplished would make the Indian Government ridiculous, not only in St. Petersburg, which might not matter just now, but in Nepal, whence we recruit our peerless Ghoorkas, in Bhutan, which controls the easiest passes into Tibet, and throughout the tribes who, in their obscure way, hold the Eastern Himalayas. No such policy will be well received in this country; and in India retreat, even when it is obviously the path of wisdom, is always regarded as a galling humiliation. We are not bere, Anglo-Indians think, to suffer humiliation at the hands of the peoples which misuse the broad glacis around the Empire. We are too dependent upon prestige, both Governments will say, and say with undeniable justice, though the saying does not cover the whole situation. We entertain little doubt, therefore, that the expedition will be reinforced, and that it will march on Lhassa, where, after several engageit will march on Lhassa, where, after several engage-ments like that of Karo, it will arrive in safety, having performed a splendid feat of arms, and conquered, or rather defied, an Empire in the clouds.

or rather dehed, an Empire in the clouds.
And then the difficulties may be thicker than ever.
The Grand Lama may, of course, be greatly impressed by our visit, may sign the treaty submitted to him, and may give us a gracious permission to depart, with assurance of abundant provision all along the road home. Judging, however, by the obstinacy he has throughout displayed, and remembering the difficulty a theocrary, always experiences along the road home. Judging, however, by the obstinacy he has throughout displayed, and remembering the difficulty a theocracy always experiences in acknowledging total defeat, it is much more probable that his Holiness will retreat to some distant monastery, leaving Colonel Younghusband to waste his great ability in conciliation upon officers who will discuss matters with him for any number of months, and then declare that without the Grand Lama's signature they have no authority to arrange anything. What, then, is Colonel Younghusband to do? He cannot go hunting the Grand Lama through the clouds as we hunted the Mullah through the deserts of Somaliland. That would be too purposeless a waste of life and trensure. He cannot hold Linasa for years as "a material guarantee," for it would immediately cease to be the capital; and though General Macdonald would, we doubt not, hold it safely enough, still we do not want to be responsible for a post in the clouds, with no easy connecting link between it and India. If we do not make good roads, the outpost at Linassa will be a perpetual anxiety; and if we do make them, they may be used by enemies, or, worse still by the swarms of projectors who the we do make them, they may be used by enemies worse still, by the swarms of projectors who moment they hear that "Tibet is open" wil moment they hear that "Tibet is open" will be rushing to ascertain and exploit its reported minerall treasures. If instead of a garrison we leave only an Envoy, he will, if the Grand Lama has fied, be accredited to no accessible person, and will almost certainly be murdered some morning by irritated Lamas, to punish whom we must send a second and more costly expedition. It is a most annoying business; but we can see no way out of it except to go forward to Lhassa, and there decide, when we have seen, or missed seeing, the Dalai Lama, what next is to be done. Perhaps the English good fortune will attend us even there, and we may discover personages whose influence is sufficient to counter-balance that of the Grand Lama, and even to coupel him to be reasonable. Perhaps,

Thin and Falling Hair and Red Rough Hands Prevented by

ILLIONS use Cuticua Soap, assisted by Cuticura Ontement, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative, antiseptic, cleansing purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. Cuticura Soap combines delicate emollient properties derived from Cuticura Ointement, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower cdours. No other medicated soap is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus ill combines in One Soap at One Price, the best skin and complexion soap, and the best toilet and baby soap in the world. ILLIONS use CUTICURA SOAP, assisted by CUTICURA OINTMENT,

COMPLETE EXTERNAL AND INTERNAL TREATMENT FOR EVERY HUMOUR,

Consisting of CUTICURA SOAP, to cleance the skin of crusts and scales, thickened cuticle; CUTICURA ONTMENT, to instantly allay itching, in irritation, and soothe and heal; and CUTICURA RESOLVENT PILLS, to cool blood.
